From JAMES ABERNETHY & Co., Fury Hill Foundry Aberdeen.

"We have now had Gutta Percha Bands working here *for three years.* One of them has been driving the fan blast for our smith's shop for all that time, and for anything we see, may drive it as long again. The speed of the fan is but 1,200 per minute. We have used them with complete satisfaction, driving circular saws, and in some cases where leather bands would have been quite inapplicable from damp. We have uniformly endeavoured to have the drums and pulleys so proportioned to the strain, as that there is no chance of the band slipping; and with this precaution, and taking care in using *cross bands that they do not rub,* we are quite satisfied that they are superior in every respect to leather—stronger at the same weight, and keeping quite straight in working—requiring no lacings, and very seldom any repairs."

WATER POISONED BY LEADEN PIPES.

The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dick, of Bonchurch, Isle of Wight.

POISONED WATER PREVENTABLE

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha Tubing. Nothing can be better. I have also recommended it to others, who have adopted the expedient."

A variety of Gutta Percha Articles, such as Mill Bands, Tubing, Sheet, Bosses, Pump Buckets, Union Joints, Bottles, Bowls, Flasks, Curtain and Cornice Rings, Solid Frames, Galvanic Batteries, &c., &c.

SOCIETY OF ARTS.—The Eleventh Annual Exhibition of Inventions will open on the 25th day of April, 1859. The days fixed for receiving articles intended for exhibition are Thursday the 7th, Friday the 8th, and Saturday the 9th April. No charge is made for space, and the Exhibition is Free.

Intending exhibitors should communicate at once with the Secretary. By order,

P. LE NEVE FOSTER,
Secretary.

Society House, John-street, Adelphi, 1st March, 1859. (171)

ENORMOUS REDUCTION IN THE COST OF STEAM POWER.

TO RAILWAY COMPANIES, STEAM SHIP PROPRIETORS, AND MANUFACTURERS.—A saving of Fuel equal to one-third of the entire consumption is effected by the introduction of "DUNCAN'S PATENT SPIRAL HEAT DIFFUSERS," which arrest the heat in its passage through the flues or tubes, and convert into impelling power the large measure that without these appliances would (even in the very best boilers) escape along with the smoke. They can be fitted in an hour or two at a small cost, and without any alteration in the existing arrangements of boilers now in use. These results are prepared to be guaranteed, and a part of the value of fuel saved by the use of the Apparatus will be accepted for royalty.

Hitherto, steam navigation to distant parts of the world has proved a commercial failure. The remedy is provided, and the vast numbers of large and splendid vessels can soon be made valuable paying property.

Further information may be had on application to GWYNNE and CO., Engineers, Essex-street Wharves, Strand, W.C., London. (167)

STEAM ENGINES FOR SALE.

PORTABLE STEAM ENGINES, from 6 to 12 horse power,
STATIONARY STEAM ENGINES, from 4 to 50 horse power,
TUBULAR BOILERS, from 4 to 50 horse power,
CORNISH BOILERS, from 4 to 50 horse power,

Are in hand, and can be despatched on eight days' notice. Prices moderate. Workmanship and Material of the best description.

Apply to R. THORNTON & Co., St. Leonard's Iron Works, Edinburgh. (90)

HART & SON, MALLEABLE IRON-FOUNDERS, 4 Vine-street, York-road, Lambeth. Orders for Malleable Iron Castings executed within a week. (77)

TO BRASS FOUNDERS.

TO BE SOLD, the Patent-right of a New and Highly-approved EQUILIBRIUM WATER COCK or VALVE, suitable for Steam Boiler Feed Pipes, or any cases where the valve is required to be opened against pressure.

Address H., MECHANICS' MAGAZINE Office, 166 Fleet-st., where a Drawing may be seen. (151)

STEAM ENGINES.

FOR SALE, a superior HIGH PRESSURE HORIZONTAL STEAM ENGINE of 6-horse power, 8-inch cylinder, and 1-foot 6-inch stroke. One of 8-horse power, 10-inch cylinder, and 1-foot 6-inch stroke. One of 10-horse power, 12-inch cylinder, and 2-feet stroke. Two of 14-horse power, 14-inch cylinders, and 2-feet stroke; and one of 30-horse power, 20-inch cylinder, and 3-feet stroke.

Apply to Messrs. PAGE and CAMERON, 64 Old Broad Street, E. C., London. (124)

ENGINEERING AND MECHANICAL DRAWING CLASSES.—Instruction given in Engineering and Mechanical Drawing, comprising the preparation of plans, elevations, and sections of marine and locomotive engines, with the detail and working drawings; also the method of delineating screws, bevel wheels, &c.; orthographical projection, and tinting, shading, and colouring taught.—For prospectuses of the Day and Evening Classes apply to Mr. T. J. HILL, at the offices, 15, Old-street, City-road. (73)

TO MARINE ENGINEERS, OR SHIP-BUILDERS.

THE PROPRIETOR of a VALUABLE PATENT for Double-expansive Marine Engines (by which great economy of space and fuel is obtained) is desirous of entering into arrangements with a respectable firm for the construction of the same. An adequate portion of the patent-right would be assigned by the advertiser to any firm taking the matter up; and he would render all assistance in his power, either in London or elsewhere, amongst ship-owners (to many of whom he is well known), in obtaining contracts, &c. Unexceptionable references given. Address C. E., MECHANICS' MAGAZINE Office, 166, Fleet-street. (76

ENGINEERING BUSINESS FOR SALE.

OWING to the continued ill health of the Proprietor, the first-class business of an Engineer and Crane and Block Maker is offered for sale. It has been established in the Metropolis for nearly 30 years, and has enjoyed extensive patronage amongst Brewers, Manufacturers, Warehousemen, and others, in and about London; the business done amounting to nearly £8,000 per annum. About £3,200 would be required, (part of which, however, may remain for any reasonable time on good security,) which is the bare value of the tools, patterns, and stock in trade. The premises, including good dwelling-house, very conveniently situated, and capable of accommodating from 60 to 70 hands, are held upon a long lease, at an extraordinary low rental, not exceeding £100 per annum, taxes included. Many of the tools are nearly new, and of the best construction. The present proprietor, who relinquishes the business solely on account of ill health, would give every assistance in his power to those succeeding him; and as his foreman, who has been with him for nearly ten years, is thoroughly acquainted with the practical parts of the business, any gentleman desirous of commencing as a manufacturing engineer would find the present a very favourable opportunity. As all accounts have been, for many years past, collected quarterly, a very small amount, say £800, would suffice as working capital. Full particulars may be obtained by application to E. E. ALLEN, Esq., MECHANICS' MAGAZINE Office, 166 Fleet Street, E.C. (130)

INDIA-RUBBER VALVES FOR STEAM ENGINES, PUMP PACKING, &c.—Explanatory Drawings and Information as to the best modes of fitting and arranging the above, and all other Mechanical Applications of VULCANISED INDIA-RUBBER, are furnished post-free by

CHARLES MACINTOSH & Co., Patentees,
Cambridge-st., Manchester, and 3 Cannon-st. West, London.
MANUFACTORY and DEPÔT, Cambridge-st., Manchester.
GENERAL WAREHOUSE, 3 Cannon-street West, London, E.C.—C. M. and Co.'s only Establishments. (180)

A PRACTICAL ENGINEER who has a general knowledge of the Construction, Arrangement, and Erection of all kinds of Machinery, desires an Engagement to conduct the Engineering Department in some large Establishment where Machinery is used. For references, &c., address B., Post-office, Canterbury-place, Lambeth-road. (184)

TO COMMERCIAL TRAVELLERS.

WANTED, a Gentleman well-acquainted with Ironmongers, Upholsterers, Coopers, &c., to Travel on Commission.

Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (164)

AN ENGAGEMENT IS OPEN for a Mechanical Draughtsman and General Assistant. One who speaks and writes French is indispensable, and of active business habits, with practical knowledge of Engineering and Machinery preferred.

Apply by letter *only*, stating Age, Salary, and References, to H. CLAYTON, Atlas Works, Upper Park-place, Dorset-square, London. (176)

TO ENGINEERS, INVENTORS, AND OTHERS.

A PRACTICAL ENGINEER of long standing prepares Original Drawings, Copies, and Tracings. Advice and Assistance given to Inventors in working out their Plans. Pupils taught privately. Terms moderate.

Apply to J. J., 171 Strand. (138)

ENGINEERS' MACHINE TOOLS FOR SALE.

A STRONG & POWERFUL PLANING MACHINE, to plane 6 feet × 30 ins. × 30 ins., self-acting in all its cuts.

A SELF-ACTING TURNING, CROSS-SURFACING, AND SCREW-CUTTING DOUBLE-GEARED GAP LATHE, headstocks, 8 ins. to centres; bed, 10 feet long, with top driving gear.

A SINGLE-POWER DRILLING MANCHINE, complete.

A DOUBLE-GEARED SELF-ACTING BORING AND DRILLING MACHINE, complete.

A SELF-ACTING NUT SHAPING MACHINE.

A BOLT AND NUT SCREWING MACHINE.

A STRONG & POWERFUL STEAM-ARM SHAPING MACHINE, complete.

A NUMBER OF PLATE-IRON PUNCHING AND SHEARING MACHINES, to punch and cut iron from ¼ in. to 1 in. thick; portable to work by hand, and stationary to work by steam power.

A SET OF PLATE-IRON BENDING ROLLERS, to work by hand or steam-power.

Ready for delivery. Inspection invited. Particulars and prices furnished.

J. TODD and Co., Kent Iron Works, Bridge-street, Greenwich. (185)

TO ENGINEERS, ARCHITECTS, PATENT AGENTS, &c.

PHOTOGRAPHS OF THE HIGHEST CLASS and of any size, taken and reproduced at a most moderate rate of charge. Reproductions of faultless accuracy, of Machinery, Models, Drawings, &c. Orders attended to in town and country. Estimates forwarded.

SPENCER, READ, & Co., 4 Agar-street, Strand. W.C. (90)

A VALUABLE PATENT to be DISPOSED OF.—The Patentee will either dispose of the Patent or grant Licences to any party wishing to manufacture, or would join a person with capital to carry out the Patent.

Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (163)

BRICKS.

TO BE LET, with immediate possession, in consequence of the death of the proprietor, J. M. Paine, the DIPPENHALL SILICA FACTORY, erected for the purpose of making improved Fire Bricks, Building Bricks, Paving Tiles, &c., &c., from the Soluble Silica Rock.

Apply to view the Buildings and Bricks to G. H. Ogston Esq., Resident Manager, Dippenhall, Farnham, Surrey, and for terms, to Messrs. Nicholls and Potter, Solicitors, Farnham. (125)

GLADSTONE & Co., CONTRACTORS and ENGINEERS.

2 John-Street, Minories, London, E.C.,

Are prepared to ESTIMATE FOR and CONSTRUCT BRIDGES, PIERS, JETTIES, &c., in Iron, Wood, or Stone. Also to supply Cranes, Girders, Turntables, and Railway Work and Plant generally. (87)

PIERCE'S

UNRIVALLED

PYRO-PNEUMATIC FIRE-LUMP WARMING AND VENTILATING STOVE GRATES,

WITH the cheerful, open fire, producing healthful warmth, with continuous Self-acting Ventilation, for Churches, Schools, Public Buildings, Banking Houses, &c. These Grates are manufactured solely by PIERCE, the Inventor, for which he received the Prize Medals of London in 1851, and of Paris in 1855.

PRICE, from £7 10s.

ILLUSTRATED CATALOGUE, with Prices and Estimates for Work, furnished on application to the Inventor and Sole Manufacturer.

Also his

IMPROVED COTTAGER'S GRATE,

For Warming Two Rooms with only One Fire. Prices, 30s. and 35s.

PIERCE, No. 5 JERMYN STREET, REGENT STREET.

(111)

TO STEAM SHIP OWNERS, ENGINEERS, AND OTHERS.

How's Patent Steam Engine Counters, can be read at sight.

These Counters register the number of revolutions made by an engine or other mechanism. They may be used for ascertaining the duty of Pumping Engines and Water-wheels; the revolutions on board a steam-vessel; to calculate the slip of the propeller; and in a locomotive to test the slip of the wheels.

How's Patent Salinometer, for Steam Boilers using Salt Water.

By these, the density of the water in the Boiler is at all times accurately shown, and a saving of boiler and fuel is effected. They are adopted by the Admiralty, the Honorable Trinity Corporation, and others. Copies of Testimonials from Messrs. Penn, Messrs. Maudslay, and others, will be forwarded on application.

How's Engine-Room Telegraph, for communicating between Captain and Engineer. Society of Arts Prize Medal, 1855.

is a Mechanical Telegraph, and by its peculiar construction, error or misunderstanding is rendered impossible. It is now extensively adopted, and gives great satisfaction.

How's Patent Fresh Water Apparatus for Ships' Use.

This apparatus is designed for the distillation of Fresh from Salt Water; and on long voyages, and where the supply of water is scanty, it will be found invaluable. Testimonials may be seen.

Patent Steam Pump and Fire-Engine for Ships' Use.

This Steam-pump occupies but a small space; works perfectly noiselessly, and throws an immense volume of water. An Illustrated Circular of Fresh Water Apparatus and Steam-pump combined, free on application.

How's Patent Machine for Cutting Bolts, Rods, Spindles, Wire, &c.

Simple in construction, inexpensive, occupies but little space, and will not easily get out of order.

A Pamphlet Illustrative of the above, sent free by post, on application to

A. P. HOW, ENGINEER,

81 MARK LANE, LONDON.

EVERY DESCRIPTION OF ENGINEERS' TOOLS, ENGINE ROOM STORES, &c., &c., SUPPLIED.

(89)

ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street, Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 130 feet in length, to work by Hand or Steam Power.

Hot-water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (44)

AT SUFFELL'S, 132 Long-acre, London, W.C., every Instrument suitable for Engineers, Contractors, Surveyors, Architects, Draftsmen, &c., to be had second hand at very reduced prices, by the most esteemed makers, consisting of Theodolites, Levels, Circumferenters, Sextants, Compasses, Protractors, Station Pointers, Adygraphs, Pentagraphs, Telescopes, Microscopes, Cases of Drawing Instruments, &c.; Rules, Scales, Chains, Levelling Staves, and Measures of all nations. Every Instrument warranted. (160)

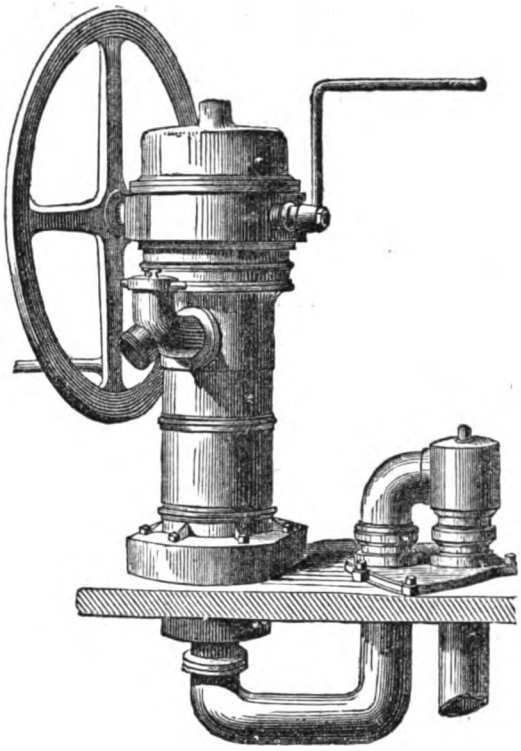
Under the Patronage of the Board of Admiralty.

SHIPS' PUMPS OF HER MAJESTY'S NAVY.

JOSIAH STONE,

Sole Manufacturer of DOWNTON'S well-known and much approved SHIPS' PUMPS, which have been used in preference to all others on board the vessels of Her Majesty's Navy, for upwards of thirty years, and have given the greatest satisfaction, effectually answering all the purposes required of any Ships' Pumps, and capable of throwing most powerful jets of water in case of fire.



These Pumps have also been most extensively used on board merchant vessels, both at home and abroad, and have been supplied to the Royal Navies of France, Prussia, Holland, Russia, Spain, and Turkey. The Pumps are portable, as they may be easily removed from the ship and put to work in a boat alongside in a few minutes. Each pump is fitted with a large foot valve plate (which may be placed in any part of the vessel most convenient), and from which communication is made to any number of distinct compartments in the vessel. In case of any of these pipes fouling, the water, by an almost momentary attachment, may be forced from the Pump downwards, so as to clear all obstructions, preventing any possibility of stoppage. The valves are of the simplest description, and being faced with ordinary leather discs, the latter may be renewed in a few minutes by the most inexperienced hands. By the peculiar construction of these Pumps, a most perfect and uninterrupted flow of water may be maintained; so uniform as to be undistinguishable from that proceeding from a cistern. The Pumps are made of several sizes, those of 7, 9, and 12 inches bore being most generally used. They may, however, be ordered of any dimensions required, and may be fitted either with one or two fly wheels. A standard, &c., is also supplied with these Pumps, to enable them, when necessary, to be used as ordinary hand-lever pumps.

JOSIAH STONE, Engineer, Manufacturer of all descriptions of PUMPS and FIRE ENGINES for Land and Ships' Use; Brass and Iron Founder and Finisher, Nail and Rivet Maker, &c.

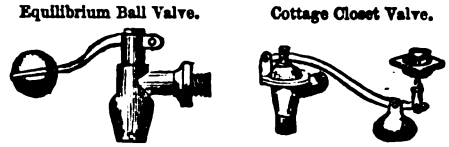
THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings; they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty ber cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, muffles, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire- standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. (43)

HIGH-PRESSURE VALVE-COCKS, LAMBERT'S PATENT.

Equilibrium Ball Valve. Cottage Closet Valve.



The Equilibrium Ball-Valve is simple and certain in its action, and is cheaper than the common cocks now in use.

The Cottage Valves are suitable for application to any kind of basin; and, as they shut against the pressure, no concussion in the pipes can possibly occur.

These cocks have been extensively and most successfully used in many towns, under continuous high pressure, varying from 100 to 350 feet; their efficiency and durability is, by experience, established.

THOMAS LAMBERT and SON,

Brass Founders, Short-street, New-cut, Lambeth. (80)

PUMPING MACHINERY.

GWYNNE AND Co., Engineers, London, manufacture and supply the following Machinery, of the most approved construction and with all the latest improvements:—Portable and Fixed Steam-Engines and Boilers of every description; Waterwheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the Supply of Towns, Cities, and Districts, and for the Irrigation of Coffee, Cotton, Indigo, Sugar-cane, and Rice Estates, for pumping out Coffer-dams, Canals, Dry Docks, Reservoirs, &c. They also manufacture and supply the Pumping and other Machinery for Paper, Pulp, and Fulling Mills, Breweries, Distilleries, Tanneries, Starch Works, Bleaching, Dyeing, and Calico Printing Works, Chemical Works, Silk, Cotton, and Flax Mills, and Manufactories in general. All Letters not paid will be refused. Illustrated Price Lists forwarded on receipt of Six Postage Stamps. —GWYNNE AND Co., Hydraulic and Mechanical Engineers, Essex-wharf, Strand, London.

For Exportation.—The above can be obtained throug British Merchants, Shippers, and Colonial Agents. (34)

RANSOME'S PATENT IMPERISHABLE SILICEOUS STONE.—Chimney-Pieces, Balustrades, Capitals, Trusses, Terminals, Fountains, Vases, Monuments, &c., of great beauty, at the most reasonable prices.

For Particulars, Specimens, Illustrations, and Agencies, apply to Mr. Frederick Ransome, Whitehall Wharf, Cannon-row, Westminster; or Patent Stone Works, Ipswich. A Liberal Discount allowed to the Trade or to Shippers. (175)

MATHEMATICAL DRAWING INSTRUMENTS, RULES, TAPES, CHAINS, LEVELS, THEODOLITES, BOX SEXTANTS, PRISMATIC and POCKET COMPASSES. Price Lists of the above articles sent post free, by John Archbutt, 20 Westminster Bridge Road, Lambeth, near Astley's Theatre. Every article warranted, and the prices will be found considerably lower than ever before charged for articles of similar quality. Routledge's Engineers' Slide Rules, 4s. 6d. each; Hawthorn's ditto, 5s. 6d.; Carpenters' Rules from 1s. (148)

EDWIN JEWITT, ENGRAVER ON WOOD AND DRAFTSMAN, 1 Pickett-place, Strand, near Temple-bar. Engineering, Scientific, and Mechanical Designs accurately engraved. Manufacturers and Tradesmen's Catalogues Illustrated. W.C. (84)

ENGINEERS' TOOLS.

FOR SALE, a Self-acting Slide LATHE, 11-inch Centres, and Bed 12 feet long, complete; and TWO PORTABLE PUNCHING and CUTTING MACHINES, one suitable for ½-inch plates, and the other for ¾-inch plates, both adapted for steam or hand power.

Apply to Messrs. PAGE & CAMERON, 64 Old Broad Street, E.C. (117)

VITRIFIED BLUE BRICKS are delivered at the Nine Elms Station, London, at 80s. per 1,000.—Address, G. H. OGSTON, J. M. Paine's Silica Works, Farnham, Surrey. (36)

WATER POISONED BY LEADEN PIPES.

"The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dick, of Bonchurch, Isle of Wight. The water has cut these deep pits almost through the pipe, and not only upon the portion which we have illustrated, but has formed similar chasms throughout the entire length."—*Expositor.*

Poisoned Water Preventable.

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious, or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha. Nothing can be better. I have also recommended it to others, who have adopted the expedient.

Resistance for Frost.

The Gutta Percha Company have been favoured with the following Letters in reference to the non-conducting properties of Gutta Percha Tubing, in the resistance of Frost.

From J. ARMSTRONG, Esq., M.D., Gravesend.

"My private house, which was supplied with your Gutta Percha Tubing some five or six years ago, has never required the slightest attention; and previously, there was no winter passed that we were not deluged in consequence of the bursting of the leaden pipes."

From HENRY BROWN and SONS, Western Works, 108 Rockingham-street, Sheffield.

"We have now a positive proof of the frost-resisting properties of the Gutta Percha Piping. On our premises we have a leaden Pipe and a Gutta Percha one lying side by side. The leaden one has been completely frozen up at least ten days, and the Gutta Percha one is still unaffected.

Remarks.—For Rails the demand is good and the price firm. Other kinds of manufactured are in moderate request. In Scotch Pigs a considerable business has been done at 51s. to 51s. 6d. per ton cash for Warrants. The shipments are fair, and would warrant an advance in price but for the unsettled state of continental politics. Other Metals present almost no fluctuation in price, and the business done in all has been very small.

LAWRIE AND HAGGER, Metal Brokers.
33 Lombard-street, E.C.

METAL AND COAL TRADES, &c.

[FROM OUR OWN CORRESPONDENT.]

The Iron Trade generally—Glasgow Pig Iron—Rails in the North—South Wales Iron Trade—South Staffordshire Trade; United States Demand; Preliminary Meetings; Prospects—Birmingham and Wolverhampton Trades—Sheffield Trade—Metals: Tin, Tin Plates, Spelter.

The Iron Trade has undergone no change for the better since our last. American houses continue to receive orders by each packet. It may be noticed some of the London shipping firms have evinced more disposition of late to do business, but up to the present time their operations have not been on a very extensive scale.

The Glasgow Pig Iron market was very dull on Tuesday, and a large business was done at 51s. 3d. one month, and 51s. cash; closing, buyers at 51s. cash, and 52s. three months, sellers 3d. higher. Nos. 1 and 3, G.M.B., 51s. 6d.

A contract for 15,000 tons, required for the East Indies, has been taken in the North, where there is a greater abundance of ore and coal, the raising of which is less expensive than in this district.

In South Wales the ironworks are generally well engaged, and fresh orders are daily coming in. The Continental demand continues good, and for home consumption large quantities of both pigs and rails have been disposed of. It is stated that rails are now selling, in South Wales, at £6 0s. 6d. to £6 2s. 6d.,

Respecting the South Staffordshire trade, we may remark that at Wolverhampton, on Wednesday, there was not that feeling which is always desired a fortnight before the preliminary meeting. Business was decidedly sluggish. The disappointment of last week was still more perceptible. The spring has not found us in the midst of great activity. United States advices received since last week, without being very valuable, speak of considerable under-selling through Liverpool shippers. Home and foreign trade dull. Buyers for home still hold back specifications. If peace should not appear more probable before the end of the ensuing fortnight there will be a dull preliminary meeting. Agents are quoting last quarter's prices for pigs, but the transactions in which they are obtained are inconsiderable. Pigs in large transactions rule from 2s 6d. to 5s. below last quarter-day rates.

The trade of Birmingham has become much quieter during the last few days. The partial re-action which has taken place has, however, been almost confined to the outworkers and to some of the small manufacturers, who, having few orders on their books, have been executing them almost as rapidly as they were given out. The large manufacturers have scarce experienced any change. The factors' travellers who deferred the commencement of their journeys for a week or two later than usual, are giving tolerably good accounts of the prospects of the home trade. In the North of England and in Scotland the aspect of business concerns is slightly improving. In the agricultural districts business is slightly restricted by the low prices obtained for produce. In connection with the export trade there is nothing new to report.

In reference to the hardware and cutlery trades of Sheffield we have the following:—There is no perceptible change in the state of trade during the last week, and any improvement which may have taken place is only partial. Though several firms are moderately busy, they are by no means fully engaged, and the business of the town generally is known to be much below the average.

The metal market is reported slacker, except as regards the East Indies; for that quarter operations have been on a more extensive scale. During the last fortnight there has not been much doing in foreign tin, the large consumers having been apparently content to use up stocks previously purchased; prices are, however, pretty well maintained. In Holland the stock in warrants and the tin arrived towards the next sale, shows a decrease in the deficiency there appeared last month, when compared with last year's figures; but against this the quantity reported to be afloat from Java to Holland is considerably less, being 35,000 slabs against 50,000 slabs of last year.

Tin plates are scarcely in so active demand as a week ago, and the manufacturers not so well off for orders.

There is a good stock of spelter in the country, and prices continue to rule down.

LIST OF MISCELLANEOUS TENDERS INVITED, AND ENGAGEMENTS OPEN.

The tenders and vacancies which appear in this weekly list are not repeated in succeeding numbers.

Railway Offices, *London, Brighton, and South Coast.*—In one or three contracts, booking offices, clerks' houses, warehouses, engine sheds, &c. Specifications, &c., Engineer's Office, London Bridge Terminus, March 24.

Gas Tank, *Boston.*—Brick tank, 86 ft. diameter, by 24 ft. deep, and single-lift gasholder, with columns and girders. Plans at Gas Works, Boston.

Cathedral Tower, *Durham.*—Restoration of central tower. Plans, Messrs. Walton and Ribson, architects, Durham.

Hotel, *Norwood.*—Alterations to Beulah Spa Hotel. Drawings, &c., of the Architect, 38 Bloomsbury-square. No date.

Manse, *Monymusk, Aberdeenshire.*—Masons' and carpenters' work. Plans, Mr. Ramage, architect, 115 Union-street, Aberdeen. March 29.

Rectory, *Yockleton, Shrewsbury.*—House and offices. Plans, &c., Mr. J. Cranston, architect, 2 Bennett's-hill, Birmingham. March 26.

Rectory, *Abbess Roding.*—Plans, Beadel & Co., architects, Chelmsford. March 28.

Houses.—Master's house, for F. Wright, Esq., Butterley Iron Works, Codnor, Derbyshire. Plans with architect, C. H. Edwards, Esq., 4 St. James's-terrace, Camden Town. March 22.

Royston, Hertfordshire.—House and two farmsteads. Plans, Mr. E. Browning, architect, Stamford. March 26.

Designs for Hospital, *Chesterfield.*—Estimated cost, £1,200. Further information, H. Waller, Hon. Sec., Chesterfield. Designs to April 3.

Designs for Mixed School and Teacher's Residence, *Caistor, Lincolnshire.*—Maximum cost, £900. £10 for second best. Further information, the Vicar of Caistor, March 25.

For Central Police Station, &c., *Lincoln.*—Plans of ground, Office of County Constabulary, Lincoln. April 2.

Refuse Wood for Sale, *Royal Arsenal, Woolwich.*—5 stacks oak, 3 of ash, 6 of elm, 1 beech, 1 fir, 3 refuse. Printed forms at War Office, Pall-mall, or Principal Military Storekeeper, Woolwich. Tenders, March 24.

Church, *County of Leicester.*—Enlarging parish church of Sheepy Magna, Leicester. Plans, &c., Black Horse, Sheepy; Tenders, March 24, Mr. R. Jennings, architect, Atherstone.

Oak Roof.—For nave of Gosberton Church, Lincolnshire, &c. Plans, &c., Mr. E. Browning, architect, Stamford. Tenders to Churchwardens, noon, March 28.

Independent Chapel, *Manchester.*—At Droylsden. Plans, &c., Mr. R. M. Smith, architect, 42 Lloyd-street, Cooper-street, Manchester. Tenders, Rev. Charles Bingley, Milton-terrace, Droylsden. March 30.

National Schools, *Heywood.*—Drawings, &c., Mr. Crowther, architect, 22 Princes-street, Manchester. Tenders, Rev. Julius Shadwell, St. Luke's Parsonage, Heywood, April 6.

School and Teacher's House, *Derwen.*—Drawings, &c., R. L. Williams, architect, Hwllan-place, Denbigh, from 25th to 30th March; from 31st March to 4th April, at Rectory-house, Derwen; at which time tenders to architect.

Parsonage, *North Wales.*—At Bettws Abergele. Plans, &c., with Mr. Williams, as above, from March 28 to April 4; when contracts.

Villas, *Nottingham.*—Four detached villa residences, south side Nottingham park. Particulars, at office of Messrs. Hine and Evans, architects, Nottingham, by March 24.

Shop and Dwelling House, *Swindon.*—Plans, &c., Mr. E. W. Mantell, Bath-terrace, Swindon, to March 24 inclusive; when tenders.

Labourers' Cottages, *Hammersmith.*—Plans, &c., Mr. G. Saunders, architect, &c., King-street, Hammersmith. Tenders, 5 P.M., March 21.

Gas Holder, *Northampton.*—Plans at offices of Gas Light Company, Northampton; or at office of Mr. J. Ennson, gas engineer, Wolverhampton. Tenders to chairman of company, by noon, April 6.

Well, *Kent.*—To sink bore well, now 160 ft. deep. Information, Mr. Oldreive, clerk of works, Kenward, Pembury, near Tonbridge, Kent.

Railway Sleepers.—30,000 railway sleeper blocks, of metal or Dantzic red wood. Tenders, March 24, to secretary of North Eastern Railway.

Hemp, *Navy.*—Riga and Petersburg. Form of tender, Storekeeper General, Somerset-place. Tender, by 2 o'clock, April 5.

Creosoting Plant Wanted.—The machinery necessary for creosote works. "A. B.," 103 Cheapside, London.

Railway Stores.—For the South Eastern Railway. Specifications, &c., of Storekeeper, London-bridge Terminus. Tenders, March 28.

Removal of Mud.—From Basin of Woolwich Dockyard. Specifications at office of Commodore Superintendent. Tenders, noon, March 31.

As Surveyor, &c.—Surveyor, inspector of nuisances, and superintendent of highways for Ely. Salary, £120 per annum. Applications, March 29, to Mr. Wm. Marshall, clerk to the Local Board, Ely.

As Draughtsman.—Accustomed to make drawings of railway carriages, &c. Messrs. J. Wright and Sons, Saltley Works, Birmingham.

Secretary and General Manager of Ironworks, *Midland Counties.*—Salary, from £400 to £500, principals, and to possess from £600 to £1,000. P. P., Hoghen and Godson, New-street, Blackfriars.

TO ENGINEERS, MILLOWNERS, AND MANUFACTURERS.

AMERICAN INDIA-RUBBER Machine Belting, Valves and Washers, Brewers' Hose, Fire Engine Hose, Improved Suction Hose—at Wholesale Prices.

W. T. HENDRY & CO.,
38 Upper Thames-street, London, E.C. (152)

FOG WHISTLES, for Seagoing Steamers.

WATER GAUGE MOUNTINGS, for Marine and Land Boilers.

GAUGE COCKS, GLAND COCKS, GREASE COCKS, CUPS and SYPHONS.

STEAM TAPS, RANGE COCKS, &c.

IMPROVED BRASS VALVES, for Steam, Water, and Gas.

W. T. HENDRY & Co., Engineers.
38 Upper Thames-street, London, E.C. (153)

TO WIRE ROPE MAKERS.—ARCHIBALD SMITH is now prepared to GRANT LICENCES for the use of his PATENT ROPE MACHINERY, guaranteed to work at six times the speed of any other, and to save upwards of fifty per cent. in the cost of making. It is used by the most eminent makers, and was also in the manufacture of the Atlantic Cable.—Apply to 69 Princes-street, Leicester-square, W. (8)

CAUTION.

TO ARCHITECTS AND BUILDERS.—In consequence of numerous complaints, the Patentee begs to inform the above, that all genuine

SMITH'S PATENT DOOR SPRINGS,

For Swing Doors, are stamped with Name and Address, thus—

SMITH, PATENTEE, 69 PRINCES STREET,
LEICESTER SQUARE, LONDON,

and that Springs thus marked are warranted.

SMITH'S PATENT WEATHER-TIGHT CASEMENT FASTENING AND SILL-BARS

are admitted by all to be the most perfect invention for the purpose. Diagrams and List of Prices on application. (143)

WATER GAUGES—WATER GAUGES.—Sir,—We find your German Gauge Tube superior to any other, and strongly recommend it. We were compelled to abandon the use of our water gauge until applying your glass tube.

Wilcox and Co., Millwall Pottery Company.

These Tubes are superior to all others; being a clear white, no mistake can arise in working. Guaranteed to stand a pressure of 500 lb.

Extensively used on all the principal lines.

To be had only of E. MOORE, 55 Upper Marylebone-street, W.; and 72 Great Titchfield-street, W.

*** Price List of Gauge Fittings, &c., on application. (98)

PATENT WEDGE and GROOVED SURFACE FRICTIONAL GEARING.—The PATENT FRICTIONAL GEARING COMPANY, Proprietors of ROBINSON'S WEDGE SURFACE FRICTIONAL GEARING PATENTS, grant Licences to Users of Machinery, for the unlimited use of the System in their Works, on very moderate terms, enabling them to make or order from any Mechanician the Machinery they require.

The Company possess Five Patents relating to this Frictional System, including (in addition to their Bevel and Mitre Wheels) a System of Disc Clutches and Clutch Movements, Wheel Clutching, Reversing, Differential, Speed Ring, Varying Speed, and Break Movements, and of Shafting, Pillow Blocks, Shafting Hangers, &c.

Frictional Wheels thus formed are applicable to the heaviest as well as the lightest kind of work, and, in addition to their being extensively in use for ordinary gearing purposes, have been in use for a considerable time applied to Mills for Rolling Iron, the Screw-Propeller, Incline-Winding Engines, Saw Mills, Pumping Engines, Flax Scutchers, Fan Blowers, Calico-Printing Machinery, Steam Winches, Cranes, Hoists, &c.

This system gives great facilities for simplifying Machines, and for mechanical combination, and has the advantage of being noiseless and cleanly, there being no oil or grease used on the wheels. Wheel Catalogues and Circulars, giving particulars, sent free by Post; also a list of manufacturing Agents, and information regarding those who, from locality or experience, are best able to execute orders for the description of work required.

Office, 20 Buchanan Street, Glasgow. (146)

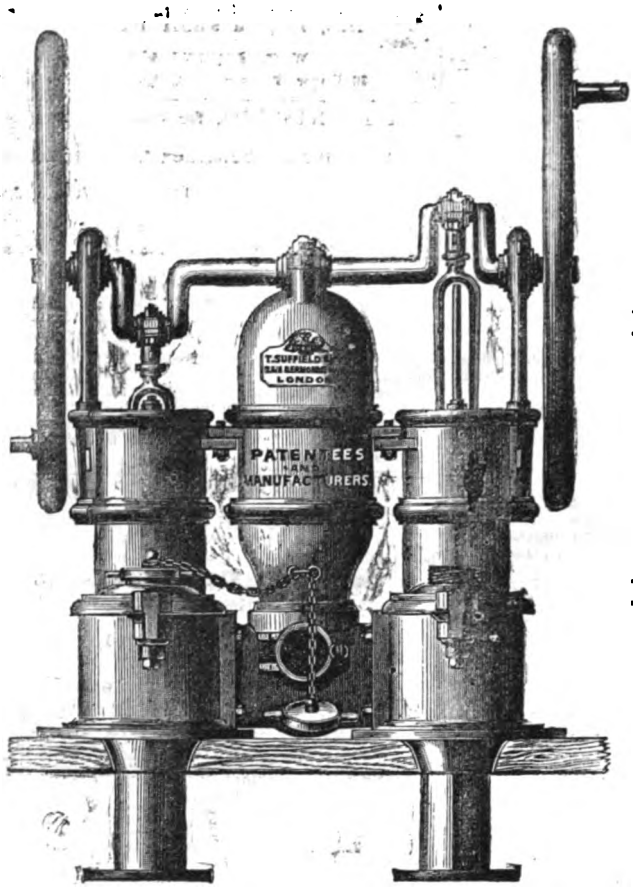
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS, SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

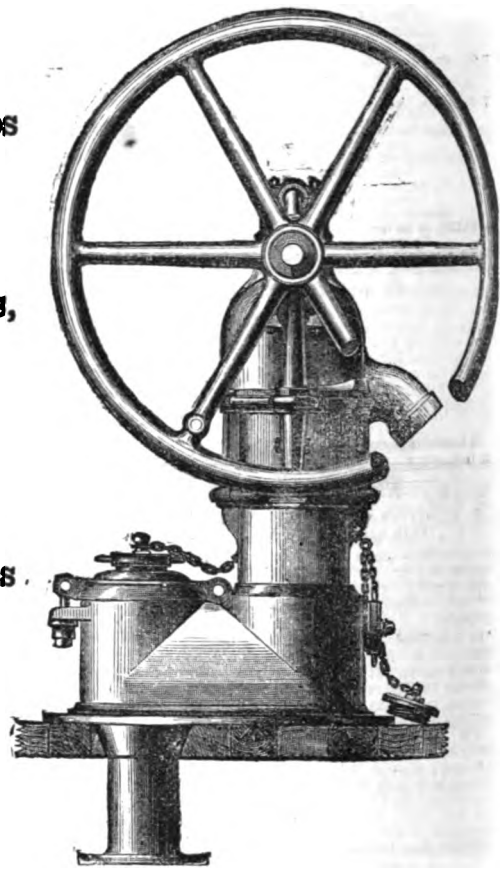
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangement either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps; the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board; the rapidity with which they can be converted into Fire Pumps, or be applied to th Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Works Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require such Stores, together with a further saving the cost of such Articles.

DEPOT, 116 FENCHURCH STREET, E.C.,

(OPPOSITE MARK LANE.)

MANUFACTORY, 12 & 13 BERMONDSEY WALL, S.E.

LONDON.

SCOTT'S
PATENT GRASS SEED SEPARATOR,

which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from

PERENNIAL AND ITALIAN RYE-GRASS, &c.,

AND

SCOTT'S PATENT CARROT SEED BEARDING

AND

CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,

which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

Communications to be sent to the Patentee, J. SCOTT, 111 Drummond Street, Euston Square, London, N.W. (48.)

CLAYTON, SHUTTLEWORTH, AND CO.,

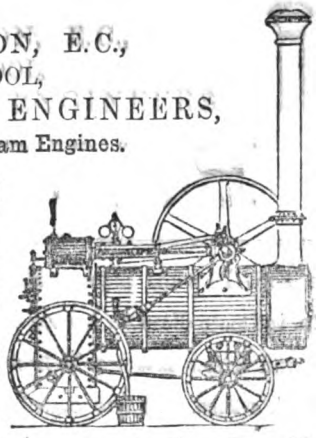
OF LINCOLN,

78 LOMBARD STREET, LONDON, E.C.,

AND 36 DALE STREET, LIVERPOOL,

AGRICULTURAL AND GENERAL ENGINEERS,

And Manufacturers of Portable and Fixed Steam Engines.



Combined Threshing Machines, which dress the corn ready for market at one operation. Grinding Mills, Saw Benches, Pumps for Irrigation and Mining purposes, with all necessary gearing for being driven by steam power. Full particulars and estimates given on application to the above address.

C. S. and Co.'s PORTABLE STEAM ENGINES are adapted for every purpose to which steam-power can be applied. When intended for winding, they are fitted with reversible link motion and winding gear. They are easy of removal, as may be seen by the engraving, and can be set to work immediately on arrival.

C. S. and Co. are now doing an extensive foreign and colonial business, and are prepared to send off engines and machinery of the before-mentioned kinds in a few days from the date of order. They would also call attention to the important *reduction in prices* made for the new year.

For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (23)

IMPROVED MACHINERY FOR AGRICULTURISTS.

RICHARD GARRETT & SONS,

LEISTON WORKS, SAXMUNDHAM, SUFFOLK,

(ESTABLISHED A.D. 1778),

EARNESTLY solicit the continued support of their numerous Friends, Agriculturists, Shippers, and others; the additions made to their Works during the present year, in the erection of new sets of Workshops, fitted with the best mechanical appliances for producing Machinery of the most improved construction, expeditiously and economically, justifies their soliciting increased support, while their leading reputation as Inventors and Manufacturers of FIRST CLASS Agricultural Machinery, is a sufficient guarantee that every Machine supplied from Leiston Works will prove to the entire satisfaction of the purchaser.

R. G. & S. are now manufacturing the following Machines and Implements, which they guarantee to be thoroughly efficient in every respect:—

PORTABLE AND FIXED STEAM ENGINES. } From 4 to 40 Horse Power, suited for every kind of work
SELF-PROPELLING AND TRACTION ENGINES. } to which Steam Power is applied.
STONE GRINDING MILLS.
MORTAR AND PUG MILLS.
MILLWRIGHTS' WORK of all kinds.
SAWING MACHINERY, from 4 to 20 Horse Power.
BRICK AND TILE MACHINES.

IMPROVED SETS OF FARM MACHINERY, for Large Occupations.
PORTABLE AND FIXED MACHINERY, for Thrashing and Dressing Corn.
THE PRIZE BOLTING AND OPEN-DRUM HORSE-POWER THRASHING MACHINES.
CORN DRESSING MACHINES, for Hand, Horse, Water, and Steam Power.
BARLEY AVELLING MACHINES.
CHAFF CUTTERS, for Hand, Horse, Water, and Steam Power.
PATENT TURNIP CUTTING AND PULPING MACHINES.

THE PRIZE CORN AND SEED DRILLS.
PRIZE CORN AND SEED DRILLS WITH MANURE APPARATUS.
PRIZE SEED AND MANURE DRILLS.
LIQUID, SEED, AND MANURE DROP DRILLS.
CHAMBER'S PATENT BROADCAST MANURE DISTRIBUTOR.
GARRETT'S PATENT HORSE HOE for all Crops.
PATENT REVOLVING HOES for Root Crops.
IMPROVED PLOUGHS AND REAPING MACHINES.
&c. &c. &c.

Of which full detailed particulars will be found in R. G. & SONS' ILLUSTRATED CATALOGUE, sent postage free to any address, in English, French, or German; and any of the above Machines will be shown in operation at R. G. & Sons' Farm, near the Works, on their receiving a few days' notice.

A Copy of R. G. & SONS' new COLONIAL LIST will be forwarded free to any of the Colonies, and Shippers will be supplied with these lists, with their names and addresses printed on, free of charge, by making application for the same.

ADDRESS—R. GARRETT & SONS, LEISTON WORKS, SAXMUNDHAM, SUFFOLK. (161)

GAS EXPLOSIONS PREVENTED.

USE THE TUBES AND FITTINGS MADE BY JOHN RUSSELL and Co. (Established at the commencement of gas-lighting), whose goods are all well tested, and warranted.

J. R. and Co. supplied Thomas Cubitt, Esq., for all his houses in Belgravia, the Queen's Palace, &c., which locality is proverbially free from gas.

J. R. and Co. are the Inventors of the Lap-Welded Tubes for Steam Boilers, and have recently obtained a Patent for an improvement in them.

J. R. and Co. are the holders of the First Prize Medals for Gas-Tubes and Fittings and Boiler Tubes.

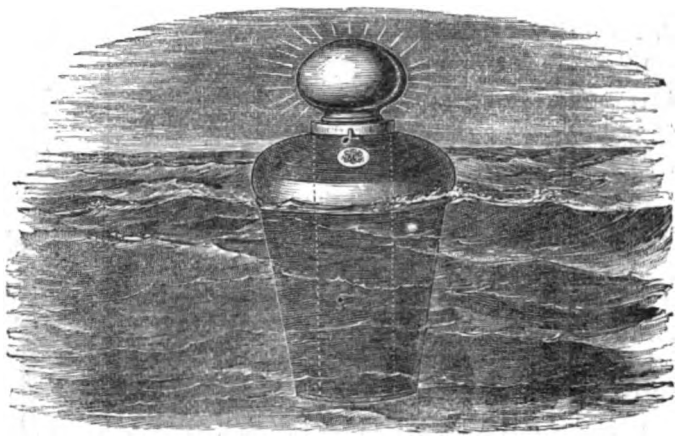
GRESHAM'S



PATENT RECORD BUOY.

The RECORD BUOY is intended to be kept in some place available for instant use, and to be thrown overboard from a sinking Ship, or a Vessel on Fire, so as to intimate disaster, having a paper inserted therein, already filled up with the Ship's Name, Port of Registry, Official Number, &c., and a few last words hastily written, intimating the nature of the calamity, with any further information that can be given at such a time. It has capacity and buoyancy to contain besides these, the Log Book, and several pounds' weight of Papers or Valuables. It is lined with Cork between the Cylinder and outside case, so that, although waterlogged, it will not sink, but keep afloat for a long time, probably for years.

In order to DISTINGUISH IT FROM ANY OTHER FLOATING SUBSTANCE, so that the Captain of a passing Ship may recognize it as an intimation of disaster, and consider it a sacred and imperative duty to pick it up and convey the information it contains according to the directions found within, it HAS RAISED CONSPICUOUSLY UPON ITS SURFACE A SILVERED GLOBE, which, owing to the reflection of the light, will make it visible at a great distance, and when dancing on the wave it shines, in fact, like a star in the firmament, and being distinguishable from anything else its character cannot be mistaken.

It is furnished with ample directions to the finder how to act, and has Envelopes already directed to the proper authorities, who, on receipt thereof (and they should be transmitted by the first available means), will, after verifying them to prevent imposition, immediately convey the information to the owners of the lost Ship, to Lloyds, and all parties concerned; and if a foreign ship, to the Consul of the nation to which she belongs.

In order to establish uniformity, and to prevent the uncertainty and confusion which a multiplicity of Buoys of various forms might occasion, when their utility becomes apparent, and to make ESPECIAL RECOGNITION OF THESE UNDOUBTED, MR. JOHN GRESHAM, J.P. and Alderman of Hull, has Patented his Invention, and has arranged with the old established Firm of

SOCIETY OF ARTS.—The Eleventh Annual Exhibition of Inventions will open on the 25th day of April, 1859. The days fixed for receiving articles intended for exhibition are Thursday the 7th, Friday the 8th, and Saturday the 9th April. No charge is made for space, and the Exhibition is Free.

Intending exhibitors should communicate at once with the Secretary. By order,

P. LE NEVE FOSTER, Secretary.

Society House, John-street, Adelphi, 1st March, 1859. (171)

LECTURES TO WORKING MEN.—GOVERNMENT SCHOOL OF MINES, JERMYN-STREET.—The Fourth Course of Six Lectures, on "Applied Mechanics," by Professor WILLIS, M.A., F.R.S., will be commenced on Monday, April 4th, at Eight o'clock.

Tickets may be obtained by Working Men only, on Monday, 28th March, from Ten to Five o'clock, upon payment of a Registration Fee of 6d. Each Applicant is requested to bring his Name, Address, and Occupation, written on a piece of paper, for which the Ticket will be exchanged.

TRENHAM REEKS, Registrar. (186)

ENORMOUS REDUCTION IN THE COST OF STEAM POWER.

TO RAILWAY COMPANIES, STEAM SHIP PROPRIETORS, AND MANUFACTURERS.—A saving of Fuel equal to one-third of the entire consumption is effected by the introduction of "DUNCAN'S PATENT SPIRAL HEAT DIFFUSERS," which arrest the heat in its passage through the flues or tubes, and convert into impelling power the large measure that without these appliances would (even in the very best boilers) escape along with the smoke. They can be fitted in an hour or two at a small cost, and without any alteration in the existing arrangements of boilers now in use. These results are prepared to be guaranteed, and a part of the value of fuel saved by the use of the Apparatus will be accepted for royalty.

Hitherto, steam navigation to distant parts of the world has proved a commercial failure. The remedy is provided, and the vast numbers of large and splendid vessels can soon be made valuable paying property.

Further information may be had on application to GWYNNE and CO., Engineers, Essex-street Wharves, Strand, W.C., London. (167)

HART & SON, MALLEABLE IRON-FOUNDERS, 4 Vine-street, York-road, Lambeth. Orders for Malleable Iron Castings executed within a week. (77)

FOR SALE.

A 12-HORSE HORIZONTAL STEAM ENGINE and a 4-HORSE DIRECT ACTING STEAM ENGINE, with Fly-wheel Governors, &c., complete. Address, W. F. Plummer, 12 Albany-road, Camberwell. (188)

BOOTH AND CO., AUCTIONEERS AND BUILDERS' SALESMEN.

TO MANUFACTURERS, MECHANICAL AND BUILDING TRADES GENERALLY.

Having established Offices and Premises for the weekly sale and convenience of the Trade in general, beg to call the attention of all parties to the only medium yet established for the sale of Building and Engineering Materials.

Messrs. B. and Co. having opened a Register for Private Sale of all kinds of Job Lots, Surplus Stocks, Stores, &c., are prepared to receive Consignments of any class Goods for immediate Sale. All particulars at "THE BUILDERS' REGISTRY OFFICE," 13 Eastcheap, London, E.C.; and THE BUILDERS' SALE GROUND, 23 and 24 Marylebone Road, Regent's Park, W. (191)

TO BUILDERS, FARMERS, DEALERS, AND OTHERS.

AT THE BUILDERS' SALE GROUNDS, 23 and 24 MARYLEBONE ROAD, REGENT'S PARK, W.—Messrs. BOOTH and Co. will sell by Auction on Tuesday next, at 1 o'clock, an excellent assortment of Marble Chimney Pieces, 1,100 Yellow Deals, Battens, and Pine Planks; 5,000 ft. of New Scantlings, and quantity of Cut Stuff; a few Oak Spokes and Felloes; 9 Four-panel Doors; 55 pair of New Sashes, partly in frames; Second-hand Shop Fronts and Doors, Sashes in Frames, &c., Glazed with Plate and other Glass; various Engineers' and Carpenters' Tools; 140 dozen of Saw Files and 50 Carpenters' Saws, various; 70 Oil Stones; 6 New Shovels; about ½-a-ton of Coach Screws, Bolts, and Blank Nuts; Iron Doors; Patent Waterclosets. Large quantity of Engineers' and Founders' Patterns. On view the Monday previous and Morning of Sale, when Catalogues may be had on the premises, and at the Offices of the Auctioneers, 13 Eastcheap, London, E. C. Or by Post for one stamp. (192)

STEAM ENGINES.

FOR SALE, a superior HIGH PRESSURE HORIZONTAL STEAM ENGINE of 6-horse power, 8-inch cylinder, and 1-foot 6-inch stroke. One of 8-horse power, 10-inch cylinder, and 1-foot 6-inch stroke. One of 10-horse power, 12-inch cylinder, and 2-feet stroke. Two of 14-horse power, 14-inch cylinders, and 2-feet stroke; and one of 30-horse power, 20-inch cylinder, and 3-feet stroke.

Apply to Messrs. PAGE and CAMERON, 64 Old Broad Street, E. C., London. (124)

CAUTION.

TO ARCHITECTS AND BUILDERS.—In consequence of numerous complaints, the Patentee begs to inform the above, that all genuine SMITH'S PATENT DOOR SPRINGS, for Swing Doors, are stamped with Name and Address, thus—SMITH, Patentee, 69 Princes Street, Leicester Square, London; and that Springs thus marked are warranted. SMITH'S PATENT WEATHER-TIGHT CASEMENT FASTENING AND SILL-BARS are admitted by all to be the most perfect invention for the purpose. Diagrams and List of Prices on application. (143)

THORLEY'S FOOD FOR CATTLE.—Every person having an interest in domestic or farm animals should obtain a supply of this celebrated and economical food, which will prove invaluable during the approaching season. For keeping horses in good condition, it is unequalled. Pigs fatten with surprising rapidity upon it, and their flesh increases in flavour and value. Cowkeepers will find great advantage in the increased quantity and improved quality of the milk during its use. All animals are benefited by it. A pamphlet on this interesting subject, accompanied by Testimonials from the principal Nobility, Gentry, and Agriculturists, forwarded on application. In Casks containing 448 Feeds (Measures enclosed), Price 50s., carriage paid to any Railway Station in the United Kingdom. Post Office Orders payable to JOSEPH THORLEY, 77 Newgate Street, London.

N.B.—The public are cautioned against being imposed upon by worthless imitations. (132)

TO BRASS FOUNDERS.

TO BE SOLD, the Patent-right of a New and Highly-approved EQUILIBRIUM WATER COCK or VALVE, suitable for Steam Boiler Feed Pipes, or any cases where the valve is required to be opened against pressure.

Address H., MECHANICS' MAGAZINE Office, 166 Fleet-st., where a Drawing may be seen. (151)

STEAM ENGINES FOR SALE.

PORTABLE STEAM ENGINES, from 6 to 12 horse power,
STATIONARY STEAM ENGINES, from 4 to 50 horse power,
TUBULAR BOILERS, from 4 to 50 horse power,
CORNISH BOILERS, from 4 to 50 horse power,

Are in hand, and can be despatched on eight days' notice. Prices moderate. Workmanship and Material of the best description.

Apply to R. THORNTON & Co., St. Leonard's Iron Works, Edinburgh. (60)

TO MARINE ENGINEERS, OR SHIP-BUILDERS.

THE PROPRIETOR of a VALUABLE PATENT for Double-expansive Marine Engines (by which great economy of space and fuel is obtained) is desirous of entering into arrangements with a respectable firm for the construction of the same. An adequate portion of the patent-right would be assigned by the advertiser to any firm taking the matter up; and he would render all assistance in his power, either in London or elsewhere, amongst ship-owners (to many of whom he is well known), in obtaining contracts, &c. Unexceptionable references given. Address C. E., MECHANICS' MAGAZINE Office, 166, Fleet-street. (76

TO COMMERCIAL TRAVELLERS.

WANTED, a Gentleman well-acquainted with Ironmongers, Upholsterers, Coopers, &c., to Travel on Commission.

Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (164)

TO ENGINEERS, INVENTORS, AND OTHERS.

A PRACTICAL ENGINEER of long standing prepares Original Drawings, Copies, and Tracings. Advice and Assistance given to Inventors in working out their Plans. Pupils taught privately. Terms moderate.

Apply to J. J., 171 Strand. (138)

ENGINEERS' MACHINE TOOLS FOR SALE.

A STRONG & POWERFUL PLANING MACHINE, to plane 6 feet × 30 ins. × 30 ins., self-acting in all its cuts.

A SELF-ACTING TURNING, CROSS-SURFACING, AND SCREW-CUTTING DOUBLE-GEARED GAP LATHE, headstocks, 8 ins. to centres; bed, 10 feet long, with top driving gear.

A SINGLE-POWER DRILLING MANCHINE, complete.

A DOUBLE-GEARED SELF-ACTING BORING AND DRILLING MACHINE, complete.

A SELF-ACTING NUT SHAPING MACHINE.

A BOLT AND NUT SCREWING MACHINE.

A STRONG & POWERFUL STEAM-ARM SHAPING MACHINE, complete.

A NUMBER OF PLATE-IRON PUNCHING AND SHEARING MACHINES, to punch and cut iron from ¼ in. to 1 in. thick; portable to work by hand, and stationary to work by steam power.

A SET OF PLATE-IRON BENDING ROLLERS, to work by hand or steam-power.

Ready for delivery. Inspection invited. Particulars and prices furnished.

J. TODD and Co., Kent Iron Works, Bridge-street, Greenwich. (185)

A VALUABLE PATENT to be DISPOSED OF.—The Patentee will either dispose of the Patent or grant Licences to any party wishing to manufacture, or would join a person with capital to carry out the Patent.

Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (163)

TO ENGINEERS, ARCHITECTS, PATENT AGENTS, &c.

PHOTOGRAPHS OF THE HIGHEST CLASS and of any size, taken and reproduced at a most moderate rate of charge. Reproductions of faultless accuracy, of Machinery, Models, Drawings, &c. Orders attended to in town and country. Estimates forwarded.

SPENCER, READ, & Co., 4 Agar-street, Strand, W.C. (90)

THE LONDON

WARMING AND VENTILATING COMPANY,

(LIMITED,)

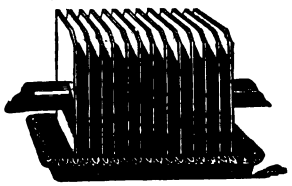
36 GREAT GEORGE STREET, Westminster, S.W.

(MANAGER—Mr. WOODCOCK.)

Churches, Greenhouses, Offices, and Buildings of every description warmed by means of a modification of the plan successfully used during the last five years by Mr. Goldsworthy Gurney in both Houses of Parliament.

Steam, Hot-water, Gas, and in open or enclosed fireplaces, Coal and Coke are equally available for the process.

The cost is less and the effect greater than that of any other known means.



The Horticulturist will find herein an instrument of new and important powers.

The apparatus may be seen in ST. PAUL'S CATHEDRAL, the various offices of the "Department of Science and Art," and in many churches and other buildings.

Particulars and Testimonials forwarded on application. (12)

VENTILATION WITHOUT FLUES.

KUKLA'S PATENT STOVES,

At 18s., 25s., and 50s.

KUKLA'S newly-invented Deflagrator—the first and only perfect GAS STOVE. Guaranteed to burn without flue—without dust, smell, or smoke, producing a great and pure heat with the least expenditure of Gas.—*Vide Society of Arts' Journal.*

Patronised by the English and French Government.

Scientific in Principle,
Simple in Construction,
Healthy and efficient in use.

The Deflagrator Stove is cheap, portable, and suited for every situation; and from the principle on which it is constructed (viz., expanding to a sixfold volume the gas used) is capable of warming any given space more quickly and more thoroughly than any other means: while its addition forms a sure remedy for any ill-warmed or ill-ventilated apartments.

The 25s. Deflagrator warms a room of 2,000 cubic feet at a cost of 3d. per day.

The 50s. Deflagrator warms 5 to 6,000 cubic feet at a cost of 6d. per day (twelve hours).

Also, the Greenhouse Stove at 18s.

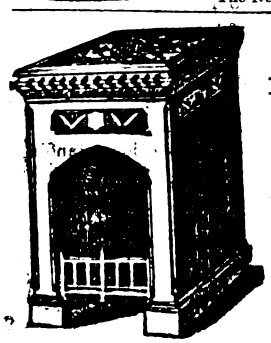
Patentee and sole Manufacturer, F. X. KUKLA, 194 Pentonville-road, London.

Country orders promptly attended to. Carriage free to any Railway in London.

Post-office Orders should be made payable to FRANCIS XAVIER KUKLA, General Office.

N.B.—Every Stove separately tested before sent out.

The New GAS COOKING STOVE for 10 persons, price £3. (103)



PIERCE'S

UNRIVALLED

PYRO-PNEUMATIC FIRE-LUMP WARMING AND VENTILATING STOVE GRATES,

WITH the cheerful, open fire, producing healthful warmth, with continuous Self-acting Ventilation, for Churches, Schools, Public Buildings, Banking Houses, &c. These Grates are manufactured solely by PIERCE, the Inventor, for which he received the Prize Medals of London in 1851, and of Paris in 1855.

PRICE, from £7 10s.

ILLUSTRATED CATALOGUE, with Prices and Estimates for Work, furnished on application to the Inventor and Sole Manufacturer.

Also his

IMPROVED COTTAGER'S GRATE,

For Warming Two Rooms with only One Fire. Prices, 30s. and 35s.

PIERCE, No. 5 JERMYN STREET, REGENT STREET. (111)

TO STEAM SHIP OWNERS, ENGINEERS, AND OTHERS.

How's Patent Steam Engine Counters, can be read at sight.

These Counters register the number of revolutions made by an engine or other mechanism. They may be used for ascertaining the duty of Pumping Engines and Water-wheels; the revolutions on board a steam-vessel; to calculate the slip of the propeller; and in a locomotive to test the slip of the wheels.

How's Patent Salinometer, for Steam Boilers using Salt Water.

By these, the density of the water in the Boiler is at all times accurately shown, and a saving of boiler and fuel is effected. They are adopted by the Admiralty, the Honorable Trinity Corporation, and others. Copies of Testimonials from Messrs. Penn, Messrs. Maudslay, and others, will be forwarded on application.

How's Engine-Room Telegraph, for communicating between Captain and Engineer.

Society of Arts Prize Medal, 1855.

is a Mechanical Telegraph, and by its peculiar construction, error or misunderstanding is rendered impossible. It is now extensively adopted, and gives great satisfaction.

How's Patent Fresh Water Apparatus for Ships' Use.

This apparatus is designed for the distillation of Fresh from Salt Water; and on long voyages, and where the supply of water is scanty, it will be found invaluable. Testimonials may be seen.

Patent Steam Pump and Fire-Engine for Ships' Use.

This Steam-pump occupies but a small space; works perfectly noiselessly, and throws an immense volume of water. An Illustrated Circular of Fresh Water Apparatus and Steam-pump combined, free on application.

How's Patent Machine for Cutting Bolts, Rods, Spindles, Wire, &c.

Simple in construction, inexpensive, occupies but little space, and will not easily get out of order.

A Pamphlet Illustrative of the above, sent free by post, on application to

A. P. HOW, ENGINEER,

81 MARK LANE, LONDON.

EVERY DESCRIPTION OF ENGINEERS' TOOLS, ENGINE ROOM STORES, &c., &c., SUPPLIED. (89)

By Her Majesty's Royal Letters Patent.

E. DENCH,

KING'S ROAD, CHELSEA, AND HAMPSTEAD ROAD,

Patentee and Sole Manufacturer of

PATENT

GALVANIZED-IRON HOT HOUSES AND CONSERVATORIES,

Has Two SPAN ROOF HOUSES left for Sale, a Great Bargain!

PATENT HOT HOUSES

every way superior to any other Material, at 1s. 3d. per ft. super, with excellent heavy, good quality GLASS.

PRINTED PRICE LIST SENT ON APPLICATION.

HEATING BY HOT WATER with efficiency and economy. (83)

Labels, Labels, Labels!!!

JOHN DAVIS, 19 Percival-street, Clerkenwell, London, E.C. Established 1810.

DIE SINKER, SEAL ENGRAVER, METAL Stamper, Piercer, and Manufacturer of Metal Labels for Patent and other Articles, Tokens, &c.; Copying, Embossing, and Piercing Presses, Stamps, Punches, Press Tools, &c.

DAVIS'S PATENT SELF-INKING ENDORSING PRESSES, the most Complete and Useful yet made.

A Lever Embossing Press and Die, complete 15s. (51)

GLENFIELD PATENT STARCH,

USED IN THE ROYAL LAUNDRY,

AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE THE FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR

GLENFIELD PATENT STARCH,

SEE THAT YOU GET IT,

as inferior kinds are often substituted.

Sold by all Chandlers, Grocers, &c., &c. (75)

ANDREW McLAREN and CO.,

ENGINEERS AND IRONFOUNDERS,

For Gas, Water, and Steam,

AND EVERY DESCRIPTION OF CASTINGS. (115)

A NEW DISCOVERY IN WASHING HOUSEHOLD LINEN.

NO FAMILY SHOULD BE WITHOUT HANCOCK'S UNIVERSAL WASHING MACHINE. It effectually cleanses the Crevices of Baby-linen, Collars, Wristbands, &c., without the possibility of injuring the Linen or Collars. Received 500 Testimonials.

PRICES.

No. 2 Washes 9 Shirts in from 3 to 10 minutes; or 4 Sheets in 5 minutes	£5 5 0
No. 3 Washes 12 Shirts in from 3 to 10 minutes; or 6 Sheets in 5 minutes	7 11 0
No. 4 Washes 18 Shirts in from 3 to 10 minutes; or 12 Sheets in 5 minutes	12 12 0

And all other Articles in proportion.

J. L. HANCOCK, Sole Manufacturer and Patentee, 82 Pentonville-road, London. (37)

CHUBB'S LOCKS, FIREPROOF SAFES, CASH AND DEED BOXES.

Complete lists of sizes and prices may be had on application.

CHUBB AND SON,

57 ST. PAUL'S CHURCHYARD, LONDON;
28 Lord-street, Liverpool; 16 Market-place, Manchester, and Wolverhampton. (4)

ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street, Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 150 feet in length, to work by Hand or Steam Power.

Hot-water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (44)

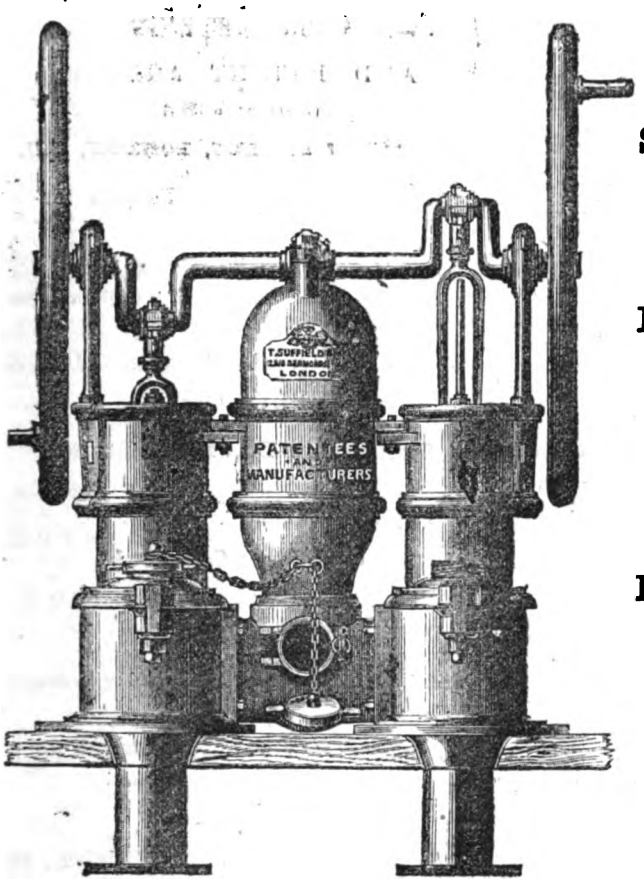
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS. SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

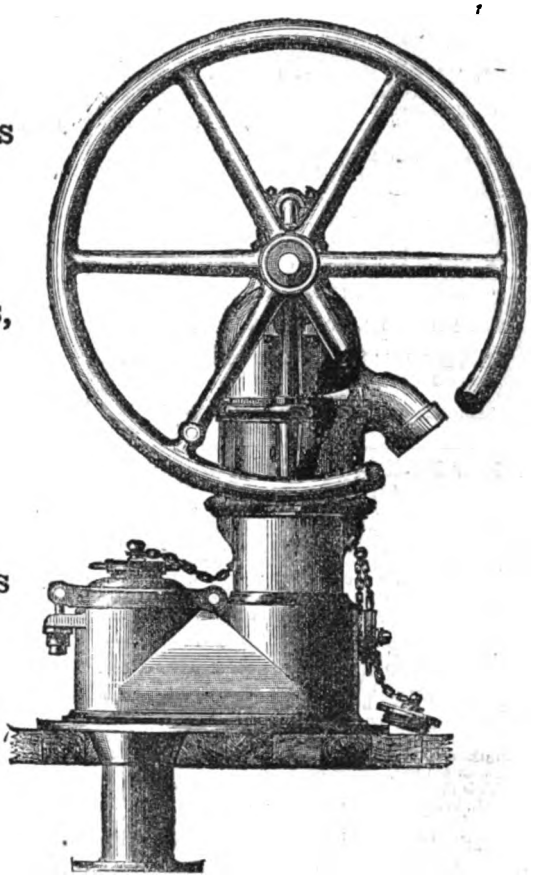
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangement either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps; the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board: the rapidity with which they can be converted into Fire Pumps, or be applied to th Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Works Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require such Stores, together with a further saving the cost of such Articles.

DEPOT, 116 FENCHURCH STREET, E.C.,

BY HER MAJESTY'S ROYAL LETTERS PATENT.

PATENT SPHERICAL SELF-ADJUSTING BEARINGS, which do not heat in work. The advantages possessed by these Bearings are:—

1st. They are Self-adjusting; and, consequently, can be put down by the most ordinary Mechanic.
2nd. They are not liable to heat, even at high speeds.
3rd. They remain constantly parellel to the Spindle; and, therefore, wear equally all across the Bearing.
4th. They require only a very small quantity of oil.

Engravings and Prices forwarded on application to the Patentees.

WALLIS & HASLAM,
Engineers and Iron Founders, North Hants Iron Works, Basingstoke. (121)

RANSOME'S PATENTED PROCESS FOR PRESERVING STONE, CEMENT, STUCCO, &c.—By this process the softest and most friable Stone, Cement, or Stucco, can be rendered Impervious and Imperishable, DECAY AT ONCE ARRESTED AND PREVENTED.

For Particulars, Specimens, Illustrations, and Agencies, apply to Mr. Frederick Ransome, Whitehall Wharf, Cannon-row, Westminster; or Patent Stone Works, Ipswich. A Liberal Discount allowed to the Trade or to Shippers. (170)

EMIGRATION TO NEW YORK, CANADA, AUSTRALIA, NEW ZEALAND, EAST INDIES, CAPE OF GOOD HOPE, &c. All Classes of Passengers booked throughout in the Finest Steam and Sailing Packets. Full Particulars in our circulars for 1859, may be had gratis on application to F. S. GRAY and Co., 54 King William Street, City, and 6 Tower Hill, London; and at 35 Bath Street, Liverpool. (187)

INDIA-RUBBER VALVES FOR STEAM ENGINES, PUMP PACKING, &c.—Explanatory Drawings and Information as to the best modes of fitting and arranging the above, and all other Mechanical Applications of VULCANISED INDIA-RUBBER, are furnished post-free by

CHARLES MACINTOSH & Co., Patentees,
Cambridge-st., Manchester, and 3 Cannon-st. West, London.
MANUFACTORY and DEPÔT, Cambridge-st., Manchester.
GENERAL WAREHOUSE, 3 Cannon-street West, London, E.C.—C. M. and Co.'s only Establishments. (139)

ENGINEERING AND MECHANICAL DRAWING CLASSES.—Instruction given in Engineering and Mechanical Drawing, comprising the preparation of plans, elevations, and sections of marine and locomotive engines, with the detail and working drawings; also the method of delineating screws, bevel wheels, &c.; orthographical projection, and tinting, shading, and colouring taught.—For prospectuses of the Day and Evening Classes apply to Mr. T. J. HILL, at the offices, 15, Old-street, City-road. (73)

BRICKS.

TO BE LET, with immediate possession, in consequence of the death of the proprietor, J. M. Paine, the DIPPENHALL SILICA FACTORY, erected for the purpose of making improved Fire Bricks, Building Bricks, Paving Tiles, &c., &c., from the Soluble Silica Rock.

Apply to view the Buildings and Bricks to G. H. Ogston Esq., Resident Manager, Dippenhall, Farnham, Surrey, and for terms, to Messrs. Nicholls and Potter, Solicitors, Farnham. (125)

ENGINEERING BUSINESS FOR SALE.

OWING to the continued ill health of the Proprietor, the first-class business of an Engineer and Crane and Block Maker is offered for sale. It has been established in the Metropolis for nearly 30 years, and has enjoyed extensive patronage amongst Brewers, Manufacturers, Warehousemen, and others, in and about London; the business done amounting to nearly £8,000 per annum. About £3,200 would be required, (part of which, however, may remain for any reasonable time on good security,) which is the bare value of the tools, patterns, and stock in trade. The premises, including good dwelling-house, very conveniently situated, and capable of accommodating from 60 to 70 hands, are held upon a long lease, at an extraordinary low rental, not exceeding £100 per annum, taxes included. Many of the tools are nearly new, and of the best construction. The present proprietor, who relinquishes the business solely on account of ill health, would give every assistance in his power to those succeeding him; and as his foreman, who has been with him for nearly ten years, is thoroughly acquainted with the practical parts of the business, any gentleman desirous of commencing as a manufacturing engineer would find the present a very favourable opportunity. As all accounts have been, for many years past, collected quarterly, a very small amount, say £800, would suffice as working capital. Full particulars may be obtained by application to E. E. ALLEN, Esq., MECHANICS' MAGAZINE Office, 166 Fleet Street, E.C. (130)

FOG WHISTLES, for Seagoing Steamers.

WATER GAUGE MOUNTINGS, for Marine and Land Boilers.

GAUGE COCKS, GLAND COCKS, GREASE COCKS, CUPS and SYPHONS.

STEAM TAPS, RANGE COCKS, &c.

IMPROVED BRASS VALVES, for Steam, Water, and Gas.

W. T. HENDRY & Co., Engineers.
38 Upper Thames-street, London, E.C. (153)

REMARKS.—Since the receipt of the favourable news as to continental politics a much better feeling prevails, and a moderate amount of business has been done without any alteration of a material character in price.

LAWRIE AND HAGGER, Metal Brokers.
33 Lombard-street, E.C.

IRON AND OTHER METALS.

[FROM OUR OWN CORRESPONDENT.]

State of the Iron Trade Generally.—Glasgow Pig Iron Market: Increased Shipments.—Yorkshire, Derbyshire, and Lancashire District.—Monmouthshire and South Wales: Brightening Prospects.—Hardware and General Trades of Birmingham and Wolverhampton.—Cutlery and Hardware Trades of Sheffield.—The Metal Market: Prices Steady.

THE disturbed state of the Continent has continued to produce unfavourable impression on the iron trade. The news, however, received on Monday last, as to the probability of an European Congress on the Italian question, cannot fail to inspire strong hopes in the minds of all that peace will be preserved, and thus produce a beneficial effect not only upon the iron trade, but on the commercial transactions generally. Although orders from the United States and the Continent are not so large as were at one time expected, the demand for home requirements is good; a fair proportion of the works in most of the districts are in pretty full employment.

At Glasgow, on Tuesday, No. 1 realized from 52s. 9d. to 53s. 6d.; Mixed Nos., warrants, 51s. 3d. to 51s. 6d.; Mixed Nos., maker's iron, 52s. 9d. to 53s. 0d.; No. 3, 52s. 9d. to 53s. 0d. Market steady. Shipped this week, 14,891; corresponding week last year, 6,578.

In Yorkshire, Derbyshire, and Lancashire, orders are on the increase, especially from India and our other chief colonies, for which markets some large orders are now under execution. The orders for railway iron are in the ascendant. Pig iron is tightening. The total shipments are in favour of this year as compared with last.

In Monmouthshire and South Wales the general state of the iron trade in both its malleable and also its pig branches is satisfactory, considering the time of the quarter and the general state of home and foreign politics. Future prospects are regarded as brightening.

In South Staffordshire the houses continue to be well supplied with orders, and it is said to be the intention of the leading members of the trade at the ensuing preliminary meeting, not to advocate any alteration in existing rates.

The inquiry for railway iron is on the increase; but few of the orders find their way into South Staffordshire or East Worcestershire.

The pig trade is rather brisk, and for first-rate qualities the price remains firm, but for inferior makes there has been a slight giving way. At Wolverhampton on Wednesday prices of all descriptions were decidedly firmer than was the case last week.

In the hardware trades of Birmingham and Wolverhampton there is a pretty good demand, so far as the home market is concerned. The accounts from Scotland are decidedly more favourable, although the demand for that market is still small. The foreign trade is generally dull, and most of the orders for the United States and Canada for what is known as the fall trade, have been received, and a large portion executed.

The factors' reports as to the condition of the country trade are upon the whole of a satisfactory character. There is evidence of a disposition to withhold orders from the manufacturers as the end of the quarter draws near, which may be regarded as an indication that the factors' themselves are not much pressed by their customers; but the season trade has been upon the whole beyond the average. At the present moment there are few instances in which anything approaching to slackness prevails, and through the whole of the quarter there has been little if any working for stocks. In some of the fancy trades they are looking up orders rather anxiously; but in the great bulk of the trades the workmen are making as much time as they choose to do, and there are few of any class out of employment.

Respecting the hardware and cutlery trades of Sheffield we learn that a few manufacturers are busy, but that others are with reason complaining of having but little to do. The expectations of those who are fully engaged are a little more hopeful with regard to the future than they were last week.

The metal market continues quiet but firm, a contemplated further rise in copper being on consideration deemed expedient.

LIST OF MISCELLANEOUS TENDERS INVITED, AND ENGAGEMENTS OPEN.

The tenders and vacancies which appear in this weekly list are not repeated in succeeding numbers.

DREDGING, *Great Yarmouth.*—Dredging and deepening of the channel of the Breydon (700 yards) and parts of the haven. Forms of tender from Isaac Preston, clerk to the commissioners. Further information from the Pier Master, April 11.

RAILWAY STATION, *Bacup, East Lancashire.*—Plans at the engineer's office, Bury Station. Tenders to Mr. Miles Fenton, Secretary, 5th April.

ENGINE STABLE, *North Eastern Railway, Gateshead.*—Iron roof. Plans, &c., Mr. Thos. Prosser, architect, Central Station, Newcastle-on-Tyne. Tenders to Mr. J. Cleghorn, Secretary, 13th April.

PERMANENT WAY STORES, *London and North Western Railway.*—No 1. sleepers. 2. Keys and treenails. 3. Fish-plates. 4. Chairs. 5. Spikes, bolts, and nuts. Specifications and forms of tender, Euston Station, London.

ST. PATRICK'S BRIDGE, *Cork.*—For rebuilding, according to plans, &c., at the office of city engineer, 20 South Mall. Tenders April 7.

SEWERAGE WORKS, *Brighton.*—For construction of tubular iron outfall, &c. Drawings, &c., borough surveyor, town hall, March 31.

CEMETERY, *Walcote, Bath.*—Designs for two mortuary chapels, entrance lodge, gateways, boundary walls, &c., in the parish of Wesson. Particulars, Mr. Williams, 1, Fountain Buildings, Bath. No date.

INFIRMARY, *Ashton-under-Lyne.* Detailed plans, elevations, and general description; to be erected at Chamber Hill. £100 for the best, and £50 for the second best plans. Plan of site, &c., Mr. H. T. Darnton, Hon. Sec. to the Committee, 88 Old-street, Ashton-under-Lyne. Plans to April 30.

CORFE CASTLE CHURCH, *Dorsetshire.*—Restoration, &c. Plans, &c., town-hall, Corfe Castle, on application to R. Taylor, Esq., churchwarden, to whom tenders, April 5.

MAINDEE CHURCH, *near Newport, Monmouthshire.*—Plant, &c., of Pritchard and Liddon, Llandaff; and 6 Whitehall, London. Tenders, 11 o'clock, April 6, T. M. Llewellin, Esq., Hon. Sec., Newport; of whom quantities, for a guinea.

CHAPEL, *Wednesfield Heath, near Wolverhampton.*—Plans at the office of Mr. George Bidlake, architect. Tenders to Mr. H. Summerhill, Heath Street, Wednesfield Heath, to 20th April.

CHAPEL, *Middleton, near Manchester.*—Plans in the schoolroom, near the Congregational Chapel. Tenders to the Honorary Secretary, Mr. Clement Kemp, Parkfield Mill, Middleton, April 11.

SCHOOLS AND MASTER'S RESIDENCE, *Wombourne, Staffordshire.*—Plans, &c., Mr. Bidlake, architect, Whampton, to whom tenders, April 11.

THE SAME, *Rawington.*—Plans, &c., Mr. G. T. Robinson, 8, Priory Row, Coventry. Tenders April 17, Rev. P. B. Brodie, Rawington, Warwick.

NEW NATIONAL SCHOOLS AND TEACHERS' HOUSES, *Bloxwich, Staffordshire.*—Tenders to C. Somerville, M.D., Hon. Sec., of whom further particulars. No date given.

VICARAGE, *Beeston.*—Plans, &c., Mr. F. Bakewell, architect, Thurland-street, Nottingham.

RECTORY HOUSE, *Abbess Roding, Essex.*—Time extended to April 4. Plans, Beadel and Co., Chelmsford.

MILITIA STOREHOUSE, *Bodmin.*—Designs of Cap. Alms, Military Orderly Rooms, Castle-street, Bodmin. Tenders April 4.

POLICE STATIONS, *Cornwall.*—At Torpoint, Menhenist, and St. Cleer. Drawings, &c., for that of Torpoint, Serjeant of County Police, Torpoint; and for Menhenist and St. Cleer, of the Inspector of County Police, Dubwalls, near Liskeard, until the 31st ult. Tenders April 2.

BANKING-HOUSE AND RESIDENCE, *Hertford.*—Plans, &c., Mr. Wm. Wilds, architect and surveyor, Hertford, on and after March 28.

HOUSES, *London.*—Taking down and re-building 28 Addle-street, City. Particulars, Mr. R. Parris, architect, 5 Walsingham-place, Lambeth. No date given.

VILLA, *Headingly.*—Extensions, North Hill. Drawings, &c., Mr. G. Smith, surveyor, 117 Park-lane, Leeds. No date.

SHEDS, *Alford.*—Masons', carpenters', and slaters' works, for the Aberdeen Commercial Company and the Aberdeen Lime Company. Plans at W. Henderson and Son's, architects, 66 Lock-street. March 30.

CARRIAGEWAY, *Maida Hill.*—In a street called Hall Place. Particulars, Mr. Tidy, builder, 36 Titchborne-street, Edgeware-road. March 31.

SCAVENGING, *Wigan.*—For three or five years. Specifications and forms of tender of the Surveyor to the Board, 67 Wallgate. Tenders, noon, April 6.

SURVEY, *St. Leonard's.*—For surveying and mapping the parish of St. Leonard's. Particulars, Mr. John Phillips, solicitor, Hastings. March 29.

DESIGNS FOR JEW'S HOSPITAL, *Mile End Road.*—Time extended to May 2.

FOREMAN ENGINEER.—To superintend the designing and construction of marine and land engines and other machinery. Gourlay, Brothers, and Co., engineers and iron shipbuilders, Dundee.

CLERK OF WORKS.—Experienced in pile-driving and tide work. Terms, age, and references, to "L. B.," *Builder* office.

ARCHITECTURAL DRAUGHTSMAN.—Practically versed in building, with a knowledge of drainage works, &c. Apply as next above.

THE SAME.—Knowledge of perspective essential. Salary £150. "Architect," Deacon's Coffee House, Walbrook, E.C.

METAL ROLLERS.—A Foreman, to take the management of a rolling-mill. Mr. S. Walker, Rolling Wire and Tube Mills, Lower Fazeley-street, Birmingham.

PRACTICAL PUDDLER.—To manage that department. Apply to Bollkaw and Vaughan, Middlesbro'-on-Tees.

TOPOGRAPHICAL DRAUGHTSMAN.—A foreigner who speaks English. To go to South America, and get up drawings of railway works: a knowledge of engineering, field-work, &c. Salary, £400 to £500. Wm. Fairbairn and Son, Manchester.

WORKING FOREMAN OF MASONS.—Permanent, if suited. Address, with references and terms, to "A. B.," Post-office, Leicester.

TIMBER MERCHANTS' FOREMEN.—To undertake the management of timber-yard, &c. X. Y. Z., Messrs. Leathwaite and Simmons, 1 Pope's Head-alley, Cornhill, E.C.

GAS-WORKS ENGINEER, *Borough of Salford.*—Make of gas 170,000,000 feet per annum; additional works in course of erection. Clay retorts used. No house. State time when can enter on service, and salary. Tenders, Mr. C. Gibson, town clerk, April 11.

GLADSTONE & Co., CONTRACTORS and ENGINEERS.
2 John-Street, Minories, London, E.C.,
Are prepared to ESTIMATE FOR and CONSTRUCT BRIDGES, PIERS, JETTIES, &c., in Iron, Wood, or Stone. Also to supply Cranes, Girders, Turntables, and Railway Work and Plant generally. (56)

MATHEMATICAL DRAWING INSTRUMENTS, RULES, TAPES, CHAINS, LEVELS, THEODOLITES, BOX SEXTANTS, PRISMATIC and POCKET COMPASSES. Price Lists of the above articles sent post free, by JOHN ARCHBUTT, 20 Westminster Bridge Road, Lambeth, near Astley's Theatre. Every article warranted, and the prices will be found considerably lower than ever before charged for articles of similar quality. Routledge's Engineers' Slide Rules, 4s. 6d. each; Hawthorn's ditto, 5s. 6d.; Carpenters' Rules from 1s. (148)

EDWIN JEWITT, ENGRAVER ON WOOD AND DRAFTSMAN, 1 Pickett-place, Strand, near Temple-bar. Engineering, Scientific, and Mechanical Designs accurately engraved. Manufacturers and Tradesmen's Catalogues Illustrated. W.C. (84)

ENGINEERS' TOOLS.

FOR SALE, a Self-acting Slide LATHE, 11-inch Centres, and Bed 12 feet long, complete; and TWO PORTABLE PUNCHING and CUTTING MACHINES, one suitable for ½-inch plates, and the other for ¾-inch plates, both adapted for steam or hand power.
Apply to Messrs. PAGE & CAMERON, 64 Old Broad Street, E.C. (117)

VITRIFIED BLUE BRICKS are delivered at the Nine Elms Station, London, at 80s. per 1,000.—Address, G. H. OGSTON, J. M. Paine's Silica Works, Farnham, Surrey. (36)

TO WIRE ROPE MAKERS.—ARCHIBALD SMITH is now prepared to GRANT LICENCES for the use of his PATENT ROPE MACHINERY, guaranteed to work at six times the speed of any other, and to save upwards of fifty per cent. in the cost of making. It is used by the most eminent makers, and was also in the manufacture of the Atlantic Cable.—Apply to 69 Princes-street, Leicester-square, W. (8)

TO ENGINEERS, MILLOWNERS, AND MANUFACTURERS.

AMERICAN INDIA-RUBBER Machine Belting, Valves and Washers, Brewers' Hose, Fire Engine Hose, Improved Suction Hose—at Wholesale Prices.
W. T. HENDRY & CO.,
38 Upper Thames-street, London, E.C. (152)

WATER GAUGES—WATER GAUGES.—Sir,—We find your German Gauge Tube superior to any other, and strongly recommend it. We were compelled to abandon the use of our water gauge until applying your glass tube.
WILCOX and Co., Millwall Pottery Company.

These Tubes are superior to all others; being a clear white, no mistake can arise in working. Guaranteed to stand a pressure of 500 lb.

Extensively used on all the principal lines.

To be had only of E. MOORE, 55 Upper Marylebone-street, W.; and 72 Great Titchfield-street, W.

*** Price List of Gauge Fittings, &c., on application. (98)

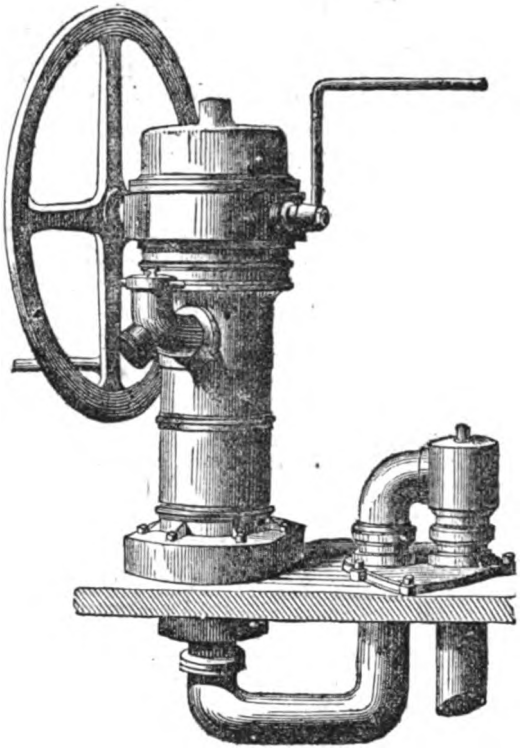
Under the Patronage of the Board of Admiralty.

SHIPS' PUMPS OF HER MAJESTY'S NAVY.

JOSIAH STONE,

Sole Manufacturer of DOWNTON'S well-known and much approved SHIPS' PUMPS, which have been used in preference to all others on board the vessels of Her Majesty's Navy, for upwards of thirty years, and have given the greatest satisfaction, effectually answering all the purposes required of any Ships' Pumps, and capable of throwing most powerful jets of water in case of fire.



These Pumps have also been most extensively used on board merchant vessels, both at home and abroad, and have been supplied to the Royal Navies of France, Prussia, Holland, Russia, Spain, and Turkey. The Pumps are portable, as they may be easily removed from the ship and put to work in a boat alongside in a few minutes. Each pump is fitted with a large foot valve plate (which may be placed in any part of the vessel most convenient), and from which communication is made to any number of distinct compartments in the vessel. In case of any of these pipes fouling, the water, by an almost momentary attachment, may be forced from the Pump downwards, so as to clear all obstructions, preventing any possibility of stoppage. The valves are of the simplest description, and being faced with ordinary leather discs, the latter may be renewed in a few minutes by the most inexperienced hands. By the peculiar construction of these Pumps, a most perfect and uninterrupted flow of water may be maintained; so uniform as to be undistinguishable from that proceeding from a cistern. The Pumps are made of several sizes, those of 7, 9, and 12 inches bore being most generally used. They may, however, be ordered of any dimensions required, and may be fitted either with one or two fly wheels. A standard, &c., is also supplied with these Pumps, to enable them, when necessary, to be used as ordinary hand-lever pumps.

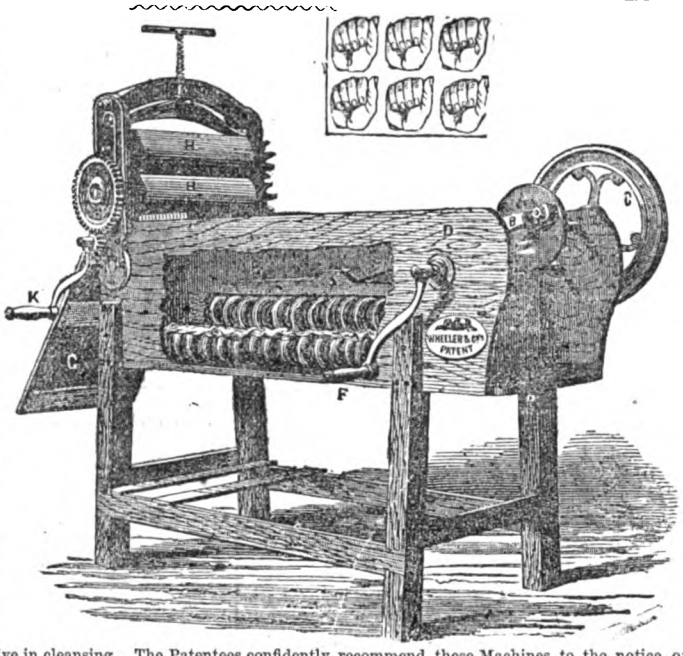
JOSIAH STONE, Engineer, Manufacturer of all descriptions of PUMPS and FIRE ENGINES for Land and Ships' Use; Brass and Iron Founder and Finisher, Nail and Rivet Maker, &c.

CONTRACTORS FOR FIRE-ENGINES, ETC., TO THE WAR DEPARTMENT,

RAILWAY STATION, DEPTFORD, AND 12 GARLICK HILL, CITY, E.C.

(97)

T. WHEELER AND CO.'S
'OXONIAN KNUCKLE WASHING MACHINE."



THE Improvements in these New Inventions are the non-exposure of the user's hands to the dangerous parts of the Machine, and the rapidity with which the work is done. These Machines have neither bands or wheels passing on the outside, wherein lies the liability to accident. The rubbers are the truest representation of the knuckles or hand washing yet brought out; the compensating floating rubbers work at right angles, backward and forward, in the same manner as does the hands. These Machines can be supplied with rubbers that represent a person's hand in the action of rubbing; the knuckles, finger nails, and palm of the hand being truly modelled. They are capable of Washing Clothes of every description whatsoever, the largest bedding to the most delicate piece of muslin can be washed without breaking a single thread; in fact, such is the delicacy of the action of these Machines, that the paper you are now reading can be passed between the rubbers without sustaining any injury, at the same time being thoroughly effective in cleansing. The Patentees confidently recommend these Machines to the notice of Laundresses, Heads of Families, Hotels, Emigrants, &c. So simple is the action of this Machine, that a boy or girl of 10 or 12 years of age can work it; the only skill required is to soak the clothes one hour before placing them in the Machine, placing a portion of the clothes at the handle end of the Machine; laying on the rubbers a part of them; turn the handle, and the clothes will pass through between the rubbers to the opposite end, effecting a saving of at least 50 per cent.

Prices: Washing Machines, £1 6s., £2 6s., £3 6s., £4 10s., £5 15s.; Washing, Wringing, and Mangling, £8 £10 15s., £14 14s.—Full Instructions sent with every Machine. Testimonials or References sent on application.

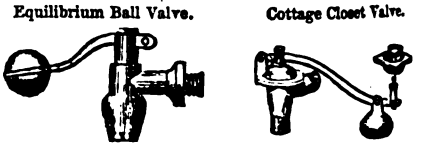
TO BRASS-FOUNDERS, ENGINEERS, &c.

THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings; they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty per cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, muffles, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire-standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. (47)

HIGH-PRESSURE VALVE-COCKS, LAMBERT'S PATENT.

Equilibrium Ball Valve. Cottage Closet Valve.



The Equilibrium Ball-Valve is simple and certain in its action, and is cheaper than the common cocks now in use.

The Cottage Valves are suitable for application to any kind of basin; and, as they shut against the pressure, no concussion in the pipes can possibly occur.

These cocks have been extensively and most successfully used in many towns, under continuous high pressure, varying from 100 to 350 feet; their efficiency and durability is, by experience, established.

THOMAS LAMBERT and SON,

Brass Founders, Short-street, New-cut, Lambeth. (80)

PUMPING MACHINERY.

GWYNNE AND Co., Engineers, London, manufacture and supply the following Machinery, of the most approved construction and with all the latest improvements:—Portable and Fixed Steam-Engines and Boilers of every description; Waterwheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the Supply of Towns, Cities, and Districts, and for the Irrigation of Coffee, Cotton, Indigo, Sugar-cane, and Rice Estates, for pumping out Coffer-dams, Canals, Dry Docks, Reservoirs, &c. They also manufacture and supply the Pumping and other Machinery for Paper, Pulp, and Fulling Mills, Breweries, Distilleries, Tanneries, Starch Works, Bleaching, Dyeing, and Calico Printing Works, Chemical Works, Silk, Cotton, and Flax Mills, and Manufactories in general. All Letters not paid will be refused. Illustrated Price Lists forwarded on receipt of Six Postage Stamps.—GWYNNE AND Co., Hydraulic and Mechanical Engineers, Essex-wharf, Strand, London.

For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (34)

SCOTT'S
PATENT GRASS SEED SEPARATOR,

which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from

PERENNIAL AND ITALIAN RYE-GRASS, &c.,

AND

SCOTT'S PATENT CARROT SEED BEARDING

AND

CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,

which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

Communications to be sent to the Patentee, J. SCOTT, 111 Drummond Street, Euston Square, London, N.W. (48.)

CLAYTON, SHUTTLEWORTH, AND CO.,

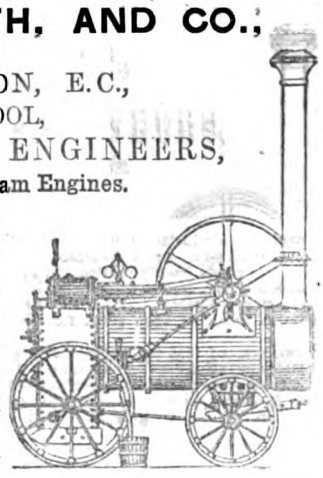
OF LINCOLN,

78 LOMBARD STREET, LONDON, E.C.,

AND 36 DALE STREET, LIVERPOOL,

AGRICULTURAL AND GENERAL ENGINEERS,

And Manufacturers of Portable and Fixed Steam Engines.



Combined Threshing Machines, which dress the corn ready for market at one operation. Grinding Mills, Saw Benches, Pumps for Irrigation and Mining purposes, with all necessary gearing for being driven by steam power. Full particulars and estimates given on application to the above address.

C. S. and Co.'s PORTABLE STEAM ENGINES are adapted for every purpose to which steam-power can be applied. When intended for winding, they are fitted with reversible link motion and winding gear. They are easy of removal, as may be seen by the engraving, and can be set to work immediately on arrival.

C. S. and Co. are now doing an extensive foreign and colonial business, and are prepared to send off engines and machinery of the before-mentioned kinds in a few days from the date of order. They would also call attention to the important *reduction in prices* made for the new year.

For Exportation.---The above can be obtained through British Merchants, Shippers, and Colonial Agents. (23)

VULCANIZED INDIA-RUBBER

In any of the following forms, of any size, or to Working Drawings for all MECHANICAL *purposes:—*

WASHERS for Steam and Gas Joints.	GAS-TUBING.	MACHINE AND MILL-BANDS for Driving all kinds of Machinery.
VALVES for Marine and other Steam Engines.	SUCTION HOSE.	RAILWAY BUFFER SPRINGS.
ENGINE-PACKING (Elastic).	FIRE ENGINE AND FACTORY HOSE.	BALL VALVES.
PUMP-BUCKETS ,,	WATERPROOF CART, VAN, AND WAGGON COVERS.	PUMP-PACKING (Rings or Rope).
HOSE-PIPES.		WHEEL-TIRES (Noiseless).

[N.B.—A Large Stock of the above always on hand, and any modification made to order.

Please address all communications to the Manufactory,

JAMES LYNE HANCOCK, VULCANIZED INDIA-RUBBER WORKS

Goswell Road, London, E.C. (85)

GAS EXPLOSIONS PREVENTED.

USE THE TUBES AND FITTINGS MADE BY JOHN RUSSELL and Co. (Established at the commencement of gas-lighting), whose goods are all well tested, and warranted.

J. R. and Co. supplied Thomas Cubitt, Esq., for all his houses in Belgravia, the Queen's Palace, &c., which locality is proverbially free from gas.

J. R. and Co. are the Inventors of the Lap-Welded Tubes for Steam Boilers, and have recently obtained a Patent for an improvement in them.

J. R. and Co. are the holders of the First Prize Medals for Gas-Tubes and Fittings and Boiler Tubes.

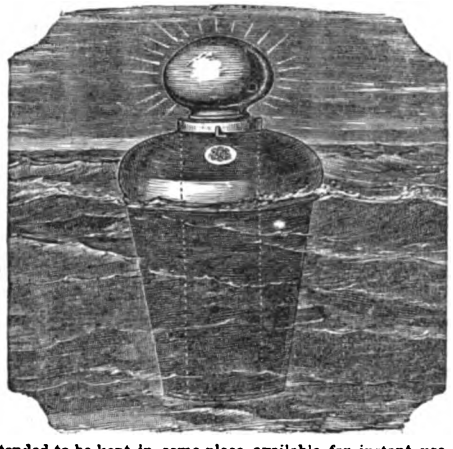
(193)

GRESHAM'S RECORD PATENT BUOY.



The RECORD BUOY is intended to be kept in some place available for instant use, and to be thrown overboard from a sinking ship, or a Vessel on Fire, so as to intimate disaster, having a paper inserted therein, already filled up with the Ship's Name, Port of Registry, Official Number, &c., and a few last words hastily written, intimating the nature of the calamity, with any further information that can be given at such a time. It has capacity and buoyancy to contain besides these, the Log-Book, and several pounds' weight of Papers or Valuables. It is lined with Cork between the Cylinder and outside case, so that, although waterlogged, it will not sink, but keep afloat for a long time, probably for years.

In order to DISTINGUISH IT FROM ANY OTHER FLOATING SUBSTANCE, so that the Captain of a passing Ship may recognize it as an intimation of disaster, and consider it a sacred and imperative duty to pick it up and convey the information it contains according to the directions found within, it HAS RAISED CONSPICUOUSLY UPON ITS SURFACE A SILVERED GLOBE, which, owing to the reflection of the light, will make it visible at a great distance, and when dancing on the wave it shines, in fact, like a star in the firmament, and being distinguishable from anything else, its character cannot be mistaken.

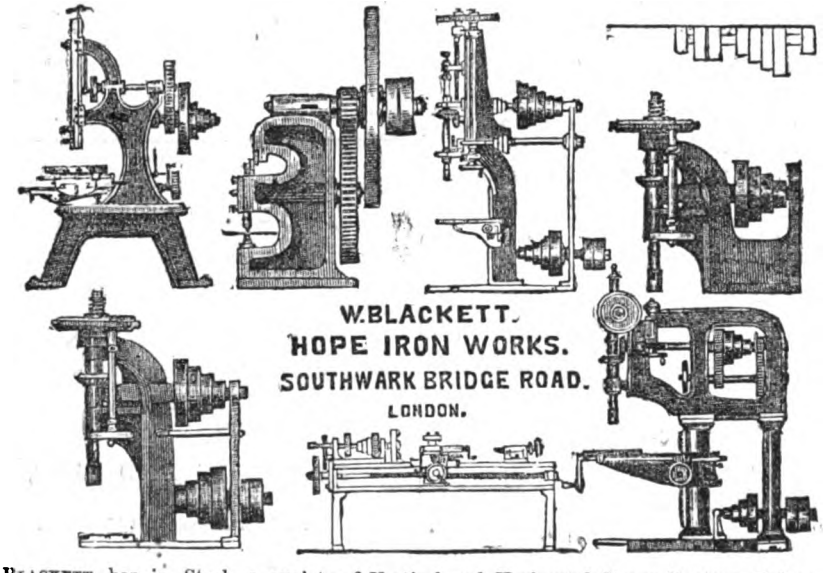
It is furnished with ample directions to the finder how to act, and has Envelopes already directed to the proper authorities, who, on receipt thereof (and they should be transmitted by the first available means), will, after verifying them to prevent imposition, immediately convey the information to the owners of the lost Ship, to Lloyd's, and all parties concerned; and if a foreign ship, to the consul of the nation to which she belongs.

In order to establish uniformity, and to prevent the uncertainty and confusion which a multiplicity of Buoys of various forms might occasion, when their utility becomes apparent, and to make ESPECIAL RECOGNITION OF THESE UNDOUBTED, MR. JOHN GRESHAM, J.P. and Alderman of Hull, has Patented his Invention, and has arranged with the old-established Firm of

GEORGE & JOSEPH OLIVER,

286 WAPPING, LONDON, E.,

TO MANUFACTURE AND SUPPLY THEM, AND TO WHOM ALL COMMUNICATIONS SHOULD BE ADDRESSED. (194)



W. BLACKETT has in Stock a variety of Vertical and Horizontal Steam Engines, Boilers, and Engineers' Tools, ready for delivery on the shortest notice. Apply as above. (70)

IMPORTANT TO MANUFACTURERS, MILL OWNERS, &c.

GUTTA PERCHA MILL BANDS.

THE GUTTA PERCHA COMPANY beg to state that the increasing demand for the Gutta Percha Strapping for Driving-bands, Lathe-straps, &c., fully justifies the strong recommendations they have everywhere received.

Their durability and strength—permanent contractability and uniformity of substance—their non-susceptibility of injury from contact with oils, grease, acids, alkalies, or water—and the facility with which the only joint required can be made in bands of from 200 to 300 feet long—render them superior to leather for almost all working purposes, and decidedly more economical.

TESTIMONIALS.

IMPORTANT ANNUAL SAVING.

From TRUMAN, HANBURY, BUXTON, & Co., Brewery, London.

"In reply to your inquiry, we have much pleasure in bearing our testimony to the advantages, both as regards economy and saving of time, effected by the use of your Patent Gutta Percha Bands in lieu of Leather Straps. The stoppage of one portion of our works through the failing of the leather strap used to be of daily occurrence—but with this annoyance we are now never troubled. We have had these straps in operation for nearly three years, and are assured by our Engineer that *they effect a saving to us of at least* THIRTY POUNDS *a year.*"

From JAMES ABERNETHY & Co., Fury Hill Foundry Aberdeen.

"We have now had Gutta Percha Bands working here *for three years.* One of them has been driving the fan blast for our smith's shop for all that time, and for anything we see, may drive it as long again. The speed of the fan is but 1,200 per minute. We have used them with complete satisfaction, driving circular saws, and in some cases where leather bands would have been quite inapplicable from damp. We have uniformly endeavoured to have the drums and pulleys so proportioned to the strain, as that there is no chance of the band slipping; and with this precaution, and taking care in using *cross bands that they do not rub*, we are quite satisfied that they are superior in every respect to leather—stronger at the same weight, and keeping quite straight in working—requiring no lacings, and very seldom any repairs."

WATER POISONED BY LEADEN PIPES.

The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dick, of Bonchurch, Isle of Wight.

POISONED WATER PREVENTABLE

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha Tubing. Nothing can be better. I have also recommended it to others, who have adopted the expedient."

A variety of Gutta Percha Articles, such as Mill Bands, Tubing, Sheet, Soles, Pump Buckets, Bosses, Union Joints, Bottles, Bowls, Flasks, Curtain and Cornice Rings, Solid Frames, Galvanic Batteries, &c., &c.

SOCIETY OF ARTS.—The Eleventh Annual Exhibition of Inventions will open on the 25th day of April, 1859. The days fixed for receiving articles intended for exhibition are Thursday the 7th, Friday the 8th, and Saturday the 9th April. No charge is made for space, and the Exhibition is Free.

Intending exhibitors should communicate at once with the Secretary. By order,

P. LE NEVE FOSTER, Secretary.

Society House, John-street, Adelphi, 1st March, 1859. (171)

THE SETTING of STEAM-ENGINE VALVES is properly effected by the use of Hopkinson's IMPROVED Steam-Engine Indicator and Book, (second edition). Steam-Engine Explained, PRICE £4 4s.

J. HOPKINSON and CO., Engineers, Britannia Works, Huddersfield. (200)

TO MARINE ENGINEERS, OR SHIP-BUILDERS.

THE PROPRIETOR of a VALUABLE PATENT for Double-expansive Marine Engines (by which great economy of space and fuel is obtained) is desirous of entering into arrangements with a respectable firm for the construction of the same. An adequate portion of the patent-right would be assigned by the advertiser to any firm taking the matter up; and he would render all assistance in his power, either in London or elsewhere, amongst ship-owners (to many of whom he is well known), in obtaining contracts, &c. Unexceptionable references given. Address C. E., MECHANICS' MAGAZINE Office, 166, Fleet-street. (76

ENORMOUS REDUCTION IN THE COST OF STEAM POWER.

TO RAILWAY COMPANIES, STEAM SHIP PROPRIETORS, AND MANUFACTURERS.—A saving of Fuel equal to one-third of the entire consumption is effected by the introduction of "DUNCAN'S PATENT SPIRAL HEAT DIFFUSERS," which arrest the heat in its passage through the flues or tubes, and convert into impelling power the large measure that without these appliances would (even in the very best boilers) escape along with the smoke. They can be fitted in an hour or two at a small cost, and without any alteration in the existing arrangements of boilers now in use. These results are prepared to be guaranteed, and a part of the value of fuel saved by the use of the Apparatus will be accepted for royalty.

Hitherto, steam navigation to distant parts of the world has proved a commercial failure. The remedy is provided, and the vast numbers of large and splendid vessels can soon be made valuable paying property.

Further information may be had on application to GWYNNE and CO., Engineers, Essex-street Wharves, Strand, W.C.; London. (167)

HART & SON, MALLEABLE IRON-FOUNDERS, 4 Vine-street, York-road, Lambeth. Orders for Malleable Iron Castings executed within a week. (77)

FOR SALE.

A 12-HORSE HORIZONTAL STEAM ENGINE and a 4-HORSE DIRECT ACTING STEAM ENGINE, with Fly-wheel Governors, &c., complete. Address, W. F. Plummer, 12 Albany-road, Camberwell. (188)

AT THE BUILDERS' SALE GROUND,

23 and 24 Marylebone Road, Regent's Park, W., (Adjoining the Workhouse.)

TO BUILDERS, FARMERS, DEALERS, AND OTHERS.

MESSRS. BOOTH & CO., will Sell by Auction, on Tuesday next, an Excellent Assortment of Building Materials; 30 Marble Chimney-Pieces; 900 Yellow Deals, Battens, and Pine Planks; 3,500 feet of New Scantling and Cut Stuff; 105 Squares of excellent ¾, 1¼ and 1-inch Dry Yellow Flooring; 75 Pair of New Sashes; A few Oak Spokes and Ash Felloes; Second-hand Shop-Fronts, Doors, Sashes, and Frames, glazed with plate and other glass; Carpenter's and Engineer's Patterns and Tools; 90 Oil Stones; New Shovels; Coach-Screws, Bolts, and Blank Nuts; Iron Doors; and Columus' Patent Water-Closets; Various Machines and other effects. On View the Monday prior and morning of Sale.

Catalogues on the Premises, and of the Auctioneer, 13 Eastcheap, London, E.C.; or by Post for one stamp. (203)

TO MANUFACTURERS, THE ENGINEERING, MECHANICAL, & BUILDING TRADES GENERALLY.

MESSRS. BOOTH & CO., AUCTIONEERS and BUILDERS' SALESMEN, having opened Registers for Public and Private Sales of all kinds of JOB LOTS, Surplus Stock, Stores, Tools, Implements, &c., &c., (either Old or New,) beg to call the attention of all parties to the only medium established of the kind, and to state that they are prepared to receive consignments of any weight, bulk, or value, and of any class of Goods for immediate Sale. Full particulars may be had for two stamps, at the BUILDING TRADES REGISTRY OFFICES, (established 1857,) 13 EASTCHEAP, LONDON, E.C. The Public Sales by Auction are held Weekly, on EVERY TUESDAY, at ONE O'CLOCK, and for the present at the BUILDERS' SALE GROUNDS, (established 1858,) 23 and 24 MARYLEBONE ROAD, REGENT'S PARK, W. Catalogues by Post for One Stamp. Advances on New Goods. All communications are held private and confidential. (204)

TO BRASS FOUNDERS.

TO BE SOLD, the Patent-right of a New and Highly-approved EQUILIBRIUM WATER COCK or VALVE, suitable for Steam Boiler Feed Pipes, or any cases where the valve is required to be opened against pressure.

Address H., MECHANICS' MAGAZINE Office, 166 Fleet-st., where a Drawing may be seen. (151)

STEAM ENGINES.

FOR SALE, a superior HIGH PRESSURE HORIZONTAL STEAM ENGINE of 6-horse power, 8-inch cylinder, and 1-foot 6-inch stroke. One of 8-horse power, 10-inch cylinder, and 1-foot 6-inch stroke. One of 10-horse power, 12-inch cylinder, and 2-feet stroke. Two of 14-horse power, 14-inch cylinders, and 2-feet stroke; and one of 30-horse power, 20-inch cylinder, and 3-feet stroke.

Apply to Messrs. PAGE and CAMERON, 64 Old Broad Street, E. C., London. (124)

A VALUABLE PATENT to be DISPOSED OF.—The Patentee will either dispose of the Patent or grant Licences to any party wishing to manufacture, or would join a person with capital to carry out the Patent.

Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (163)

TO ENGINEERS, ARCHITECTS, PATENT AGENTS, &c.

PHOTOGRAPHS OF THE HIGHEST CLASS and of any size, taken and reproduced at a most moderate rate of charge. Reproductions of faultless accuracy, of Machinery, Models, Drawings, &c. Orders attended to in town and country. Estimates forwarded.

SPENCER, READ, & Co., 4 Agar-street, Strand, W.C. (90)

TO COMMERCIAL TRAVELLERS.

WANTED, a Gentleman well-acquainted with Ironmongers, Upholsterers, Coopers, &c., to Travel on Commission.

Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (164)

TO ENGINEERS, INVENTORS, AND OTHERS.

A PRACTICAL ENGINEER of long standing prepares Original Drawings, Copies, and Tracings. Advice and Assistance given to Inventors in working out their Plans. Pupils taught privately. Terms moderate.

Apply to J. J., 171 Strand. (138)

THE COTTON SUPPLY ASSOCIATION.

COTTON GINS.

IMPROVEMENT UPON THE INDIAN CHURKA.

TO COTTON GIN MAKERS, MACHINISTS, AND INVENTORS.

THE Committee of the Cotton Supply Association have received from the Bombay Chamber of Commerce two Indian Churkas, or Hand-roller Gins of native construction, and such as are now used by the natives of India, with the request that they should be submitted to the Machinists of this country, with a view to obtaining, if possible, a superior machine. Your attention is therefore respectfully requested to the construction of this "Churka," which may be seen at the offices of this Association. The objects to be aimed at in the making of an improved machine, are—

1. That the machine do no injury to the cotton, in the process of separating the seed from the fibre. It is said that "no machine can possibly separate the cotton from the seeds with less injury to the staple than does the Churka."
2. That the machine, as far as possible, do rid the cotton from leaf and impurities.
3. That the machine be of simple construction, and durable.
4. That the machine be easily repaired by the native Indian.
5. That it be portable.
6. That the cost be as low as possible. The "Churka" costs only two rupees, or 4s. It is necessary that the improved machine should be within the ability of the natives to purchase.
7. That the machine be able to do its work faithfully, in spite of carelessness or neglect.
8. That the machine be able to clean a fair quantity of cotton per day, with the labour of one person (male or female).

The Committee submit the above conditions to the consideration of Machine Makers, and Mr. Haywood, the Secretary of this Association, will be prepared to afford any further information that may be required.

It is proposed, in furtherance of the wishes of the Bombay Chamber of Commerce, to hold a trial of the merits of the different Gins that may be constructed to meet the above conditions, in two or three months from this date. Due notice of the day of trial will be given.

Premiums of £20, £10, and £5 will be paid by the Association to the exhibitors of the Gins which rank 1st, 2nd, and 3rd in order of merit.

G. R. HAYWOOD, Secretary of the Cotton Supply Association.

1 Newall's Buildings, Manchester, March 25th, 1859. (196)

STEAM ENGINES FOR SALE.

PORTABLE STEAM ENGINES, from 6 to 12 horse power,
STATIONARY STEAM ENGINES, from 4 to 50 horse power,
TUBULAR BOILERS, from 4 to 50 horse power,
CORNISH BOILERS, from 4 to 50 horse power,

Are in hand, and can be despatched on eight days' notice. Prices moderate. Workmanship and Material of the best description.

Apply to R. THORNTON & Co., St. Leonard's Iron Works, Edinburgh. (197)

GLADSTONE & Co., CONTRACTORS and ENGINEERS.

2 John-Street, Minories, London, E.C.,

Are prepared to ESTIMATE FOR and CONSTRUCT BRIDGES, PIERS, JETTIES, &c., in Iron, Wood, or Stone. Also to supply Cranes, Girders, Turntables, and Railway Work and Plant generally. (199)

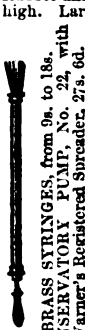
3 ,,	7	5
3½ ,,	8	0

A lighter Pump of 3 inches diameter, can be supplied if required 5 15

IMPROVED LIQUID MANURE, OR GENERAL PORTABLE PUMP.

These Pumps are fitted with J. Warner and Son's Patent Bucket and Sucker, and cannot clog in action. The Barrel is of Galvanized Iron, not likely to corrode, and can be raised or lowered at pleasure. The legs will fold together, and the whole may be carried on shoulder to any pond or tank required.

4½ in. Liquid Manure Pumps, with legs, £3 3s.; 1½ in. Gutta Percha Suction Pipe, 1s. 11d. per foot; 2 in. Flexible Rubber and Canvass Suction Pipe, on Wires, 3s. 3d. per foot. The Barrel is 27½ inches long, and the legs are 5 feet high. Larger sizes of the above if required.



BRASS SYRINGES, from 9s. to 18s.
CONSERVATORY PUMP, No. 22, with Warner's Registered Spreader, 27s. 6d.

Galvanized Iron Tub GARDEN ENGINE, with Warner's Registered Spreader, is strongly recommended for durability and low price, viz., £2 19s., to hold Ten Gallons. Larger sizes, in either wood or iron.

WARNER'S SWING WATER-BARROW.
(To hold Thirty Gallons), £3 3s.,

is intended for all large Establishments where much watering is done by the watering-pot. By its use much time and labour of the Gardener are saved, particularly where the Tank, Pond, or Pump is at a distance from the garden.

MUSICAL SHEEP BELLS, with Straps, in sets of 6, 19s.; ditto, in sets of 8, 25s.; ditto, in sets of 12, 38s.

WARNER'S CATTLE AND SHEEP BELLS, in sets of 6, with Straps, 13s. per set.

Bells for Churches, Chapels, Colleges, Schools, Turret Clocks, &c., cast for any size, note, or weight, singly or in peals. Tuned by machinery. Stocked and wheeled ready for fixing. Old Bells re-cast or taken in exchange.

The great 16-ton Bell, for the Houses of Parliament, was made by JOHN WARNER and SONS, 1856, under their Patent.

May be obtained of any Ironmonger or Plumber, in town and Country; or of the Patentees and Manufacturers, as above. (80)

By Her Majesty's Royal Letters Patent.

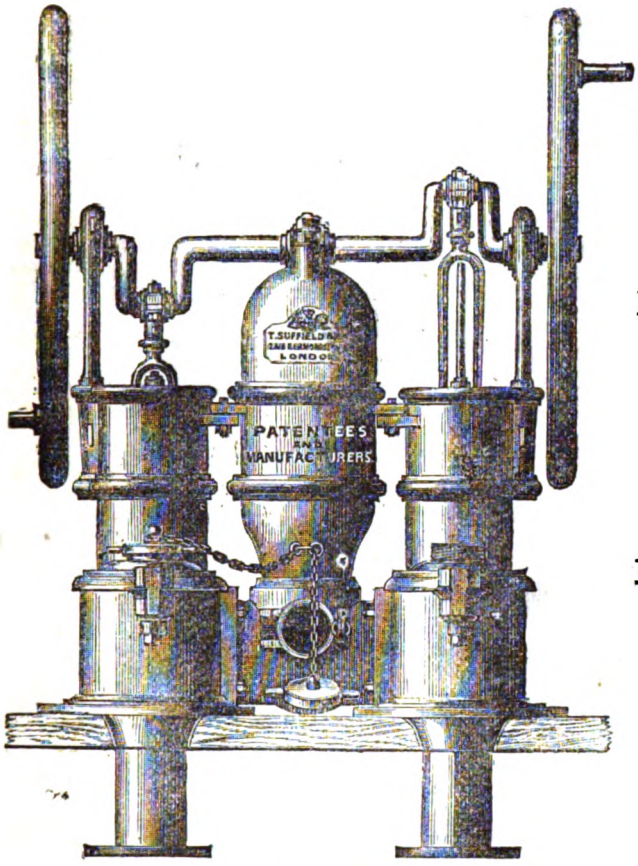
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS. SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

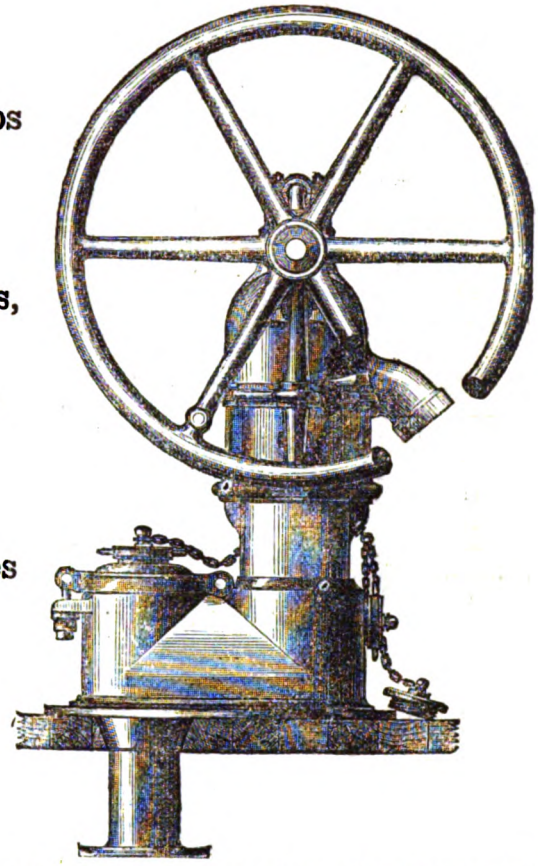
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangemen t either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps, the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board; the rapidity with which they can be converted into Fire Pumps, or be applied to the Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Work Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require such Stores, together with a further saving the cost of such Articles.

Published by W. EVERETT and SON, 34 Bouverie Street, City, E.C. (179)

ENGINEERING BUSINESS FOR SALE.

OWING to the continued ill health of the Proprietor, the first-class business of an Engineer and Crane and Block Maker is offered for sale. It has been established in the Metropolis for nearly 30 years, and has enjoyed extensive patronage amongst Brewers, Manufacturers, Warehousemen, and others, in and about London; the business done amounting to nearly £8,000 per annum. About £3,200 would be required, (part of which, however, may remain for any reasonable time on good security,) which is the bare value of the tools, patterns, and stock in trade. The premises, including good dwelling-house, very conveniently situated, and capable of accommodating from 60 to 70 hands, are held upon a long lease, at an extraordinary low rental, not exceeding £100 per annum, taxes included. Many of the tools are nearly new, and of the best construction. The present proprietor, who relinquishes the business solely on account of ill health, would give every assistance in his power to those succeeding him; and as his foreman, who has been with him for nearly ten years, is thoroughly acquainted with the practical parts of the business, any gentleman desirous of commencing as a manufacturing engineer would find the present a very favourable opportunity. As all accounts have been, for many years past, collected quarterly, a very small amount, say £800, would suffice as working capital. Full particulars may be obtained by application to E. E. Allen, Esq., Mechanics' Magazine Office, 166 Fleet Street, E.C. (130)

ENGINEERING AND MECHANICAL DRAWING CLASSES.—Instruction given in Engineering and Mechanical Drawing, comprising the preparation of plans, elevations, and sections of marine and locomotive engines, with the detail and working drawings; also the method of delineating screws, bevel wheels, &c.; orthographical projection, and tinting, shading, and colouring taught.—For prospectuses of the Day and Evening Classes apply to Mr. T. J. HILL, at the offices, 15, Old-street, City-road. (73)

BRICKS.

TO BE LET, with immediate possession, in consequence of the death of the proprietor, J. M. Paine, the DIPPENHALL SILICA FACTORY, erected for the purpose of making improved Fire Bricks, Building Bricks, Paving Tiles, &c., &c., from the Soluble Silica Rock.

Apply to view the Buildings and Bricks to G. H. Ogston Esq., Resident Manager, Dippenhall, Farnham, Surrey, and for terms, to Messrs. Nicholls and Potter, Solicitors, Farnham. (185)

ENGINEERS' MACHINE TOOLS FOR SALE.

A STRONG & POWERFUL PLANING MACHINE, to plane 6 feet × 30 ins. × 30 ins., self-acting in all its cuts.

A SELF-ACTING TURNING, CROSS-SURFACING, AND SCREW-CUTTING DOUBLE-GEARED GAP LATHE, headstocks, 8 ins. to centres; bed, 10 feet long, with top driving gear.

A SINGLE-POWER DRILLING MANCHINE, complete.

A DOUBLE-GEARED SELF-ACTING BORING AND DRILLING MACHINE, complete.

A SELF-ACTING NUT SHAPING MACHINE.

A BOLT AND NUT SCREWING MACHINE.

A STRONG & POWERFUL STEAM-ARM SHAPING MACHINE, complete.

A NUMBER OF PLATE-IRON PUNCHING AND SHEARING MACHINES, to punch and cut iron from ¼ in. to 1 in. thick; portable to work by hand, and stationary to work by steam power.

A SET OF PLATE-IRON BENDING ROLLERS, to work by hand or steam-power.

Ready for delivery. Inspection invited. Particulars and prices furnished.

J. TODD and Co., Kent Iron Works, Bridge-street, Greenwich. (185)

FOG WHISTLES, for Seagoing Steamers.

WATER GAUGE MOUNTINGS, for Marine and Land Boilers.

GAUGE COCKS, GLAND COCKS, GREASE COCKS, CUPS and SYPHONS.

STEAM TAPS, RANGE COCKS, &c.

IMPROVED BRASS VALVES, for Steam, Water, and Gas.

W. T. HENDRY & Co., Engineers,
38 Upper Thames-street, London, E.C. (153)

TO ENGINEERS, MILLOWNERS, AND MANUFACTURERS.

AMERICAN INDIA-RUBBER Machine Belting, Valves and Washers, Brewers' Hose, Fire Engine Hose, Improved Suction Hose—at Wholesale Prices.

W. T. HENDRY & CO.,
38 Upper Thames-street, London, E.C. (152)

RANSOME'S PATENT STONE FILTERS—of every description for Domestic purposes, for Manufactories, Public Companies, Shipping, &c.

For Particulars, Specimens, Illustrations, and Agencies, apply to Mr. Frederick Ransome, Whitehall Wharf, Cannon-row, Westminster; or Patent Stone Works, Ipswich. A Liberal Discount allowed to the Trade or to Shippers. (170)

ENGINEERS' TOOLS.

FOR SALE, a Self-acting Slide LATHE, 11-inch Centres, and Bed 12 feet long, complete; and TWO PORTABLE PUNCHING and CUTTING MACHINES, one suitable for ½-inch plates, and the other for ⅝-inch plates, both adapted for steam or hand power.

Apply to Messrs. PAGE & CAMERON, 64 Old Broad Street, E.C. (117)

VITRIFIED BLUE BRICKS are delivered at the Nine Elms Station, London, at 80s. per 1,000.—Address, G. H. OGSTON, J. M. Paine's Silica Works, Farnham, Surrey. (36)

TO WIRE ROPE MAKERS.—ARCHIBALD SMITH is now prepared to GRANT LICENCES for the use of his PATENT ROPE MACHINERY, guaranteed to work at six times the speed of any other, and to save upwards of fifty per cent. in the cost of making. It is used by the most eminent makers, and was also in the manufacture of the Atlantic Cable.—Apply to 69 Princes-street, Leicester-square, W. (198)

PUMPING MACHINERY.

GWYNNE AND Co., Engineers, London, manufacture and supply the following Machinery, of the most approved construction and with all the latest improvements:—Portable and Fixed Steam-Engines and Boilers of every description; Waterwheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the Supply of Towns, Cities, and Districts, and for the Irrigation of Coffee, Cotton, Indigo, Sugar-cane, and Rice Estates, for pumping out Coffer-dams, Canals, Dry Docks, Reservoirs, &c. They also manufacture and supply the Pumping and other Machinery for Paper, Pulp, and Fulling Mills, Breweries, Distilleries, Tanneries, Starch Works, Bleaching, Dyeing, and Calico Printing Works, Chemical Works, Silk, Cotton, and Flax Mills, and Manufactories in general. All Letters not paid will be refused. Illustrated Price Lists forwarded on receipt of Six Postage Stamps.—GWYNNE AND Co., Hydraulic and Mechanical Engineers, Essex-wharf, Strand, London.

For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (24)

MATHEMATICAL DRAWING INSTRUMENTS, RULES, TAPES, CHAINS, LEVELS, THEODOLITES, BOX SEXTANTS, PRISMATIC and POCKET COMPASSES. Price Lists of the above articles sent post free, by John Archbutt, 20 Westminster Bridge Road, Lambeth, near Astley's Theatre. Every article warranted, and the prices will be found considerably lower than ever before charged for articles of similar quality. Routledge's Engineers' Slide Rules, 4s. 6d. each; Hughes' ditto, 6s. 6d.; Carpenters' Rules from 1s. (146)

REMARKS.—Metals generally quiet, with prices steady. Foreign Tin has improved considerably in price, and sellers are few. Spelter evinces signs of further improvement.

LAWRIE AND HAGGER, Metal Brokers.
33 Lombard-street, E.C.

IRON AND OTHER METALS.

[FROM OUR OWN CORRESPONDENT.]

The Preliminary Meeting of Iron Masters yesterday (Thursday): Prices unaltered: quietude throughout the Trade—Similarity of experience in all the Districts—Pig Iron Trade generally—Glasgow Market: Increased Exports—The General Hardware and other Trades of Birmingham, Wolverhampton, and Sheffield—Felicitations on the Defeat of the Great Western Bill—Board Returns of the Exports of Metals: General Increase of Manufactured Iron, with Copper, Brass, Lead, and Tin—Machinery—Metal Imports.

THE great event of the week in the iron trade was the preliminary meeting of masters, which was held yesterday (Thursday) in Birmingham. It was scarcely so influentially or numerously attended as is the case when a change is likely to be made in prices. For a few weeks past it has been evident that there would be no alteration. The meeting was therefore anticipated with less interest than customary. The period just preceding the preliminary meeting is often characterised by the absence or the conspicuous silencing of the complaints of alarmists. This state of things was very observable last quarter. Now, however, there does not seem to be any visible effort to unduly elevate the present position and future prospects of the trade. To a superficial observer, therefore, the trade held scarcely so prosperous an aspect as at this time last quarter. Still, of the two we have no doubt but there is more iron being made and sold now than then. How long the comparison will be favourable to the current time will depend upon the course of foreign politics.

From the several iron-making districts of the country the week's reports are very similar, and may be thus summarised:—"The iron trade is quieter than could be wished, and the orders do not come in fast as is desirable. The leading makers have, however, enough orders in hand to keep their works in tolerably active operation."

Pig iron is scarcely so buoyant as usual at this period.

At Glasgow, on Tuesday, the week's shipments were entered at 13,171 tons against 12,955 tons in the corresponding period of last year. The prices obtained on Tuesday were for No. 1, 52s. 6d. to 52s. 9d.; mixed No.'s. warrants, 52s. 9d. to 52s. 10d.; ditto, maker's iron, 52s. 6d. to 52s. 9d.; No. 3, 52s. 6d. to 52s. 9d. Market drooping.

In Birmingham and South Staffordshire congratulations have been exchanged by the different leading iron masters and merchants upon the defeat of the attempt by the Great Western Railway Company to legalise a new and increased scale of tariff charges for the conveyance of both merchandise and passengers. The tables of exports for the months of January and February, just issued by the Board of Trade, are especially interesting to us as showing the progress of the iron trade during that period. The following is a summary of the principal items more immediately affecting the interests referred to:—

	January and February. 1858. Tons.		1859. Tons.
Pig Iron	28,457	...	27,496
Castings	10,067	...	8,884
	38,524		38,380
Bar Iron	25,993	...	41,422
Railway Iron	44,013	...	47,189
Wire	1,162	...	1,682
Wrought of all sorts ...	17,065	...	24,837
Steel	1,322	...	2,913
	89,555		118,043

The general hardware, edge tool, and cutlery trades of Birmingham, Wolverhampton, and Sheffield, have very slightly changed in two or three branches; some impetus has been given by orders coming in for goods for season wear or use, but in other respects the orders given out by the factors have been inconsiderable, the shopkeepers continuing to order only the smallest quantity of almost all descriptions of goods.

The falling-off in the export of pig-iron and castings accounts for the temporary depression in the pig-iron trade of the country generally from the commencement of the year to the end of February.

Placing February this year in comparison with that month in 1858 and 1857 respectively, the figures stand as under:—

	Month ending February 28th. 1857.		1858.		1859.
Iron, Pig	£86,309	...	47,337	...	46,244
Iron, Bar and Rod ...	200,217	...	124,372	...	160,495
Iron, Wire	23,589	...	9,693	...	13,638
Iron, Railway	292,352	...	153,696	...	158,402
Iron, Cast	62,438	...	58,773	...	50,438
Iron, Wrought	219,014	...	140,146	...	189,627
Steel...	58,008	...	28,564	...	52,392

On dissecting the returns we find that, whilst the total export of pigs shows a falling-off, a larger quantity than usual went to the United States in February this year. For bar and rod iron the exports increased to all parts of the world, except Holland and Sardinia; and the same of railway iron, the exceptions in the latter case being Hanover, the Hanse Towns, Spain, and Australia. In cast iron, the only improvement was in regard to Australia and Brazil. There was a slight difference in favour of last year in the exports of wrought-iron to the former country and Holland, but to all other markets an increase.

In the metals not classed under the head of iron we find the returns for February in the three past years as follows:—

	Month ending February 28th. 1857:		1858.		1859.
Copper unwrought ...	£58,700	...	62,103	...	68,870
Copper sheets, nails, &c., including yellow metal	133,643	...	122,710	...	98,524
Copper and other wrought	26,735	...	66,459	...	23,769
Brass	11,607	...	7,483	...	11,337
Lead	32,982	...	28,169	...	31,433
Tin	19,305	...	16,926	...	20,096
Tin Plates	135,585	...	80,502	...	107,726

Whilst the exports of yellow metal sheathing increased to Holland, Belgium, the United States and Brazil, the total exports show a considerable falling-off.

In tin plates, whilst there is an improvement upon 1858, the exports are yet far short of 1857. To America twice the quantity of tin plates has gone this year as compared with last.

Machinery stands thus:—Steam-engines, Feb. 1857, £104,068; 1858, £76,798; 1859, £43,335. Other sorts, Feb. 1857, £141,800; 1858, £130,160; 1859, £129,412.

In imports there was a falling-off in bar-iron, steel, and tin; but an increase in copper, with lead and spelter.

LIST OF MISCELLANEOUS TENDERS INVITED, AND ENGAGEMENTS OPEN.

The tenders and vacancies which appear in this weekly list are not repeated in succeeding numbers.

RAILWAY WORKS, *Ireland*.—To make and lay railway from Banbridge Junction to junction with Ulster Railway, with all the excavations, embankments, &c., complete. Plans, &c., Mr. Blakiston, engineer of the company, 33, Anglesey-street, Dublin. Tenders at the office of the company, Belfast, April 20.

EXCAVATING ROCK, *Scotland*.—At entrance to the Edinburgh, Perth, and Dundee Railway Companies' Harbour, at Broughty. Plans, &c., Mr. Barril, engineer, Burntisland. Tenders to the Secretary, 9, Prince's-street, Edinburgh, April 13.

LANDING STAGE, *Scotland*.—At entrance to Victoria Dock, Leith. Specifications at office of Superintendent Leith Harbour and Docks. Tenders, Mr. Phin, clerk to commissioners of said harbours, 13, Heriot Row, Edinburgh, April 9.

SLEEPERS, *Monckland Railway*.—Larch timber. Delivered at any of the company's stations. Tenders, April 6, at Secretary's offices, 64, West Regent-street, Glasgow.

WAGGON WHEELS, *North Eastern Railway*.—For 1,000 wrought iron waggon wheels, with cast iron naves, according to drawing, &c., with Mr. E. Fletcher, Locomotive Works, Gateshead. Tenders to Mr. J. Cleghorn, Secretary, York, April 13.

BRIDGE, *Pennybout*.—For the replanking of Pennybout Bridge, with crossed rod deal. Specifications, Mr. W. Wisleade, county surveyor, Kington. Tenders, April 5.

CHURCH, *Kegworth, Leicestershire*.—For the works required in the restoration, &c. Plans, &c., Mr. Wells, churchwarden, Kegworth, from April 4. Tenders, April 16, Rev. J. Clark, Kegworth Rectory, near Derby.

CHURCH, *Wakefield*.—For building a new church for the West Riding Asylum, Wakefield. Plans until April 16, at the Court House. Tenders April 20.

CHURCH, *Milford*.—For enlarging the district church of St. John, near Godalming. Plans at the school house. Tenders to Rev. W. Watson, Milford, Godalming, April 9

CHAPEL AND SUNDAY SCHOOL, *Bury*.—For the Christian Church. Plans, &c., at the vestry. Tenders to Mr. W. Kay, 22, Union Square, April 16.

CHAPEL, *Warwick*.—For the erection of a Roman Catholic chapel. Plans, Mr. Cordles, West-street, Warwick, to whom tenders. April 7.

CHAPEL, *Collampton, Devonshire*.—Enlarging, &c., Baptist Chapel. Plans, &c., Mr. Bond. Further particulars, Mr. John Back, Willand. April 4.

PARSONAGE, *Ilfracombe*.—For the district of St. Philip and St. James. Drawings and specifications at 102, Guildford-street, Russell-square, to whom tenders to April 9; and at the Portland Rooms, Ilfracombe.

PARSONAGE, *Sleren, Suffolk*.—Plans, &c., at the Inn. Tenders to Mr. Robert Appleton, surveyor, Halesworth, April 11.

PUBLIC HALL, MECHANICS' INSTITUTE, &c., *Maldon*.—Plans, &c., Mr. W. K. Digby, High-street, Maldon; and Mr. J. R. Smith, architect, 8, Adam-street, Adelphi, London. April 11.

HOSPITAL, *Bath*.—Re-erection of Bellott's Hospital. Plans, &c., Messrs. Cotterell and Spackman, 6, Walks, Bath. Tenders to April 4.

WAREHOUSE, *Aldershot*.—For erecting a warehouse, building, and dwelling house over. Plans, &c., Mr. F. Eggar, architect, Farnham, to whom tenders, April 6.

FARM-HOUSE, *Chester-le-street*.—Farm-house, Honaton, Outside Farm, near Fatfield. Plans, &c., Mr. Cawthorn, Lumley. Tenders, April 4.

HOUSE, *Oldham*.—For Wesleyan minister. Plans, &c., Mr. W. T. Thompson, architect, 52 George-street, Oldham. Tenders to Rev. J. Tindall, April 11.

CHIMNEY SHAFT, *Penge*.—At the North Surrey District School, near the Anerley station. Plans with the Superintendent of the school. Tenders, April 14.

PAINTERS' WORK, *Manchester*.—The painting of certain corporation buildings, within and without, in two contracts. Specifications, &c., city surveyor, April 8.

SCAVENGING AND WATERING, *City of London*.—For the six divisions, for one year, from Midsummer next. Specifications, commissioners of sewers offices, Guildhall. Tenders, April 19, accompanied with names of two sureties for £500 each, and £20 in Bank of England notes.

COPPER, *East India Company*.—Tenders are received today (Friday) for 125 tons of copper slips, 2¼ in. wide and 1-10th in. thick; 125 tons of copper slips, 2¼ in. wide and 1-13th in. thick; also, 500 copper sheets of ¼ in. thick.

STONE, *Dover*.—The Dover Local Board of Health want 500 yards of the best 2½ in. tooled Yorkshire paving stone; 1,000 ft. lineal of Guernsey or Aberdeen kirb, 12 in. by 6 in.; 500 tons of blue Guernsey broken granite; and 50 tons of Guernsey or Aberdeen granite pitchers, 9 in. by 4 in. Further particulars of the surveyor. Tenders to office of Local Board, April 6.

PARTNERSHIP WANTED.—By an engineer having a thorough knowledge of the business, and who can bring £2,000 capital. Apply at Mr. C. H. Minchin's, 59 King-street, Manchester.

WANTED, A PARTNER, with a small capital, to commence a new machine for the Manchester trade. Apply to J., 147, *Manchester Guardian* office.

WANTED, A WATER TANK (either cast or wrought iron), 24 ft. long, 19 ft. wide, and 6 ft. deep. To be fixed near Wolverhampton. James Fullwood, Sedgley, near Dudley.

ADDITIONAL INSPECTOR TO STEAM BOILER ASSURANCE COMPANY.—Salary, £120 per annum. Must be a practical mechanic, accustomed to the examination of steam boilers, indicating engines, and mechanical drawing. Address Mr. R. B. Longridge, No. 1 New Brown-street, Manchester.

AN ENGINEER, to take the entire management of two 45-horse power engines, coupled. C. D, 11 Half Moon-street, Manchester.

PLANS FOR COVERED MARKET HOUSE, *Pontefract*.—On the vacant ground in the market place. Further information to Mr. H. J. Coleman, town-clerk, to whom tenders, April 19.

FOR TRAINING SCHOOL, *Winchester*.—The plan should admit of the erection of a chapel, &c., and must meet the requirements of the Committee of Council on Education. Plans to Rev. Canon Jacob, Crawley Rectory, Winchester.

EDWIN JEWITT, ENGRAVER ON WOOD AND DRAFTSMAN, 1 Pickett-place, Strand, near Temple-bar. Engineering, Scientific, and Mechanical Designs accurately engraved. Manufacturers and Tradesmen's Catalogues Illustrated. W.C. (84)

ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street, Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 150 feet in length, to work by Hand or Steam Power.

Hot-water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (44)

INDIA-RUBBER VALVES FOR STEAM ENGINES, PUMP PACKING, &c.—Explanatory Drawings and Information as to the best modes of fitting and arranging the above, and all other Mechanical Applications of VULCANISED INDIA-RUBBER, are furnished post-free by

CHARLES MACINTOSH & Co., Patentees, Cambridge-st., Manchester, and 3 Cannon-st. West, London.

MANUFACTORY and DEPÔT, Cambridge-st., Manchester.

GENERAL WAREHOUSE, 3 Cannon-street West, London, E.C.—C. M. and Co.'s only Establishments. (12[illegible])

EMIGRATION TO NEW YORK, CANADA, AUSTRALIA, NEW ZEALAND, EAST INDIES, CAPE OF GOOD HOPE, &c. All Classes of Passengers booked throughout in the Finest Steam and Sailing Packets. Full Particulars in our circulars for 1859, may be had gratis on application to F. S. GRAY and Co., 51 King William Street, City, and 6 Tower Hill, London; and at [illegible] Street, Liverpool. ([illegible])

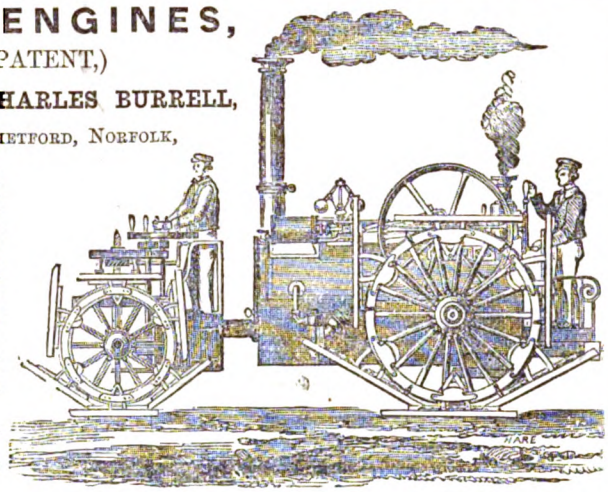
MANUFACTURED BY CHARLES BURRELL,

ST. NICHOLAS WORKS, THETFORD, NORFOLK,



And ordered for India, Australia, and South America, may now be seen, complete and in course of construction at the above works. BOYDELL'S TRACTION ENGINES AND ENDLESS RAILWAY will draw heavier loads over good roads than any other traction engine, and on soft and bad roads will draw heavy loads where no other traction engine can move itself. All objection to the wear and tear of these Engines is entirely removed by the use of Charles Burrell's improved patent Wrought Iron Wheels, fitted with Rails and Tyre, as well as all the wearing parts, of Steel.

Apply also to Mr. Hemming, 47 Mark Lane, E.C.

CLAYTON, SHUTTLEWORTH, AND CO.,

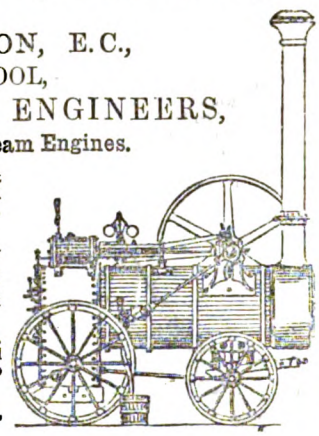
OF LINCOLN,

78 LOMBARD STREET, LONDON, E.C.,

AND 36 DALE STREET, LIVERPOOL,

AGRICULTURAL AND GENERAL ENGINEERS,

And Manufacturers of Portable and Fixed Steam Engines.

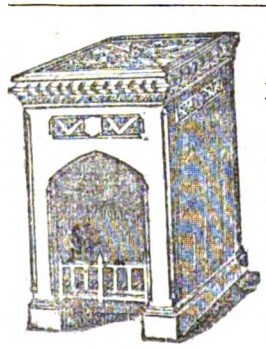


Combined Threshing Machines, which dress the corn ready for market at one operation. Grinding Mills, Saw Benches, Pumps for Irrigation and Mining purposes, with all necessary gearing for being driven by steam power. Full particulars and estimates given on application to the above address.

C. S. and Co.'s PORTABLE STEAM ENGINES are adapted for every purpose to which steam-power can be applied. When intended for winding, they are fitted with reversible link motion and winding gear. They are easy of removal, as may be seen by the engraving, and can be set to work immediately on arrival.

C. S. and Co. are now doing an extensive foreign and colonial business, and are prepared to send off engines and machinery of the before-mentioned kinds in a few days from the date of order. They would also call attention to the important *reduction in prices* made for the new year.

For Exportation.---The above can be obtained through British Merchants, Shippers, and Colonial Agents. (23)



PIERCE'S

UNRIVALLED

PYRO-PNEUMATIC FIRE-LUMP WARMING AND VENTILATING STOVE GRATES,

WITH the cheerful, open fire, producing healthful warmth, with continuous Self-acting Ventilation, for Churches, Schools, Public Buildings, Banking Houses, &c. These Grates are manufactured solely by PIERCE, the Inventor, for which he received the Prize Medals of London in 1851, and of Paris in 1855.

PRICE, from £7 10s.

ILLUSTRATED CATALOGUE, with Prices and Estimates for Work, furnished on application to the Inventor and Sole Manufacturer.

AGENTS WANTED. (32)

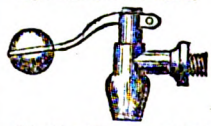
TO BRASS-FOUNDERS, ENGINEERS, &c.

THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings; they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty per cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, muffles, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire-standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. (43)

HIGH-PRESSURE VALVE-COCKS,

LAMBERT'S PATENT.

Equilibrium Ball Valve. Cottage Closet Valve.



The Equilibrium Ball-Valve is simple and certain in its action, and is cheaper than the common cocks now in use.

The Cottage Valves are suitable for application to any kind of basin; and, as they shut against the pressure, no concussion in the pipes can possibly occur.

These cocks have been extensively and most successfully used in many towns, under continuous high pressure, varying from 100 to 350 feet; their efficiency and durability is, by experience, established.

IMPROVED MACHINERY FOR AGRICULTURISTS.

RICHARD GARRETT & SONS,

LEISTON WORKS, SAXMUNDHAM, SUFFOLK,

(ESTABLISHED A.D. 1778),

EARNESTLY solicit the continued support of their numerous Friends, Agriculturists, Shippers, and others; the additions made to their Works during the present year, in the erection of new sets of Workshops, fitted with the best mechanical appliances for producing Machinery of the most improved construction, expeditiously and economically, justifies their soliciting increased support, while their leading reputation as Inventors and Manufacturers of First Class Agricultural Machinery, is a sufficient guarantee that every Machine supplied from Leiston Works will prove to the entire satisfaction of the purchaser.

R. G. & S. are now manufacturing the following Machines and Implements, which they guarantee to be thoroughly efficient in every respect:—

PORTABLE AND FIXED STEAM ENGINES. } From 4 to 40 Horse Power, suited for every kind of work
SELF-PROPELLING AND TRACTION ENGINES. } to which Steam Power is applied.
STONE GRINDING MILLS.
MORTAR AND PUG MILLS.
MILLWRIGHTS' WORK of all kinds.
SAWING MACHINERY, from 4 to 20 Horse Power.
BRICK AND TILE MACHINES.

IMPROVED SETS OF FARM MACHINERY, for Large Occupations.
PORTABLE AND FIXED MACHINERY, for Thrashing and Dressing Corn.
THE PRIZE BOLTING AND OPEN-DRUM HORSE-POWER THRASHING MACHINES.
CORN DRESSING MACHINES, for Hand, Horse, Water, and Steam Power.
BARLEY AVELLING MACHINES.
CHAFF CUTTERS, for Hand, Horse, Water, and Steam Power.
PATENT TURNIP CUTTING AND PULPING MACHINES.

THE PRIZE CORN AND SEED DRILLS.
PRIZE CORN AND SEED DRILLS WITH MANURE APPARATUS.
PRIZE SEED AND MANURE DRILLS.
LIQUID, SEED, AND MANURE DROP DRILLS.
CHAMBER'S PATENT BROADCAST MANURE DISTRIBUTOR.
GARRETT'S PATENT HORSE HOE for all Crops.
PATENT REVOLVING HOES for Root Crops.
IMPROVED PLOUGHS AND REAPING MACHINES.
&c. &c. &c.

Of which full detailed particulars will be found in R. G. & SONS' Illustrated Catalogue, sent postage free to any address, in English, French, or German; and any of the above Machines will be shown in operation at R. G. & Sons' Farm, near the Works, on their receiving a few days' notice.

A Copy of R. G. & SONS' new Colonial List will be forwarded free to any of the Colonies, and Shippers will be supplied with these lists, with their names and addresses printed on, free of charge, by making application for the same.

Address—R. GARRETT & SONS, Leiston Works, Saxmundham, Suffolk. (161)

GREAT REDUCTION IN THE PRICE OF

FOWLER'S PATENT STEAM PLOUGH.

From the great Improvements recently made, JOHN FOWLER is prepared to execute Orders at the following prices:—

Windlass to Eight-horse Engine, with Patent Self-moving Anchor, Headland Ropes, Rope Porters, and all necessary Tools	£160 0 0
Cultivator, fitted with Three, Five, or Seven Tines	25 0 0
Seven Hundred Yards Iron Wire Rope, 1¼ in. circumference, which is a sufficient length, on this plan of working, for a 350 yards furrow	22 10 0
Steel Rope, £7 10s. extra.	£207 10 0

The advantages to be derived in the working of this Tackle over others are, no belt is used, consequently no delay is caused from its slipping in showery weather; it can be efficiently worked by two men and two boys; and it is not confined to scarifying only, but a two-furrow balance plough can be worked by it. From the direct action of the draught, a small engine will effect a larger quantity of work than the same engine on the "round-about system;" only half the rope is required for the same length of furrow, and a whole field can be done without shifting. The windlass can be attached to any agricultural engine, and the weight added would only be 12 cwt. The Tackle can be set at work within an hour of entering the field intended to be cultivated. The Drums on which the Rope is worked are four feet in diameter, and from its being wound in grooves, all crushing is avoided, and by these means a great saving in wire rope is effected.

LARGER POWER ENGINES AT COMPARATIVE PRICES.

Illustrated Catalogues with New Prices will be ready shortly. For further Particulars apply to

JOHN FOWLER, JUN., 28 CORNHILL, LONDON. (201)

SCOTT'S
PATENT GRASS SEED SEPARATOR,

which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from

PERENNIAL AND ITALIAN RYE-GRASS, &c.,

AND

SCOTT'S PATENT CARROT SEED BEARDING

AND

CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,

which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

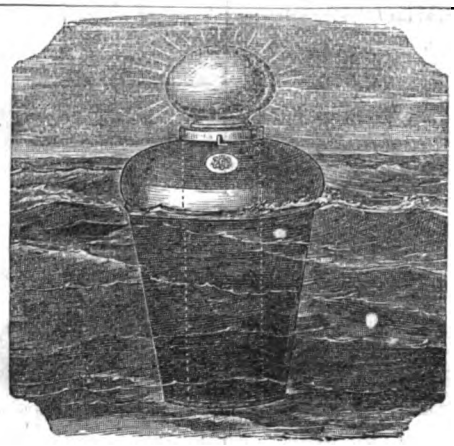
(89)

GRESHAM'S



RECORD

PATENT

BUOY.

The RECORD BUOY is intended to be kept in some place available for instant use, and to be thrown overboard from a sinking ship, or a Vessel on fire, so as to [illegible] disaster, having a paper inserted therein, already filled up with the Ship's Name, Port of Registry, Official Number, &c., and a few last words hastily written, intimating the nature of the calamity, with any further information that can be given at such a time. It has capacity and buoyancy to contain besides these, the Log Book, and several pounds' weight of Papers or Valuables. It is lined with Cork between the Cylinder and outside case, so that, although waterlogged, it will not sink, but keep afloat for a long time, probably for years.

In order to DISTINGUISH IT FROM ANY OTHER FLOATING SUBSTANCE, so that the Captain of a passing Ship may recognize it as an intimation of disaster, and consider it a sacred and imperative duty to pick it up and convey the information it contains according to the directions found within, it HAS RAISED CONSPICUOUSLY UPON ITS SURFACE A SILVERED GLOBE, which, owing to the reflection of the light, will make it visible at a great distance, and when dancing on the wave it shines, in fact, like a star in the firmament, and being distinguishable from anything else, its character cannot be mistaken.

It is furnished with ample directions to the finder how to act, and has Envelopes already directed to the proper authorities, who, on receipt thereof (and they should be transmitted by the first available means), will, after verifying them to prevent imposition, immediately convey the information to the owners of the lost Ship, to Lloyd's, and all parties concerned; and if a foreign ship, to the consul of the nation to which she belongs.

In order to establish uniformity, and to prevent the uncertainty and confusion which a multiplicity of Buoys of various forms might occasion, when their utility becomes apparent, and to make ESPECIAL RECOGNITION OF THESE UNDOUBTED, MR. JOHN GRESHAM, J.P. and Alderman of Hull, has Patented his Invention, and has arranged with the old-established Firm of

GEORGE & JOSEPH OLIVER,

286 WAPPING, LONDON, E.,

TO MANUFACTURE AND SUPPLY THEM, AND TO WHOM ALL COMMUNICATIONS SHOULD BE ADDRESSED.

(194)

WATER POISONED BY LEADEN PIPES.

"The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dick, of Bonchurch, Isle of Wight. The water has cut these deep pits almost through the pipe, and not only upon the portion which we have illustrated, but has formed similar chasms throughout the entire length."—*Exposition.*

Poisoned Water Preventable.

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious, or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha. Nothing can be better. I have also recommended it to others, who have adopted the expedient.

Resistance for Frost.

The Gutta Percha Company have been favoured with the following Letters in reference to the non-conducting properties of Gutta Percha Tubing, in the resistance of Frost.

From J. ARMSTRONG, Esq., M.D., Gravesend.

"My private house, which was supplied with your Gutta Percha Tubing some five or six years ago, has never required the slightest attention; and previously, there was no winter passed that we were not deluged in consequence of the bursting of the leaden pipes."

From HENRY BROWN and SONS, Western Works, 108 Rockingham-street, Sheffield.

"We have now a positive proof of the frost-resisting properties of the Gutta Percha Piping. On our premises we have a leaden Pipe and a Gutta Percha one lying side by side. The leaden one has been completely frozen up at least ten days, and the Gutta Percha one is still unaffected.

THE COTTON SUPPLY ASSOCIATION.

COTTON GINS.

IMPROVEMENT UPON THE INDIAN CHURKA.

TO COTTON GIN MAKERS, MACHINISTS, AND INVENTORS.

THE Committee of the Cotton Supply Association have received from the Bombay Chamber of Commerce two Indian Churkas, or Hand-roller Gins of native construction, and such as are now used by the natives of India, with the request that they should be submitted to the Machinists of this country, with a view to obtaining, if possible, a superior machine. Your attention is therefore respectfully requested to the construction of this "Churka," which may be seen at the offices of this Association. The objects to be aimed at in the making of an improved machine, are—

1. That the machine do no injury to the cotton, in the process of separating the seed from the fibre. It is said that "no machine can possibly separate the cotton from the seeds with less injury to the staple than does the Churka."
2. That the machine, as far as possible, do rid the cotton from leaf and impurities.
3. That the machine be of simple construction, and durable.
4. That the machine be easily repaired by the native Indian.
5. That it be portable.
6. That the cost be as low as possible. The "Churka" costs only two rupees, or 4s. It is necessary that the improved machine should be within the ability of the natives to purchase.
7. That the machine be able to do its work faithfully, in spite of carelessness or neglect.
8. That the machine be able to clean a fair quantity of cotton per day, with the labour of one person (male or female).

The Committee submit the above conditions to the consideration of Machine Makers, and Mr. Haywood, the Secretary of this Association, will be prepared to afford any further information that may be required.

It is proposed, in furtherance of the wishes of the Bombay Chamber of Commerce, to hold a trial of the merits of the different Gins that may be constructed to meet the above conditions, in two or three months from this date. Due notice of the day of trial will be given.

Premiums of £20, £10, and £5 will be paid by the Association to the exhibitors of the Gins which rank 1st, 2nd, and 3rd in order of merit.

G. R. HAYWOOD,
Secretary of the Cotton Supply Association.

THE Imports of Foreign Flax Fibre having declined to a most serious extent, and the Cultivation of the Plant decreased at home, a great necessity has arisen for laying the foundation of a System whereby a sufficient supply of raw material may be secured to meet the requirements of a great staple industry of the country—known as the Flax and Linen Trade.

It has, therefore, been determined to form "THE NATIONAL FLAX COMPANY, LIMITED," whereby such a System may be initiated.

This will be effected by the introduction of mechanical improvements, whereby a continuous and easy, as well as profitable, preparation of the Fibre from the Plant can be effected.

Such preparation will be carried on in establishments to be called "Rettories," and to be erected in suitable localities, where the Flax Crop, in its entirety, or otherwise, will be purchased from the Grower.

By thus creating a Market within easy reach of the Farmer, and proving to him practically that he can easily produce a good-paying Crop, needing no further trouble in its preparation, and for which he may regularly receive *ready money* at harvest time, when the demands on him for *labour-cost* are large, it is considered that a very extensive growth of Flax will be gradually introduced throughout the country generally.

A more perfect cultivation of this Plant will also be induced, whereby many existing prejudices, in respect to the supposed exhaustive properties of Flax, will be removed, and the Grower convinced that it is really one of value in Districts suitable to it, and in fair rotation. It will also be found that land capable of producing any kind of grain is equally available for Flax; and that there is no better *preparation* for a Wheat Crop to follow.

The Company have secured the Patents, Plans, and Services of Mr. G. A. CATOR, who has devoted a large sum of money and many years in bringing the matter to its present effective condition.

By reference to the detailed Prospectus, it will be clearly seen that, with the outlay proposed, a very large Dividend may be calculated on with perfect safety; showing that this Company presents unusual features of promise to parties seeking investment in substantial and well-considered enterprises.

*** Prospectuses, Pamphlets, Forms of Application for Shares, and all other information, may be obtained at the Offices of the Company. (207)

TEMPORARY OFFICES.

12 Pancras-lane, Cheapside, E.C., London.

The improved system adopted by the last Patent Law Amendment Act having greatly increased the number of Patents taken out by, and removed various obstacles in the way of Inventors, and the Acts of Parliament lately passed limiting the liability of Shareholders in Public Companies, have now rendered the formation of such an Association not only comparatively easy, but have also afforded the means by which it may become remunerative to its Members, without incurring any unnecessary risk.

The Company has been formed for the purpose of assisting Inventors, and its contemplated operations comprise—

The taking out of Patents and Registrations for Inventors, and when required, advancing the money for this purpose.
The advancing sums of Money on approved security to Inventors and Patentees, for the purpose of enabling them to develope and complete their Patents and Inventions.
The devotion of a portion of the Company's Premises for the purpose of receiving Models and Drawings of Inventions and Patents.
The Purchase and Sale of Inventions and Patents.
The Selling of Patents and Inventions on Commission.
The investigation of the value and merits of Inventions, and the granting of Certificates thereof.
The keeping a Registry of all Patents taken out by the Company, and the furnishing a Monthly List thereof to all Subscribers.

The Board of Directors will not require the particulars of an Invention to be communicated to them before the same is registered; but the particulars will only have to be communicated to the Secretary, who will give a written undertaking, not to disclose them to any one without the consent of the Inventor.

No Shareholders holding 10 Shares in the Company, will be required to pay any preliminary fee for the consideration by the Board of any Patent or Invention they may wish to bring before its notice.

All Shareholders in the Company will be considered as Subscribers to the monthly list of Patents, and as such, will have the lists sent to them, without further payment.

The subscription for the list, by parties not holding Shares, will be £1 1s. per annum.

One of the great objects of the Company will be at all times to watch over and preserve the rights of Patentees; and if possible to obtain a repeal of the stamp duties affecting Inventors; or if not able to accomplish this, to obtain a great reduction in the amount of such duties.

As the business of the Company can be carried on by means of a small Capital, it is with the greatest confidence anticipated that a very high return in the shape of a bonus or dividend will be obtained by the Shareholders of the Company.

All information may be obtained at the Office, and the Deposit may be paid to the Bankers or to the Secretary. (200)

ENGINEERING BUSINESS FOR SALE.

OWING to the continued ill health of the Proprietor, the first-class business of an Engineer and Crane and Block Maker is offered for sale. It has been established in the Metropolis for nearly 30 years, and has enjoyed extensive patronage amongst Brewers, Manufacturers, Warehousemen, and others, in and about London; the business done amounting to nearly £8,000 per annum. About £3,200 would be required, (part of which, however, may remain for any reasonable time on good security,) which is the bare value of the tools, patterns, and stock in trade. The premises, including good dwelling-house, very conveniently situated, and capable of accommodating from 60 to 70 hands, are held upon a long lease, at an extraordinary low rental, not exceeding £100 per annum, taxes included. Many of the tools are nearly new, and of the best construction. The present proprietor, who relinquishes the business solely on account of ill health, would give every assistance in his power to those succeeding him; and as his foreman, who has been with him for nearly ten years, is thoroughly acquainted with the practical parts of the business, any gentleman desirous of commencing as a manufacturing engineer would find the present a very favourable opportunity. As all accounts have been, for many years past, collected quarterly, a very small amount, say £800, would suffice as working capital. Full particulars may be obtained by application to E. E. ALLEN, Esq., MECHANICS' MAGAZINE Office, 166 Fleet Street, E.C. (130)

FOG WHISTLES, for Seagoing Steamers.

WATER GAUGE MOUNTINGS, for Marine and Land Boilers.

GAUGE COCKS, GLAND COCKS, GREASE COCKS, CUPS and SYPHONS.

STEAM TAPS, RANGE COCKS, &c.

IMPROVED BRASS VALVES, for Steam, Water, and Gas.

W. T. HENDRY & Co., Engineers.
38 Upper Thames-street, London, E. C. (153)

TO ENGINEERS, MILLOWNERS, AND MANUFACTURERS.

AMERICAN INDIA-RUBBER Machine Belting, Valves and Washers, Brewers' Hose, Fire Engine Hose, Improved Suction Hose—at Wholesale Prices.

W. T. HENDRY & CO.,
38 Upper Thames-street, London, E.C. (152)

RANSOME'S PATENT IMPERISHABLE SILICEOUS STONE.—Chimney-Pieces, Balustrades, Capitals, Trusses, Terminals, Fountains, Vases, Monuments, &c., of great beauty, at the most reasonable prices.

For Particulars, Specimens, Illustrations, and Agencies, apply to Mr. Frederick Ransome, Whitehall Wharf, Cannon-row, Westminster; or Patent Stone Works, Ipswich. A Liberal Discount allowed to the Trade or to Shippers. (175)

PUMPING MACHINERY.

GWYNNE AND Co., Engineers, London, manufacture and supply the following Machinery, of the most approved construction and with all the latest improvements:—Portable and Fixed Steam-Engines and Boilers of every description; Waterwheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the Supply of Towns, Cities, and Districts, and for the Irrigation of Coffee, Cotton, Indigo, Sugar-cane, and Rice Estates, for pumping out Coffer-dams, Canals, Dry Docks, Reservoirs, &c. They also manufacture and supply the Pumping and other Machinery for Paper, Pulp, and Fulling Mills, Breweries, Distilleries, Tanneries, Starch Works, Bleaching, Dyeing, and Calico Printing Works, Chemical Works, Silk, Cotton, and Flax Mills, and Manufactories in general. All Letters not paid will be refused. Illustrated Price Lists forwarded on receipt of Six Postage Stamps.—GWYNNE AND Co., Hydraulic and Mechanical Engineers, Essex-wharf, Strand, London.

For Exportation.—The above can be obtained throug British Merchants, Shippers, and Colonial Agents. (24)

MATHEMATICAL DRAWING INSTRUMENTS, RULES, TAPES, CHAINS, LEVELS, THEODOLITES, BOX SEXTANTS, PRISMATIC and POCKET COMPASSES. Price Lists of the above articles sent post free, by JOHN ARCHBUTT, 20 Westminster Bridge Road, Lambeth, near Astley's Theatre. Every article warranted, and the prices will be found considerably lower than ever before charged for articles of similar quality. Routledge's Engineers' Slide Rules, 4s. 6d. each; Hawthorn's ditto, 5s. 6d.; Carpenters' Rules from 1s. (148)

BRICKS.

TO BE LET, with immediate possession, in consequence of the death of the proprietor, J. M. Paine, the DIPPENHALL SILICA FACTORY, erected for the purpose of making improved Fire Bricks, Building Bricks, Paving Tiles, &c., &c., from the Soluble Silica Rock.

Apply to view the Buildings and Bricks to G. H. Ogston Esq., Resident Manager, Dippenhall, Farnham, Surrey and for terms, to Messrs. Nicholls and Potter, Solicitors, Farnham. (125)

ENGINEERS' TOOLS.

FOR SALE, a Self-acting Slide LATHE, 11-inch Centres, and Bed 12 feet long, complete; and TWO PORTABLE PUNCHING and CUTTING MACHINES, one suitable for ½-inch plates, and the other for ¾-inch plates, both adapted for steam or hand power.

Apply to Messrs. PAGE & CAMERON, 64 Old Broad Street, E.C. (117)

VITRIFIED BLUE BRICKS are delivered at the Nine Elms Station, London, at 80s. per 1,000. —Address, G. H. OGSTON, J. M. Paine's Silica Works, Farnham, Surrey. (36)

CAUTION.

TO ARCHITECTS AND BUILDERS.—In consequence of numerous complaints, the Patentee begs to inform the above, that all genuine SMITH'S PATENT DOOR SPRINGS, for Swing Doors, are stamped with Name and Address, thus—SMITH, Patentee, 69 Princes Street, Leicester Square, London; and that Springs thus marked are warranted. SMITH'S PATENT WEATHER-TIGHT CASEMENT FASTENING AND SILL-BARS are admitted by all to be the most perfect invention for the purpose. Diagrams and List of Prices on application. (143)

THORLEY'S FOOD FOR CATTLE.—Every person having an interest in domestic or farm animals should obtain a supply of this celebrated and economical food, which will prove invaluable during the approaching season. For keeping horses in good condition, it is unequalled. Pigs fatten with surprising rapidity upon it, and their flesh increases in flavour and value. Cowkeepers will find great advantage in the increased quantity and improved quality of the milk during its use. All animals are benefited by it. A pamphlet on this interesting subject, accompanied by Testimonials from the principal Nobility, Gentry, and Agriculturists, forwarded on application. In Casks containing 448 Feeds (Measures enclosed). Price 50s., carriage paid to any Railway Station in the United Kingdom. Post Office Orders payable to JOSEPH THORLEY, 77 Newgate Street, London.

N.B.—The public are cautioned against being imposed upon by worthless imitations. (132)

WATER GAUGES—WATER GAUGES.—Sir,—We find your German Gauge Tube superior to any other, and strongly recommend it. We were compelled to abandon the use of our water gauge until applying your glass tube.

WILCOX and Co., Millwall Pottery Company.

These Tubes are superior to all others; being a clear white, no mistake can arise in working. Guaranteed to stand a pressure of 500 lb.

Extensively used on all the principal lines.

To be had only of E. MOORE, 55 Upper Marylebone-street, W.; and 72 Great Titchfield-street, W.

*** Price List of Gauge Fittings, &c., on application. (94)

AT SUFFELL'S, 132 Long-acre, London, W.C., every Instrument suitable for Engineers, Contractors, Surveyors, Architects, Draftsmen, &c., to be had second hand at very reduced prices, by the most esteemed makers, consisting of Theodolites, Levels, Circumferenters, Sextants, Compasses, Protractors, Station Pointers, Adygraphs, Pentagraphs, Telescopes, Microscopes, Cases of Drawing Instruments, &c.; Rules, Scales, Chains, Levelling Staves, and Measures of all nations. Every Instrument warranted. (212)

EMIGRATION TO NEW YORK, CANADA, AUSTRALIA, NEW ZEALAND, EAST INDIES, CAPE OF GOOD HOPE, &c. All Classes of Passengers booked throughout in the Finest Steam and Sailing Packets. Full Particulars in our circulars for 1859, may be had gratis on application to F. S. GRAY and Co., 51 King William Street, City, and 6 Tower Hill, London; and at 35 Bath Street, Liverpool. (187)

THE SETTING of STEAM-ENGINE VALVES is properly effected by the use of Hopkinson's IMPROVED Steam-Engine Indicator and Book, (second edition). Steam-Engine Explained, PRICE £4 4s.

J. HOPKINSON and CO.,
Engineers, Britannia Works, Huddersfield. (200)

TO MARINE ENGINEERS, OR SHIP-BUILDERS.

THE PROPRIETOR of a VALUABLE PATENT for Double-expansive Marine Engines (by which great economy of space and fuel is obtained) is desirous of entering into arrangements with a respectable firm for the construction of the same. An adequate portion of the patent-right would be assigned by the advertiser to any firm taking the matter up; and he would render all assistance in his power, either in London or elsewhere, amongst ship-owners (to many of whom he is well known), in obtaining contracts, &c. Unexceptionable references given. Address C. E., MECHANICS' MAGAZINE Office, 166, Fleet-street. (76

TO BRASS FOUNDERS.

TO BE SOLD, the Patent-right of a New and Highly-approved EQUILIBRIUM WATER COCK or VALVE, suitable for Steam Boiler Feed Pipes, or any cases where the valve is required to be opened against pressure.

Address H., MECHANICS' MAGAZINE Office, 166 Fleet-st., where a Drawing may be seen. (151)

TO ENGINEERS, ARCHITECTS, PATENT AGENTS, &c.

PHOTOGRAPHS OF THE HIGHEST CLASS and of any size, taken and reproduced at a most moderate rate of charge. Reproductions of faultless accuracy, of Machinery, Models, Drawings, &c. Orders attended to in town and country. Estimates forwarded.

SPENCER, READ, & Co., 4 Agar-street, Strand. W.C. (90)

METROPOLITAN BOARD OF WORKS.—MAIN DRAINAGE OF THE METROPOLIS.—SOUTHERN HIGH LEVEL SEWER.—To BUILDERS, CONTRACTORS, and Others.—The Metropolitan Board of Works hereby give notice, that they will MEET at the Council Chamber, Guildhall, in the City of London, on Friday, the 20th day of May next, at Twelve o'clock at noon precisely, and will then be prepared to open TENDERS by parties who may be willing to CONTRACT for the CONSTRUCTION of MAIN BRICK SEWERS, 9 miles 2,940 feet in length, or thereabouts, and for the execution of other works in connection therewith, to extend from Deptford Creek to High-street, Clapham. Also, a branch to extend from the Broadway, Deptford, to the point of junction of the Effra Sewer at Dulwich and Norwood, all in the respective parishes of Saint Nicholas, Deptford, in the county of Kent; Saint Giles, Camberwell; Saint Mary, Lambeth; Clapham, and Streatham, in the county of Surrey; and for the maintenance of such works in complete repair for twelve calendar months.

Parties desiring to submit tenders, may, upon payment of £3, obtain plans, sections, specification, form of tender, and other particulars, on application at the office of the Board, between the hours of Nine a.m. and Four p.m., on and after Thursday, the 14th of April instant.

Tenders addressed to the Metropolitan Board of Works, must be delivered at the office of the Board, No. 1 Greek-street, Soho, before Four o'clock p.m. on Thursday, the 19th day of May next, and no tender will be received after that hour.

The Board do not bind themselves to accept the lowest, or any tender, and the party whose tender shall be accepted, will be required to provide two approved sureties for the due performance of the work.

E. H. WOOLRYCH, Clerk of the Board.
No. 1 Greek-street, Soho, April 7, 1859. (211)

VULCANISED INDIA-RUBBER MACHINE BANDING IS NOT AFFECTED BY WET, HEAT, OR COLD; does not stretch nor slip on the pulleys. HOSES for BREWERIES, &c., will NOT impart TASTE, SMELL, or COLOUR: also for conducting, or steam purposes. Washers, Valves, Sheets, Printing Blankets, &c., in Stock. Other Articles made to order. All Goods warranted to stand 300° Fahrenheit.

N.B.—Sole Contractors to the Lords Commissioners of the Admiralty.

DODGE and GIANDONATI (late DODGE, BACON, and Co.), 44 St. Paul's Churchyard, London, E.C. (208)

TO ENGINEERS, INVENTORS, AND OTHERS.

A PRACTICAL ENGINEER of long standing prepares Original Drawings, Copies, and Tracings. Advice and Assistance given to Inventors in working out their Plans. Pupils taught privately. Terms moderate.

Apply to J. J., 171 Strand. (138)

FOR SALE.

A 12-HORSE HORIZONTAL STEAM ENGINE and a 4-HORSE DIRECT ACTING STEAM ENGINE, with Fly-wheel Governors, &c., complete. Address, W. F. Plummer, 12 Albany-road, Camberwell. (148)

By Her Majesty's Royal Letters Patent.

E. DENCH,

KING'S ROAD, CHELSEA, AND HAMPSTEAD ROAD,
Patentee and Sole Manufacturer of

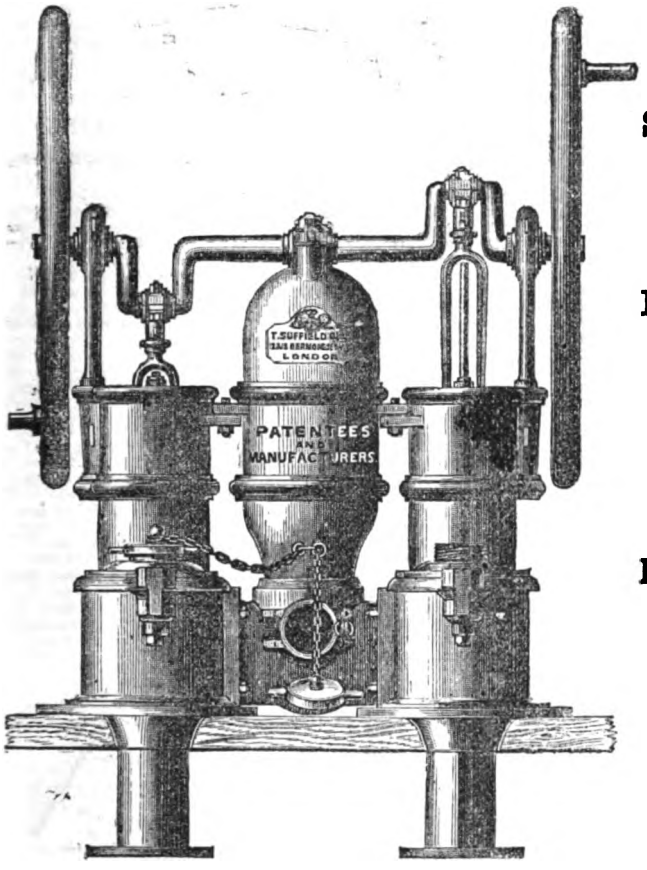
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS. SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

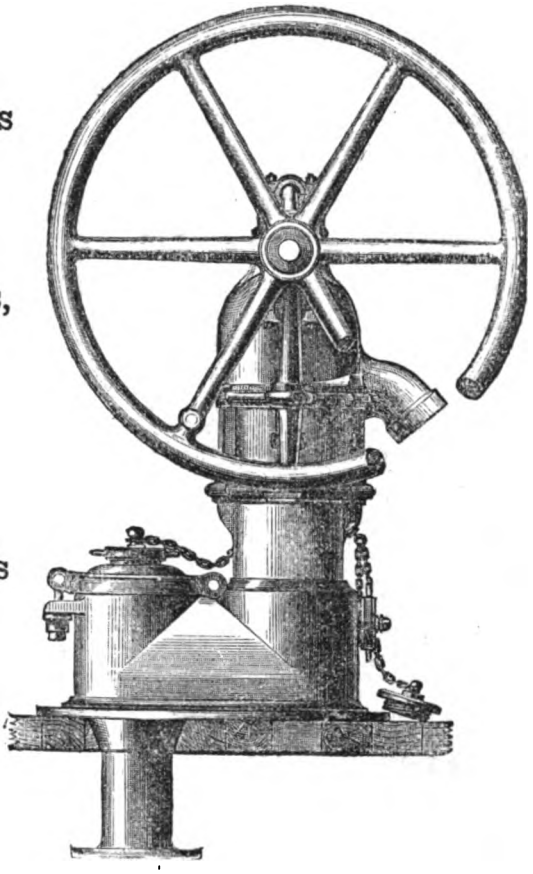
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangement either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps; the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board: the rapidity with which they can be converted into Fire Pumps, or be applied to the Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Work Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require such Stores, together with a further saving the cost of such Articles.

DEPOT, 116 FENCHURCH STREET, E.C.,

(OPPOSITE MARK LANE.)

IMPORTANT TO MANUFACTURERS, MILL OWNERS, &c.

GUTTA PERCHA MILL BANDS.

THE GUTTA PERCHA COMPANY beg to state that the increasing demand for the Gutta Percha Strapping for Driving-bands, Lathe-straps, &c., fully justifies the strong recommendations they have everywhere received.

Their durability and strength—permanent contractability and uniformity of substance—their non-susceptibility of injury from contact with oils, grease, acids, alkalies, or water—and the facility with which the only joint required can be made in bands of from 200 to 300 feet long—render them superior to leather for almost all working purposes, and decidedly more economical.

TESTIMONIALS.

IMPORTANT ANNUAL SAVING.

From TRUMAN, HANBURY, BUXTON, & Co., Brewery, London.

"In reply to your inquiry, we have much pleasure in bearing our testimony to the advantages, both as regards economy and saving of time, effected by the use of your Patent Gutta Percha Bands in lieu of Leather Straps. The stoppage of one portion of our works through the failing of the leather strap used to be of daily occurrence—but with this annoyance we are now never troubled. We have had these straps in operation for nearly three years, and are assured by our Engineer that *they effect a saving to us of at least* THIRTY POUNDS *a year.*"

From JAMES ABERNETHY & Co., Fury Hill Foundry Aberdeen.

"We have now had Gutta Percha Bands working here *for three years.* One of them has been driving the fan blast for our smith's shop for all that time, and for anything we see, may drive it as long again. The speed of the fan is but 1,200 per minute. We have used them with complete satisfaction, driving circular saws, and in some cases where leather bands would have been quite inapplicable from damp. We have uniformly endeavoured to have the drums and pulleys so proportioned to the strain, as that there is no chance of the band slipping; and with this precaution, and taking care in using *cross bands that they do not rub*, we are quite satisfied that they are superior in every respect to leather—stronger at the same weight, and keeping quite straight in working—requiring no lacings, and very seldom any repairs."

WATER POISONED BY LEADEN PIPES.

The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. D——, of Bonchurch, Isle of Wight.

POISONED WATER PREVENTABLE

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha Tubing. Nothing can be better. I have also recommended it to others, who have adopted the expedient."

A variety of Gutta Percha Articles, such as Mill Bands, Tubing, Sheet, Soles, Pump Buckets, Bosses, Union Joints, Bottles, Bowls, Flasks, Curtain and Cornice Rings, Solid Frames, Galvanic Batteries, &c., &c.

MANUFACTURED BY THE

REMARKS.—Iron: Rails are firm, very much owing to the demand for Indian railroads, for which tenders to the extent of 11,000 tons are invited. Merchant Bars are easier, and manufactured Iron is altogether quiet. Scotch Pigs have receded to 51s. 6d. cash. Copper is very quiet; foreign manufactured is lower in price than the fixed prices of English according to the relative value. Tinplates are rather higher. Spelter is a shade easier. Business in Metals very limited.

LAWRIE AND HAGGER, Metal Brokers.
33 Lombard-street, E.C.

IRON AND OTHER METALS.

[FROM OUR OWN CORRESPONDENT.]

The Iron Trade generally—Cleveland and South Wales Districts—Yorkshire and Staffordshire—United States, Continental, East India Demand; more Rails required for India—Glasgow Pig Iron Market—On Change at Birmingham and Wolverhampton; Influence of the Dissolution upon Trade—Hardware and General Trades of Birmingham, Wolverhampton, and District—The Far-famed Soho Works and what is being done There—The Sheffield Trade.

THE iron trade remains very quiet in most of the different districts, districts where railway work is turned out in the largest quantity having the most to do. The houses that have laid themselves out for this department of the trade in the South Wales and the Cleveland beds are therefore well employed.

Indeed, less cannot be said of the works of repute in Yorkshire and Staffordshire, whose products are in so high repute the world over for their adaptability to the machinist and the civil engineer.

The United States orders in the week have been few of no great value. The Continent of course is not much in the market. India is the best customer at present. The demands for that dependency are many and of great worth, calling into activity for a time some of the best machinists, and tending to the prosperity of certain of the iron works first adverted to. On Wednesday the East India Railway Company were in the market for 11,000 tons more of rails with the accompanying requirements in the shape of plates, screws, and the like. A favourable illustration of the demand of that market for machinery will be found in our remarks upon the trade of Birmingham.

At Glasgow on Tuesday nothing is reported to have been doing. The quantity of iron shipped in the week was shown to be 13,331 tons against 15,300 tons in the corresponding week last year. The rates realised were, for No. 1, 52s. to 52s. 3d.; mixed No.'s, warrants, 52s. to 52s. 4d.; ditto, makers' iron, 52s. to 52s. 3d.; No. 3, 52s. to 52s. 3d.

Respecting the South Staffordshire trade, we have to report that only little business was transacted to-day (Thursday) in Birmingham, or yesterday (Wednesday) at Wolverhampton, nor had matters improved in the week upon the state of things reported by us in our last. The talk was more upon election business than upon business, with regrets that all hope of an improved state of things must now be abandoned for weeks to come. The dissolution will seriously affect the iron trade, and the step which Government has taken has, therefore, been condemned by masters who are unable to foresee any political benefit from the dissolution at all commensurate with the injurious effects which will follow its dislocation of trade. The first quarterly meeting, which will be held next Wednesday in Wolverhampton, is not looked forward to with any expectation that the haze which hung over the preliminary meeting, will give place to other than increased uncertainty as to the trade prospects of the ensuing three months, both foreign and also home politics having so unsettled an aspect. By some, alarm is now beginning to be felt and expressed in regard to the immediate future of the Continent. All these causes combined were too powerful for even weather of unexampled brilliancy to produce a cheerfulness at Wolverhampton and Birmingham that could affect any tangible good upon orders or prices. These latter for manufactured iron are maintained in the new transactions for the quarter entered into by first-class houses, for bars, £7 10s., hoops, £8 10s., and plates, £9 10s. To get orders, however, second-rate firms still consent to execute at prices considerably below this quotation. Pig iron is by no means scarce, and for samples not first-class terms continue to get a little easier.

The hardware and general trades of Birmingham, Wolverhampton, and the surrounding district are without much alteration from their condition last week. Of the two scarcely so many orders have been received in the past seven days as in the previous corresponding period.

The leading machine and casting firm of the district of Birmingham (the far-famed Soho) are very well off for orders. It is stated that such is the state of their books, that they have enough work in hand to afford employment to their numerous workpeople for the next two years. Among the orders now under execution, is one for machinery for the City of Dublin Company steamers, which are designed to attain a speed of from 21 to 22 miles an hour. Of so large dimensions is this machinery, that the two cylinders require each for their casting upwards of 30 tons of molten metal. The vessels are to be 2,000 tons burden. Messrs. Watt and Co. are also making a number of marine engines for English frigates and men-of-war. Among the miscellaneous machinery upon which this firm is now in active operation, are all the apparatus necessary to a mint, with steam engines of 100 horse to work it. The boilers of this engine, which will be of copper, will cost between £9,000 and £10,000. The whole is for export to Calcutta, for the use of the Mint there.

In Sheffield the country firms report things as flat. A few of the rolling mills are in full work, which would be more gratifying were it not so partial. The American advices are again spoken of as rather better, and though there is not a positive improvement in sales, the orders sent home being principally for stock, yet this betokens a more hopeful feeling, and shows that the prospects for the future are cheering. We hear there is a slight improvement in the continental orders, in spite of the uncertainty which still hangs over the future course of events.

LIST OF MISCELLANEOUS TENDERS INVITED, AND ENGAGEMENTS OPEN.

The tenders and vacancies which appear in this weekly list are not repeated in succeeding numbers.

NORTHERN LIGHTHOUSES.—1. On Skerville, or the Iron Rock, a lighthouse tower, with dwelling-house, on the island of Jura. 2. On Stourhead, on western coast, county of Sutherland. 3. On the butt of the Lewis. Information at the office, 84 George-street, Edinburgh, up to April 16, when tenders.

RAILS, CHAIRS, &c., *East India Company.*—11,000 tons of rails, 100 tons of bolts and nuts, 3,000 tons of chairs, 300,000 keys, 225 tons of twisted spikes, 600 tons of fishing plates. Specifications and forms of tender, Company's offices. Tenders to Secretary, April 19.

CREOSOTED TIMBER, BOLTS, &c., *East India Railway Company.*—100,000 cubic feet of creosoted timber for girders, and 100 tons of bolts, nuts, &c. Specifications, forms, and delivery of tenders, as next above.

COPPER, *Navy.*—100 tons of English tough cake for Chatham. Tenders, Somerset-place, 2 o'clock, April 12.

REBUILDING DEDDLESPOOL HALL, *near Betley, Staffordshire.*—Plans, &c., there; and further information of the architect, Mr. T. Bower, jun., Town-hall, Nantwich, to whom tenders, April 11.

POLICE LODGE, CLOCK TOWER, AND DRINKING FOUNTAIN, *Nottingham.*—On the Recreation Ground. Drawings, &c., town clerk; and of Mr. Edwards, architect, 4 St. James's terrace, Camden Town, April 12.

SEWER WORKS, TUNNELLING, &c., *Blackburn.*—Execution of portions of main outlet sewer, consisting of about 500 lineal yards of sewer, 6 feet by 20 feet, together with branch sewers, &c., connected therewith. Plans, &c., Mr. Brierley, Borough Surveyer. Tenders to Town Clerk, April 30.

SEWERAGE AND DRAINAGE WORKS, *Stoke-upon-Trent.*—The making and fixing of pumps and connections, the supply of iron tank, the providing, laying, and fixing water pipes and cocks: construction of sewerage reservoirs, the supply of stoneware glazed pipes, laying down a system of complete drainage and alteration of privies, at the workhouse of the above parish. Plans, &c., at the parish office. Tenders by ten forenoon, to the guardians, May 4.

BRIDGE ROADS AND DRAINS, *Salford.*—The Justices of the Peace for the county of Lancaster invite tenders for the keeping in repair for seven years the roads, footpaths and drains of the twenty-five bridges which the inhabitants of the hundred of Salford are liable to keep in repair. Particulars, Bridgemaster's office, 41 Dalton-street, Manchester, to which place tenders, May 9.

IRON ROOF, *Winchester.*—For the roofing in of the centre part of the Winchester Corn Exchange. Plans, &c., Mr. John Colson, architect, St. Swithen-street, Winchester, April 11. Tenders, C. Bailey, Esq., solicitor, Winchester, April 22.

WORKS AND REPAIRS, *Stations of the London District of the War Department.*—May 1, 1859, to March 31, 1862. London, Windsor, Hounslow, Hampton Court, Kneller Hall and Richmond; Croydon and Carshalton; Barnet, Halfield, and Uxbridge. Schedules, forms, &c., St. James-street, Buckingham-gate, April 16, War-office, Pall-mall.

SEWERS, *Chelsea.*—For about 480 feet run of brick sewer, &c., according to specification and drawing at office of vestry, Manor-house, 111 King's-road, Chelsea, where tenders by 3 o'clock, April 12.

CHURCH, *Newcastle-upon-Tyne.*—Clayton Memorial Church in the Cemetery Road. Tenders to Mr. Andrew M'Leod, Chairman of the Committee, 11 New Bridge-street, Newcastle, April 26. Plans, &c., Mr. Dobson, architect, Newcastle-upon-Tyne.

RESTORATION OF LANGTOFT CHURCH.—Plans, &c., Mr. E Browning, architect, Stamford, April 11. Tenders to Churchwardens, April 19.

CHURCH, *Cardiff.*—New church, parish of St. John's. Plans, &c., Messrs. Pritchard and Leddon, Llandaff; and 6 Whitehall, London. Tenders to same at Llandaff, April 23.

CHURCH, *Suffolk.*—Rebuilding parish church at Farnstead. Plans in school-room, April 11. Tenders to Rev. the Rector, April 23.

EPISCOPAL CHAPEL, *Lower Sydenham.*—Alterations, new chancel, &c. Plans, &c., Mr. Brown. Information and bills of quantity, Messrs. Poulton and Woodman, architects, Reading, to whom tenders April 15.

CHURCH, *Kirkby Woodhouse, Notts.*—Particulars, Messrs. Hine and Evans, architects, Nottingham.

CHURCH, *Larton, Notts.*—Rebuilding parish church. Plans, &c., Messrs. Hine and Evans, as above.

CHAPEL, *Diss.*—New Baptist chapel. Plans, &c., Crown Hotel, Diss, Norfolk. April 12.

CHAPEL AND SCHOOL-ROOMS, *Burley Lawn, Leeds.*—Drawings, &c., Mr. Geo. Smith, surveyor and architect. April 13.

RECTORY HOUSE, *Uppingham, Rutland.*—Alterations, &c. Plans and bill of quantities, Mr. E. Flaw, architect, Northampton. April 16.

SCHOOLS, *Workington.*—The building of Workington Free Schools for 500 scholars, with residences for master and mistress. Plans, &c., Mr. Lamposts, to whom tenders, and further information of Mr. T. Nicholson, architect, Hereford. April 23.

CHURCH OF ENGLAND SCHOOLS.—*Workington.*—Plans, Mr. Charles Eagle-field, architect, Maryport. April 12.

CEMETERY, *Yorkshire.*—Burial ground at Handsworth Woodhouse, and also two chapels thereon. Plans, &c., Mr. S. F. Holmes, surveyor to Burial Board, 7 St. James's-row, Sheffield. April 11.

FIREPROOF MILL, *Hunslet, Yorkshire.*—Erection of a fireproof mill. Plans, &c., Mr. Shaw, 2 Belgrave-square, Leeds, April 11. Tenders to 18th April.

COVERED MARKET, *Workington.*—Plans, &c., Mr. Boroman, Green Dragon Hotel, Workington. Information, Mr. Charles Eaglefield, architect, Maryport. April 12.

ALTERATION TO RESIDENCES, *King's Newton, near Derby.* Alterations and additions. Plans, &c., Mr. B. Wilson, architect, Alpeton, and Mr. Jos. Beresford, King's Newton. April 25.

HOUSES, *Hartlepool.*—Dockmaster's and deputy-dockmaster's house for the North Eastern Railway Company. Plans, Mr. T. Prosser, architect, Central Station, Newcastle-on-Tyne. Tenders to Mr. J. Cleghorn, secretary, York, April 13.

RAG STONE, *Gravesend to Sheerness.*—For supplying the above according to specification. The contracts to be for such time and as shall be mentioned by the justices. Tenders, April 27.

VALUATION AND PARTIAL SURVEY, *Holywell.*—Parish of Holywell for the purpose of the parochial assessment. Tenders to Mr. W. Macintosh, clerk of Union, April 20.

SURVEYOR, *Longton.*—Whole time, salary, £150. The duties may be known from W. Webberley, Chief Bailiff, Longton, Staffordshire.

MANAGER.—For a plain and fancy power-loom manufacturing concern, with 500 looms. Address G. R., care of Mr. R. Goodair, 54 George-street, Manchester.

METAL ROLLER.—An engineer to superintend the rolling of yellow metal, and manufacture of solid brass tubes at the admiralty works of a Foreign Government. £20 per month, lodging and travelling expenses. Personal application to Mr. G. R. Collis, Church-street, Birmingham.

A RESPECTABLE MAN who thoroughly understands the manufacture of some useful or valuable article, is wanted by a person who wishes to establish a business in Birmingham. Terms: an interest in the business, or a salary.

ONE HUNDRED AND FIFTY EXCAVATORS wanted on the Honeyhourne branch of the Oxford, Worcester, and Wolverhampton Railway. Application to Mr. Wilson, engineer's office, Worcester station; or to Mr. Ponsonby, resident engineer.

PUMPS.—A twenty-inch plunger lift (second hand). B. D. Collens, 6 Bridge Parade, Bristol.

PORTABLE ENGINES.—Two portable engines wanted to hire. Box. 12 Post-office, Swansea.

VERTICAL ENGINE.—Suitable for grinding wanted. Box 12, Post-office, Swansea.

Labels, Labels, Labels!!!

JOHN DAVIS, 19 Percival-street, Clerkenwell, London, E.C. Established 1810.

DIE SINKER, SEAL ENGRAVER, METAL Stamper, Piercer, and Manufacturer of Metal Labels for Patent and other Articles, Tokens, &c.; Copying, Embossing, and Piercing Presses, Stamps, Punches, Press Tools, &c.

DAVIS'S PATENT SELF-INKING ENDORSING PRESSES, the most Complete and Useful yet made.

A Lever Embossing Press and Die, complete 15s. (51)

VENTILATION WITHOUT FLUES.

KUKLA'S PATENT STOVES,

At 18s., 25s., and 50s.

KUKLA'S newly-invented Deflagrator—the first and only perfect GAS STOVE. Guaranteed to burn without flue—without dust, smell, or smoke, producing a great and pure heat with the least expenditure of Gas.—*Vide Society of Arts' Journal.*

Patronised by the English and French Government.

Scientific in Principle,
Simple in Construction,
Healthy and efficient in use.

The Deflagrator Stove is cheap, portable, and suited for every situation; and from the principle on which it is constructed (viz., expanding to a sixfold volume the gas used) is capable of warming any given space more quickly and more thoroughly than any other means: while its addition forms a sure remedy for any ill-warmed or ill-ventilated apartments.

The 25s. Deflagrator warms a room of 2,000 cubic feet at a cost of 3d. per day.

The 50s. Deflagrator warms 5 to 6,000 cubic feet at a cost of 6d. per day (twelve hours).

Also, the Greenhouse Stove at 18s.

Patentee and sole Manufacturer, F. X. KUKLA, 194 Pentonville-road, London.

Country orders promptly attended to. Carriage free to any Railway in London.

Post-office Orders should be made payable to FRANCIS XAVIER KUKLA, General Office.

N.B.—Every Stove separately tested before sent out.

The New Gas Cooking Stove for 10 persons, price £3. (103

PIERCE'S

UNRIVALLED

PYRO-PNEUMATIC FIRE-LUMP WARMING AND VENTILATING STOVE GRATES,

WITH the cheerful, open fire, producing healthful warmth, with continuous Self-acting Ventilation, for Churches, Schools, Public Buildings, Banking Houses, &c. These Grates are manufactured solely by PIERCE, the Inventor, for which he received the Prize Medals of London in 1851, and of Paris in 1855.

PRICE, from £7 10s.

ILLUSTRATED CATALOGUE, with Prices and Estimates for Work, furnished on application to the Inventor and Sole Manufacturer.

Also his

TO BRASS-FOUNDERS, ENGINEERS, &c.

THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings; they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty per cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, muffles, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire-standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. (43

ENORMOUS REDUCTION IN THE COST OF STEAM POWER.

TO RAILWAY COMPANIES, STEAM SHIP PROPRIETORS, AND MANUFACTURERS.—A saving of Fuel equal to one-third of the entire consumption is effected by the introduction of "DUNCAN'S PATENT SPIRAL HEAT DIFFUSERS," which arrest the heat in its passage through the flues or tubes, and convert into impelling power the large measure that without these appliances would (even in the very best boilers) escape along with the smoke. They can be fitted in an hour or two at a small cost, and without any alteration in the existing arrangements of boilers now in use. These results are prepared to be guaranteed, and a part of the value of fuel saved by the use of the Apparatus will be accepted for royalty.

Hitherto, steam navigation to distant parts of the world has proved a commercial failure. The remedy is provided, and the vast numbers of large and splendid vessels can soon be made valuable paying property.

Further information may be had on application to GWYNNE and CO., Engineers, Essex-street Wharves, Strand, W.C., London. (167)

STEAM ENGINES FOR SALE.

PORTABLE STEAM ENGINES, from 6 to 12 horse power,
STATIONARY STEAM ENGINES, from 4 to 50 horse power,
TUBULAR BOILERS, from 4 to 50 horse power,
CORNISH BOILERS, from 4 to 50 horse power,

Are in hand, and can be despatched on eight days' notice. Prices moderate. Workmanship and Material of the best description.

Apply to R. THORNTON & Co., St. Leonard's Iron Works, Edinburgh. (197)

GLADSTONE & Co., CONTRACTORS and ENGINEERS.

2 John-Street, Minories, London, E.C.,

Are prepared to ESTIMATE FOR and CONSTRUCT BRIDGES, PIERS, JETTIES, &c., in Iron, Wood, or Stone. Also to supply Cranes, Girders, Turntables, and Railway Work and Plant generally. (199)

A VALUABLE PATENT to be DISPOSED OF.—The Patentee will either dispose of the Patent or grant Licences to any party wishing to manufacture, or would join a person with capital to carry out the Patent.

Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (169)

Digitized by Google

GREAT REDUCTION IN THE PRICE OF

FOWLER'S PATENT STEAM PLOUGH.

From the great Improvements recently made, JOHN FOWLER is prepared to execute Orders at the following prices:—

Windlass to Eight-horse Engine, with Patent Self-moving Anchor, Headland Ropes, Rope Porters, and all necessary Tools	£160 0 0
Cultivator, fitted with Three, Five, or Seven Tines	25 0 0
Seven Hundred Yards Iron Wire Rope, 1¾ in. circumference, which is a sufficient length, on this plan of working, for a 350 yards furrow	22 10 0
Steel Rope, £7 10s. extra.	£207 10 0

The advantages to be derived in the working of this Tackle over others are, no belt is used, consequently no delay is caused from its slipping in showery weather; it can be efficiently worked by two men and two boys; and it is not confined to scarifying only, but a two-furrow balance plough can be worked by it. From the direct action of the draught, a small engine will effect a larger quantity of work than the same engine on the "round-about system;" only half the rope is required for the same length of furrow, and a whole field can be done without shifting. The windlass can be attached to any agricultural engine, and the weight added would only be 12 cwt. The Tackle can be set at work within an hour of entering the field intended to be cultivated. The Drums on which the Rope is worked are four feet in diameter, and from its being wound in grooves, all crushing is avoided, and by these means a great saving in wire rope is effected.

LARGER POWER ENGINES AT COMPARATIVE PRICES.

Illustrated Catalogues with New Prices will be ready shortly. For further Particulars apply to

JOHN FOWLER, JUN., 28 CORNHILL, LONDON. (201)

SCOTT'S
PATENT GRASS SEED SEPARATOR,

which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from

PERENNIAL AND ITALIAN RYE-GRASS, &c.,

AND

SCOTT'S PATENT CARROT SEED BEARDING

AND

CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,

which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

Communications to be sent to the Patentee, J. SCOTT, 111 Drummond Street, Euston Square, London, N.W. (48)

TO ENGINEERS, MILLWRIGHTS, MACHINISTS, &c.

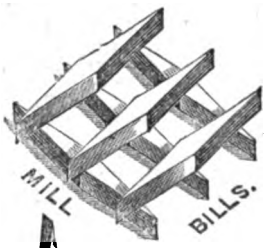
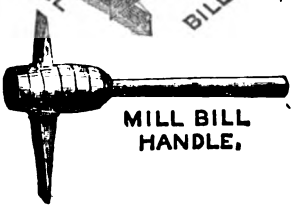
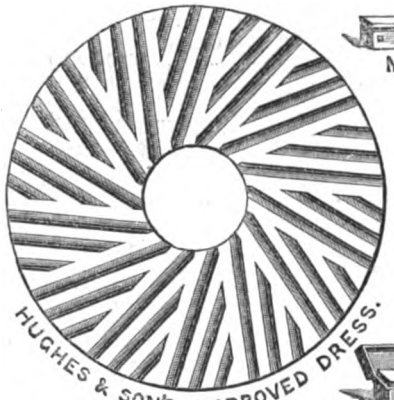
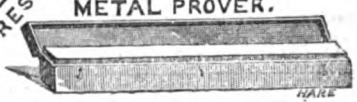
IMPORTANT TO MILLERS AND OTHERS.

ESTABLISHED OF HALF A









UPWARDS CENTURY.

HUGHES AND SONS, MILLSTONE MAKERS,

Great Dover-street and Swan-street, Borough, London, S.E.,

BEG to call the attention of Millers, Millwrights, Engineers, Agricultural Machinists, Cement Manufacturers, Distillers, Merchants and others, to their extensive Stock of FRENCH BURR MILLSTONES, manufactured from a superior Brown Burr, of quality, workmanship, and finish not to be equalled by any house in England. Also to their Stock of French Burrs, of various quality and texture, selected by them in person at the best quarries in France, where their choice is unlimited. The extent of their business requiring several thousand Burr Stones annually more than any other Millstone Maker in England (as may be seen by reference to the Custom House "Shipping List"), places them in a position to execute all orders entrusted to them to satisfaction.

H. and S. are also Importers of Peak, Cologne, Granite, and Grindstones direct from the quarries; and have always on hand at their works a varied assortment of Flour Machines, Smut Machines, Bolting Machines, Separators, Kilns, &c.; Wove Wire for Screen Work; Wire Webb for Flour Cylinders; Improved Square Smut Wire, wove by machinery, with rough surface, made to cover any size cylinder in one sheet; Bolting Cloths; Best Oak-tanned Leather Millbands, well stretched and rivetted at joints; Webbing for Elevators; Elevating Buckets; Screw Jacks, Proved-iron Hoisting Chain; Iron and Brass Sheave Blocks; Iron and Slate Provers; Mahogany Staffs; Sack and Heaving Barrows; Cast Steel Mill Bills, of finest Silver Steel; Flour Machine Brushes, made of the best Russian Bristles; and all other articles used in Mills.

HUGHES and SONS employ none but the Best Workmen;

and wish to draw attention to the fact that by employing no Travellers, thereby avoiding the necessarily high expenses connected therewith, they are in a position to give their Customers all the advantages from this circumstance, as well as those arising from adequate capital, combined with practical judgment.

TO STEAM SHIP OWNERS, ENGINEERS, AND OTHERS.

How's Patent Steam Engine Counters, can be read at sight.

These Counters register the number of revolutions made by an engine or other mechanism. They may be used for ascertaining the duty of Pumping Engines and Water-wheels; the revolutions on board a steam-vessel; to calculate the slip of the propeller; and in a locomotive to test the slip of the wheels.

How's Patent Salinometer, for Steam Boilers using Salt Water.

By these, the density of the water in the Boiler is at all times accurately shown, and a saving of boiler and fuel is effected. They are adopted by the Admiralty, the Honorable Trinity Corporation, and others. Copies of Testimonials from Messrs. Penn, Messrs. Maudslay, and others, will be forwarded on application.

How's Engine-Room Telegraph, for communicating between Captain and Engineer. Society of Arts Prize Medal, 1855.

is a Mechanical Telegraph, and by its peculiar construction, error or misunderstanding is rendered impossible. It now extensively adopted, and gives great satisfaction.

How's Patent Fresh Water Apparatus for Ships' Use.

This apparatus is designed for the distillation of Fresh from Salt Water; and on long voyages, and where the supply of water is scanty, it will be found invaluable. Testimonials may be seen.

Patent Steam Pump and Fire-Engine for Ships' Use.

This Steam-pump occupies but a small space; works perfectly noiselessly, and throws an immense volume of water. An Illustrated Circular of Fresh Water Apparatus and Steam-pump combined, free on application.

How's Patent Machine for Cutting Bolts, Rods, Spindles, Wire, &c.

Simple in construction, inexpensive, occupies but little space, and will not easily get out of order.

A Pamphlet Illustrative of the above, sent free by post, on application to

A. P. HOW, ENGINEER,

81 MARK LANE, LONDON.

EVERY DESCRIPTION OF ENGINEERS' TOOLS, ENGINE ROOM STORES, &c., &c., SUPPLIED.

(89)

EDWIN JEWITT, ENGRAVER ON WOOD AND DRAFTSMAN, 1 Pickett-place, Strand, near Temple-bar. Engineering, Scientific, and Mechanical Designs accurately engraved. Manufacturers and Tradesmen's Catalogues Illustrated. W.C. (51)

ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street, Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 150 feet in length, to work by hand or Steam Power.

Hot-Water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (44)

INDIA-RUBBER VALVES FOR STEAM ENGINES, PUMP PACKING, &c. — Explanatory Drawings and Information as to the best modes of fitting and arranging the above, and all other Mechanical Applications of VULCANISED INDIA-RUBBER, are furnished post-free by

CHARLES MACINTOSH & Co., Patentees,
Cambridge-st., Manchester, and 3 Cannon-st. West, London.

METROPOLITAN BOARD OF WORKS.—MAIN DRAINAGE OF THE METROPOLIS.—SOUTHERN HIGH LEVEL SEWER.—To BUILDERS, CONTRACTORS, and Others.—The Metropolitan Board of Works hereby give notice, that they will MEET at the Council Chamber, Guildhall, in the City of London, on Friday, the 20th day of May next, at Twelve o'clock at noon precisely, and will then be prepared to open TENDERS by parties who may be willing to CONTRACT for the CONSTRUCTION of MAIN BRICK SEWERS, 9 miles 2,940 feet in length, or thereabouts, and for the execution of other works in connection therewith, to extend from Deptford Creek to High-street, Clapham. Also, a branch to extend from the Broadway, Deptford, to the point of junction of the Effra Sewer at Dulwich and Norwood, all in the respective parishes of Saint Nicholas, Deptford, in the county of Kent; Saint Giles, Camberwell; Saint Mary, Lambeth; Clapham, and Streatham, in the county of Surrey: and for the maintenance of such works in complete repair for twelve calendar months.

Parties desiring to submit tenders, may, upon payment of £3, obtain plans, sections, specification, form of tender, and other particulars, on application at the office of the Board, between the hours of Nine a.m. and Four p.m., on and after Thursday, the 14th of April instant.

Tenders addressed to the Metropolitan Board of Works, must be delivered at the office of the Board, No. 1 Greek-street, Soho, before Four o'clock p m. on Thursday, the 19th day of May next, and no tender will be received after that hour.

The Board do not bind themselves to accept the lowest, or any tender, and the party whose tender shall be accepted, will be required to provide two approved sureties for the due performance of the work.

E. H. WOOLRYCH, Clerk of the Board.

No. 1 Greet-street, Soho, April 7, 1859. (211)

193 Gresham House, Old Broad-street, London, E.C.

THE Imports of Foreign Flax Fibre having declined to a most serious extent, and the Cultivation of the Plant decreased at home, a great necessity has arisen for laying the foundation of a System whereby a sufficient supply of raw material may be secured to meet the requirements of a great staple industry of the country—known as the Flax and Linen Trade.

It has, therefore, been determined to form "THE NATIONAL FLAX COMPANY, LIMITED," whereby such a System may be initiated.

This will be effected by the introduction of mechanical improvements, whereby a continuous and easy, as well as profitable, preparation of the Fibre from the Plant can be effected.

Such preparation will be carried on in establishments to be called "Rettories," and to be erected in suitable localities, where the Flax Crop, in its entirety, or otherwise, will be purchased from the Grower.

By thus creating a Market within easy reach of the Farmer, and proving to him practically that he can easily produce a good-paying Crop, needing no further trouble in its preparation, and for which he may regularly receive *ready money* at harvest time, when the demands on him for *labour-cost* are large, it is considered that a very extensive growth of Flax will be gradually introduced throughout the country generally.

A more perfect cultivation of this Plant will also be induced, whereby many existing prejudices, in respect to the supposed exhaustive properties of Flax, will be removed, and the Grower convinced that it is really one of value in Districts suitable to it, and in fair rotation. It will also be found that land capable of producing any kind of grain is equally available for Flax; and that there is no better *preparation* for a Wheat Crop to follow.

The Company have secured the Patents, Plans, and Services of Mr. G. A. CATOR, who has devoted a large sum of money and many years in bringing the matter to its present effective condition.

By reference to the detailed Prospectus, it will be clearly seen that, with the outlay proposed, a very large Dividend may be calculated on with perfect safety; showing that this Company presents unusual features of promise to parties seeking investment in substantial and well-considered enterprises.

*** Prospectuses, Pamphlets, Forms of Application for Shares, and all other information, may be obtained at the Offices of the Company. (207)

THE COTTON SUPPLY ASSOCIATION.

COTTON GINS.

IMPROVEMENT UPON THE INDIAN CHURKA.

TO COTTON GIN MAKERS, MACHINISTS, AND INVENTORS.

THE Committee of the Cotton Supply Association have received from the Bombay Chamber of Commerce two Indian Churkas, or Hand-roller Gins of native construction, and such as are now used by the natives of India, with the request that they should be submitted to the Machinists of this country, with a view to obtaining, if possible, a superior machine. Your attention is therefore respectfully requested to the construction of this "Churka," which may be seen at the offices of this Association. The objects to be aimed at in the making of an improved machine, are—

1. That the machine do no injury to the cotton, in the process of separating the seed from the fibre. It is said that "no machine can possibly separate the cotton from the seeds with less injury to the staple than does the Churka."
2. That the machine, as far as possible, do rid the cotton from leaf and impurities.
3. That the machine be of simple construction, and durable.
4. That the machine be easily repaired by the native Indian.
5. That it be portable.
6. That the cost be as low as possible. The "Churka" costs only two rupees, or 4s. It is necessary that the improved machine should be within the ability of the natives to purchase.
7. That the machine be able to do its work faithfully, in spite of carelessness or neglect.
8. That the machine be able to clean a fair quantity of cotton per day, with the labour of one person (male or female).

The Committee submit the above conditions to the consideration of Machine Makers, and Mr. Haywood, the Secretary of this Association, will be prepared to afford any further information that may be required.

It is proposed, in furtherance of the wishes of the Bombay Chamber of Commerce, to hold a trial of the merits of the different Gins that may be constructed to meet the above conditions, in two or three months from this date. Due notice of the day of trial will be given.

Premiums of £20, £10, and £5 will be paid by the Association to the exhibitors of the Gins which rank 1st, 2nd, and 3rd in order of merit.

G. R. HAYWOOD,
Secretary of the Cotton Supply Association.

1 Newall's Buildings, Manchester,
March 25th, 1859. (196)

THE GENERAL PATENT COMPANY, LIMITED.—Capital, £50,000, in 5,000 Shares of £10 each. Calls not to exceed £2 10s. per Share for the first Year, and no subsequent call to be made without two months' notice. Deposit, 5s. per Share.

And all other Articles in proportion.

J. L. HANCOCK, Sole Manufacturer and Patentee,
82 Pentonville-road, London. (37)

ENGINEERING BUSINESS FOR SALE.

OWING to the continued ill health of the Proprietor, the first-class business of an Engineer and Crane and Block Maker is offered for sale. It has been established in the Metropolis for nearly 30 years, and has enjoyed extensive patronage amongst Brewers, Manufacturers, Warehousemen, and others, in and about London; the business done amounting to nearly £8,000 per annum. About £3,200 would be required, (part of which, however, may remain for any reasonable time on good security,) which is the bare value of the tools, patterns, and stock in trade. The premises, including good dwelling-house, very conveniently situated, and capable of accommodating from 60 to 70 hands, are held upon a long lease, at an extraordinary low rental, not exceeding £100 per annum, taxes included. Many of the tools are nearly new, and of the best construction. The present proprietor, who relinquishes the business solely on account of ill health, would give every assistance in his power to those succeeding him; and as his foreman, who has been with him for nearly ten years, is thoroughly acquainted with the practical parts of the business, any gentleman desirous of commencing as a manufacturing engineer would find the present a very favourable opportunity. As all accounts have been, for many years past, collected quarterly, a very small amount, say £800, would suffice as working capital. Full particulars may be obtained by application to E. E. ALLEN, Esq., MECHANICS' MAGAZINE Office, 166 Fleet Street, E.C. (130)

TO ENGINEERS, INVENTORS, AND OTHERS.

A PRACTICAL ENGINEER of long standing prepares Original Drawings, Copies, and Tracings. Advice and Assistance given to Inventors in working out their Plans. Pupils taught privately. Terms moderate.

Apply to J. J., 171 Strand. (138)

FOR SALE.

A 12-HORSE HORIZONTAL STEAM ENGINE and a 4-HORSE DIRECT ACTING STEAM ENGINE, with Fly-wheel Governors, &c., complete. Address, W. F. Plummer, 12 Albany-road, Camberwell. (188)

THE SETTING of STEAM-ENGINE VALVES is properly effected by the use of Hopkinson's IMPROVED Steam-Engine Indicator and Book, (second edition). Steam-Engine Explained, PRICE £4 4s.

J. HOPKINSON and CO.,
Engineers, Britannia Works, Huddersfield. (200)

VULCANISED INDIA-RUBBER MACHINE BANDING is NOT AFFECTED BY WET, HEAT, OR COLD; does not stretch nor slip on the pulleys. HOSES for BREWERIES, &c., will NOT impart TASTE, SMELL, or COLOUR: also for conducting, or steam purposes. Washers, Valves, Sheets, Printing Blankets, &c., in Stock. Other Articles made to order. All Goods warranted to stand 300° Fahrenheit.

N.B.—Sole Contractors to the Lords Commissioners of the Admiralty.

DODGE and GIANDONATI (late DODGE, BACON, and Co), 44 St. Paul's Churchyard, London, E.C. (208)

AT SUFFELL'S, 132 Long-acre, London, W.C., every Instrument suitable for Engineers, Contractors, Surveyors, Architects, Draftsmen, &c., to be had second hand at very reduced prices, by the most esteemed makers, consisting of Theodolites, Levels, Circumferenters, Sextants, Compasses, Protractors, Station Pointers, Adygraphs, Pentagraphs, Telescopes, Microscopes, Cases of Drawing Instruments, &c.; Rules, Scales, Chains, Levelling Staves, and Measures of all nations. Every Instrument warranted. (212)

EMIGRATION TO NEW YORK, CANADA, AUSTRALIA, NEW ZEALAND, EAST INDIES, CAPE OF GOOD HOPE, &c. All Classes of Passengers booked throughout in the Finest Steam and Sailing Packets. Full Particulars in our circulars for 1859, may be had gratis on application to F. S. GRAY and Co., 54 King William Street, City, and 6 Tower Hill, London; and at 35 Bath Street, Liverpool. (187)

BRICKS.

TO BE LET, with immediate possession, in consequence of the death of the proprietor, J. M. Paine, the DIPPENHALL SILICA FACTORY, erected for the purpose of making improved Fire Bricks, Building Bricks, Paving Tiles, &c., &c., from the Soluble Silica Rock.

Apply to view the Buildings and Bricks to G. H. Ogston Esq., Resident Manager, Dippenhall, Farnham, Surrey and for terms, to Messrs. Nicholls and Potter, Solicitors, Farnham. (125)

TO ENGINEERS, ARCHITECTS, PATENT AGENTS, &c.

PHOTOGRAPHS OF THE HIGHEST CLASS and of any size, taken and reproduced at a most moderate rate of charge. Reproductions of faultless accuracy, of Machinery, Models, Drawings, &c. Orders attended to in town and country. Estimates forwarded.

SPENCER, READ, & Co., 4 Agar-street, Strand, W.C. (90)

TO MARINE ENGINEERS, OR SHIP-BUILDERS.

THE PROPRIETOR of a VALUABLE PATENT for Double-expansive Marine Engines (by which great economy of space and fuel is obtained) is desirous of entering into arrangements with a respectable firm for the construction of the same. An adequate portion of the patent-right would be assigned by the advertiser to any firm taking the matter up; and he would render all assistance in his power, either in London or elsewhere, amongst ship-owners (to many of whom he is well known), in obtaining contracts, &c. Unexceptionable references given. Address C. E., MECHANICS' MAGAZINE Office, 166, Fleet-street. (76

PUMPING MACHINERY.

GWYNNE AND Co., Engineers, London, manufacture and supply the following Machinery, of the most approved construction and with all the latest improvements:—Portable and Fixed Steam-Engines and Boilers of every description; Waterwheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the Supply of Towns, Cities, and Districts, and for the Irrigation of Coffee, Cotton, Indigo, Sugar-cane, and Rice Estates, for pumping out Coffer-dams, Canals, Dry Docks, Reservoirs, &c. They also manufacture and supply the Pumping and other Machinery for Paper, Pulp, and Fulling Mills, Breweries, Distilleries, Tanneries, Starch Works, Bleaching, Dyeing, and Calico Printing Works, Chemical Works, Silk, Cotton, and Flax Mills, and Manufactories in general. All Letters not paid will be refused. Illustrated Price Lists forwarded on receipt of Six Postage Stamps. —GWYNNE AND Co., Hydraulic and Mechanical Engineers, Essex-wharf, Strand, London.

For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (24)

MR. WALTER HALL is prepared to Grant Licences, or to Dispose of his Patent for working Railway Breaks. Particulars to be had of Mr. HALL, who may be addressed by letter to the care of the MECHANICS' MAGAZINE, 166 Fleet-street, E.C. (217)

SPIRAL TUBE BRUSHES made with Wire or Whalebone for Tubes of

1¼	1¾	2	2¼	2½	3	3½	4	4½	5 ins. diam.
24/,	25/,	26/,	28/,	30/,	32/,	35/,	38/,	42/,	46/, 50/ per doz.

Quantities of Two Dozen and upwards delivered in London.

WILLIAM WALLER, Uddingston, by Glasgow. (213)

BRASS ENGINE and BOILER FITTINGS.—

Water-Gauges for Glasses, ½ ¾ ¾ inch diam.
26/, 30/, 35/ each.
With Guards, 32/, 37/6 „

Gauge and Pet-Cocks, from 3/6 each.

Whistles, with 1¼ 2 2½ 3 4 inch bell.
12/6, 18/6, 26/, 45/, 50/ each.

Blow-off Cock for Portable Engines, 12/6 each.
Oil Cups, of all kinds, from 18/ per dozen.
Ball Clacks, Balls, Cages, and sets complete.
Forsyth's Safety Boiler Plugs, 12/6 and 18/ each.

WILLIAM WALLER, Uddingston, by Glasgow. (214)

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR

Families, by using this delicious VINEGAR, insure purity and effect a saving of 50 per cent. See "Report of Dr. Letheby, City Officer of Health, Dr. Hassall, of the 'Lancet' Commission, and others." Sold by the Trade in Bottles, labelled and capsuled. Wholesale—63 King William-street, London-bridge, E.C. Six Quart Samples sent free to any Railway for 3s. 6d. (216)

TO BRASS FOUNDERS.

TO BE SOLD, the Patent-right of a New and Highly-approved EQUILIBRIUM WATER COCK or VALVE, suitable for Steam Boiler Feed Pipes, or any cases where the valve is required to be opened against pressure.

Address H., MECHANICS' MAGAZINE Office, 166 Fleet-st., where a Drawing may be seen. (151)

MATHEMATICAL DRAWING INSTRUMENTS, RULES, TAPES, CHAINS, LEVELS, THEODOLITES, BOX SEXTANTS, PRISMATIC and POCKET COMPASSES. Price Lists of the above articles sent post free, by JOHN ARCHBUTT, 20 Westminster Bridge Road, Lambeth, near Astley's Theatre. Every article warranted, and the prices will be found considerably lower than ever before charged for articles of similar quality. outledge's Engineers' Slide Rules, 4s. 6d. each; Hawborn's ditto, 5s. 6d.; Carpenters' Rules from 1s. (148)

ENGINEERS' TOOLS.

FOR SALE, a Self-acting Slide LATHE, 11-inch Centres, and Bed 12 feet long, complete; and TWO PORTABLE PUNCHING and CUTTING MACHINES, one suitable for ½-inch plates, and the other for ¾-inch plates, both adapted for steam or hand power.

Apply to Messrs. PAGE & CAMERON, 64 Old Broad Street, E.C. (117)

PATENT WEDGE and GROOVED SURFACE FRICTIONAL GEARING.—The PATENT FRICTIONAL GEARING COMPANY, Proprietors of ROBERTSON'S WEDGE SURFACE FRICTIONAL GEARING PATENTS, grant Licences to Users of Machinery, for the unlimited use of the System in their Works, on very moderate terms, enabling them to make or order from any Mechanician the Machinery they require.

The Company possess Five Patents relating to this Frictional System, including (in addition to their Bevel and Mitre Wheels) a System of Disc Clutches and Clutch Movements, Wheel Clutching, Reversing, Differential, Speed Ring, Varying Speed, and Break Movements, and of Shafting, Pillow Blocks, Shafting Hangers, &c.

Frictional Wheels thus formed are applicable to the heaviest as well as the lightest kind of work, and, in addition to their being extensively in use for ordinary gearing purposes, have been in use for a considerable time applied to Mills for Rolling Iron, the Screw-Propeller, Incline-Winding Engines, Saw Mills, Pumping Engines, Flax Scutchers, Fan Blowers, Calico-Printing Machinery, Steam Winches, Cranes, Hoists, &c.

This system gives great facilities for simplifying Machines, and for mechanical combination, and has the advantage of being noiseless and cleanly, there being no oil or grease used on the wheels. Wheel Catalogues and Circulars, giving particulars, sent free by Post; also a list of manufacturing Agents, and information regarding those who, from locality or experience, are best able to execute orders for the description of work required.

Office, 20 Buchanan Street, Glasgow. (146)

N.B.—These Bands are celebrated for being well stitched and rivetted at joints, and being also of equal thickness throughout.

H. & SONS beg to call particular attention to their having always on hand a Large Assortment of Improved Screw-socket Rivets, varying in size, from ¼-inch upwards, for fastening Mill Bands, Elevator Cups, &c., also White and Brown Laces. (206)

IMPROVED MACHINERY FOR AGRICULTURISTS.

RICHARD GARRETT & SONS,

LEISTON WORKS, SAXMUNDHAM, SUFFOLK,

(ESTABLISHED A.D. 1778),

EARNESTLY solicit the continued support of their numerous Friends, Agriculturists, Shippers, and others; the additions made to their Works during the present year, in the erection of new sets of Workshops, fitted with the best mechanical appliances for producing Machinery of the most improved construction, expeditiously and economically, justifies their soliciting increased support, while their leading reputation as Inventors and Manufacturers of FIRST CLASS Agricultural Machinery, is a sufficient guarantee that every Machine supplied from Leiston Works will prove to the entire satisfaction of the purchaser.

R. G. & S. are now manufacturing the following Machines and Implements, which they guarantee to be thoroughly efficient in every respect:—

PORTABLE AND FIXED STEAM ENGINES. } From 4 to 40 Horse Power, suited for every kind of work
SELF-PROPELLING AND TRACTION ENGINES. } to which Steam Power is applied.
STONE GRINDING MILLS.
MORTAR AND PUG MILLS.
MILLWRIGHTS' WORK of all kinds.
SAWING MACHINERY, from 4 to 20 Horse Power.
BRICK AND TILE MACHINES.

IMPROVED SETS OF FARM MACHINERY, for Large Occupations.
PORTABLE AND FIXED MACHINERY, for Thrashing and Dressing Corn.
THE PRIZE BOLTING AND OPEN-DRUM HORSE-POWER THRASHING MACHINES.
CORN DRESSING MACHINES, for Hand, Horse, Water, and Steam Power.
BARLEY AVELLING MACHINES.
CHAFF CUTTERS, for Hand, Horse, Water, and Steam Power.
PATENT TURNIP CUTTING AND PULPING MACHINES.

THE PRIZE CORN AND SEED DRILLS.
PRIZE CORN AND SEED DRILLS WITH MANURE APPARATUS.
PRIZE SEED AND MANURE DRILLS.
LIQUID, SEED, AND MANURE DROP DRILLS.
CHAMBER'S PATENT BROADCAST MANURE DISTRIBUTOR.
GARRETT'S PATENT HORSE HOE for all Crops.
PATENT REVOLVING HOES for Root Crops.
IMPROVED PLOUGHS AND REAPING MACHINES.

&c. &c. &c.

Of which full detailed particulars will be found in R. G. & SONS' ILLUSTRATED CATALOGUE, sent postage free to any address, in English, French, or German; and any of the above Machines will be shown in operation at R. G. & Sons' Farm, near the Works, on their receiving a few days' notice.

A Copy of R. G. & SONS' new COLONIAL LIST will be forwarded free to any of the Colonies, and Shippers will be supplied with those lists, with their names and addresses printed on, free of charge, by making application for the same.

ADDRESS—R. GARRETT & SONS, LEISTON WORKS, SAXMUNDHAM, SUFFOLK. (161)

PIERCE'S

UNRIVALLED

PYRO-PNEUMATIC FIRE-LUMP WARMING AND VENTILATING STOVE GRATES,

WITH the cheerful, open fire, producing healthful warmth, with continuous Self-acting Ventilation, for Churches, Schools, Public Buildings, Banking Houses, &c. These Grates are manufactured solely by PIERCE, the Inventor, for which he received the Prize Medals of London in 1851, and of Paris in 1855.

PRICE, from £7 10s.

ILLUSTRATED CATALOGUE, with Prices and Estimates for Work, furnished on application to the Inventor and Sole Manufacturer.

TO BRASS-FOUNDERS, ENGINEERS, &c.

THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings; they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty per cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, muffles, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire-standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. (43

ENORMOUS REDUCTION IN THE COST OF STEAM POWER.

TO RAILWAY COMPANIES, STEAM SHIP PROPRIETORS, AND MANUFACTURERS.—A saving of Fuel equal to one-third of the entire consumption is effected by the introduction of "DUNCAN'S PATENT SPIRAL HEAT DIFFUSERS," which arrest the heat in its passage through the flues or tubes, and convert into impelling power the large measure that without these appliances would (even in the very best boilers) escape along with the smoke. They can be fitted in an hour or two at a small cost, and without any alteration in the existing arrangements of boilers now in use. These results are prepared to be guaranteed, and a part of the value of fuel saved by the use of the Apparatus will be accepted for royalty.

Hitherto, steam navigation to distant parts of the world has proved a commercial failure. The remedy is provided, and the vast numbers of large and splendid vessels can soon be made valuable paying property.

Further information may be had on application to GWYNNE and CO., Engineers, Essex-street Wharves, Strand, W.C., London. (167)

STEAM ENGINES FOR SALE.

PORTABLE STEAM ENGINES, from 6 to 12 horse power,
STATIONARY STEAM ENGINES, from 4 to 50 horse power,
TUBULAR BOILERS, from 4 to 50 horse power,
CORNISH BOILERS, from 4 to 50 horse power,

Are in hand, and can be despatched on eight days' notice. Prices moderate. Workmanship and Material of the best description.

Apply to R. THORNTON & Co., St. Leonard's Iron Works, Edinburgh. (197)

GLADSTONE & Co., CONTRACTORS and ENGINEERS.

How's Patent Steam Engine Counters, can be read at sight.

These Counters register the number of revolutions made by an engine or other mechanism. They may be used for ascertaining the duty of Pumping Engines and Water-wheels; the revolutions on board a steam-vessel; to calculate the slip of the propeller; and in a locomotive to test the slip of the wheels.

How's Patent Salinometer, for Steam Boilers using Salt Water.

By these, the density of the water in the Boiler is at all times accurately shown, and a saving of boiler and fuel is effected. They are adopted by the Admiralty, the Honorable Trinity Corporation, and others. Copies of Testimonials from Messrs. Penn, Messrs. Maudslay, and others, will be forwarded on application.

How's Engine-Room Telegraph, for communicating between Captain and Engineer.
Society of Arts Prize Medal, 1855.

is a Mechanical Telegraph, and by its peculiar construction, error or misunderstanding is rendered impossible. It now extensively adopted, and gives great satisfaction.

How's Patent Fresh Water Apparatus for Ships' Use.

This apparatus is designed for the distillation of Fresh from Salt Water; and on long voyages, and where the supply of water is scanty, it will be found invaluable. Testimonials may be seen.

Patent Steam Pump and Fire-Engine for Ships' Use.

This Steam-pump occupies but a small space; works perfectly noiselessly, and throws an immense volume of water. An Illustrated Circular of Fresh Water Apparatus and Steam-pump combined, free on application.

How's Patent Machine for Cutting Bolts, Rods, Spindles, Wire, &c.

Simple in construction, inexpensive, occupies but little space, and will not easily get out of order.

A Pamphlet Illustrative of the above, sent free by post, on application to

A. P. HOW, ENGINEER,
81 MARK LANE, LONDON.
EVERY DESCRIPTION OF ENGINEERS' TOOLS, ENGINE ROOM STORES, &c., &c., SUPPLIED. (59)

WATER POISONED BY LEADEN PIPES.

"The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dick, of Bonchurch, Isle of Wight. The water has cut these deep pits almost through the pipe, and not only upon the portion which we have illustrated, but has formed similar chasms throughout the entire length."—*Expositor.*

Poisoned Water Preventable.

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious, or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha. Nothing can be better. I have also recommended it to others, who have adopted the expedient.

Resistance for Frost.

The Gutta Percha Company have been favoured with the following Letters in reference to the non-conducting properties of Gutta Percha Tubing, in the resistance of Frost.

From J. ARMSTRONG, Esq., M.D., Gravesend.

"My private house, which was supplied with your Gutta Percha Tubing some five or six years ago, has never required the slightest attention; and previously, there was no winter passed that we were not deluged in consequence of the bursting of the leaden pipes."

From HENRY BROWN and SONS, Western Works, 108 Rockingham-street, Sheffield.

"We have now a positive proof of the frost-resisting properties of the Gutta Percha Piping. On our premises we have a leaden Pipe and a Gutta Percha one lying side by side. The leaden one has been completely frozen up at least ten days, and the Gutta Percha one is still unaffected.

REMARKS.—Iron: The Market is quiet; in Scotch Pigs a considerable business has been done, but at a shade lower prices. Copper is quiet. Tin: English has been advanced £3 per ton on common and £4 on refined. Spelter is rather firmer and inclined to advance.

LAWRIE AND HAGGER, Metal Brokers.
33 Lombard-street, E.C.

IRON AND OTHER METALS.

[FROM OUR OWN CORRESPONDENT.]

Iron Trade of the Country: by what affected—South Staffordshire Quarterly Meeting: very quiet: Prices—North Staffordshire Iron Trade: Preliminary Meeting—Additional Blast Furnaces in South Staffordshire—Monmouthshire and South Wales—Derby, York, and Lancaster—Whitby District and the Coasting Trade—Glasgow Market—The Iron Trade of Ireland; Attempt to Revive it—Birmingham, Wolverhampton, and Sheffield Hardwares—Metal Market.

THE iron trade of the country has not experienced a week of prosperity. In every district the lowering of the political horizon is exercising an unfavourable influence, which becomes increasingly perceptible.

The first current quarterly meeting of the South Staffordshire Ironmasters' Association was held on Wednesday in Wolverhampton, and the second yesterday (Thursday) in Birmingham. At neither was there any perceptible movement; nor was the attendance scarcely so influential and numerous as is usual on such occasions. There were merchants present from London and Liverpool, and the north; but the orders given out by them were not so many as were received from the same firms last quarter. In fact, many of the orders which were booked at the last-named period are yet wanting their specifications. Consumers, whose necessities are not immediate, expressed their determination to abide the development of the preliminaries recently initiated in regard to continental and home politics. The existing uncertainty in relation to the course which the former of these in particular will take, was referred to on every hand, as the chief cause of the quietude so perceptible, as well in Birmingnam as in Wolverhampton. Whilst, however, very little business was done, there was no feeling of despondency, it being the general conviction that if customers delayed purchasing at once, so low were their stocks, that they must soon be in the market, and that if the Italian difficulty should issue in a Continental war, and England become embroiled, the consequent retarding of the progress of home improvements would be in a measure compensated by the requirements of a state of war. The prices recommended by the preliminary meeting were adopted for manufacturing iron, but the little pig iron sold went at 1s. 3d. under the prices obtained a fortnight ago.

Additional blast furnaces are shortly to be put up in South Staffordshire. Messrs. Round, colliery proprietors of Tividale, are about to erect two; and Messrs. Dawes, of the Bromford Lane works, near West Bromwich, have a similar intention.

On Thursday the quarterly meeting of the North Staffordshire Coal and Ironmaster's Association was held at the Railway Hotel, Stoke-upon-Trent; the president, Robert Heath, Esq., in the chair. Masters were not loud in their complaints of the present state of trade; but shrugged their shoulders when the future came to be referred to. The meeting was an influential one, and the wages question was fully entered into—the present demand for increased rate—which the Association are determined to resist.

From Monmouthshire and South Wales our advices are of an improved description. There is more being done throughout that extensive district at the various ironworks than for any previous part of the year. Some of the houses have good continental orders on hand.

In the district of Derby, York, and Lancaster, underselling is complained of by the first-class works; who nevertheless are tolerably active for finished iron of almost every description. The demand for pig-iron is said to be otherwise than slack, with prices firm.

In the Whitby district we learn that the iron trade is being pushed forward with extra vigour. Messrs. Palmer and Co., of Port Mulgrave, for instance, having lately put furnaces in blast at the Jarrow Iron Works, Newcastle-on-Tyne, are especially marked in this respect. A new company denominated the Albert Iron and Cement Works, succeed at Wreckbills, that called the Victoria Iron and Cement Works, which has been wound up. The new company propose to work their ore into stock till they can use it themselves. The new company intend to rebuild the two furnaces, whose foundations, when the property belonged to the Victoria, gave way a twelvemonth ago. The weather in the past winter has been remarkably favourable to the shipping transactions of the works situated along the beach.

In Glasgow, on Tuesday, No. 1 realised from 51s. to 51s. 3d. Market drooping. Shipped this week, 13,629 tons; corresponding week last year, 10,319 tons.

An attempt is being made to revive the iron trade of Ireland by the formation of a joint-stock company, who propose to manufacture with peculiarly prepared peat, which is said to possess all the advantages of both coal and charcoal, without the disadvantages of either.

In Birmingham things are clouded. The orders for general goods have seriously fallen off during the past week.

In Wolverhampton there seems rather to be a slight improvement in the hardware trade generally. There the foreign orders are tolerably good.

Respecting the trade of Sheffield, we may say that with the Continental question still unsettled, and a general election pending it cannot be expected that any improvement has taken place. As compared with January, the exports, under the head of hardwares and cutlery, show a slight diminution. Of the metal market it may be said that spelter continues to display an upward tendency. The market is insufficiently supplied.

Judging from the quantity of tin at present in the market, and from the quantity that is expected to be available at the next July, the direction of that metal also is upward. The next sale takes place in June, and the utmost quantity expected to be offered is 150,000 tons.

LIST OF MISCELLANEOUS TENDERS INVITED, AND ENGAGEMENTS OPEN.

The tenders and vacancies which appear in this weekly list are not repeated in succeeding numbers.

RAILWAY WORKS, *Maryport and Carlisle Railway.*—Station house, dwelling house, and head offices at Maryport. Plans, Company's offices, Maryport. Tenders April 22.

RAILWAY WAGGONS, as above.—Forty coal waggons after a pattern, to be seen at Maryport. Tenders, April 22.

SEWERS, *Islington.*—For the construction of 320 feet of sewer, 3 feet 9 inches high by 2 feet 6 inches wide, Seven Sister's-road. Forms of tender, &c., at Vestry Office. Tenders, April 27.

MAIN DRAINAGE OF THE METROPOLIS.—Main brick sewers, 9 miles 2,940 feet in length, and other works in connection therewith from Deptford Creek to High-street, Clapham. Also a branch to extend from Broadway, Deptford, to junction of Effra Sewer at Dulwich and Norwood, and for the maintenance of such works in complete repair for twelve calendar months. Parties desirous to submit tenders may, upon payment of £3, obtain plans, sections, specifications, form of tender, and other particulars on application at the office of the Metropolitan Board of Works, No. 1 Greek-street, Soho, where tenders before 4 o'clock, May 19.

SEWERAGE WORKS, *Preston.*—For laying 2,250 yards of pipe sewers from 9 to 18 inches in diameter. Plans, &c., at the office of local board, 16 Church-street, Preston. Tenders to Mr. J. Newton, surveyor, the 20th inst.

WATERWORKS, *Dunbar.*—For a water wheel, gearing, pumps, &c., 3,500 yards of cast-iron pipes. Plans, &c., at Town Clerk's offices, Dunbar, or J. Leslie, Esq., C.E., George-street, Edinburgh.

CLEANSING HARBOUR, *Hull.*—Plans, Mr. D. Thorp, surveyor. Tenders to noon, April 25.

ROADS, *Great and Little Usworth and North Biddock.*—Finding material and keeping in repair for twelvemonths. Particulars of Mr. Snowdon, of Usworth. Tenders to Rev. T. Thackeray, Usworth, 20th April.

ROAD, *near Dorking, Surrey.*—Through Betchworth park. Plans, &c., Mr. Grantham, 7 Great Scotland-yard, London, S.W. Tenders, April 27.

CHURCH, *Greetland, near Halifax.*—Specifications, Messrs. Sowerby's warehouse, Upper George-yard, Halifax. Tenders to Rev. T. Snow, Greetland.

RESTORATION, *Reading.*—Abbey gateway, and fitting it for the purposes of a residence for the curator of public pleasure grounds and offices for their surveyor. Plans, &c., Mr. Marshall, 73 Oxford-street, Reading. Tenders to the mayor, April 19.

CONGREGATIONAL CHAPEL, *Bishop Stortford, Herts.*—Also a temporary building. Plans, &c., by the 25th, at vestry of present chapel, where tenders, May 4. Information and bills of quantities, Messrs. Poulton and Woodman, Reading.

NATIONAL SCHOOLS, *Andover.*—Plans, Star Hotel, Andover, or 30A Wimpole-street, London, W., from the 18th to the 28th. Tenders, Rev. H. M. White, Andover, May 2.

SCHOOLS, *Middlesbro', Yorkshire.*—And two teachers' residences. Plans, Mr. J. S. Peacock, town clerk; information, Mr. Norton, architect, 24 Old Bond-street, W., London. Tenders, April 23.

BATHS, *London.*—Time extended for receiving tenders for works at the bath in Orange Wharf, Leicester-square, to April 26. Forms, &c., Messrs. Balam and Lee, 10 Buckingham-street, Adelphi.

HOUSES, *Hipperholme.*—Two semi-detached villas. Plans, Mr. T. C. Hope, architect, 31 Kirkgate, Bradford, April 20.

HOUSES, *Edgware-road.*—Taking down and rebuilding No. 118 Edgware-road and No. 6 Harrow-road. Drawings on the premises to 19th inst. No date given.

OFFICES, *Bolton.*—For the *Bolton Chronicle*. Plans, &c., Messrs. Best, architects, 1 Acresfield, Bolton. Tenders, April 25.

COTTAGES, *Reigate.*—Twelve cottages for the Redhill and Reigate Cottage Improvement Society. Drawings, &c., Mr. E. Baxendell, 7 Beaufort-buildings, Strand, W.C., and P. Martin, Esq., Station-road, Redhill. Tenders to Mr. A. Ross, Gatton Park, Reigate. April 21.

ALTERATION, *Seaford, Sussex.*—Seaford House. Drawings, specifications, and gratuities, Mr. W. Habershorn, 38 Bloomsbury-square, London. Tenders, April 21.

GASOMETERS, *Rochdale.*—Re-sheeting two, each 40 feet diameter. Specifications, Mr. R. Bell, manager. Tenders to the Town Clerk, April 20.

LAMP-POSTS.—Construction of lamp-posts upon a novel principle. Abbot, Barton, and Co., advertisement contractors, 2 Upper Wellington-street, Strand.

WATERING THE TOWN OF GUILDFORD.—For three years. At what rate per day, not less than 80 days per year. Tenders to Mr. J. Hockley, Clerk to Commissioners, April 20.

BRICKMAKING, *Scotland.*—Making and burning 60,000 or 80,000 bricks at Dalbeattie, near Dumfries. Particulars, Mr. H. Maxwell, Terraughty, Dumfries.

COAL, *Navy.*—2,500 tons of Welsh for the Naval Yard, Haulbowline. Tender, April 19.

ROYAL NATIONAL LIFE-BOAT INSTITUTION.—The Committee of this Institution would call attention to the fact that 206 persons were saved from wrecks during the past year by the Society's Life-boats and those of other bodies; that it has now eighty-one life-boats under its management; that it has several more boats nearly ready to be sent to their stations; and that a large number of additional life-boats are wanted on the coasts. The constant demands on the limited funds of the Institution are, therefore, necessarily very heavy, and the Committee earnestly appeal to the public at large for assistance.

THOMAS BARING, Chairman.
THOMAS CHAPMAN, Deputy-Chairman.

April, 1859.

Contributions are received by all the Metropolitan and Country Bankers, and by the Secretary at the Institution, 14, John-street, Adelphi. (221)

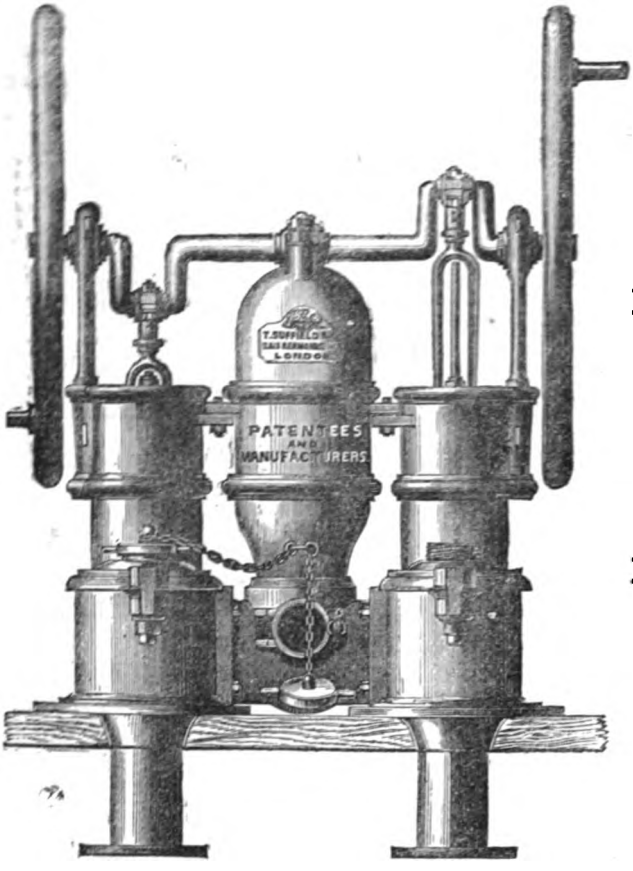
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS, SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

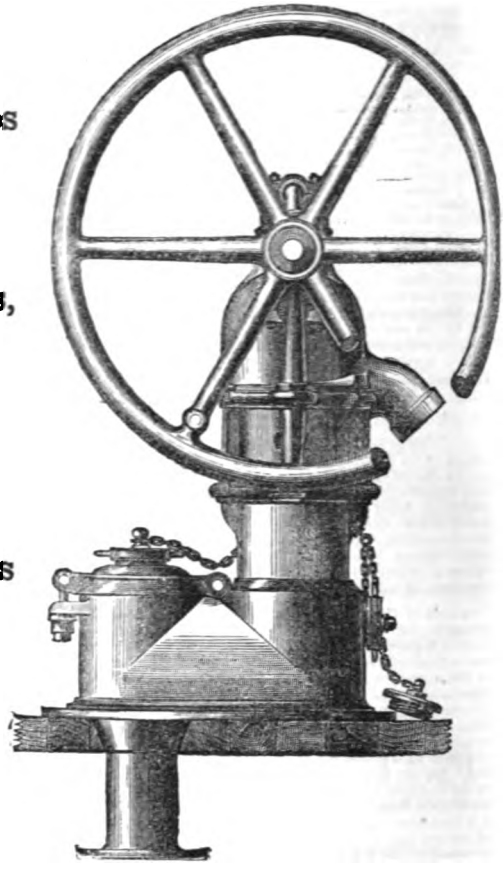
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangemen either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps; the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board; the rapidity with which they can be converted into Fire Pumps, or be applied to the Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Work Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require such Stores, together with a further saving the cost of such Articles.

STEAM CULTIVATION.

CHANDLER AND OLIVER

HAVE much pleasure in being able to state that they are now prepared to execute orders for their PATENT STEAM WINDING ENGINES AND PLOUGHS, for Cultivating Land by Steam.

The WINDING TACKLE can be fitted to Engines of any maker, and the Plough can be made to take any kind of apparatus necessary for Cultivating the Soil, such as Scarrifier Tines or Broad Shares, &c. Any Engine now used by Farmers can be fitted with the Tackle. It is light and simple, and an ordinary Farm Labourer can work it.

The Engine can be used for Thrashing without taking the Ploughing Tackle off, not requiring more than three or four horses to take it from place to place.

These Engines are very useful for Pile Driving or Drawing Ballast up inclined planes; at the same time they can be used for Pumping. Farmers will find them most useful for all purposes.

Messrs. CHANDLER and OLIVER are prepared to receive orders for separate Windlasses, which are light and simple, and generally useful.

For further Information apply to

ROBERT CHANDLER, ENGINEER, BOW, NEAR LONDON,

Or Mr. OLIVER, Farmer, Hatfield, Herts.

ILLUSTRATED CATALOGUES, WITH PRICES, WILL BE READY SHORTLY. (215)

GREAT REDUCTION IN THE PRICE OF

FOWLER'S PATENT STEAM PLOUGH.

From the great Improvements recently made, JOHN FOWLER is prepared to execute Orders at the following prices:—

Windlass to Eight-horse Engine, with Patent Self-moving Anchor, Headland Ropes, Rope Porters, and all necessary Tools	£160 0 0
Cultivator, fitted with Three, Five, or Seven Tines	25 0 0
Seven Hundred Yards Iron Wire Rope, 1¼ in. circumference, which is a sufficient length, on this plan of working, for a 350 yards furrow	22 10 0
Steel Rope, £7 10s. extra.	£207 10 0

The advantages to be derived in the working of this Tackle over others are, no belt is used, consequently no delay is caused from its slipping in showery weather; it can be efficiently worked by two men and two boys; and it is not confined to scarifying only, but a two-furrow balance plough can be worked by it. From the direct action of the draught, a small engine will effect a larger quantity of work than the same engine on the "round-about system;" only half the rope is required for the same length of furrow, and a whole field can be done without shifting. The windlass can be attached to any agricultural engine, and the weight added would only be 12 cwt. The Tackle can be set at work within an hour of entering the field intended to be cultivated. The Drums on which the Rope is worked are four feet in diameter, and from its being wound in grooves, all crushing is avoided, and by these means a great saving in wire rope is effected.

LARGER POWER ENGINES AT COMPARATIVE PRICES.

Illustrated Catalogues with New Prices will be ready shortly. For further Particulars apply to

JOHN FOWLER, JUN., 28 CORNHILL, LONDON. (201)

SCOTT'S
PATENT GRASS SEED SEPARATOR,

which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from

PERENNIAL AND ITALIAN RYE-GRASS, &c.,

AND

SCOTT'S PATENT CARROT SEED BEARDING

AND

CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,

which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

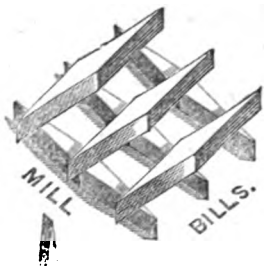
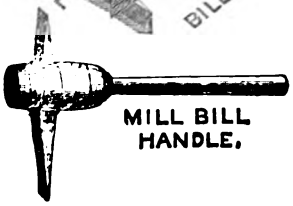
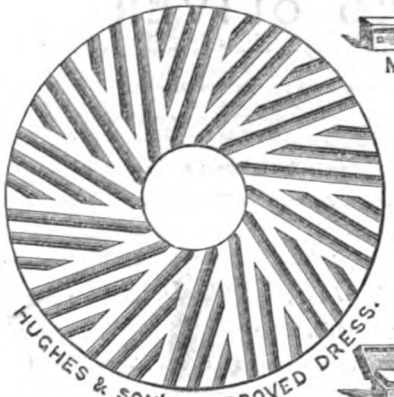
IMPORTANT TO MILLERS AND OTHERS.

ESTABLISHED OF HALF A





UPWARDS CENTURY.



HUGHES AND SONS, MILLSTONE MAKERS,

Great Dover-street and Swan-street, Borough, London, S.E.,

BEG to call the attention of Millers, Millwrights, Engineers, Agricultural Machinists, Cement Manufacturers, Distillers, Merchants and others, to their extensive Stock of FRENCH BURR MILLSTONES, manufactured from a superior Brown Burr, of quality, workmanship, and finish not to be equalled by any house in England. Also to their Stock of French Burrs, of various quality and texture, selected by them in person at the best quarries in France, where their choice is unlimited. The extent of their business requiring several thousand Burr Stones annually more than any other Millstone Maker in England (as may be seen by reference to the Custom House "Shipping List"), places them in a position to execute all orders entrusted to them to satisfaction.

H. and S. are also Importers of Peak, Cologne, Granite, and Grindstones direct from the quarries; and have always on hand at their works a varied assortment of Flour Machines, Smut Machines, Bolting Machines, Separators, Kilns, &c.; Wove Wire for Screen Work; Wire Webb for Flour Cylinders; Improved Square Smut Wire, wove by machinery, with rough surface, made to cover any size cylinder in one sheet; Bolting Cloths; Best Oak-tanned Leather Millbands, well stretched and rivetted at joints; Webbing for Elevators; Elevating Buckets; Screw Jacks, Proved-iron Hoisting Chain; Iron and Brass Sheave Blocks; Iron and Slate Provers; Mahogany Staffs; Sack and Heaving Barrows; Cast Steel Mill Bills, of finest Silver Steel; Flour Machine Brushes, made of the best Russian Bristles; and all other articles used in Mills.

HUGHES and SONS employ none but the Best Workmen;

and wish to draw attention to the fact that by employing no Travellers, thereby avoiding the necessarily high expenses connected therewith, they are in a position to give their Customers all the advantages from this circumstance, as well as those arising from adequate capital, combined with practical judgment.

. ALL GOODS DELIVERED FREE TO WHARVES OR RAILWAYS IN LONDON. (206)

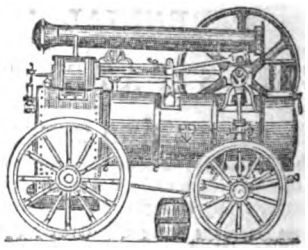
PRIZE PORTABLE and FIXED STEAM ENGINES,
SMITH'S PATENT STEAM PLOUGHS,
PATENT PRIZE COMBINED THRASHING MACHINES, containing R. P. and Co.'s NEW PATENT CORN CLEANER,
SAWING MACHINERY, CIRCULAR and VERTICAL of all Sizes,
MILLS of all Kinds, FIXED and PORTABLE, for Grinding Bones, Flour, Linseed, Mortar, Clay, &c.
PUMPS, CRANES, CRABS, SCREW-JACKS, &c.

Illustrated Catalogues, with full Particulars and Testimonials, may be had by applying as above. (34)



CLAYTON, SHUTTLEWORTH, AND CO.,

OF LINCOLN,
78 LOMBARD STREET, LONDON, E.C.,
AND 36 DALE STREET, LIVERPOOL,
AGRICULTURAL AND GENERAL ENGINEERS,

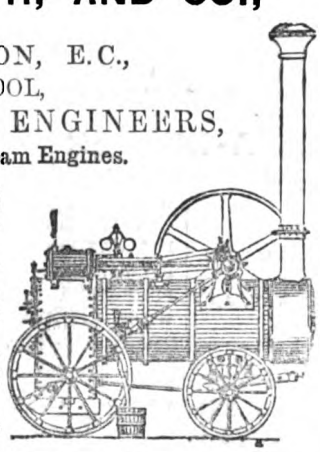
And Manufacturers of Portable and Fixed Steam Engines.

Combined Threshing Machines, which dress the corn ready for market at one operation. Grinding Mills, Saw Benches, Pumps for Irrigation and Mining purposes, with all necessary gearing for being driven by steam power. Full particulars and estimates given on application to the above address.

C. S. and Co.'s PORTABLE STEAM ENGINES are adapted for every purpose to which steam-power can be applied. When intended for winding, they are fitted with reversible link motion and winding gear. They are easy of removal, as may be seen by the engraving, and can be set to work immediately on arrival.

C. S. and Co. are now doing an extensive foreign and colonial business, and are prepared to send off engines and machinery of the before-mentioned kinds in a few days from the date of order. They would also call attention to the important *reduction in prices* made for the new year.

For Exportation.---The above can be obtained through British Merchants, Shippers, and Colonial Agents. (23)



ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street, Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 130 feet in length, to work by hand or Steam Power.

Hot-Water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (44)

Managing Director—R. I. LONGBOTTOM, Esq. (224)

ROYAL NATIONAL LIFE-BOAT INSTITUTION.—The Committee of this Institution would call attention to the fact that 206 persons were saved from wrecks during the past year by the Society's Life-boats and those of other bodies; that it has now eighty-one life-boats under its management; that it has several more boats nearly ready to be sent to their stations; and that a large number of additional life-boats are wanted on the coasts. The constant demands on the limited funds of the Institution are, therefore, necessarily very heavy, and the Committee earnestly appeal to the public at large for assistance.

THOMAS BARING, Chairman.
THOMAS CHAPMAN, Deputy-Chairman.

April, 1859.

Contributions are received by all the Metropolitan and Country Bankers, and by the Secretary at the Institution, 14, John-street, Adelphi. (221)

THORLEY'S FOOD FOR CATTLE.—Every person having an interest in domestic or farm animals should obtain a supply of this celebrated and economical food, which will prove invaluable during the approaching season. For keeping horses in good condition, it is unequalled. Pigs fatten with surprising rapidity upon it, and their flesh increases in flavour and value. Cowkeepers will find great advantage in the increased quantity and improved quality of the milk during its use. All animals are benefited by it. A pamphlet on this interesting subject, accompanied by Testimonials from the principal Nobility, Gentry, and Agriculturists, forwarded on application. In Casks containing 448 Feeds (Measures enclosed). Price 50s., carriage paid to any Railway Station in the United Kingdom. Post Office Orders payable to JOSEPH THORLEY, 77 Newgate Street, London.

N.B.—The public are cautioned against being imposed upon by worthless imitations. (132)

HART & SON, MALLEABLE IRON-FOUNDERS, 4 Vine-street, York-road, Lambeth. Orders for Malleable Iron Castings executed within a week. (77)

TO MANUFACTURERS, THE ENGINEERING, MECHANICAL, & BUILDING TRADES GENERALLY.

MESSRS. BOOTH & CO., AUCTIONEERS and BUILDERS' SALESMEN, having opened Registers for Public and Private Sales of all kinds of JOB LOTS, Surplus Stock, Stores, Tools, Implements, &c., &c., (either Old or New,) beg to call the attention of all parties to the only medium established of the kind, and to state that they are prepared to receive consignments of any weight, bulk, or value, and of any class of Goods for immediate Sale. Full particulars may be had for two stamps, at the BUILDING TRADES REGISTRY OFFICES, (established 1857,) 13 EASTCHEAP, LONDON, E.C. The Public Sales by Auction are held Weekly, on EVERY TUESDAY, at ONE O'CLOCK, and for the present at the BUILDERS' SALE GROUNDS, (established 1858,) 23 and 24 MARYLEBONE ROAD, REGENT'S PARK, W. Catalogues by Post for One Stamp. Advances on New Goods. All communications are held private and confidential. (204)

ENGINEERS' TOOLS.

FOR SALE, a Self-acting Slide LATHE, 11-inch Centres, and Bed 12 feet long, complete; and TWO PORTABLE PUNCHING and CUTTING MACHINES, one suitable for ½-inch plates, and the other for ⅜-inch plates, both adapted for steam or hand power.

Apply to Messrs. PAGE & CAMERON, 64 Old Broad Street, E.C. (117)

POWER HAMMER WANTED—from 5 to 10 cwt., Second-hand, in good working order, to drive from a shaft or direct by steam, and to have a variable fall. Full particulars to U. F., Office of MECHANICS' MAGAZINE. (220)

THE COTTON SUPPLY ASSOCIATION.

COTTON GINS.

IMPROVEMENT UPON THE INDIAN CHURKA.

TO COTTON GIN MAKERS, MACHINISTS, AND INVENTORS.

THE Committee of the Cotton Supply Association have received from the Bombay Chamber of Commerce two Indian Churkas, or Hand-roller Gins of native construction, and such as are now used by the natives of India, with the request that they should be submitted to the Machinists of this country, with a view to obtaining, if possible, a superior machine. Your attention is therefore respectfully requested to the construction of this "Churka," which may be seen at the offices of this Association. The objects to be aimed at in the making of an improved machine, are—

1. That the machine do no injury to the cotton, in the process of separating the seed from the fibre. It is said that "no machine can possibly separate the cotton from the seeds with less injury to the staple than does the Churka."
2. That the machine, as far as possible, do rid the cotton from leaf and impurities.
3. That the machine be of simple construction, and durable.
4. That the machine be easily repaired by the native Indian.
5. That it be portable.
6. That the cost be as low as possible. The "Churka" costs only two rupees, or 4s. It is necessary that the improved machine should be within the ability of the natives to purchase.
7. That the machine be able to do its work faithfully, in spite of carelessness or neglect.
8. That the machine be able to clean a fair quantity of cotton per day, with the labour of one person (male or female).

The Committee submit the above conditions to the consideration of Machine Makers, and Mr. Haywood, the Secretary of this Association, will be prepared to afford any further information that may be required.

It is proposed, in furtherance of the wishes of the Bombay Chamber of Commerce, to hold a trial of the merits of the different Gins that may be constructed to meet the above conditions, in two or three months from this date. Due notice of the day of trial will be given.

Premiums of £20, £10, and £5 will be paid by the Association to the exhibitors of the Gins which rank 1st, 2nd, and 3rd in order of merit.

G. R. HAYWOOD,
Secretary of the Cotton Supply Association.

193 Gresham House, Old Broad-street, London, E.C.

THE Imports of Foreign Flax Fibre having declined to a most serious extent, and the Cultivation of the Plant decreased at home, a great necessity has arisen for laying the foundation of a System whereby a sufficient supply of raw material may be secured to meet the requirements of a great staple industry of the country—known as the Flax and Linen Trade.

It has, therefore, been determined to form "THE NATIONAL FLAX COMPANY, LIMITED," whereby such a System may be initiated.

This will be effected by the introduction of mechanical improvements, whereby a continuous and easy, as well as profitable, preparation of the Fibre from the Plant can be effected.

Such preparation will be carried on in establishments to be called "Rettories," and to be erected in suitable localities, where the Flax Crop, in its entirety, or otherwise, will be purchased from the Grower.

By thus creating a Market within easy reach of the Farmer, and proving to him practically that he can easily produce a good-paying Crop, needing no further trouble in its preparation, and for which he may regularly receive *ready money* at harvest time, when the demands on him for *labour-cost* are large, it is considered that a very extensive growth of Flax will be gradually introduced throughout the country generally.

A more perfect cultivation of this Plant will also be induced, whereby many existing prejudices, in respect to the supposed exhaustive properties of Flax, will be removed, and the Grower convinced that it is really one of value in Districts suitable to it, and in fair rotation. It will also be found that land capable of producing any kind of grain is equally available for Flax; and that there is no better *preparation* for a Wheat Crop to follow.

The Company have secured the Patents, Plans, and Services of Mr. G. A. CATOR, who has devoted a large sum of money and many years in bringing the matter to its present effective condition.

By reference to the detailed Prospectus, it will be clearly seen that, with the outlay proposed, a very large Dividend may be calculated on with perfect safety; showing that this Company presents unusual features of promise to parties seeking investment in substantial and well-considered enterprises.

*** Prospectuses, Pamphlets, Forms of Application for Shares, and all other information, may be obtained at the Offices of the Company. (207)

N.B.—These Bands are celebrated for being well stitched and rivetted at joints, and being also of equal thickness throughout.

H. & SONS beg to call particular attention to their having always on hand a Large Assortment of Improved Screw-socket Rivets, varying in size, from ½-inch upwards, for fastening Mill Bands, Elevator Cups, &c., also White and Brown Laces. (206)

TO STEAM SHIP OWNERS, ENGINEERS, AND OTHERS.

How's Patent Steam Engine Counters, can be read at sight.

These Counters register the number of revolutions made by an engine or other mechanism. They may be used for ascertaining the duty of Pumping Engines and Water-wheels; the revolutions on board a steam-vessel; to calculate the slip of the propeller; and in a locomotive to test the slip of the wheels.

How's Patent Salinometer, for Steam Boilers using Salt Water.

By these, the density of the water in the Boiler is at all times accurately shown, and a saving of boiler and fuel is effected. They are adopted by the Admiralty, the Honorable Trinity Corporation, and others. Copies of Testimonials from Messrs. Penn, Messrs. Maudslay, and others, will be forwarded on application.

How's Engine-Room Telegraph, for communicating between Captain and Engineer.

Society of Arts Prize Medal, 1855.

is a Mechanical Telegraph, and by its peculiar construction, error or misunderstanding is rendered impossible. It now extensively adopted, and gives great satisfaction.

How's Patent Fresh Water Apparatus for Ships' Use.

This apparatus is designed for the distillation of Fresh from Salt Water; and on long voyages, and where the supply of water is scanty, it will be found invaluable. Testimonials may be seen.

Patent Steam Pump and Fire-Engine for Ships' Use.

This Steam-pump occupies but a small space; works perfectly noiselessly, and throws an immense volume of water. An Illustrated Circular of Fresh Water Apparatus and Steam-pump combined, free on application.

How's Patent Machine for Cutting Bolts, Rods, Spindles, Wire, &c.

Simple in construction, inexpensive, occupies but little space, and will not easily get out of order.

A Pamphlet Illustrative of the above, sent free by post, on application to

A. P. HOW, ENGINEER,

81 MARK LANE, LONDON.

EVERY DESCRIPTION OF ENGINEERS' TOOLS, ENGINE ROOM STORES, &c., &c., SUPPLIED. (89)

CLAYTON, SHUTTLEWORTH, AND CO.,

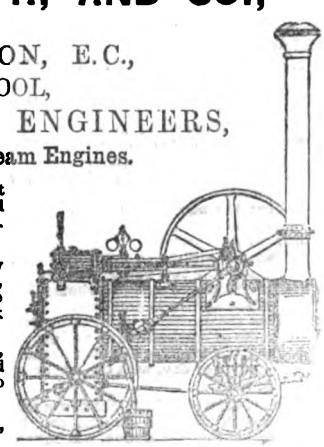
OF LINCOLN,

78 LOMBARD STREET, LONDON, E.C.,

AND 36 DALE STREET, LIVERPOOL,

AGRICULTURAL AND GENERAL ENGINEERS,

And Manufacturers of Portable and Fixed Steam Engines.



Combined Threshing Machines, which dress the corn ready for market at one operation. Grinding Mills, Saw Benches, Pumps for Irrigation and Mining purposes, with all necessary gearing for being driven by steam power. Full particulars and estimates given on application to the above address.

C. S. and Co.'s PORTABLE STEAM ENGINES are adapted for every purpose to which steam-power can be applied. When intended for winding, they are fitted with reversible link motion and winding gear. They are easy of removal, as may be seen by the engraving, and can be set to work immediately on arrival.

C. S. and Co. are now doing an extensive foreign and colonial business, and are prepared to send off engines and machinery of the before-mentioned kinds in a few days from the date of order. They would also call attention to the important *reduction in prices* made for the new year.

For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (23)

CAUTION.

TO ARCHITECTS AND BUILDERS.—In consequence of numerous complaints, the Patentee begs to inform the above, that all genuine SMITH'S PATENT DOOR SPRINGS, for Swing Doors, are stamped with Name and Address, thus—SMITH, Patentee, 69 Princes Street, Leicester Square, London; and that Springs thus marked are warranted. SMITH'S PATENT WEATHER-TIGHT CASEMENT FASTENING AND SILL-BARS are admitted by all to be the most perfect invention for the purpose. Diagrams and List of Prices on application. (143)

INDIA-RUBBER VALVES FOR STEAM ENGINES, PUMP PACKING, &c.—Explanatory Drawings and Information as to the best modes of fitting and arranging the above, and all other Mechanical Applications of VULCANISED INDIA-RUBBER, are furnished post-free by

CHARLES MACINTOSH & Co., Patentees,

Cambridge-st., Manchester, and 3 Cannon-st. West, London.

MANUFACTORY and DEPÔT, Cambridge-st., Manchester.

GENERAL WAREHOUSE, 3 Cannon-street West, London, E.C.—C. M. and Co.'s only Establishments. (139)

NOTICE OF REMOVAL.

WILLIAM DRAY AND CO.,

FROM SWAN LANE TO

ADELAIDE PLACE, LONDON BRIDGE.

(221)

BRICKS.

TO BE LET, with immediate possession, in consequence of the death of the proprietor, J. M. Paine, the DIPPENHALL SILICA FACTORY, erected for the purpose of making improved Fire Bricks, Building Bricks, Paving Tiles, &c., &c., from the Soluble Silica Rock.

Apply to view the Buildings and Bricks to G. H. Ogston Esq., Resident Manager, Dippenhall, Farnham, Surrey and for terms, to Messrs. Nicholls and Potter, Solicitors, Farnham. (125)

TO ENGINEERS, ARCHITECTS, PATENT AGENTS, &c.

PHOTOGRAPHS OF THE HIGHEST CLASS and of any size, taken and reproduced at a most moderate rate of charge. Reproductions of faultless accuracy, of Machinery, Models, Drawings, &c. Orders attended to in town and country. Estimates forwarded.

SPENCER, READ, & Co., 4 Agar-street, Strand. W.C. (90)

PUMPING MACHINERY.

GWYNNE AND Co., Engineers, London, manufacture and supply the following Machinery, of the most approved construction and with all the latest improvements:—Portable and Fixed Steam-Engines and Boilers of every description; Waterwheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the Supply of Towns, Cities, and Districts, and for the Irrigation of Coffee, Cotton, Indigo, Sugar-cane, and Rice Estates, for pumping out Coffer-dams, Canals, Dry Docks, Reservoirs, &c. They also manufacture and supply the Pumping and other Machinery for Paper, Pulp, and Fulling Mills, Breweries, Distilleries, Tanneries, Starch Works, Bleaching, Dyeing, and Calico Printing Works, Chemical Works, Silk, Cotton, and Flax Mills, and Manufactories in general. All Letters not paid will be refused. Illustrated Price Lists forwarded on receipt of Six Postage Stamps. —GWYNNE AND Co., Hydraulic and Mechanical Engineers, Essex-wharf, Strand, London.

For Exportation.—The above can be obtained throug British Merchants, Shippers, and Colonial Agents. (24)

WATER GAUGES—WATER GAUGES.—Sir,—We find your German Gauge Tube superior to any other, and strongly recommend it. We were compelled to abandon the use of our water gauge until applying your glass tube.

WILCOX and Co., Millwall Pottery Company.

These Tubes are superior to all others; being a clear white, no mistake can arise in working. Guaranteed to stand a pressure of 500 lb.

Extensively used on all the principal lines.

To be had only of E. MOORE, 55 Upper Marylebone-street, W.; and 72 Great Titchfield-street, W.

*** Price List of Gauge Fittings, &c., on application. (90)

VULCANISED INDIA-RUBBER MACHINE BANDING is NOT AFFECTED BY WET, HEAT, OR COLD; does not stretch nor slip on the pulleys. HOSES for BREWERIES, &c., will NOT impart TASTE, SMELL, or COLOUR: also for conducting, or steam purposes. Washers, Valves, Sheets, Printing Blankets, &c., in Stock. Other Articles made to order. All Goods warranted to stand 300° Fahrenheit.

N.B.—Sole Contractors to the Lords Commissioners of the Admiralty.

DODGE and GIANDONATI (late DODGE, BACON, and Co), 44 St. Paul's Churchyard, London, E.C. (208)

AT SUFFELL'S, 132 Long-acre, London, W.C., every Instrument suitable for Engineers, Contractors, Surveyors, Architects, Draftsmen, &c., to be had second hand at very reduced prices, by the most esteemed makers, consisting of Theodolites, Levels, Circumferenters, Sextants, Compasses, Protractors, Station Pointers, Adygraphs, Pentagraphs, Telescopes, Microscopes, Cases of Drawing Instruments, &c.; Rules, Scales, Chains, Levelling Staves, and Measures of all nations. Every Instrument warranted. (212)

EMIGRATION TO NEW YORK, CANADA, AUSTRALIA, NEW ZEALAND, EAST INDIES, CAPE OF GOOD HOPE, &c. All Classes of Passengers booked throughout in the Finest Steam and Sailing Packets. Full Particulars in our circulars for 1859, may be had gratis on application to F. S. GRAY and Co., 54 King William Street, City, and 6 Tower Hill, London; and at 35 Bath Street, Liverpool. (187)

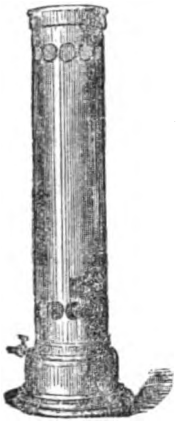
(193)



VENTILATION WITHOUT FLUES.

KUKLA'S PATENT STOVES,

At 18s., 25s., and 50s.

KUKLA'S newly-invented Deflagrator—the first and only perfect GAS STOVE. Guaranteed to burn without flue—without dust, smell, or smoke, producing a great and pure heat with the least expenditure of Gas.—*Vide Society of Arts' Journal.*

Patronised by the English and French Government.

Scientific in Principle,
Simple in Construction,
Healthy and efficient in use.

The Deflagrator Stove is cheap, portable, and suited for every situation; and from the principle on which it is constructed (viz., expanding to a sixfold volume the gas used) is capable of warming any given space more quickly and more thoroughly than any other means: while its addition forms a sure remedy for any ill-warmed or ill-ventilated apartments.

The 25s. Deflagrator warms a room of 2,000 cubic feet at a cost of 3d. per day.

The 50s. Deflagrator warms 5 to 6,000 cubic feet at a cost of 6d. per day (twelve hours).

Also, the Greenhouse Stove at 18s.

Patentee and sole Manufacturer, F. X. KUKLA, 194 Pentonville-road, London.

Country orders promptly attended to. Carriage free to any Railway in London.

Post-office Orders should be made payable to FRANCIS XAVIER KUKLA, General Office.

N.B.—Every Stove separately tested before sent out.

The New Gas Cooking Stove for 10 persons, price £3. (103

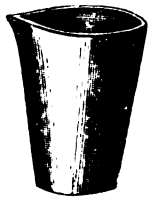
TO BRASS-FOUNDERS, ENGINEERS, &c.



THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings; they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty per cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, mufflers, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire-standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. (43

ENORMOUS REDUCTION IN THE COST OF STEAM POWER.

TO RAILWAY COMPANIES, STEAM SHIP PROPRIETORS, AND MANUFACTURERS.—A saving of Fuel equal to one-third of the entire consumption is effected by the introduction of "DUNCAN'S PATENT SPIRAL HEAT DIFFUSERS," which arrest the heat in its passage through the flues or tubes, and convert into impelling power the large measure that without these appliances would (even in the very best boilers) escape along with the smoke. They can be fitted in an hour or two at a small cost, and without any alteration in the existing arrangements of boilers now in use. These results are prepared to be guaranteed, and a part of the value of fuel saved by the use of the Apparatus will be accepted for royalty.

Hitherto, steam navigation to distant parts of the world has proved a commercial failure. The remedy is provided, and the vast numbers of large and splendid vessels can soon be made valuable paying property.

Further information may be had on application to GWYNNE and CO., Engineers, Essex-street Wharves, Strand, W.C., London. (167)

STEAM ENGINES FOR SALE.

PORTABLE STEAM ENGINES, from 6 to 12 horse power,
STATIONARY STEAM ENGINES, from 4 to 50 horse power,
TUBULAR BOILERS, from 4 to 50 horse power,
CORNISH BOILERS, from 4 to 50 horse power,

Are in hand, and can be despatched on eight days' notice. Prices moderate. Workmanship and Material of the best description.

Apply to R. Thornton & Co., St. Leonard's Iron Works, Edinburgh. (197)

GLADSTONE & Co., CONTRACTORS and ENGINEERS.

2 John-Street, Minories, London, E.C.,

Are prepared to ESTIMATE FOR and CONSTRUCT BRIDGES, PIERS, JETTIES, &c., in Iron, Wood, or Stone. Also to supply Cranes, Girders, Turntables, and Railway Work and Plant generally. (199)

A VALUABLE PATENT to be DISPOSED OF.—The Patentee will either dispose of the Patent or grant Licences to any party wishing to manufacture, or would join a person with capital to carry out the Patent.

TO MARINE ENGINEERS, OR SHIP-BUILDERS.

THE PROPRIETOR of a VALUABLE PATENT for Double-expansive Marine Engines (by which great economy of space and fuel is obtained) is desirous of entering into arrangements with a respectable firm for the construction of the same. An adequate portion of the patent-right would be assigned by the advertiser to any firm taking the matter up; and he would render all assistance in his power, either in London or elsewhere, amongst ship-owners (to many of whom he is well known), in obtaining contracts, &c. Unexceptionable references given. Address C. E., Mechanics' Magazine Office, 166, Fleet-street. (76

ENGINEERING BUSINESS FOR SALE.

OWING to the continued ill health of the Proprietor, the first-class business of an Engineer and Crane and Block Maker is offered for sale. It has been established in the Metropolis for nearly 30 years, and has enjoyed extensive patronage amongst Brewers, Manufacturers, Warehousemen, and others, in and about London; the business done amounting to nearly £8,000 per annum. About £3,200 would be required, (part of which, however, may remain for any reasonable time on good security,) which is the bare value of the tools, patterns, and stock in trade. The premises, including good dwelling-house, very conveniently situated, and capable of accommodating from 60 to 70 hands, are held upon a long lease, at an extraordinary low rental, not exceeding £100 per annum, taxes included. Many of the tools are nearly new, and of the best construction. The present proprietor, who relinquishes the business solely on account of ill health, would give every assistance in his power to those succeeding him; and as his foreman, who has been with him for nearly ten years, is thoroughly acquainted with the practical parts of the business, any gentleman desirous of commencing as a manufacturing engineer would find the present a very favourable opportunity. As all accounts have been, for many years past, collected quarterly, a very small amount, say £300, would suffice as working capital. Full particulars may be obtained by application to E. E. Allen, Esq., Mechanics' Magazine Office, 166 Fleet Street, E.C. (130)

IMPORTANT TO MANUFACTURERS, MILL OWNERS, &c.

GUTTA PERCHA MILL BANDS.

THE GUTTA PERCHA COMPANY beg to state that the increasing demand for the Gutta Percha Strapping for Driving-bands, Lathe-straps, &c., fully justifies the strong recommendations they have everywhere received.

Their durability and strength—permanent contractability and uniformity of substance—their non-susceptibility of injury from contact with oils, grease, acids, alkalies, or water—and the facility with which the only joint required can be made in bands of from 200 to 300 feet long—render them superior to leather for almost all working purposes, and decidedly more economical.

TESTIMONIALS.

IMPORTANT ANNUAL SAVING.

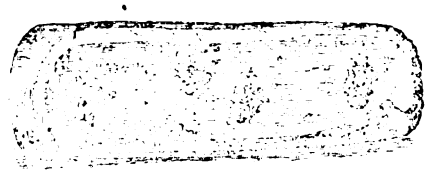
From TRUMAN, HANBURY, BUXTON, & Co., Brewery, London.

"In reply to your inquiry, we have much pleasure in bearing our testimony to the advantages, both as regards economy and saving of time, effected by the use of your Patent Gutta Percha Bands in lieu of Leather Straps. The stoppage of one portion of our works through the failing of the leather strap used to be of daily occurrence—but with this annoyance we are now never troubled. We have had these straps in operation for nearly three years, and are assured by our Engineer that *they effect a saving to us of at least* THIRTY POUNDS *a year*."

From JAMES ABERNETHY & Co., Fury Hill Foundry Aberdeen.

"We have now had Gutta Percha Bands working here *for three years*. One of them has been driving the fan blast for our smith's shop for all that time, and for anything we see, may drive it as long again. The speed of the fan is but 1,200 per minute. We have used them with complete satisfaction, driving circular saws, and in some cases where leather bands would have been quite inapplicable from damp. We have uniformly endeavoured to have the drums and pulleys so proportioned to the strain, as that there is no chance of the band slipping; and with this precaution, and taking care in using *cross bands that they do not rub*, we are quite satisfied that they are superior in every respect to leather—stronger at the same weight, and keeping quite straight in working—requiring no lacings, and very seldom any repairs."

WATER POISONED BY LEADEN PIPES.



The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dale, of Bonchurch, Isle of Wight.

POISONED WATER PREVENTABL

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha Tubing. Nothing can be better. I have also recommended it to others, who have adopted the expedient."

A variety of Gutta Percha Articles, such as Mill Bands, Tubing, Sheet, Soles, Pump Buckets, Bosses, Union Joints, Bottles, Bowls, Flasks, Curtain and Cornice Rings, Solid Frames, Galvanic Batteries, &c., &c.

MANUFACTURED BY THE

Gutta Percha Company, Patentees,

NOTICE.

In consequence of the early publication which Good Friday has forced upon us, we have failed to secure our country correspondent's letter on the Metal Trades and the Prices Current of Metals in time to give them as usual.

LIST OF MISCELLANEOUS TENDERS INVITED, AND ENGAGEMENTS OPEN.

The tenders and vacancies which appear in this weekly list are not repeated in succeeding numbers.

PAINTING, *North Eastern Railway.*—The stations on main line between York and Normanton and Newcastle and Gateshead. Particulars to Mr. Prosser, Central Station, Newcastle. Tenders, April 27.

COAL, *French Navy.*—3,000,000 kilogrammes, Newcastle. Particulars at office of Consul General, 36 King William-street, City. Tenders to the Maritime authorities at Toulon, May 2.

GAS COAL, OR NUTS, *Stafford.*—5,000 tons at Gasworks the next two years. Tenders, May 3.

PLANS FOR GASWORKS, *Scotland.*—The Aberlour Gas Light Company want plans, specifications, and estimates for the erection of gasworks in Charlestown. Information of Mr. C. Grant, Secretary of Company, schoolhouse of Aberlour. Tenders, May 2.

CANNEL, *Dukinfield Gas Company.*—Particulars, Mr. Dore, at the Works.

PUMPING ENGINES WANTED.—Of about 100 horse. Captain Ninness, Warston Cottage, Ashbourne, Derbyshire.

NEW 25-horse high pressure engine, J. Hargreaves 1 Ford-street, Hyde-road, Ardwick.

CONDENSING.—Cylinder 28 to 30 inches diameter, stroke 5 feet, spur segment wheel about 18 feet. A. and W. Ogle. Croston, near Chorley, Manchester.

PAIR OF HEAVY IRON ROLLERS WANTED.—Also a small punching and shearing machine. K. 91, *Manchester Guardian* Office.

CONSTRUCTION OF RAILWAY.—From Junction of Lancashire and Yorkshire Railway at Ashton-under-Lyne to Oldham. Plans, J. G. Blackburn, Esq., C.E., Oldham. Tenders to Mr. Ross, Secretary, to Guide Bridge Junction Railway, London-road Station, Manchester, April.

COAST GUARD STATION, *Freshwatergate, Isle of Wight.*—Drawings, &c., at coast guard watch room to 30th inst. Tenders to Admiralty Coast Guard Office, London, 2nd May.

GASWORKS, *Oughtibridge*—Machinery, gasholder, apparatus, mains, &c. Drawings and specifications, Mr. Cashin, C.E., 16, Branch-street, Sheffield. Tenders to Mr. G. Garside, Secretary, April 28

GASHOLDER, *Stone.*—Thirty feet in diameter, and 11 feet 3 inches deep, with columns, girders, &c. Tenders to J. Grundy, Secretary, April 30.

GASOMETER, *Sowerby.*—50 feet diameter and 12 feet deep for Sowerby bridge gas works. Specifications at the office. Tenders to the Gas Company till May 1.

MAIN SEWER, *Royal Victoria Hospital.*—Extension 350 yards. Drawings, &c., Royal Engineer Office, Netley; to which place tenders, May 9.

BRICK TANK, *Nottingham*, for the reception of gas-holder, 120 feet diameter. Drawings at Offices of Company on 18th April, and bills of quantities, a guinea. Tenders to 28th April, at Gas Offices, George-street, Nottingham.

SEWERS, *Blackburn.*—500 yards of brick sewer, 6 feet by 4 feet, 410 yards of which will be tunnelling with branch sewers and the like. Tenders, April 30, to Mr. Briercly, borough surveyor.

PAVING WORKS, *Manchester.*—In the district of the Bradford Local Board of Health. Sections, &c., at the office of said Local Board, Mill-lane, Bradford, where tenders, May 2.

CEMETERY, *Brightside Bierlow, Sheffield.*—Chapels, superintendent's house, lodge, &c. Plans, &c., Messrs. Flecton and Son, architects, East Parade, Sheffield, on April 25. Tenders, May 9.

NEW CONGREGATIONAL CHAPEL, *Brixton.*—Plans at Mr. C. Bates's, News-rooms, Crescent, Brixton, until April 23rd. Tenders to Rev. T. G. Potter Fairfield, Brixton, to April 27th.

RESEATING PARISH CHURCH, *Wyke Regis, near Weymouth, Dorsetshire.*—Plans at the Vestry-room. Tenders to Rev. H. Pigou, on 28th inst.

PARSONAGE HOUSE, *Whitley, Cheshire.*—Plans for alterations and additions at the Chetwode Arms, Whitley, from 29th to 30th April. Tenders to Mr. R. Jennings, architect, Atherstone, on May 3rd.

BLUE COAT SCHOOL, *Bath.*—Drawings till May 7th. Tenders to Messrs. Manners and Gill, architects, to May 7th.

FOREST HILL NATIONAL SCHOOL, *Sydenham.*—Drawings at office of architect, 9 Spring Gardens, London, S.W. Tenders to the same until May 2nd.

THE SAME WITH TEACHER'S HOUSE, *Lepton, near Huddersfield.*—Plans, &c., Red Lion Inn, Lepton. Tenders, April 27.

PAROCHIAL SCHOOLS, *Parish of Deane*, between *Bolton and Wigan.*—Plans, 32 St. Ann-street, Manchester. Tenders to April 27th.

RECTORY, *Catherington, near Horndean, Hants.*—Plans, &c., Ship and Bell, Horndean; and of Mr. C. E. Davis, 3 Westgate-buildings, Bath. April 28.

BANK, *Nottingham.*—Alterations to Messrs. Wright's Bank. Drawings, &c., and quantities, Mr. C. H. Edwards, 4, St. James's Terrace, Camden Town; and the Bank, Carlton Street, Nottingham. Tenders May 3.

HARBOUR OFFICE, *Swansea.*—Plans at the present harbour offices, and at Mr. R. Gribbles, architect, 22, Spencer Villas, Putney, May 4.

GAS LIGHTING, *London.*—Tenders at per lamp for three years from Midsummer day next, to the Guildhall, 10th May.

TO INVENTORS AND PATENTEES.

MESSRS.

ROBERTSON, BROOMAN, & Co.,

Civil Engineers

AND PATENT AGENTS,

(ESTABLISHED 1823,)

ENGINEERS AND IRONFOUNDERS,

174 UPPER THAMES STREET.

MAKERS OF

ALL KINDS OF CAST IRON PIPES,

For Gas, Water, and Steam,

AND EVERY DESCRIPTION OF CASTINGS.

(115)

FOG WHISTLES, for Seagoing Steamers.

WATER GAUGE MOUNTINGS, for Marine and Land Boilers.

GAUGE COCKS, GLAND COCKS, GREASE COCKS, CUPS and SYPHONS.

STEAM TAPS, RANGE COCKS, &c.

IMPROVED BRASS VALVES, for Steam, Water, and Gas.

W. T. HENDRY & Co., Engineers.

38 Upper Thames-street, London, E. C. (153)

A NEW DISCOVERY IN WASHING HOUSEHOLD LINEN.

NO FAMILY SHOULD BE WITHOUT HANCOCK'S UNIVERSAL WASHING MACHINE. It effectually cleanses the Crevices of Baby-linen, Collars, Wristbands, &c., without the possibility of injuring the Linen or Collars. Received 500 Testimonials.

PRICES.

No. 2 Washes 9 Shirts in from 3 to 10 minutes; or 4 Sheets in 5 minutes	£5 5 0
No. 3 Washes 12 Shirts in from 3 to 10 minutes; or 6 Sheets in 5 minutes	7 11 0
No. 4 Washes 18 Shirts in from 3 to 10 minutes; or 12 Sheets in 5 minutes	12 12 0

And all other Articles in proportion.

J. L. HANCOCK, Sole Manufacturer and Patentee, 63 Pentonville-road, London. (37)

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.

Families, by using this delicious VINEGAR, insure purity and effect a saving of 50 per cent. See "Report of Dr. Letheby, City Officer of Health, Dr. Hassall, of the 'Lancet' Commission, and others." Sold by the Trade, in Bottles, labelled and capsuled. Wholesale—63 King William-street, London-bridge, E.C. Six Quart Samples sent free to any Railway for 3s. 6d. (216)

By Her Majesty's Royal Letters Patent.

E. DENCH,

KING'S ROAD, CHELSEA, AND HAMPSTEAD ROAD

Patentee and Sole Manufacturer of

PATENT

GALVANIZED-IRON HOT HOUSES AND CONSERVATORIES,

Has Two SPAN ROOF HOUSES left for Sale, a Great Bargain!

PATENT HOT HOUSES

every way superior to any other Material, at 1s. 3d. per ft. super, with excellent heavy, good quality GLASS.

PRINTED PRICE LIST SENT ON APPLICATION.

HEATING BY HOT WATER with efficiency and economy. (83)

TO BRASS FOUNDERS.

TO BE SOLD, the Patent-right of a New an Highly-approved EQUILIBRIUM WATER COCK or VALVE, suitable for Steam Boiler Feed Pipes, or any cases where the valve is required to be opened against pressure.

Address H., MECHANICS' MAGAZINE Office, 166 Fleet-st., where a Drawing may be seen. (151)

MATHEMATICAL DRAWING INSTRUMENTS, RULES, TAPES, CHAINS, LEVELS, THEODOLITES, BOX SEXTANTS, PRISMATIC and POCKET COMPASSES. Price Lists of the above articles sent post free, by JOHN ARCHBUTT, 20 Westminster Bridge Road, Lambeth, near Astley's Theatre. Every article warranted, and the prices will be found considerably lower than ever before charged for articles of similar quality. Routledge's Engineers' Slide Rules, 4s. 6d. each; Hawthorn's ditto, 5s. 6d.; Carpenters' Rules from 1s. (148)

ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street, Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 150 feet in length, to work by hand or Steam Power.

Hot-Water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (44)

EDWIN JEWITT, ENGRAVER ON WOOD AND DRAFTSMAN, 1 Pickett-place, Strand, near Temple-bar. Engineering, Scientific, and Mechanical Designs accurately engraved. Manufacturers and Tradesmen's Catalogues Illustrated. W.C. (84)

SPIRAL TUBE BRUSHES made with Wire or Whalebone for Tubes of

1½ 1¾ 2 2½ 2¾ 3 3½ 4 4½ 5 ins. diam.

24/, 25/, 26/, 28/, 30/, 32/, 35/, 38/, 42/, 46/, 50/ per doz.

Quantities of Two Dozen and upwards delivered in London.

WILLIAM WALLER, Uddingston, by Glasgow. (213)

BRASS ENGINE and BOILER FITTINGS.—Water-Gauges for Glasses, ½ ¾ 1 inch diam. 26/, 30/, 35/ each.

With Guards, 32/, 37/6 „

Gauge and Pet-Cocks, from 3/6 each.

Whistles, with 1½ 2 2½ 3 4 inch bell. 12/6, 18/6, 26/, 45/, 50/ each.

Blow-off Cock for Portable Engines, 12/6 each.

Oil Cups, of all kinds, from 18/ per dozen.

Ball Cocks, Balls, Cages, and sets complete.

Forsyth's Safety Boiler Plugs, 12/6 and 18/ each.

WILLIAM WALLER, Uddingston, by Glasgow. (214)

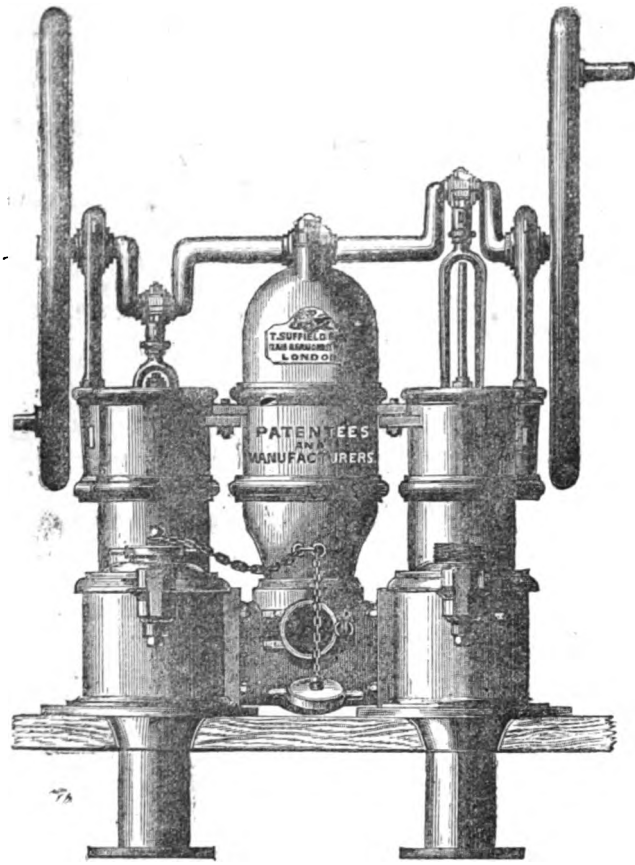
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS, SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

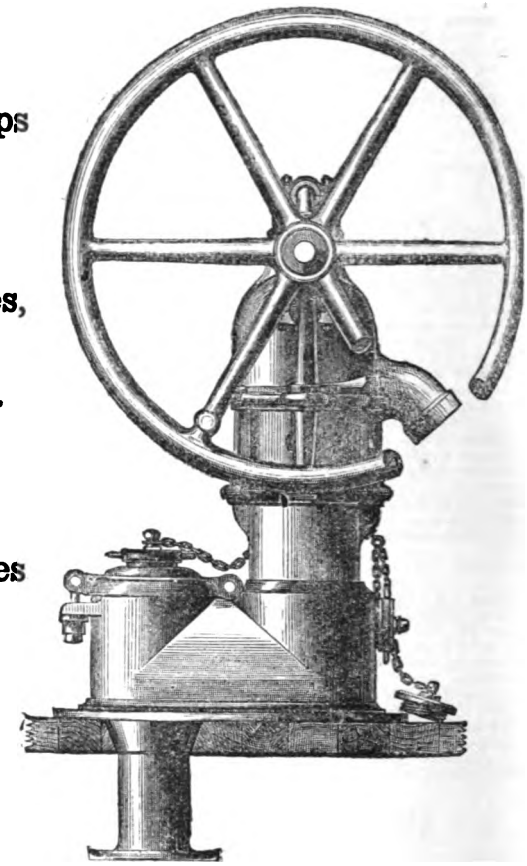
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangement either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps; the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board; the rapidity with which they can be converted into Fire Pumps, or be applied to the Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Works or Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require such Stores, together with a further saving in the cost of such Articles.

DEPOT, 116 FENCHURCH STREET, E.C.,

(OPPOSITE MARK LANE.)

MANUFACTORY, 12 & 13 BERMONDSEY WALL, S.E.

LONDON. (15)

STEAM CULTIVATION.

CHANDLER AND OLIVER

HAVE much pleasure in being able to state that they are now prepared to execute orders for their PATENT STEAM WINDING ENGINES AND PLOUGHS, for Cultivating Land by Steam.

The WINDING TACKLE can be fitted to Engines of any maker, and the Plough can be made to take any kind of apparatus necessary for Cultivating the Soil, such as Scarrifier Tines or Broad Shares, &c. Any Engine now used by Farmers can be fitted with the Tackle. It is light and simple, and an ordinary Farm Labourer can work it.

The Engine can be used for Thrashing without taking the Ploughing Tackle off, not requiring more than three or four horses to take it from place to place.

These Engines are very useful for Pile Driving or Drawing Ballast up inclined planes; at the same time they can be used for Pumping. Farmers will find them most useful for all purposes.

Messrs. CHANDLER and OLIVER are prepared to receive orders for separate Windlasses, which are light and simple, and generally useful.

For further Information apply to

ROBERT CHANDLER, ENGINEER, BOW, NEAR LONDON,

Or Mr. OLIVER, Farmer, Hatfield, Herts.

ILLUSTRATED CATALOGUES, WITH PRICES, WILL BE READY SHORTLY. (215)

GREAT REDUCTION IN THE PRICE OF

FOWLER'S PATENT STEAM PLOUGH.

From the great Improvements recently made, JOHN FOWLER is prepared to execute Orders at the following prices:—

Windlass to Eight-horse Engine, with Patent Self-moving Anchor, Headland Ropes, Rope Porters, and all necessary Tools	£160 0 0
Cultivator, fitted with Three, Five, or Seven Tines	25 0 0
Seven Hundred Yards Iron Wire Rope, 1¼ in. circumference, which is a sufficient length, on this plan of working, for a 350 yards furrow	22 10 0
Steel Rope, £7 10s. extra.	£207 10 0

The advantages to be derived in the working of this Tackle over others are, no belt is used, consequently no delay is caused from its slipping in showery weather; it can be efficiently worked by two men and two boys; and it is not confined to scarifying only, but a two-furrow balance plough can be worked by it. From the direct action of the draught, a small engine will effect a larger quantity of work than the same engine on the "round-about system;" only half the rope is required for the same length of furrow, and a whole field can be done without shifting. The windlass can be attached to any agricultural engine, and the weight added would only be 12 cwt. The Tackle can be set at work within an hour of entering the field intended to be cultivated. The Drums on which the Rope is worked are four feet in diameter, and from its being wound in grooves, all crushing is avoided, and by these means a great saving in wire rope is effected.

LARGER POWER ENGINES AT COMPARATIVE PRICES.

Illustrated Catalogues with New Prices will be ready shortly. For further Particulars apply to

JOHN FOWLER, JUN., 28 CORNHILL, LONDON. (201)

SCOTT'S
PATENT GRASS SEED SEPARATOR,

which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from

PERENNIAL AND ITALIAN RYE-GRASS, &c.,

AND

SCOTT'S PATENT CARROT SEED BEARDING

AND

CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,

which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

Communications to be sent to the Patentee, J. SCOTT, 111 Drummond Street, Euston Square, London, N.W. (48)

TO ENGINEERS, MILLWRIGHTS, MACHINISTS, &c.

VULCANIZED INDIA-RUBBER

In any of the following forms, of any size, or to Working Drawings for all MECHANICAL *purposes:—*

WASHERS for Steam and Gas Joints.	GAS-TUBING.	MACHINE AND MILL-BANDS for Driving all kinds of Machinery.
VALVES for Marine and other Steam Engines.	SUCTION HOSE.	RAILWAY BUFFER SPRINGS.
ENGINE-PACKING (Elastic).	FIRE ENGINE AND FACTORY HOSE.	BALL VALVES.
PUMP-BUCKETS ,,	WATERPROOF CART, VAN, AND WAGGON COVERS.	PUMP-PACKING (Rings or Rope).
HOSE-PIPES.		WHEEL-TIRES (Noiseless).

[N.B.—A Large Stock of the above always on hand, and any modification made to order.

Please address all communications to the Manufactory,

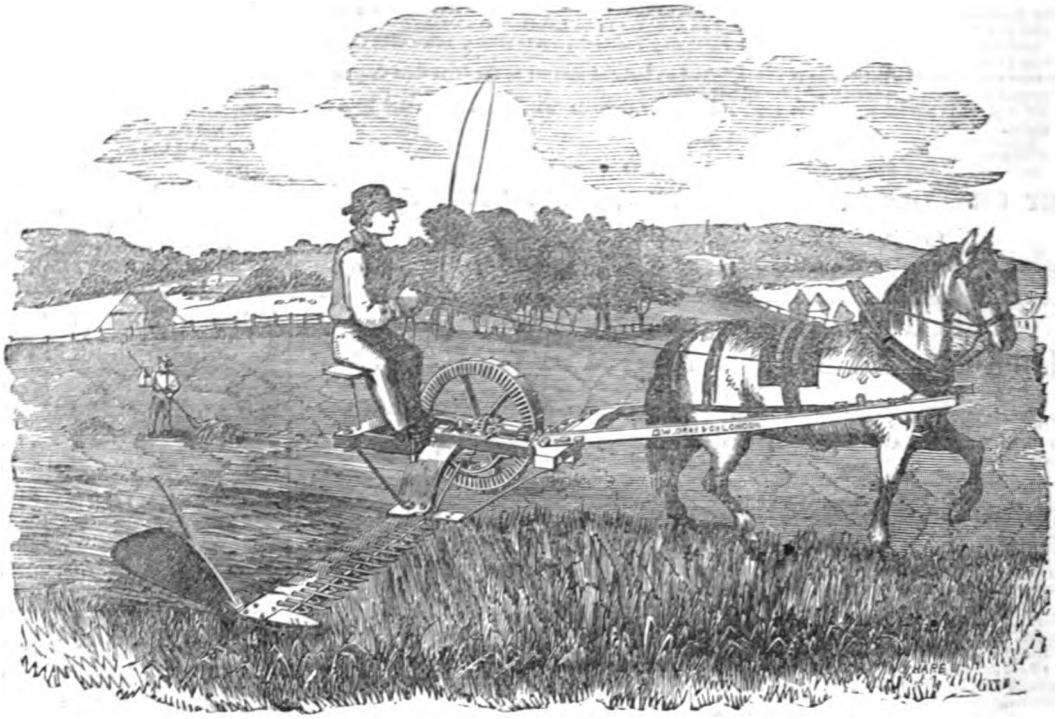
NOTICE OF REMOVAL.

WM. DRAY & CO.,

ADELAIDE PLACE, LONDON BRIDGE, LATE OF SWAN LANE.

CHAMPION REAPER,



PRICE - - - - - - - £25.

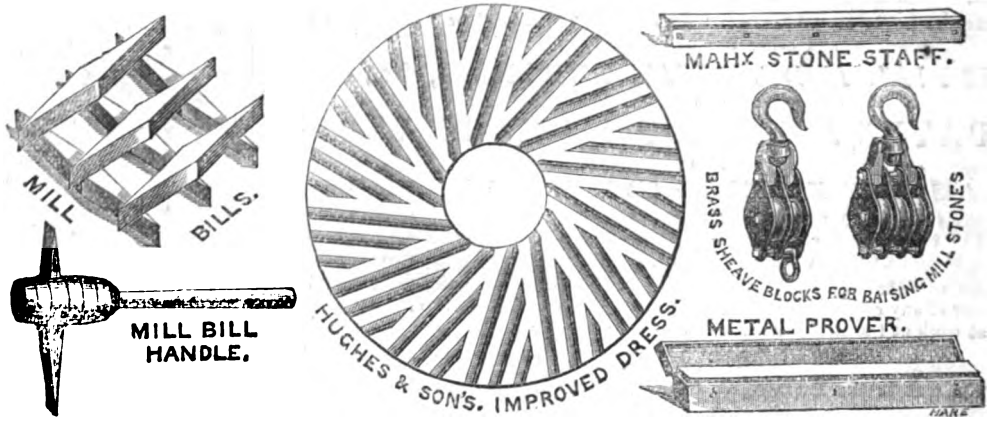
EARLY ORDERS for the CHAMPION REAPER are particularly requested, as they will be executed in rotation. WM. DRAY & CO. take this opportunity of thanking their Friends for the many Orders received, and suggest the desirability of intending purchasers following an early course, rather than postponing Orders until Reapers are wanted for use.

WM. DRAY & CO., ADELAIDE PLACE, LONDON BRIDGE.

(222)

IMPORTANT TO MILLERS AND OTHERS.

ESTABLISHED UPWARDS OF HALF A CENTURY.



HUGHES AND SONS, MILLSTONE MAKERS,

Great Dover-street and Swan-street, Borough, London, S.E.,

BEG to call the attention of Millers, Millwrights, Engineers, Agricultural Machinists, Cement Manufacturers, Distillers, Merchants and others, to their extensive Stock of FRENCH BURR MILLSTONES, manufactured from a superior Brown Burr, of quality, workmanship, and finish not to be equalled by any house in England. Also to their Stock of French Burrs, of various quality and texture, selected by them in person at the best quarries in France, where their choice is unlimited. The extent of their business requiring several thousand Burr Stones annually more than any other Millstone Maker in England (as may be seen by reference to the Custom House "Shipping List"), places them in a position to execute all orders entrusted to them to satisfaction.

H. and S. are also Importers of Peak, Cologne, Granite, and Grindstones direct from the quarries; and have always on hand at their works a varied assortment of Flour Machines, Smut Machines, Bolting Machines, Separators, Kilns, &c.; Wove Wire for Screen Work; Wire Webb for Flour Cylinders; Improved Square Smut Wire, wove by machinery, with rough surface, made to cover any size cylinder in one sheet; Bolting Cloths; Best Oak-tanned Leather Millbands, well stretched and rivetted at joints; Webbing for Elevators; Elevating Buckets; Screw Jacks, Proved-iron Hoisting Chain; Iron and Brass Sheave Blocks; Iron and Slate Provers; Mahogany Staffs; Sack and Heaving Barrows; Cast Steel Mill Bills, of finest Silver Steel; Flour Machine Brushes, made of the best Russian Bristles; and all other articles used in Mills.

HUGHES and SONS employ none but the Best Workmen;

and wish to draw attention to the fact that by employing no Travellers, thereby avoiding the necessarily high expenses connected therewith, they are in a position to give their Customers all the advantages from this circumstance, as well as those arising from adequate capital, combined with practical judgment.

. ALL GOODS DELIVERED FREE TO WHARVES OR RAILWAYS IN LONDON. (205)

Published by RICHARD ARCHIBALD BROOMAN, at the MECHANICS' MAGAZINE Office, 166 Fleet-street, in the Parish of St. Dunstan's-in-the-West, in the County of Middlesex; and printed by JAMES JUDD and HENRY ALEXANDER GLASS, of 14 Holford-square, Pentonville, in the County of Middlesex, at their Office 38a New Bridge-street, in the Parish of St. Anne's, Blackfriars, in the City of London.—Friday, April 22, 1859.

OFFICES.

193 Gresham House, Old Broad-street, London, E.C.

THE Imports of Foreign Flax Fibre having declined to a most serious extent, and the Cultivation of the Plant decreased at home; a great necessity has arisen for laying the foundation of a System whereby a sufficient supply of raw material may be secured to meet the requirements of a great staple industry of the country—known as the Flax and Linen Trade.

It has, therefore, been determined to form "THE NATIONAL FLAX COMPANY, LIMITED," whereby such a System may be initiated.

This will be effected by the introduction of mechanical improvements, whereby a continuous and easy, as well as profitable, preparation of the Fibre from the Plant can be effected.

Such preparation will be carried on in establishments to be called "Rettories," and to be erected in suitable localities, where the Flax Crop, in its entirety, or otherwise, will be purchased from the Grower.

By thus creating a Market within easy reach of the Farmer, and proving to him practically that he can easily produce a good-paying Crop, needing no further trouble in its preparation, and for which he may regularly receive *ready money* at harvest time, when the demands on him for *labour-cost* are large, it is considered that a very extensive growth of Flax will be gradually introduced throughout the country generally.

A more perfect cultivation of this Plant will also be induced, whereby many existing prejudices, in respect to the supposed exhaustive properties of Flax, will be removed, and the Grower convinced that it is really one of value in Districts suitable to it, and in fair rotation. It will also be found that land capable of producing any kind of grain is equally available for Flax; and that there is no better *preparation* for a Wheat Crop to follow.

The Company have secured the Patents, Plans, and Services of Mr. G. A. CATOR, who has devoted a large sum of money and many years in bringing the matter to its present effective condition.

By reference to the detailed Prospectus, it will be clearly seen that, with the outlay proposed, a very large Dividend may be calculated on with perfect safety; showing that this Company presents unusual features of promise to parties seeking investment in substantial and well-considered enterprises.

*** Prospectuses, Pamphlets, Forms of Application for Shares, and all other information, may be obtained at the Offices of the Company. (207)

HART & SON, MALLEABLE IRON-FOUNDERS, 4 Vine-street, York-road, Lambeth. Orders for Malleable Iron Castings executed within a week. (77)

TO BOILERMAKERS AND IRON-SHIP BUILDERS.

FOR SALE: a number of strong and powerful PUNCHING AND SHEARING MACHINES, to punch and cut Plate-Iron from ½ to 1 inch thick; portable, to work by hand, and for fixing to work by steam power. Also a set of Boilerplate Bending Rollers. Inspection invited. Prices and other particulars furnished on application to

J. TODD & Co., Kent Iron Works, Bridge-street, Greenwich, S.E. (231)

PATENTS FOR SALE.—Two English Patents, one for STEAM GENERATING, and the other for STEAM HEATING APPARATUS, will be SOLD by AUCTION, at the Office of M. Thomas, Notary, 17 Rue Blene, Paris, on the 31st of May, 1859, at 12 o'clock. Upset price, 20,000 francs. For particulars, apply to M. Thomas, as above, or to M. Delacroix, Advocate, 61 Rue de Rivoli, Paris, Liquidator to the firm of Moinier and Co. (230)

ENGINEERS' TOOLS FOR SALE, viz.: PLANING, SHAPING, BORING, AND DRILLING, BOLT AND NUT SCREWING AND NUT SHAPING MACHINES. Inspection invited. Prices and other particulars furnished on application to

J. TODD & Co., Kent Iron Works, Bridge-street, Greenwich, S.E. (232)

FOR SALE.

A 12-HORSE HORIZONTAL STEAM ENGINE and a 4-HORSE DIRECT ACTING STEAM ENGINE, with Fly-wheel Governors, &c., complete. Address, W. F. Plummer, 12 Albany-road, Camberwell. (188)

TO BE SOLD.

A PORTABLE HIGH-PRESSURE ENGINE, of Four Horse Power, complete. Also, a Six Horse Power HIGH-PRESSURE ENGINE and BOILER. Inspection invited. Prices and other particulars furnished on application to

J. TODD & Co., Kent Iron Works, Bridge-street, Greenwich, S.E. (233)

TO MILLWRIGHTS AND ENGINEERS.

WANTED.—A Working Foreman who practically understands Mill Work, and can repair Steam Engines. None but steady men need apply. Address, WOODS & SON, Suffolk Iron Works, Stowmarket. (229)

WANTED.—A Young Man, from 21 to 30 years of age, who understands Drawings, and can make tracings of Machinery, to canvass for orders among Boiler Makers, Engineers, and Iron Shipbuilders. Applicants to state their age, previous employment, commission and salary required, with references. Address, B. S. G., care of Mr. Samuel Deacon, 154 Leadenhall-street, E. C. (234)

TO MANUFACTURERS, THE ENGINEERING, MECHANICAL, & BUILDING TRADES GENERALLY.

MESSRS. BOOTH & CO., AUCTIONEERS and BUILDERS' SALESMEN, having opened Registers for Public and Private Sales of all kinds of JOB LOTS, Surplus Stock, Stores, Tools, Implements, &c., &c., (either Old or New,) beg to call the attention of all parties to the only medium established of the kind, and to state that they are prepared to receive consignments of any weight, bulk, or value, and of any class of Goods for immediate Sale. Full particulars may be had for two stamps, at the BUILDING TRADES REGISTRY OFFICES, (established 1857,) 13 EASTCHEAP, LONDON, E.C. The Public Sales by Auction are held Weekly, on EVERY TUESDAY, at ONE O'CLOCK, and for the present at the BUILDERS' SALE GROUNDS, (established 1858,) 23 and 24 MARYLEBONE ROAD, REGENT'S PARK, W. Catalogues by Post for One Stamp. Advances on New Goods. All communications are held private and confidential. (204)

TO COMMERCIAL TRAVELLERS.

WANTED, a Gentleman well-acquainted with Ironmongers, Upholsterers, Coopers, &c., to Travel on Commission.

Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (164)

IMPROVED MACHINERY FOR AGRICULTURISTS.

RICHARD GARRETT & SONS,

LEISTON WORKS, SAXMUNDHAM, SUFFOLK,

(ESTABLISHED A.D. 1778),

EARNESTLY solicit the continued support of their numerous Friends, Agriculturists, Shippers, and others; the additions made to their Works during the present year, in the erection of new sets of Workshops, fitted with the best mechanical appliances for producing Machinery of the most improved construction, expeditiously and economically, justifies their soliciting increased support, while their leading reputation as Inventors and Manufacturers of FIRST CLASS Agricultural Machinery, is a sufficient guarantee that every Machine supplied from Leiston Works will prove to the entire satisfaction of the purchaser.

R. G. & S. are now manufacturing the following Machines and Implements, which they guarantee to be thoroughly efficient in every respect:—

PORTABLE AND FIXED STEAM ENGINES. } From 4 to 40 Horse Power, suited for every kind of work
SELF-PROPELLING AND TRACTION ENGINES. } to which Steam Power is applied.
STONE GRINDING MILLS.
MORTAR AND PUG MILLS.
MILLWRIGHTS' WORK of all kinds.
SAWING MACHINERY, from 4 to 20 Horse Power.
BRICK AND TILE MACHINES.

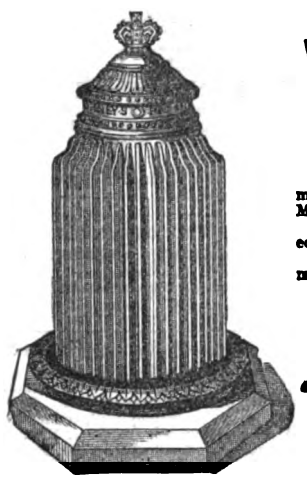
IMPROVED SETS OF FARM MACHINERY, for Large Occupations.
PORTABLE AND FIXED MACHINERY, for Thrashing and Dressing Corn.
THE PRIZE BOLTING AND OPEN-DRUM HORSE-POWER THRASHING MACHINES.
CORN DRESSING MACHINES, for Hand, Horse, Water, and Steam Power.
BARLEY AVELLING MACHINES.
CHAFF CUTTERS, for Hand, Horse, Water, and Steam Power.
PATENT TURNIP CUTTING AND PULPING MACHINES.

THE PRIZE CORN AND SEED DRILLS.
PRIZE CORN AND SEED DRILLS WITH MANURE APPARATUS.
PRIZE SEED AND MANURE DRILLS.
LIQUID, SEED, AND MANURE DROP DRILLS.
CHAMBER'S PATENT BROADCAST MANURE DISTRIBUTOR.
GARRETT'S PATENT HORSE HOE for all Crops.
PATENT REVOLVING HOES for Root Crops.
IMPROVED PLOUGHS AND REAPING MACHINES.
&c. &c. &c.

Of which full detailed particulars will be found in R. G. & SONS' ILLUSTRATED CATALOGUE, sent postage free to any address, in English, French, or German; and any of the above Machines will be shown in operation at R. G. & Sons' Farm, near the Works, on their receiving a few days' notice.

A Copy of R. G. & SONS' new COLONIAL LIST will be forwarded free to any of the Colonies, and Shippers will be supplied with these lists, with their names and addresses printed on, free of charge, by making application for the same.

ADDRESS—R. GARRETT & SONS, LEISTON WORKS, SAXMUNDHAM, SUFFOLK. (161)



THE LONDON

WARMING AND VENTILATING COMPANY,

(LIMITED,)

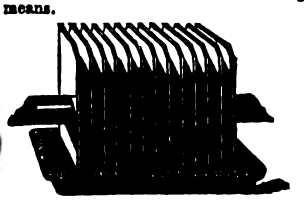
26 GREAT GEORGE STREET, Westminster, S.W.

(MANAGER—Mr. WOODCOCK.)

Churches, Greenhouses, Offices, and Buildings of every description warmed by means of a modification of the plan successfully used during the last five years by Mr. Goldsworthy Gurney in both Houses of Parliament.

Steam, Hot-water, Gas, and in open or enclosed fireplaces, Coal and Coke are equally available for the process.

The cost is less and the effect greater than that of any other known means.



The Horticulturist will find herein an instrument of new and important powers.

The apparatus may be seen in ST. PAUL'S CATHEDRAL, the various offices of the "Department of Science and Art," and in many churches and other buildings.

Particulars and Testimonials forwarded on application.

(12)

VULCANISED INDIA-RUBBER MACHINE BANDING is NOT AFFECTED BY WET, HEAT, OR COLD; does not stretch nor slip on the pulleys. HOSES for BREWERIES, &c., will NOT impart TASTE, SMELL, or COLOUR: also for conducting, or steam purposes. Washers, Valves, Sheets, Printing Blankets, &c., in Stock. Other Articles made to order. All Goods warranted to stand 300° Fahrenheit.

N.B.—Sole Contractors to the Lords Commissioners of the Admiralty.

DODGE and GIANDONATI (late DODGE, BACON, and Co), 44 St. Paul's Churchyard, London, E.C.

(208)

TO ENGINEERS, MILLOWNERS, AND MANUFACTURERS.

AMERICAN INDIA-RUBBER Machine Belting, Valves and Washers, Brewers' Hose, Fire Engine Hose, Improved Suction Hose—at Wholesale Prices.

W. T. HENDRY & CO.,
38 Upper Thames-street, London, E.C. (152)

MR. WALTER HALL is prepared to Grant Licences, or to Dispose of his Patent for working Railway Breaks. Particulars to be had of Mr. HALL, who may be addressed by letter to the care of the MECHANICS' MAGAZINE, 166 Fleet-street, E.C. (217)

BY HER MAJESTY'S ROYAL LETTERS PATENT.

PATENT SPHERICAL SELF-ADJUSTING BEARINGS, which do not heat in work. The advantages possessed by these Bearings are:—

1st. They are Self-adjusting; and, consequently, can be put down by the most ordinary Mechanic.
2nd. They are not liable to heat, even at high speeds.
3rd. They remain constantly parellel to the Spindle; and, therefore, wear equally all across the Bearing.
4th. They require only a very small quantity of oil.

Engravings and Prices forwarded on application to the Patentees.

WALLIS & HASLAM,

Engineers and Iron Founders, North Hants Iron Works, Basingstoke. (121)

RANSOME'S PATENTED PROCESS FOR PRESERVING STONE, CEMENT, STUCCO, &c.—By this process the softest and most friable Stone, Cement, or Stucco, can be rendered Impervious and Imperishable, DECAY AT ONCE ARRESTED AND PREVENTED.

For Particulars, Specimens, Illustrations, and Agencies, apply to Mr. Frederick Ransome, Whitehall Wharf, Cannon-row, Westminster; or Patent Stone Works, Ipswich. A Liberal Discount allowed to the Trade or to Shippers. (147)

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR,

Families, by using this delicious VINEGAR, insure purity and effect a saving of 50 per cent. See "Report of Dr. Letheby, City Officer of Health, Dr. Hassall, of the 'Lancet' Commission, and others." Sold by the Trade, in Bottles, labelled and capsuled. Wholesale—63 King William-street, London-bridge, E.C. Six Quart Samples sent free to any Railway for 3s. 6d. (216)

By Her Majesty's Royal Letters Patent.

E. DENCH,

KING'S ROAD, CHELSEA, AND HAMPSTEAD ROAD

Patentee and Sole Manufacturer of

PATENT

GALVANIZED-IRON HOT HOUSES AND CONSERVATORIES,

Has Two SPAN ROOF HOUSES left for Sale, a Great Bargain!

PATENT HOT HOUSES

every way superior to any other Material, at 1s. 3d. per ft. super, with excellent heavy, good quality GLASS.

PRINTED PRICE LIST SENT ON APPLICATION.

HEATING BY HOT WATER with efficiency and economy. (83)

TO BRASS FOUNDERS.

TO BE SOLD, the Patent-right of a New and Highly-approved EQUILIBRIUM WATER COCK or VALVE, suitable for Steam Boiler Feed Pipes, or any cases where the valve is required to be opened against pressure.

Address H., MECHANICS' MAGAZINE Office, 166 Fleet-st., where a Drawing may be seen. (151)

SPIRAL TUBE BRUSHES made with Wire or Whalebone for Tubes of

1½ 1¾ 2 2¼ 2½ 2¾ 3 3½ 4 4½ 5 ins. diam.
24/, 25/, 26/, 28/, 30/, 32/, 35/, 38/, 42/, 46/, 50/ per doz.

Quantities of Two Dozen and upwards delivered in London.

WILLIAM WALLER, Uddingston, by Glasgow. (213)

BRASS ENGINE and BOILER FITTINGS.—

Water-Gauges for Glasses, ½ ¾ 1 inch diam.
26/, 30/, 35/ each.
With Guards, 32/, 37/6 „

Gauge and Pet-Cocks, from 3/6 each.

Whistles, with 1½ 2 2½ 3 4 inch bell.
12/6, 18/6, 26/, 45/, 50/ each.

Blow-off Cock for Portable Engines, 12/6 each.
Oil Cups, of all kinds, from 18/ per dozen.
Ball Clacks, Balls, Cages, and sets complete.
Forsyth's Safety Boiler Plugs, 12/6 and 18/ each.
WILLIAM WALLER, Uddingston, by Glasgow. (212)

MATHEMATICAL DRAWING INSTRUMENTS, RULES, TAPES, CHAINS, LEVELS, THEODOLITES, BOX SEXTANTS, PRISMATIC and POCKET COMPASSES. Price Lists of the above articles sent post free, by JOHN ARCHBUTT, 20 Westminster Bridge Road, Lambeth, near Astley's Theatre. Every article warranted, and the prices will be found considerably lower than ever before charged for articles of similar quality. Routledge's Engineers' Slide Rules, 4s. 6d. each; Hawthorn's ditto, 5s. 6d.; Carpenters' Rules from 1s. (148)

ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street, Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 130 feet in length, to work by hand or Steam Power.

Hot-Water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (44)

EDWIN JEWITT, ENGRAVER ON WOOD AND DRAFTSMAN, 1 Pickett-place, Strand, near Temple-bar. Engineering, Scientific, and Mechanical Designs accurately engraved. Manufacturers and Tradesmen's Catalogues Illustrated, W.C. (34)

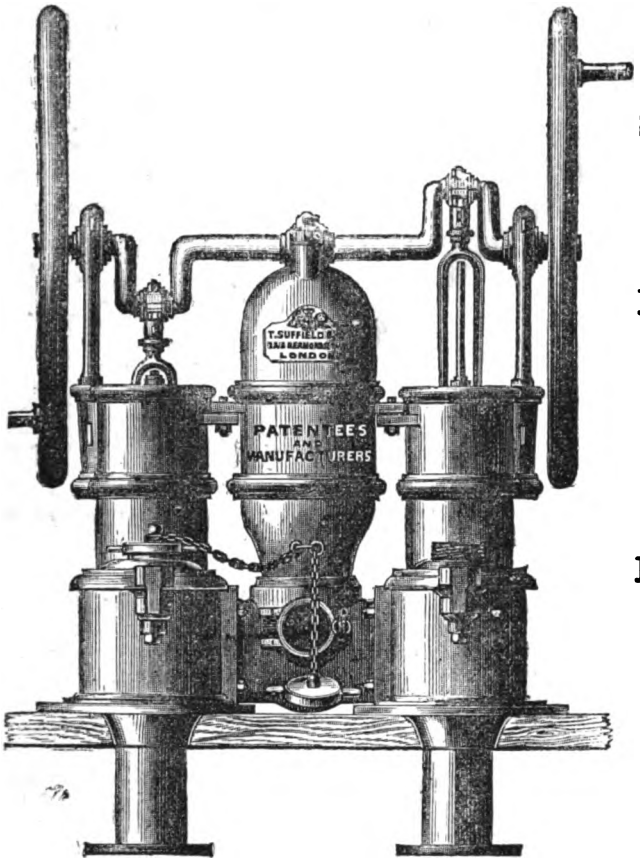
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS. SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

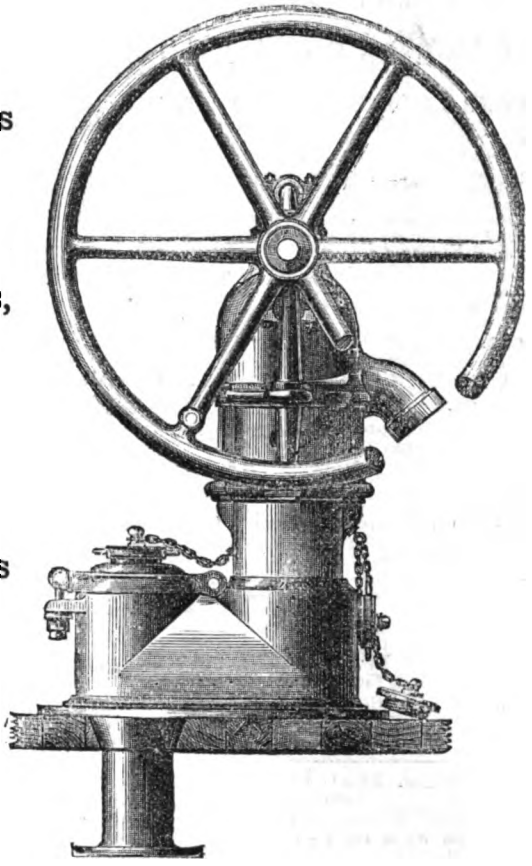
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangement either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps; the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board; the rapidity with which they can be converted into Fire Pumps, or be applied to the Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Works or Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require such Stores, together with a further saving in the cost of such Articles.

A PRACTICAL ENGINEER of long standing prepares Original Drawings, Copies, and Tracings. Advice and Assistance given to Inventors in working out their Plans. Pupils taught privately. Terms moderate.

Apply to J. J., 171 Strand. (138)

ENGINEERING BUSINESS FOR SALE.

OWING to the continued ill health of the Proprietor, the first-class business of an Engineer and Crane and Block Maker is offered for sale. It has been established in the Metropolis for nearly 30 years, and has enjoyed extensive patronage amongst Brewers, Manufacturers, Warehousemen, and others, in and about London; the business done amounting to nearly £8,000 per annum. About £3,200 would be required, (part of which, however, may remain for any reasonable time on good security,) which is the bare value of the tools, patterns, and stock in trade. The premises, including good dwelling-house, very conveniently situated, and capable of accommodating from 60 to 70 hands, are held upon a long lease, at an extraordinary low rental, not exceeding £100 per annum, taxes included. Many of the tools are nearly new, and of the best construction. The present proprietor, who relinquishes the business solely on account of ill health, would give every assistance in his power to those succeeding him; and as his foreman, who has been with him for nearly ten years, is thoroughly acquainted with the practical parts of the business, any gentleman desirous of commencing as a manufacturing engineer would find the present a very favourable opportunity. As all accounts have been, for many years past, collected quarterly, a very small amount, say £800, would suffice as working capital. Full particulars may be obtained by application to E. E. ALLEN, Esq., MECHANICS' MAGAZINE Office, 166 Fleet Street, E.C. (130)

NOTICE OF REMOVAL.

VITRIFIED BLUE BRICKS are delivered at the Nine Elms Station, London, at 80s. per 1,000.—Address, G. H. OGSTON, J. M. Paine's Silica Works, Farnham, Surrey. (36)

WATER POISONED BY LEADEN PIPES.

"The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dick, of Bonchurch, Isle of Wight. The water has cut these deep pits almost through the pipe, and not only upon the portion which we have illustrated, but has formed similar chasms throughout the entire length."—*Expositor.*

Poisoned Water Preventable.

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious, or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha. Nothing can be better. I have also recommended it to others, who have adopted the expedient.

Resistance for Frost.

The Gutta Percha Company have been favoured with the following Letters in reference to the non-conducting properties of Gutta Percha Tubing, in the resistance of Frost.

From J. ARMSTRONG, Esq., M.D., Gravesend.

"My private house, which was supplied with your Gutta Percha Tubing some five or six years ago, has never required the slightest attention; and previously, there was no winter passed that we were not deranged in consequence of the bursting of the leaden pipes."

From HENRY BROWN and SONS, Western Works, 108 Rockingham-street, Sheffield.

"We have now a positive proof of the frost-resisting properties of the Gutta Percha Piping. On our premises we have a leaden Pipe and a Gutta Percha one living side by side. The leaden one has been completely frozen up at least ten days, and the Gutta Percha one is still unaffected.

Every Variety for Gutta Percha Articles

REMARKS. — Business in Metals has been thoroughly paralysed through the warlike intelligence of the week. Where we do not quote lower prices, as Scotch Pigs fallen to 49s. 3d. per ton, and Spelter to £20, the quotations are nearly all nominal.

LAWRIE AND HAGGER, Metal Brokers.
33 Lombard-street, E.C.

TO INVENTORS AND PATENTEES.

MESSRS.

ROBERTSON, BROOMAN, & Co.,

Civil Engineers

AND PATENT AGENTS,

(ESTABLISHED 1823,)

166 FLEET STREET, LONDON, E.C.

Undertake to obtain Patents for Inventions

In the United Kingdom and Foreign Countries and the transaction generally of all Business relating to PATENTS.

ROBERTSON, BROOMAN, & Co.,

"MECHANICS' MAGAZINE" & PATENT OFFICE,

166 FLEET STREET, LONDON, E.C. (16)

TO MARINE ENGINEERS, OR SHIP-BUILDERS.

THE PROPRIETOR of a VALUABLE PATENT for Double-expansive Marine Engines (by which great economy of space and fuel is obtained) is desirous of entering into arrangements with a respectable firm for the construction of the same. An adequate portion of the patent-right would be assigned by the advertiser to any firm taking the matter up; and he would render all assistance in his power, either in London or elsewhere, amongst ship-owners (to many of whom he is well known), in obtaining contracts, &c. Unexceptionable references given. Address C. E., MECHANICS' MAGAZINE Office, 166, Fleet-street. (76

A NEW DISCOVERY IN WASHING HOUSEHOLD LINEN.

NO FAMILY SHOULD BE WITHOUT HANCOCK'S UNIVERSAL WASHING MACHINE. It effectually cleanses the Crevices of Baby-linen, Collars, Wristbands, &c., without the possibility of injuring the Linen or Collars. Received 500 Testimonials.

PRICES.

No. 2 Washes 9 Shirts in from 3 to 10 minutes; or 4 Sheets in 5 minutes - - - - - £5 5 0
No. 3 Washes 12 Shirts in from 3 to 10 minutes; or 6 Sheets in 5 minutes - - - - - 7 11 0
No. 4 Washes 18 Shirts in from 3 to 10 minutes; or 12 Sheets in 5 minutes - - - - - 12 12 0
And all other Articles in proportion.

J. L. HANCOCK, Sole Manufacturer and Patentee, 62 Pentonville-road, London. (37)

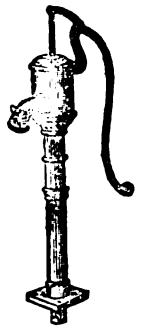
JOHN WARNER AND SONS,

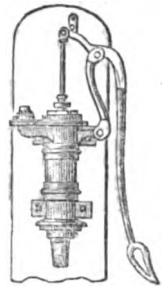
8 CRESCENT, JEWIN STREET, LONDON.

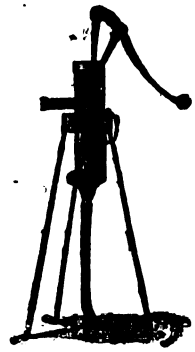
HYDRAULIC ENGINEERS, BRASS AND BELL FOUNDERS,

PATENTEES OF IMPROVEMENTS IN PUMPS.

atent Vibrating Standard Lift and Force Pumps.







PATENT CAST-IRON PUMP fitted with J. Warner and Sons' Patent Bucket and Sucker, which cannot clog in action, for Farms, Cottages, and Wells, not exceeding 28 feet.

Dia.	Height.	£ s.
2½ in. short	1 ft. 7 in.	1 10
2½ in. long	3 " 3 "	1 14
3 "	6 " 6 "	2 8

4 "	3 " 6 "	3 3
4½ "	3 " 6 "	3 3

2½ in. short, with 15 feet of Lead Pipe attached, ready for fixing 2 14
2½ in. long. do. do. 2 18

PATENT BRASS LIFT AND FORCE PUMP, on Plank, for House purposes, supply of Cisterns, &c.

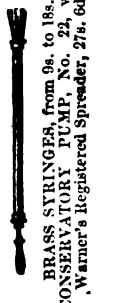
	£ s.
2½ inch	6 0
3 "	7 5
3½ "	8 0

A lighter Pump of 3 inches diameter, can be supplied if required 5 15

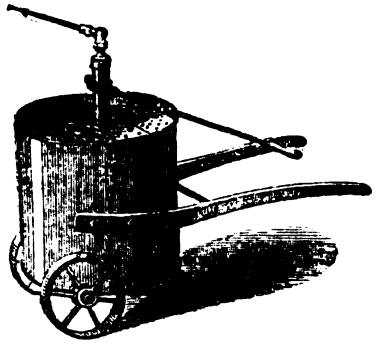
IMPROVED LIQUID MANURE, OR GENERAL PORTABLE PUMP.

These Pumps are fitted with J. Warner and Son's Patent Bucket and Sucker, and cannot clog in action. The Barrel is of Galvanized Iron, not likely to corrode, and can be raised or lowered at pleasure. The legs will fold together, and the whole may be carried on shoulder to any pond or tank required.

4½ in. Liquid Manure Pumps, with legs, £3 3s.; 1¼ in. Gutta Percha Suction Pipe, 1s. 11d. per foot; 2 in. Flexible Rubber and Canvass Suction Pipe, on Wires, 3s. 3d. per foot. The Barrel is 27½ inches long, and the legs are 5 feet high. Larger sizes of the above if required.

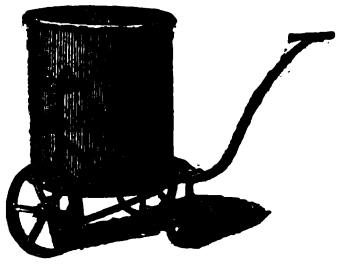


BRASS SYRINGES, from 9s. to 18s.
CONSERVATORY PUMP, No. 22, with Warner's Registered Spreader, 27s. 6d.



Galvanized Iron Tub GARDEN ENGINE, with Warner's Registered Spreader, is strongly recommended for durability and low price, viz., £2 19s., to hold Ten Gallons. Larger sizes, in either wood or iron.

WARNER'S SWING WATER-BARROW.
(To hold Thirty Gallons), £3 3s.,



is intended for all large Establishments where much watering is done by the watering-pot. By its use much time and labour of the Gardener are saved, particularly where the Tank, Pond, or Pump is at a distance from the garden.

MUSICAL SHEEP BELLS, with Straps, in sets of 6, 19s.; ditto, in sets of 8, 25s.; ditto, in sets of 12, 38s.

WARNER'S CATTLE AND SHEEP BELLS, in sets of 6, with Straps, 13s. per set.

Bells for Churches, Chapels, Colleges, Schools, Turret Clocks, &c., cast for any size, note, or weight, singly or in peals. Tuned by machinery. Stocked and wheeled ready for fixing. Old Bells re-cast or taken in exchange.

The great 16-ton Bell, for the Houses of Parliament, was made by JOHN WARNER and SONS, 1856, under their Patent.

May be obtained of any Ironmonger or Plumber, in town and Country; or of the Patentees and Manufacturers, as above. (30)

INDIA-RUBBER VALVES FOR STEAM ENGINES, PUMP PACKING, &c. — Explanatory Drawings and Information as to the best modes of fitting and arranging the above, and all other Mechanical Applications of VULCANISED INDIA-RUBBER, are furnished post-free by

CHARLES MACINTOSH & Co., Patentees, Cambridge-st., Manchester, and 3 Cannon-st. West, London.

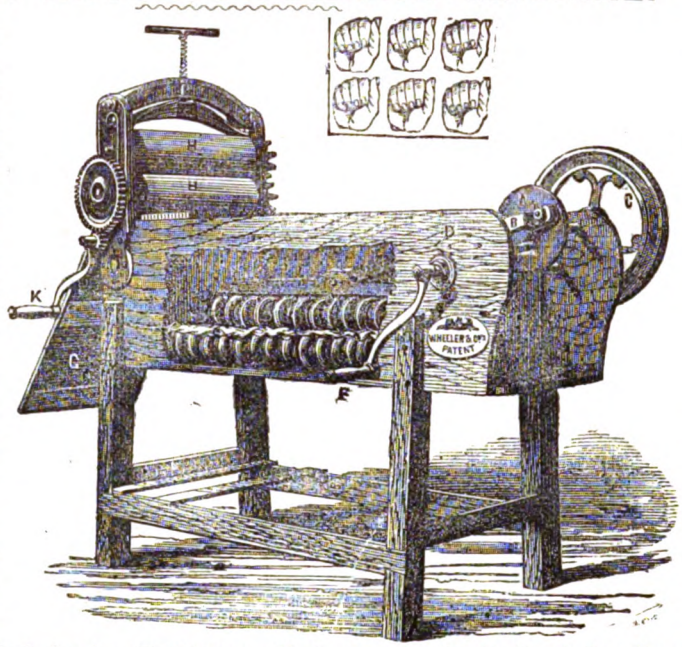
(193)

T. WHEELER AND CO.'S

"OXONIAN KNUCKLE WASHING MACHINE."



The Improvements in these New Inventions are the non-exposure of the user's hands to the dangerous parts of the Machine, and the rapidity with which the work is done. These Machines have neither bands or wheels passing on the outside, wherein lies the liability to accident. The rubbers are the truest representation of the knuckles or hand washing yet brought out; the compensating floating rubbers work at right angles, backward and forward, in the same manner as does the hands. These Machines can be supplied with rubbers that represent a person's hand in the action of rubbing; the knuckles, finger nails, and palm of the hand being truly modelled. They are capable of Washing Clothes of every description whatsoever, the largest bedding to the most delicate piec of muslin can be washe without breaking a singl thread; in fact, such is the delicacy of the action of these Machines, that the paper you are now reading can be passed between the rubbers without sustaining any injury, at the same time being thoroughly effective in cleansing. The Patentees confidently recommend these Machines to the notice of Laundresses, Heads of Families, Hotels, Emigrants, &c. So simple is the action of this Machine, that a boy or girl of 10 or 12 years of age can work it; the only skill required is to soak the clothes one hour before placing them in the Machine, placing a portion of the clothes at the handle end of the Machine; laying on the rubbers a part of them; turn the handle, and the clothes will pass through between the rubbers to the opposite end, effecting a saving of at least 50 per cent.

Prices: Washing Machines, £1 6s., £2 6s., £3 6s., £4 10s., £5 15s.; Washing, Wringing, and Mangling, £8 £10 15s., £14 14s.—Full Instructions sent with every Machine. Testimonials or References sent on application.

MANUFACTORY, ALBION WORKS PARK END STREET, OXFORD (114)

TO STEAM SHIP OWNERS, ENGINEERS, AND OTHERS.

How's Patent Steam Engine Counters, can be read at sight.

These Counters register the number of revolutions made by an engine or other mechanism. They may be used for ascertaining the duty of Pumping Engines and Water-wheels; the revolutions on board a steam-vessel; to calculate the slip of the propeller; and in a locomotive to test the slip of the wheels.

How's Patent Salinometer, for Steam Boilers using Salt Water.

By these, the density of the water in the Boiler is at all times accurately shown, and a saving of boiler and fuel is effected. They are adopted by the Admiralty, the Honorable Trinity Corporation, and others. Copies of Testimonials from Messrs. Penn, Messrs. Maudslay, and others, will be forwarded on application.

How's Engine-Room Telegraph, for communicating between Captain and Engineer.

Society of Arts Prize Medal, 1855.

is a Mechanical Telegraph, and by its peculiar construction, error or misunderstanding is rendered impossible. It now extensively adopted, and gives great satisfaction.

How's Patent Fresh Water Apparatus for Ships' Use.

This apparatus is designed for the distillation of Fresh from Salt Water; and on long voyages, and where the supply of water is scanty, it will be found invaluable. Testimonials may be seen.

Patent Steam Pump and Fire-Engine for Ships' Use.

This Steam-pump occupies but a small space; works perfectly noiselessly, and throws an immense volume of water. An Illustrated Circular of Fresh Water Apparatus and Steam-pump combined, free on application.

How's Patent Machine for Cutting Bolts, Rods, Spindles, Wire, &c.

Simple in construction, inexpensive, occupies but little space, and will not easily get out of order.

A Pamphlet Illustrative of the above, sent free by post, on application to

A. P. HOW, ENGINEER,

81 MARK LANE, LONDON.

EVERY DESCRIPTION OF ENGINEERS' TOOLS, ENGINE ROOM STORES, &c., &c., SUPPLIED.

TO BRASS-FOUNDERS, ENGINEERS, &c.

THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings; they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty ber cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, muffles, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire-standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. (43

ENORMOUS REDUCTION IN THE COST OF STEAM POWER.

TO RAILWAY COMPANIES, STEAM SHIP PROPRIETORS, AND MANUFACTURERS.—A saving of Fuel equal to one-third of the entire consumption is effected by the introduction of "DUNCAN'S PATENT SPIRAL HEAT DIFFUSERS," which arrest the heat in its passage through the flues or tubes, and convert into impelling power the large measure that without these appliances would (even in the very best boilers) escape along with the smoke. They can be fitted in an hour or two at a small cost, and without any alteration in the existing arrangements of boilers now in use. These results are prepared to be guaranteed, and a part of the value of fuel saved by the use of the Apparatus will be accepted for royalty.

Hitherto, steam navigation to distant parts of the world has proved a commercial failure. The remedy is provided, and the vast numbers of large and splendid vessels can soon be made valuable paying property.

Further information may be had on application to GWYNNE and CO., Engineers, Essex-street Wharves, Strand, W.C., London. (167)

A VALUABLE PATENT to be DISPOSED OF.—The Patentee will either dispose of the Patent or grant Licences to any party wishing to manufacture, or would join a person with capital to carry out the Patent.

Address, A. Z., Mechanics' Magazine Office, 166 Fleet-street. (163)

STEAM ENGINES FOR SALE.

PORTABLE STEAM ENGINES, from 6 to 12 horse power,
STATIONARY STEAM ENGINES, from 4 to 50 horse power,
TUBULAR BOILERS, from 4 to 50 horse power,
CORNISH BOILERS, from 4 to 50 horse power,

Are in hand, and can be despatched on eight days' notice. Prices moderate. Workmanship and Material of the best description.

Please address all communications to the Manufactory,

JAMES LYNE HANCOCK, VULCANIZED INDIA-RUBBER WORKS
Goswell Road, London, E.C. (85)

STEAM CULTIVATION.

CHANDLER AND OLIVER

HAVE much pleasure in being able to state that they are now prepared to execute orders for their PATENT STEAM WINDING ENGINES AND PLOUGHS, for Cultivating Land by Steam.

The WINDING TACKLE can be fitted to Engines of any maker, and the Plough can be made to take any kind of apparatus necessary for Cultivating the Soil, such as Scarrifier Tines or Broad Shares, &c. Any Engine now used by Farmers can be fitted with the Tackle. It is light and simple, and an ordinary Farm Labourer can work it.

The Engine can be used for Thrashing without taking the Ploughing Tackle off, not requiring more than three or four horses to take it from place to place.

These Engines are very useful for Pile Driving or Drawing Ballast up inclined planes; at the same time they can be used for Pumping. Farmers will find them most useful for all purposes.

Messrs. CHANDLER and OLIVER are prepared to receive orders for separate Windlasses, which are light and simple, and generally useful.

For further Information apply to

ROBERT CHANDLER, ENGINEER, BOW, NEAR LONDON,

Or Mr. OLIVER, Farmer, Hatfield, Herts.

ILLUSTRATED CATALOGUES, WITH PRICES, WILL BE READY SHORTLY. (215)

GREAT REDUCTION IN THE PRICE OF

FOWLER'S PATENT STEAM PLOUGH.

From the great Improvements recently made, JOHN FOWLER is prepared to execute Orders at the following prices:—

Windlass to Eight-horse Engine, with Patent Self-moving Anchor, Headland Ropes, Rope Porters, and all necessary Tools	£160 0 0
Cultivator, fitted with Three, Five, or Seven Tines	25 0 0
Seven Hundred Yards Iron Wire Rope, 1¼ in. circumference, which is a sufficient length, on this plan of working, for a 350 yards furrow	22 10 0
Steel Rope, £7 10s. extra.	£207 10 0

The advantages to be derived in the working of this Tackle over others are, no belt is used, consequently no delay is caused from its slipping in showery weather; it can be efficiently worked by two men and two boys; and it is not confined to scarifying only, but a two-furrow balance plough can be worked by it. From the direct action of the draught, a small engine will effect a larger quantity of work than the same engine on the "round-about system;" only half the rope is required for the same length of furrow, and a whole field can be done without shifting. The windlass can be attached to any agricultural engine, and the weight added would only be 12 cwt. The Tackle can be set at work within an hour of entering the field intended to be cultivated. The Drums on which the Rope is worked are four feet in diameter, and from its being wound in grooves, all crushing is avoided, and by these means a great saving in wire rope is effected.

LARGER POWER ENGINES AT COMPARATIVE PRICES.

Illustrated Catalogues with New Prices will be ready shortly. For further Particulars apply to

JOHN FOWLER, JUN., 28 CORNHILL, LONDON. (201)

SCOTT'S
PATENT GRASS SEED SEPARATOR,

which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from

PERENNIAL AND ITALIAN RYE-GRASS, &c.,

AND

SCOTT'S PATENT CARROT SEED BEARDING

AND

CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,

which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

Communications to be sent to the Patentee, J. SCOTT, 111 Drummond Street, Euston Square, London, N.W. (48)

LUND'S LONDON LEVER for Drawing Corks is the most simple and efficacious Instrument ever offered to the public for removing the Corks from Bottles without disturbing the contents. The use of this Lever prevents the possibility of any injury to the hand by the accidental breaking of the neck of the Bottle.

Sold by all Cutlers and Ironmongers, and at the Patentee's Wholesale Warehouse, 23, 24, 25 Fleet Street, London. (178)

FIRE BRICKS.—THE FARNHAM INDESTRUCTIBLE SILICIOUS FIRE BRICKS have been greatly REDUCED in PRICE, and will be delivered at the Nine Elms Station, London, at 90s. per 1,000.—Address, G. H. OGSTON, J. M., Paine's Silica Works, Farnham, Surrey. (35)

THE Imports of Foreign Flax Fibre having declined to a most serious extent, and the Cultivation of the Plant decreased at home, a great necessity has arisen for laying the foundation of a System whereby a sufficient supply of raw material may be secured to meet the requirements of a great staple industry of the country—known as the Flax and Linen Trade.

It has, therefore, been determined to form "THE NATIONAL FLAX COMPANY, LIMITED," whereby such a System may be initiated.

This will be effected by the introduction of mechanical improvements, whereby a continuous and easy, as well as profitable, preparation of the Fibre from the Plant can be effected.

Such preparation will be carried on in establishments to be called "Rettories," and to be erected in suitable localities, where the Flax Crop, in its entirety, or otherwise, will be purchased from the Grower.

By thus creating a Market within easy reach of the Farmer, and proving to him practically that he can easily produce a good-paying Crop, needing no further trouble in its preparation, and for which he may regularly receive *ready money* at harvest time, when the demands on him for *labour-cost* are large, it is considered that a very extensive growth of Flax will be gradually introduced throughout the country generally.

A more perfect cultivation of this Plant will also be induced, whereby many existing prejudices, in respect to the supposed exhaustive properties of Flax, will be removed, and the Grower convinced that it is really one of value in Districts suitable to it, and in fair rotation. It will also be found that land capable of producing any kind of grain is equally available for Flax; and that there is no better *preparation* for a Wheat Crop to follow.

The Company have secured the Patents, Plans, and Services of Mr. G. A. CATOR, who has devoted a large sum of money and many years in bringing the matter to its present effective condition.

By reference to the detailed Prospectus, it will be clearly seen that, with the outlay proposed, a very large Dividend may be calculated on with perfect safety; showing that this Company presents unusual features of promise to parties seeking investment in substantial and well-considered enterprises.

*** Prospectuses, Pamphlets, Forms of Application for Shares, and all other information, may be obtained at the Offices of the Company. (207)

TO PIANOFORTE MANUFACTURERS.

A PERSON OF MANY YEARS' EXPERIENCE in the Pianoforte manufacture, perfectly competent to undertake either the control or the actual performance of the same, is desirous of meeting with an engagement, either temporary or permanent. Reference, both for character and ability, may be made to the Editors of the MECHANICS' MAGAZINE. Address, P. M., MECHANICS' MAGAZINE Office, 166 Fleet-street, London, E.C. (241)

THE ARMSTRONG GUN.

TO THE SCIENTIFIC.

THE ADVERTISER having provisionally Registered, with a view of taking out Letters Patent for some important improvements to the above newly-invented Gun, thereby making it doubly efficient by delivering twice the number of shots, in any given time, than in its present state; dispensing with the sponge now used, by causing each shot to cleanse the Gun in its passage through the bore; and also throwing shots, varying from 32 lbs. to 200 lbs., without increasing the size of the bore, or charge of powder.

Any Gentleman of Capital being disposed to join the advertiser in this undertaking, will find it an opportunity rarely to be met with.

Address, Mr. W. GOSLING,
82 Wellington-street,
Thursday, May 5th, 1859. Woolwich.
(239)

TO COMMERCIAL TRAVELLERS.

WANTED, a Gentleman well-acquainted with Ironmongers, Upholsterers, Coopers, &c., to Travel on Commission.

Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (164

TO MILLWRIGHTS AND ENGINEERS.

WANTED. — A Working Foreman who practically understands Mill Work, and can repair Steam Engines. None but steady men need apply. Address, WOODS & SON, Suffolk Iron Works, Stowmarket. (229)

HART & SON, MALLEABLE IRON-FOUNDERS, 4 Vine-street, York-road, Lambeth. Orders for Malleable Iron Castings executed within a week. (77)

NORTON'S GOSSAMER CARTRIDGES, FOR MILITARY FIRE-ARMS.

These Cartridges are Manufactured by Mr. JAMES LEETCH, Gunmaker, 68 Margaret-street, Regent-street. Capt. N. has lately made an improvement in them, by pasting the thin tissue over the junction of the cartridge with the base of the shot. (237)

ENGINEERS' TOOLS FOR SALE, viz.: PLANING, SHAPING, BORING, AND DRILLING, BOLT AND NUT SCREWING AND NUT SHAPING MACHINES. Inspection invited. Prices and other particulars furnished on application to

J. TODD & Co., Kent Iron Works, Bridge-street, Greenwich, S.E. (232)

FOR SALE.

A 12-HORSE HORIZONTAL STEAM ENGINE and a 4-HORSE DIRECT ACTING STEAM ENGINE, with Fly-wheel Governors, &c., complete. Address, W. F. Plummer, 12 Albany-road, Camberwell. (188)

CONDY'S PATENT FLUID, or NATURAL DISINFECTANT,

Not only Deodorizes but Disinfects perfectly, and DESTROYS FOR EVER the cause of infection.

Is not poisonous, as it may be used to purify water. Evolves no noxious or unpleasant gas. Cannot be mistaken for any other fluid, thereby preventing death and disease; and is therefore the best, safest, cheapest, and most pleasant disinfectant ever introduced.

This fluid has been examined and reported upon by the Board of Health, all the most eminent Men and Chemists of the day, in all cases in the most satisfactory manner possible.

The Public are recommended to use this Fluid, properly diluted with water, frequently and habitually in larders, sculleries, dairies, musty cakes, sick rooms, close places, &c., as it has numerous advantages, and can be used with certain immediate success and perfect safety.

Sold in Quart Bottles, 1s.; Pints, 2s.; Half-pints, 1s.; and in bulk, 10s. per Gallon.

Free to Railway on receipt of Order or Stamps. (238)

VENTILATION WITHOUT FLUES.

KUKLA'S PATENT STOVES,

At 18s., 25s., and 50s.

KUKLA'S newly-invented Deflagrator—the first and only perfect GAS STOVE. Guaranteed to burn without flue—without dust, smell, or smoke, producing a great and pure heat with the least expenditure of Gas.—*Vide Society of Arts' Journal.*

Patronised by the English and French Government.

Scientific in Principle,
Simple in Construction,
Healthy and efficient in use.

The Deflagrator Stove is cheap, portable, and suited for every situation; and from the principle on which it is constructed (viz., expanding to a sixfold volume the gas used) is capable of warming any given space more quickly and more thoroughly than any other means: while its addition forms a sure remedy for any ill-warmed or ill-ventilated apartments.

The 25s. Deflagrator warms a room of 2,000 cubic feet at a cost of 3d. per day.

The 50s. Deflagrator warms 5 to 6,000 cubic feet at a cost of 6d. per day (twelve hours). Also, the Greenhouse Stove at 18s.

Patentee and sole Manufacturer, F. X. KUKLA, 194 Pentonville-road, London.

Country orders promptly attended to. Carriage free to any Railway in London.

Post-office Orders should be made payable to FRANCIS XAVIER KUKLA, General Office.

N.B.—Every Stove separately tested before sent out.

The NEW GAS COOKING STOVE for 10 persons, price £3. (103

PIERCE'S

UNRIVALLED

PYRO-PNEUMATIC FIRE-LUMP WARMING AND VENTILATING STOVE GRATES,

WITH the cheerful, open fire, producing healthful warmth, with continuous Self-acting Ventilation, for Churches, Schools, Public Buildings, Banking Houses, &c. These Grates are manufactured solely by PIERCE, the Inventor, for which he received the Prize Medals of London in 1851, and of Paris in 1855.

PRICE, from £7 10s.

ILLUSTRATED CATALOGUE, with Prices and Estimates for Work, furnished on application to the Inventor and Sole Manufacturer.

Also his

IMPROVED COTTAGER'S GRATE,

For Warming Two Rooms with only One Fire. Prices, 30s. and 35s.

PIERCE, No. 5 JERMYN STREET, REGENT STREET.

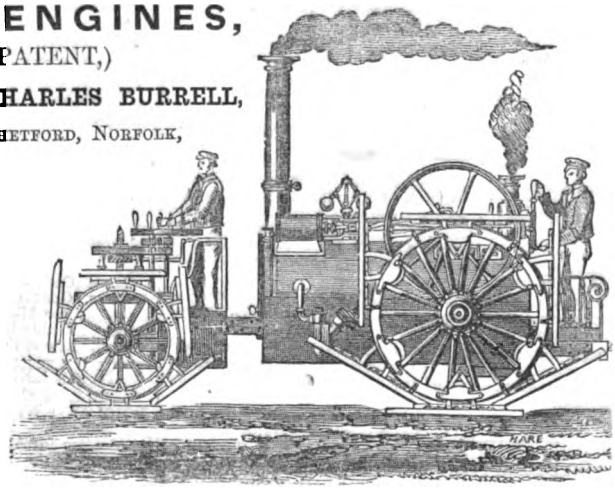
(111)

TRACTION ENGINES,

(BOYDELL'S PATENT,)

MANUFACTURED BY CHARLES BURRELL,

ST. NICHOLAS WORKS, THETFORD, NORFOLK,



And ordered for India, Australia, and South America, may now be seen, complete and in course of construction at the above works. BOYDELL'S TRACTION ENGINES AND ENDLESS RAILWAY will draw heavier loads over good roads than any other traction engine, and on soft and bad roads will draw heavy loads where no other traction engine can move itself. All objection to the wear and tear of these Engines is entirely removed by the use of Charles Burrell's improved patent Wrought Iron Wheels, fitted with Rails and Tyre, as well as all the wearing parts, of Steel.

☞ *Apply also to Mr. Hemming, Mark Lane, E.C.*

TO BRASS-FOUNDERS, ENGINEERS, &c.

THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings; they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty per cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, muffles, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire-standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. (43

ENORMOUS REDUCTION IN THE COST OF STEAM POWER.

TO RAILWAY COMPANIES, STEAM SHIP PROPRIETORS, AND MANUFACTURERS.—A saving of Fuel equal to one-third of the entire consumption is effected by the introduction of "DUNCAN'S PATENT SPIRAL HEAT DIFFUSERS," which arrest the heat in its passage through the flues or tubes, and convert into impelling power the large measure that without these appliances would (even in the very best boilers) escape along with the smoke. They can be fitted in an hour or two at a small cost, and without any alteration in the existing arrangements of boilers now in use. These results are prepared to be guaranteed, and a part of the value of fuel saved by the use of the Apparatus will be accepted for royalty.

Hitherto, steam navigation to distant parts of the world has proved a commercial failure. The remedy is provided, and the vast numbers of large and splendid vessels can soon be made valuable paying property.

Further information may be had on application to GWYNNE and CO., Engineers, Essex-street Wharves, Strand, W.C., London. (167)

ENGINEERING BUSINESS FOR SALE.

OWING to the continued ill health of the Proprietor, the first-class business of an Engineer and Crane and Block Maker is offered for sale. It has been established in the Metropolis for nearly 30 years, and has enjoyed extensive patronage amongst Brewers, Manufacturers, Warehousemen, and others, in and about London; the business done amounting to nearly £8,000 per annum. About £3,200 would be required, (part of which, however, may remain for any reasonable time on good security,) which is the bare value of the tools, patterns, and stock in trade. The premises, including good dwelling-house, very conveniently situated, and capable of accommodating from 60 to 70 hands, are held upon a long lease, at an extraordinary low rental, not exceeding £100 per annum, taxes included. Many of the tools are nearly new, and of the best construction. The present proprietor, who relinquishes the business solely on account of ill health, would give every assistance in his power to those succeeding him; and as his foreman, who has been with him for nearly ten years, is thoroughly acquainted with the practical parts of the business, any gentleman desirous of commencing as a manufacturing engineer would find the present a very favourable opportunity. As all accounts have been, for many years past, collected quarterly, a very small amount, say £800, would suffice as working capital. Full particulars may be obtained by application to E. E. ALLEN, Esq., MECHANICS' MAGAZINE Office, 166 Fleet Street, E.C. (130)

THORLEY'S FOOD FOR CATTLE.—Every person having an interest in domestic or farm animals should obtain a supply of this celebrated and economical food, which will prove invaluable during the approaching season. For keeping horses in good condition, it is unequalled. Pigs fatten with surprising rapidity upon it, and their flesh increases in flavour and value. Cowkeepers will find great advantage in the increased quantity and improved quality of the milk during its use. All animals are benefited by it. A pamphlet on this interesting subject, accompanied by Testimonials from the principal Nobility, Gentry, and Agriculturists, forwarded on application. In Casks containing 448 Feeds (Measures enclosed). Price 50s., carriage paid to any Railway Station in the United Kingdom. Post Office Orders payable to JOSEPH THORLEY, 77 Newgate Street, London.

N.B.—The public are cautioned against being imposed upon by worthless imitations. (132)

PRICE £4 4s.

HOPKINSON'S IMPROVED STEAM ENGINE INDICATOR and BOOK, to be had only of J. HOPKINSON and CO., Britannia Works, Huddersfield.

HOPKINSON'S PATENT MERCURIAL STEAM PRESSURE GUAGE. Price from 42s. to 84s., according to pressure.

HOPKINSON'S PATENT COMPOUND SAFETY VALVE has a discharging area equal to an ordinary valve 8¾ inches diameter; explosion from deficiency of water, excessive steam, and intentional or accidental tamperings is impossible when fitted with this valve.

PATENT MERCURIAL VACUUM GUAGES 50s. each &c., &c.

J. HOPKINSON & CO., Britannia Works, Huddersfield. (158)

IMPORTANT TO MANUFACTURERS, MILL OWNERS, &c.

GUTTA PERCHA MILL BANDS.

THE GUTTA PERCHA COMPANY beg to state that the increasing demand for the Gutta Percha Strapping for Driving-bands, Lathe-straps, &c., fully justifies the strong recommendations they have everywhere received.

Their durability and strength—permanent contractability and uniformity of substance—their non-susceptibility of injury from contact with oils, grease, acids, alkalies, or water—and the facility with which the only joint required can be made in bands of from 200 to 300 feet long—render them superior to leather for almost all working purposes, and decidedly more economical.

TESTIMONIALS.

IMPORTANT ANNUAL SAVING.

From TRUMAN, HANBURY, BUXTON, & Co., Brewery, London.

"In reply to your inquiry, we have much pleasure in bearing our testimony to the advantages, both as regards economy and saving of time, effected by the use of your Patent Gutta Percha Bands in lieu of Leather Straps. The stoppage of one portion of our works through the failing of the leather strap used to be of daily occurrence—but with this annoyance we are now never troubled. We have had these straps in operation for nearly three years, and are assured by our Engineer that *they effect a saving to us of at least* THIRTY POUNDS *a year*."

From JAMES ABERNETHY & Co., Fury Hill Foundry Aberdeen.

"We have now had Gutta Percha Bands working here *for three years*. One of them has been driving the fan blast for our smith's shop for all that time, and for anything we see, may drive it as long again. The speed of the fan is but 1,200 per minute. We have used them with complete satisfaction, driving circular saws, and in some cases where leather bands would have been quite inapplicable from damp. We have uniformly endeavoured to have the drums and pulleys so proportioned to the strain, as that there is no chance of the band slipping; and with this precaution, and taking care in using *cross bands that they do not rub*, we are quite satisfied that they are superior in every respect to leather—stronger at the same weight, and keeping quite straight in working—requiring no lacings, and very seldom any repairs."

WATER POISONED BY LEADEN PIPES.

The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dick, of Bonchurch, Isle of Wight.

POISONED WATER PREVENTABLE

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha Tubing. Nothing can be better. I have also recommended it to others, who have adopted the expedient."

A variety of Gutta Percha Articles, such as Mill Bands, Tubing, Sheet, Soles, Pump Buckets, Bosses, Union Joints, Bottles, Bowls, Flasks, Curtain and Cornice Rings, Solid Frames, Galvanic Batteries, &c., &c.

REMARKS.—Nearly a complete stagnation to business in Metals, prices of nearly every article evincing a tendency downwards.

LAWRIE AND HAGGER, Metal Brokers.

33 Lombard-street, E.C.

IRON AND OTHER METALS.

[FROM OUR OWN CORRESPONDENT.]

The Iron Trade of Great Britain: Return to work of the Men: General average Work—The State of Things in South Staffordshire: Pigs a Drag—The Glasgow Market—The Scotch Iron Trade generally—Liverpool Metal Market—The Government Returns for March: Increased Export and Import of Metals and Hardware.

We learn from the different iron-producing districts of the kingdom that the excitement consequent upon the elections and the holidays having now subsided the men have returned to their work; and that the various mills and forges have, with some exceptional instances, assumed their wonted activity. Though the demand for first-class iron is not of a very brisk nature, yet it is sufficient to keep the works of the leading members of the trade fairly in gear. The demand from the continent is dull, but the advices from the United States are of a more satisfactory nature. This, combined with a tolerably active home trade, keeps for the present the best-known houses in fair average work. How long this will last is, however, a serious problem.

At Birmingham, yesterday, and at Wolverhampton, on Wednesday, pig iron was a complete drag. Most of the malleable iron makers are well supplied with it, and the make has not yet been reduced. In consequence of there being no demand it was difficult to obtain a quotation. The best makers continue to ask £3 12s. 6d., and the inferior makes are still quoted at £3 5s. There is, however, more margin in the latter than in the former descriptions. So great is that margin that there are instances in which 100 tons of a tolerably good pig of the latter class could be had—terms, cash on delivery—for as small a sum as £300. Such instances exist, but they are rare, and would not exist perhaps on the following day after they were entered into. That such pigs can be made at a profit and sold for that money is next to impossible.

There were loud complaints at Birmingham and at Wolverhampton at the increased railway and canal rates for the carrying of Ulvertone ore—an increase which will seriously run up the price of the material of which good pigs are made, and thereby increase the present difficulties of the pig-iron maker. The makers of malleable iron reported a falling off in orders received from both home and foreign markets. They are able to keep most of their houses employed.

Respecting Tuesday's market at Glasgow, we are advised—"Our pig-iron market has been flat again to-day, and a large business was done at 48s. 6d., and 48s. 9d. one month open, closing nominally at these rates. Nos. 1 and 3, G.M.B., 48s. 9d. In their circular, dated Friday last, Messrs. Shaw and Thompson, of Glasgow, state that during the past month the course of the Scotch pig-iron market has been an almost uninterrupted decline."

In Liverpool the approach of war has caused prices of pig iron to give way considerably. A large business has been done at reduced quotations.

From Birmingham and Wolverhampton we learn that most of the general traders in nearly every description of hardware and fancy goods are experiencing the early effects of the continental war. The merchants engaged in the Italian trade have suspended all their orders; and the Mediterranean trade generally is entirely stopped. The American trade continues dull; a similar remark applies to the South American. There is little doing with the East Indies; indeed there is scarcely a branch of the export trade which can be said to be otherwise than languid. The home trade cannot fail to suffer from the events which led to the stoppage of so important a part of the continental trade.

The Government returns for the month of March show that the iron and hardware trades have largely participated in the benefits accruing from an increased export demand.

There was an increased exportation of wrought-iron to all countries except Holland, but the total was below the trade of the corresponding month of 1857. In railway iron of all kinds the increase was very great, especially to India and the United States. The cast-iron exports continue to be large, India taking large quantities, though the shipments to Egypt and the United States have fallen off.

There was a large increase in the pig-iron exports to France and the United States, but the trade in this commodity with Russia and Holland continued to decline, and the total, though a considerable increase upon last year, was below the exports of 1857.

The imports were on a similar scale with the exports.

LIST OF MISCELLANEOUS TENDERS INVITED, AND ENGAGEMENTS OPEN.

The tenders and vacancies which appear in this weekly list are not repeated in succeeding numbers.

LOCOMOTIVES, *Victorian Railway.*—Four locomotive tank engines. Specifications, De Pass and Sons, 4 Abchurch-lane, E.C.; further information, J. K. Brunel, Esq., 18 Duke-street, Westminster. Tenders, May 14, to Messrs. De Pass and Son.

STEAM ENGINES AND PUMPS, *West Ham.*—For the supply and erection of duplicate steam engines and boilers complete, 30-horse power—steam to be worked expansively: as, also, for supply and erection of sewage pumps. Specification, Mr. W. J. Barsham's, Clerk to the West Ham Local Board, Stratford-green, E.; and R. Robinson, Esq., C.E., 34 Parliament-street, Westminster. Tenders to the clerk, May 16.

RAILWAY VIADUCT AND STATION, *London and North-Western.*—Rebuilding the Spon-end Viaduct, near Coventry, and erection of station at the Avenue-road, Leamington. Particulars, Engineer's Office, Euston-station. Tenders, 4 o'clock, May 11.

RAILWAY STORES, *Glasgow and South-Western.*—For supply of iron and steel, iron castings, nails and spikes, malleable iron forgings, copper, &c. To extend to six or twelve months from June 1. Schedules, &c., Local Superintendent, Kilmarnock. Tenders to Secretary, Bridge-street Station, Glasgow, May 23.

GAS-HOLDER WANTED.—Second-hand. Fifty to sixty feet diameter, fifteen to twenty feet deep. A.B., Mr. Clifford, Inner Temple-lane, London.

RAILWAY, *Oldham, Ashton-under-Lyne, and Guide Bridge Junction.*—Plans &c., Mr. J. G. Blackburne, C.E., Oldham. Tenders to May 11.

WATERWORKS ENGINES, *Stockholm, Sweden.*—Four Engines, with boilers, machinery, &c., for the Stockholm Waterworks in Sweden, and for the Stockton and Middlesborough Waterworks in England. Drawings, Mr. Hawksley, C.E., 30, Great George-street, Westminster, S.W. Tenders, May 14.

CHURCH, *Oldham.*—For the erection of St. Peter's. Drawings, &c., Messrs. Holden and Son, 64 Cross-street, Manchester. Tenders to Building Committee, at Messrs. Fallows and Kaymer, Barker-street, Manchester, May 11.

CHURCH, *Stourbridge, Worcestershire.*—Plans, &c., Messrs. Oates and Perrins, Stourbridge. Tenders, May 25th.

WESLEYAN CHAPEL AND SCHOOL, *Liverpool.*—At Prince's Park. Drawings, &c., Clerk of the Works, Trinity Chapel, Grove-street, Liverpool. Tenders, May 9, to Chairman of Committee, at 16 Berry-street, Liverpool.

CHURCH, *Yspythy, Denbighshire.*—Plans and particulars, Rev. J. Morgan, Yspythy, Parsonage, Corwen.

LITTLE CAWTHORPE CHURCH, *near Louth.*—Plans, &c., bill of quantities, &c., of Mr. Withers, 51 Doughty-street, London, W. C. Tenders to Rev. E. Huff, the Vicarage, Little Cawthorpe, near Louth, May 17.

AUCTION ROOMS, *Woolwich.*—Plans, &c., Messrs. William Gosling and Son, architects, &c., 82 Wellington-street, Woolwich, 12th instant. Tenders May 18, to Mr. H. Kemp, Auctioneer, Church-street.

ROADS, *Scotland.*—Making several miles of new farm roads, in two or three separate divisions on the estates of Sorne and Quinish, near Tobermory, Island of Mull. Particulars, J. Forsyth, Esq., 73 Guildford-street, Russell-square, London, W. C.

GAS LIGHTING, *London.*—The Commissioners of Sewers will at Guildhall, on May 10, receive tenders for lighting the city lamps for three years, from Midsummer next. Specifications at the Sewer's office, Guildhall.

STONE, *Manchester.*—Samples of good building stone, at per cube foot. F. C. Halton, Clerk to the Assize Court Committee, Manchester, forthwith.

HOTEL, *Highbridge, Somersetshire.*—Plans, Mr. R. Down, Architect, Eastover. Tenders, May 16.

SCHOOLS, *Kenilworth, Warwickshire.*—Plans at the Bank, Kenilworth. Tenders to May 16 to Rev. W. F. Bichmore.

SCHOOL, *St. Chads, Shrewsbury.* Plans, &c., Office of Mr. Haycock. Tenders to May 18.

MILITIA STORES, *Cardiff.* Plans, &c., at Office of Clerk of the Peace, Cardiff. Tenders to May 13.

VILLA RESIDENCE, *Haygrove, Bridgwater.* Plans, Mr. Robert Down, Eastover. Tenders to May 10.

HOUSE, STABLES, &c., *Belmont, near Starbeck, Harrowgate.* Plans, Messrs. J. Child and Son, Architects, 23 Park-row, Leeds, to May 3, and at Tenter Lodge, Knaresborough, from 4th to 10th of May. Tenders, May 11.

DESIGNS FOR DRINKING FOUNTAINS.—Prizes of £20, £10, and £5 respectively will be given by the Metropolitan Free Drinking Fountain Association for designs to fulfil the following conditions:—1. The cost, when erected, not to exceed £50; 2, To have a receptacle for a filter and ball-cock cisterns; 3, To yield one small stream of water; 4, To protect the water from the extreme changes of Temperature; 5, To occupy small space. Designs, May 25, No. 12 Pall Mall, West.

TRAFFIC MANAGER WANTED.—For the Banff, Portsoy, and Strathisla Railway. Salary from £150 to £250 per annum. Applications May 16, with Mr. Forbes, Sol., Portsoy; or Messrs. C. and E. Blyth, C.E., Edinburgh,

TO INVENTORS AND PATENTEES.

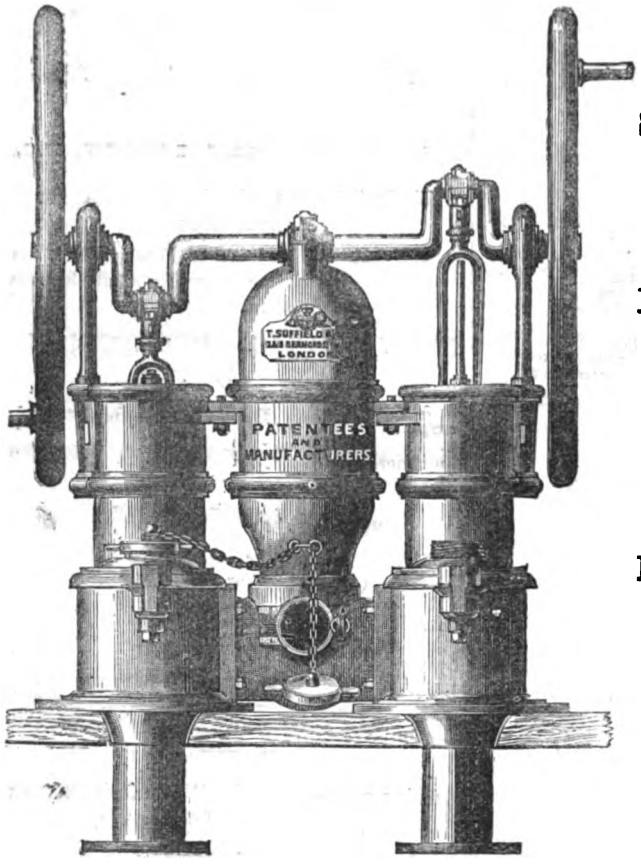
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS, SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

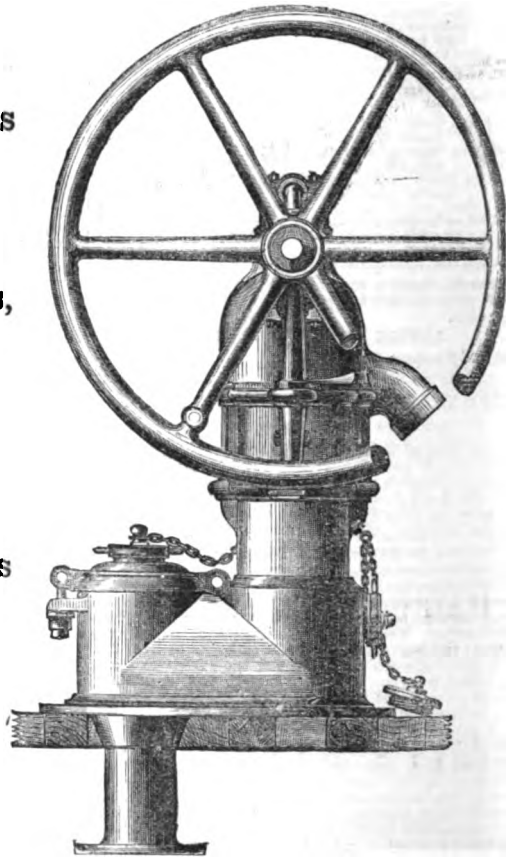
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangement either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps; the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board; the rapidity with which they can be converted into Fire Pumps, or be applied to the Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Works or Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require such Stores, together with a further saving in the cost of such Articles.

VULCANIZED INDIA-RUBBER

In any of the following forms, of any size, or to Working Drawings for all MECHANICAL *purposes* :—

WASHERS for Steam and Gas Joints.
VALVES for Marine and other Steam Engines.
ENGINE-PACKING (Elastic).
PUMP-BUCKETS ,,
HOSE-PIPES.
GAS-TUBING.
SUCTION HOSE.
FIRE ENGINE AND FACTORY HOSE.
WATERPROOF CART, VAN, AND WAGGON COVERS.
MACHINE AND MILL-BANDS for Driving all kinds of Machinery.
RAILWAY BUFFER SPRINGS.
BALL VALVES.
PUMP-PACKING (Rings or Rope).
WHEEL-TIRES (Noiseless).

[N.B.—A Large Stock of the above always on hand, and any modification made to order.

Please address all communications to the Manufactory,

JAMES LYNE HANCOCK, VULCANIZED INDIA-RUBBER WORKS
Goswell Road, London, E.C. (85)

STEAM CULTIVATION.

CHANDLER AND OLIVER

HAVE much pleasure in being able to state that they are now prepared to execute orders for their PATENT STEAM WINDING ENGINES AND PLOUGHS, for Cultivating Land by Steam.

The WINDING TACKLE can be fitted to Engines of any maker, and the Plough can be made to take any kind of apparatus necessary for Cultivating the Soil, such as Scarrifier Tines or Broad Shares, &c. Any Engine now used by Farmers can be fitted with the Tackle. It is light and simple, and an ordinary Farm Labourer can work it.

The Engine can be used for Thrashing without taking the Ploughing Tackle off, not requiring more than three or four horses to take it from place to place.

These Engines are very useful for Pile Driving or Drawing Ballast up inclined planes; at the same time they can be used for Pumping. Farmers will find them most useful for all purposes.

Messrs. CHANDLER and OLIVER are prepared to receive orders for separate Windlasses, which are light and simple, and generally useful.

For further Information apply to

ROBERT CHANDLER, ENGINEER, BOW, NEAR LONDON,

Or Mr. OLIVER, Farmer, Hatfield, Herts.

ILLUSTRATED CATALOGUES, WITH PRICES, WILL BE READY SHORTLY. (215)

SCOTT'S
PATENT GRASS SEED SEPARATOR,

which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from

PERENNIAL AND ITALIAN RYE-GRASS, &c.,

AND

SCOTT'S PATENT CARROT SEED BEARDING

AND

CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,

which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

Communications to be sent to the Patentee, J. SCOTT, 111 Drummond Street, Euston Square, London, N.W. (48)

CLAYTON, SHUTTLEWORTH, AND CO.,

OF LINCOLN,

78 LOMBARD STREET, LONDON, E.C.,

AND 36 DALE STREET, LIVERPOOL,

AGRICULTURAL AND GENERAL ENGINEERS,

And Manufacturers of Portable and Fixed Steam Engines.

Combined Threshing Machines, which dress the corn ready for market at one operation. Grinding Mills, Saw Benches, Pumps for Irrigation and Mining purposes, with all necessary gearing for being driven by steam power. Full particulars and estimates given on application to the above address.

C. S. and Co.'s PORTABLE STEAM ENGINES are adapted for every purpose to which steam-power can be applied. When intended for winding, they are fitted with reversible link motion and winding gear. They are easy of removal, as may be seen by the engraving, and can be set to work immediately on arrival.

C. S. and Co. are now doing an extensive foreign and colonial business, and are prepared to send off engines and machinery of the before-mentioned kinds in a few days from the date of order. They would also call attention to the important *reduction in prices* made for the new year.

For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (23).

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.

Families, by using this delicious VINEGAR, insure purity and effect a saving of 50 per cent. See "Report of Dr. Letheby, City Officer of Health, Dr. Hassall, of the 'Lancet' Commission, and others." Sold by the Trade, in Bottles, labelled and capsuled. Wholesale—63 King William-street, London-bridge, E.C. Six Quart Samples sent free to any Railway for 3s. 6d. (216)

LUND'S LONDON LEVER for Drawing Corks is the most simple and efficacious Instrument ever offered to the public for removing the Corks from Bottles without disturbing the contents. The use of this Lever prevents the possibility of any injury to the hand by the accidental breaking of the neck of the Bottle.

Sold by all Cutlers and Ironmongers, and at the Patentee's Wholesale Warehouse, 23, 24, 25 Fleet Street, London. (178)

FIRE BRICKS.—THE FARNHAM INDESTRUCTIBLE SILICIOUS FIRE BRICKS have been greatly REDUCED in PRICE, and will be delivered at the Nine Elms Station, London, at 90s. per 1,000. —Address, G. H. OGSTON, J. M., Paine's Silica Works, Farnham, Surrey. (35)

GLENFIELD PATENT STARCH,

USED IN THE ROYAL LAUNDRY,

AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE THE FINEST STARCH SHE EVER USED.

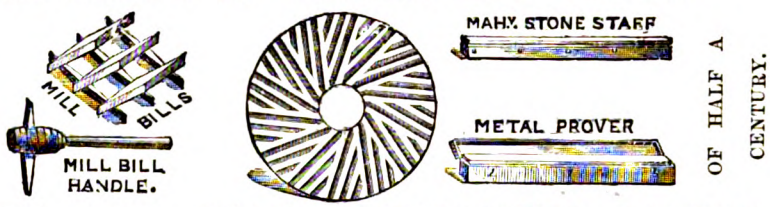
FOR FURTHER PARTICULARS APPLY TO

JOHN FOWLER, JUN., 28 CORNHILL, LONDON, E.C. (236)

IMPORTANT TO MILLERS AND OTHERS.

ESTABLISHED UPWARDS OF HALF A CENTURY.



HUGHES AND SONS, MILLSTONE MAKERS,

Great Dover-street and Swan-street, Borough, London, S.E.,

BEG to call the attention of Millers, Millwrights, Engineers, Agricultural Machinists, Cement Manufacturers, Distillers, Merchants, and others, to their extensive Stock of FRENCH BURR MILLSTONES, manufactured from a superior Brown Burr, of quality, workmanship, and finish not to be equalled by any house in England. Also to their Stock of French Burrs, of various quality and texture, selected by them in person at the best quarries in France, where their choice is unlimited. The extent of their business requiring several thousand Burr Stones annually more than any other Millstone Maker in England (as may be seen by reference to the Custom House "Shipping List"), places them in a position to execute all orders entrusted to them to satisfaction.

H. and S. are also Importers of Peak, Cologne, Granite, and Grindstones direct from the quarries; and have always on hand at their works a varied assortment of Flour Machines, Smut Machines, Bolting Machines, Separators, Kilns, &c.; Wove Wire for Screen Work; Wire Webb for Flour Cylinders; Improved Square Smut Wire, wove by machinery, with rough surface, made to cover any size cylinder in one sheet; Bolting Cloths; Best Oak-tanned Leather Millbands, well stretched and rivetted at joints; Webbing for Elevators; Elevating Buckets; Screw Jacks, Proved-iron Hoisting Chain; Iron and Brass Sheave Blocks; Iron and Slate Provers; Mahogany Staffs; Sack and Heaving Barrows; Cast Steel Mill Bills, of finest Silver Steel; Flour Machine Brushes, made of the best Russian Bristles; and all other articles used in Mills.

HUGHES and SONS employ none but the Best Workmen;

and wish to draw attention to the fact that by employing no Travellers, thereby avoiding the necessarily high expenses connected therewith, they are in a position to give their Customers all the advantages from this circumstance, as well as those arising from adequate capital, combined with practical judgment.

*** ALL GOODS DELIVERED FREE TO WHARVES OR RAILWAYS IN LONDON. (240)

ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street, Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 130 feet in length, to work by hand or Steam Power.

Hot-Water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (44)

TO BRASS FOUNDERS.

TO BE SOLD, the Patent-right of a New and Highly-approved EQUILIBRIUM WATER COCK or VALVE, suitable for Steam Boiler Feed Pipes, or any cases where the valve is required to be opened against pressure.

Address H., MECHANICS' MAGAZINE Office, 166 Fleet-st., where a Drawing may be seen. (151)

MATHEMATICAL DRAWING INSTRUMENTS, RULES, TAPES, CHAINS, LEVELS, THEODOLITES, BOX SEXTANTS, PRISMATIC and POCKET COMPASSES. Price Lists of the above articles sent post free, by JOHN ARCHBUTT, 20 Westminster Bridge Road, Lambeth, near Astley's Theatre. Every article warranted, and the prices will be found considerably lower than ever before charged for articles of similar quality. Routledge's Engineers' Slide Rules, 4s. 6d. each; Hawthorn's ditto, 5s. 6d.; Carpenters' Rules from 1s. (148)

INDIA-RUBBER VALVES FOR STEAM ENGINES, PUMP PACKING, &c. — Explanatory Drawings and Information as to the best modes of fitting and arranging the above, and all other Mechanical Applications of VULCANISED INDIA-RUBBER, are furnished post-free by

CHARLES MACINTOSH & Co., Patentees,
Cambridge-st., Manchester, and 3 Cannon-st. West, London.
MANUFACTORY and DEPÔT, Cambridge-st., Manchester.
GENERAL WAREHOUSE, 3 Cannon-street West, London, E.C.—C. M. and Co.'s only Establishments. (139)

EDWIN JEWITT, ENGRAVER ON WOOD AND DRAFTSMAN, 1 Pickett-place, Strand, near Temple-bar. Engineering, Scientific, and Mechanical Designs accurately engraved. Manufacturers and Tradesmen's Catalogues Illustrated. W.C. (84)

VULCANISED INDIA-RUBBER MACHINE BANDING is NOT AFFECTED BY WET, HEAT, OR COLD; does not stretch nor slip on the pulleys. HOSES for BREWERIES, &c., will NOT impart TASTE, SMELL, or COLOUR: also for conducting, or steam purposes. Washers, Valves, Sheets, Printing Blankets, &c., in Stock. Other Articles made to order. All Goods warranted to stand 300° Fahrenheit.

N.B.—Sole Contractors to the Lords Commissioners of the Admiralty.

DODGE and GIANDONATI (late DODGE, BACON, and Co), 44 St. Paul's Churchyard, London, E.C. (208)

PUMPING MACHINERY.

GWYNNE AND Co., Engineers, London, manufacture and supply the following Machinery, of the most approved construction and with all the latest improvements:—Portable and Fixed Steam-Engines and Boilers of every description; Waterwheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the Supply of Towns, Cities, and Districts, and for the Irrigation of Coffee, Cotton, Indigo, Sugar-cane, and Rice Estates, for pumping out Coffer-dams, Canals, Dry Docks, Reservoirs, &c. They also manufacture and supply the Pumping and other Machinery for Paper, Pulp, and Fulling Mills, Breweries, Distilleries, Tanneries, Starch Works, Bleaching, Dyeing, and Calico Printing Works, Chemical Works, Silk, Cotton, and Flax Mills, and Manufactories in general. All Letters not paid will be refused. Illustrated Price Lists forwarded on receipt of Six Postage Stamps.—GWYNNE AND Co., Hydraulic and Mechanical Engineers, Essex-wharf, Strand, London.

For Exportation.—The above can be obtained throug British Merchants, Shippers, and Colonial Agents. (24)

Published by RICHARD ARCHIBALD BROOMAN, at the MECHANICS' MAGAZINE Office, 166 Fleet-street, in the Parish of St. Dunstan's-in-the-West, in the County of Middlesex; and printed by JAMES JUDD, of 14 Holford-square, Pentonville, in the County of Middlesex, and HENRY ALEXANDER GLASS, at their Office, 38A New Bridge-street, in the Parish of St Anne's Blackfriars, in the City of London.—Friday, May 6 1859.

ROYAL POLYTECHNIC INSTITUTION.—PATRON: H. R. HIGHNESS THE PRINCE CONSORT.

Lecture by Mr. E. V. GARDNER, Professor of Chemistry, on the PHILOSOPHY of MAGIC, with Brilliant Experiments.

Splendid Series of DISSOLVING VIEWS of the HOLY LAND, after David Roberts's Sketches.

Lecture by Mr. LENNOX HORNE on the HUMOROUS MELODIES of OLD ENGLAND.

Lecture by Mr. J. L. KING: "PHILOSOPHY in SPORT MADE SCIENCE in EARNEST."—The OXY-HYDROGEN MICROSCOPE.—MODELS in MOTION, &c., &c.

Madrigals, Part-Songs, &c., by the ST. GEORGE'S CHOIR, every Wednesday Evening at Eight.

Managing Director—R. I. LONGBOTTOM, Esq. (252)

TO MANUFACTURERS, THE ENGINEERING, MECHANICAL, & BUILDING TRADES GENERALLY.

MESSRS. BOOTH & CO., AUCTIONEERS and BUILDERS' SALESMEN, having opened Registers for Public and Private Sales of all kinds of JOB LOTS, Surplus Stock, Stores, Tools, Implements, &c., &c., (either Old or New,) beg to call the attention of all parties to the only medium established of the kind, and to state that they are prepared to receive consignments of any weight, bulk, or value, and of any class of Goods for immediate Sale. Full particulars may be had for two stamps, at the BUILDING TRADES REGISTRY OFFICES, (established 1857,) 13 EASTCHEAP, LONDON, E.C. The Public Sales by Auction are held Weekly, on EVERY TUESDAY, at ONE O'CLOCK, and for the present at the BUILDERS' SALE GROUNDS, (established 1858,) 23 and 24 MARYLEBONE ROAD, REGENT'S PARK, W. Catalogues by Post for One Stamp. Advances on New Goods. All communications are held private and confidential. (204)

THE USE of a CORNISH HIGH-PRESSURE BOILER is required for a few weeks after usual working hours, to complete some experiments on the evaporation of water under varying pressures. Parties willing to treat are requested to address, stating full particulars and terms, to X. Y. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street, E.C. (248)

PATENT HEAT DIFFUSERS.

BY the USE of DUNCAN, GWYNNE, and C. WYE WILLIAMS' PATENT HEAT DIFFUSERS, the maximum of STEAM POWER is realised from the fuel used in Steam Boilers. They are exceedingly simple, can be applied in a few hours, and do not require any alteration in the existing arrangements of Boilers in use.

The Patentees are prepared to accept for Royalty a part of the value of the Fuel saved by the use of their Apparatus.

Every information may be had on application to the Manufacturers, GWYNNE and CO., Engineers, Essex-street Wharves, Strand, London. (251)

TO SHIPBUILDERS, SHIPOWNERS, CAPTAINS, &c.

THE ANCHOR COMMITTEE AFFIRM "TROTMAN'S PATENT ANCHOR" to be superior to all others, possessing Thirty-Five Per Cent. more Holding Power than either Porter's or Roger's, and equivalent in all respects to ordinary Anchors of 28 per cent. greater weight.

"This appeared to the Committee of vast importance to the Shipping Interests, &c."

(Vide their Official Report, 1853, "On the relative merits of different descriptions of Anchors," sanctioned and approved by the Admiralty.)

THE ANCHOR COMMITTEE

Nominated by the Lords Commissioners of the Admiralty "to investigate and determine the relative merits of Anchors," in compliance with a requisition from the principal Shipowners, Underwriters, &c., of the United Kingdom.

Rear-Admiral the Hon. Sir M. Stopford, K.C.B., Chairman.

Capt. Superintendent Charles Hope, R.N., Her Majesty's Dockyard, Sheerness.

Captain George Rodney Munday, R.N., Her Majesty's Ship "Nile."

Jonathan Aylen, Esq., R.N., Master Attendant, Her Majesty's Dockyard, Sheerness.

James Tonkin, Esq., Master, R.N., Her Majesty's Ship "Waterloo," 120 guns.

William Schaw Lindsay, Esq., M.P., &c., &c.

Duncan Dunbar, Esq., Chairman of General Shipowners' Society; Do. Mercantile Marine Board, London. Member of the Committee of "Lloyd's Register" of Shipping, &c.

Anthony Ridley, Esq., Vice-Chairman of Mercantile Marine Board; Member of the Committee of "Lloyd's Register" of Shipping, &c.

William Drew, Esq., Member of the Mercantile Marine Board; Member of the Committee of "Lloyd's Register" of Shipping, &c.

William Phillips, Esq., Member of the Committee of "Lloyd's Register" of Shipping; General Shipowners' Society, &c.

George Marshall, Esq., Member of the Committee of "Lloyd's Register" of Shipping; General Shipowners' Society, &c.

THE INTERNATIONAL JURY AT PARIS

Also awarded this Invention the First Class Medal, 1855.

Licensed Makers of Trotman's Improved Anchors:—

Messrs. Hawks, Crawshay, and Sons, Newcastle-on-Tyne,
" John Abbott and Co., Park Works, Gateshead, Durham,
" J. and E. Lumsden, Strand Iron Works, Sunderland,
" N. Hingley and Sons, Cradley and Netherton Iron Works,
" Proctor and Taylor, Milbank Forge, Hartlepool,
" Henry Wood and Co., Goree Piazzas, Liverpool,
" Wood Brothers, Chester, Wolverhampton, and Stourbridge,
" R. Wight and Sons, Iron Works, Sunderland and Seaham,
" Pow and Fawcus, 49 Lr. Shadwell, London, and North Shields,
" John Gilbert, Cradley Heath, Staffordshire.

DEPÔTS,

GEORGE WOOD & CO., 14 Fore-st., Limehouse, London, and at 4 Goree Piazza, Liverpool.

JOHN TROTMAN,

PATENTEE, 42 CORNHILL, LONDON. (246)

TO STEAM SHIP BUILDERS, ENGINEERS, TOOL MAKERS, IRON MASTERS, AND OTHERS.

THE ADVERTISER, who has had considerable experience in Marine Engineering and Iron Shipbuilding, and who is an expert Draughtsman, is desirous of meeting with a permanent Engagement as London Agent, Manager of a Shipbuilding Yard, or to act in any capacity in which ample knowledge of Mechanical Details and a large connexion among Engineers, Ship Owners, and others, might be rendered available. The Advertiser having also been much engaged in working out some important patented inventions, would undertake to further the objects of those having property of this kind, either to dispose of or to bring into operation. Apply by letter, to M. E., MECHANICS' MAGAZINE Office, 166 Fleet-street. (250)

MARINE ENGINE DRAUGHTSMAN.—Wanted an experienced Draughtsman accustomed to Marine Engine Work. Apply by letter, with references, to G. B. R., 6 Holland-street, Blackfriars-road, S. (247)

HART & SON, MALLEABLE IRON FOUNDERS, 4 Vine-street, York-road, Lambeth. Orders for Malleable Iron Castings executed within a week. (77)

TO COMMERCIAL TRAVELLERS.

WANTED, a Gentleman well-acquainted with Ironmongers, Upholsterers, Coopers, &c., to Travel on Commission.

Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (164

THE NATIONAL FLAX COMPANY, LIMITED.

Capital, £200,000, in Shares of £1 each.

5s. to be paid on Application; 5s. within Three Months from Allotment; and the remainder, as required, in two Payments of 5s. each.

TRUSTEE.

HENRY FENTON JADIS, Esq., Comptroller of Corn Returns Board of Trade.

PRESIDENT OF THE BOARD OF DIRECTORS.

Sir JOHN DORAT, Vice-Pres. R.S.L.

BANKERS.

Messrs. HEYWOOD, KENNARDS, & Co., 4 Lombard-st., E.C.

SECRETARY.

Mr. JOHN H. POWELL.

GENERAL MANAGER.

Mr. G. A. CATOR.

OFFICES.

193 Gresham House, Old Broad-street, London, E.C.

THE imports of Foreign Flax Fibre having declined to a most serious extent, the Cultivation of the Plant decreased at home, and war, which threatens to become general in Europe, having commenced, a great necessity has arisen for laying the foundation of a system whereby a sufficient *Home* supply of Raw Material may be secured to meet the requirements of a great staple industry of the country—known as the Flax and Linen Trade.

It has, therefore, been determined to form "THE NATIONAL FLAX COMPANY, LIMITED," whereby such a system may be initiated.

This will be effected in Establishments to be called "Rettories," and to be erected in suitable localities throughout the United Kingdom, where the Flax Crop will be purchased from the Grower, and the Fibre prepared therefrom.

Large Dividends may be calculated on with perfect safety, as will be seen by reference to the Prospectuses and explanatory Pamphlets, which, together with Forms of Applications for Shares, and all other information, may be obtained *free* at the Offices of the Company. (245)

FUEL AND STEAM ECONOMY.—Apply, to Mr. LEE STEVENS, C.E., 1 Fish-street-hill, E.C. (243)

THE ARMSTRONG GUN.

TO THE SCIENTIFIC.

THE ADVERTISER having provisionally Registered, with a view of taking out Letters Patent for some important improvements to the above newly-invented Gun, thereby making it doubly efficient by delivering twice the number of shots, in any given time, than in its present state; dispensing with the sponge now used, by causing each shot to cleanse the Gun in its passage through the bore; and also throwing shots, varying from 32 lbs. to 200 lbs., without increasing the size of the bore, or charge of powder.

Any Gentleman of Capital being disposed to join the advertiser in this undertaking, will find it an opportunity rarely to be met with.

Address, Mr. W. GOSLING, 82 Wellington-street, Thursday, May 5th, 1859. Woolwich. (239)

NORTON'S GOSSAMER CARTRIDGES, FOR MILITARY FIRE-ARMS.

These Cartridges are Manufactured by Mr. JAMES LEETCH, Gunmaker, 68 Margaret-street, Regent-street. Capt. N. has lately made an improvement in them, by pasting the thin tissue over the junction of the cartridge with the base of the shot. (237)

ENGINEERS' TOOLS FOR SALE, viz.: PLANING, SHAPING, BORING, AND DRILLING, BOLT AND NUT SCREWING AND NUT SHAPING MACHINES. Inspection invited. Prices and other particulars furnished on application to

J. TODD & Co., Kent Iron Works, Bridge-street, Greenwich, S.E. (232)

IMPROVED MACHINERY FOR AGRICULTURISTS.

RICHARD GARRETT & SONS,

LEISTON WORKS, SAXMUNDHAM, SUFFOLK,

(ESTABLISHED A.D. 1778),

EARNESTLY solicit the continued support of their numerous Friends, Agriculturists, Shippers, and others; the additions made to their Works during the present year, in the erection of new sets of Workshops, fitted with the best mechanical appliances for producing Machinery of the most improved construction, expeditiously and economically, justifies their soliciting increased support, while their leading reputation as Inventors and Manufacturers of FIRST CLASS Agricultural Machinery, is a sufficient guarantee that every Machine supplied from Leiston Works will prove to the entire satisfaction of the purchaser.

R. G. & S. are now manufacturing the following Machines and Implements, which they guarantee to be thoroughly efficient in every respect:—

PORTABLE AND FIXED STEAM ENGINES. } From 4 to 40 Horse Power, suited for every kind of work
SELF-PROPELLING AND TRACTION ENGINES. } to which Steam Power is applied.
STONE GRINDING MILLS.
MORTAR AND PUG MILLS.
MILLWRIGHTS' WORK of all kinds.
SAWING MACHINERY, from 4 to 20 Horse Power.
BRICK AND TILE MACHINES.

IMPROVED SETS OF FARM MACHINERY, for Large Occupations.
PORTABLE AND FIXED MACHINERY, for Thrashing and Dressing Corn.
THE PRIZE BOLTING AND OPEN-DRUM HORSE-POWER THRASHING MACHINES.
CORN DRESSING MACHINES, for Hand, Horse, Water, and Steam Power.
BARLEY AVELLING MACHINES.
CHAFF CUTTERS, for Hand, Horse, Water, and Steam Power.
PATENT TURNIP CUTTING AND PULPING MACHINES.

THE PRIZE CORN AND SEED DRILLS.
PRIZE CORN AND SEED DRILLS WITH MANURE APPARATUS.
PRIZE SEED AND MANURE DRILLS.
LIQUID, SEED, AND MANURE DROP DRILLS.
CHAMBER'S PATENT BROADCAST MANURE DISTRIBUTOR.
GARRETT'S PATENT HORSE HOE for all Crops.
PATENT REVOLVING HOES for Root Crops.
IMPROVED PLOUGHS AND REAPING MACHINES.
&c. &c. &c.

Of which full detailed particulars will be found in R. G. & SONS' ILLUSTRATED CATALOGUE, sent postage free to any address, in English, French, or German; and any of the above Machines will be shown in operation at R. G. & Sons' Farm, near the Works, on their receiving a few days' notice.

A Copy of R. G. & SONS' new COLONIAL LIST will be forwarded free to any of the Colonies, and Shippers will be supplied with these lists, with their names and addresses printed on, free of charge, by making application for the same.

ADDRESS—R. GARRETT & SONS, LEISTON WORKS, SAXMUNDHAM, SUFFOLK. (161)

BRICKS.

TO BE LET, with immediate possession, in consequence of the death of the proprietor, J. M. Paine, the DIPPENHALL SILICA FACTORY, erected for the purpose of making improved Fire Bricks, Building Bricks, Paving Tiles, &c., &c., from the Soluble Silica Rock.

Apply to view the Buildings and Bricks to G. H. Ogston Esq., Resident Manager, Dippenhall, Farnham, Surrey and for terms, to Messrs. Nicholls and Potter, Solicitors, Farnham. (125)

MR. WALTER HALL is prepared to Grant Licences, or to Dispose of his Patent for working Railway Breaks. Particulars to be had of Mr. HALL, who may be addressed by letter to the care of the MECHANICS' MAGAZINE, 166 Fleet-street, E.C. (217)

STEAM ENGINES.

FOR SALE, a superior HIGH PRESSURE HORIZONTAL STEAM ENGINE of 6-horse power, 8-inch cylinder, and 1-foot 6-inch stroke. One of 8-horse power, 10-inch cylinder, and 1-foot 6-inch stroke. One of 10-horse power, 12-inch cylinder, and 2-feet stroke. Two of 14-horse power, 14-inch cylinders, and 2-feet stroke; and one of 30-horse power, 20-in. cylinder, and 3-ft. stroke.

Apply to Messrs. PAGE and CAMERON, 64 Old Broad Street, E. C., London. (124)

ANDREW McLAREN and CO.,

ENGINEERS AND IRONFOUNDERS,

174 UPPER THAMES STREET.

MAKERS OF

ALL KINDS OF CAST IRON PIPES,

For Gas, Water, and Steam,

AND EVERY DESCRIPTION OF CASTINGS.

(115)

BRASS ENGINE and BOILER FITTINGS.—Water-Gauges for Glasses, ½ ¾ 1 inch diam.
26/, 30/, 35/ each.
With Guards, 32/, 37/6 „
Gauge and Pet-Cocks, from 3/6 each.
Whistles, with 1½ 2 2½ 3 4 inch bell.
12/6, 18/6, 26/, 45/, 50/ each.
Blow-off Cock for Portable Engines, 12/6 each.
Oil Cups, of all kinds, from 18/ per dozen.
Ball Clacks, Balls, Cages, and sets complete.
Forsyth's Safety Boiler Plugs, 12/6 and 18/ each.
WILLIAM WALLER, Uddingston, by Glasgow. (214)

TO ENGINEERS, ARCHITECTS, PATENT AGENTS, &c.

PHOTOGRAPHS OF THE HIGHEST CLASS and of any size, taken and reproduced at a most moderate rate of charge. Reproductions of faultless accuracy, of Machinery, Models, Drawings, &c. Orders attended to in town and country. Estimates forwarded.

SPENCER, READ, & Co., 4 Agar-street, Strand. W.C. (90)

THE GENERAL PATENT COMPANY, LIMITED.—Capital, £50,000, in 5,000 Shares of £10 each. Calls not to exceed £2 10s. per Share for the first Year, and no subsequent call to be made without two months' notice. Deposit, 5s. per Share.

PATRONS.

WM. FAIRBAIRN, Esq., C.E., F.R.S., F.G.S., &c., &c., The Polygon, Manchester.

TEMPORARY OFFICES.

12 Pancras-lane, Cheapside, E.C., London.

The Company has been formed for the purpose of assisting Inventors, and its contemplated operations comprise—

The taking out of Patents and Registrations for Inventors, and when required, advancing the money for this purpose.
The advancing sums of Money on approved security to Inventors and Patentees, for the purpose of enabling them to develope and complete their Patents and Inventions.
The Purchase and Sale of Inventions and Patents.
The Selling of Patents and Inventions on Commission.
The investigation of the value and merits of Inventions, and the granting of Certificates thereof.
The devotion of a portion of the Company's Premises for the purpose of receiving Models and Drawings of Inventions and Patents.
The keeping a Registry of all Patents taken out by the Company, and the furnishing a Monthly List thereof to all Subscribers.

All information may be obtained at the Office, and the Deposit may be remitted to the Bankers or to the Secretary (223)

WATER POISONED BY LEADEN PIPES.

"The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dick, of Bonchurch, Isle of Wight. The water has cut these deep pits almost through the pipe, and not only upon the portion which we have illustrated, but has formed similar chasms throughout the entire length."—*Expositor.*

Poisoned Water Preventable.

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious, or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha. Nothing can be better. I have also recommended it to others, who have adopted the expedient.

Resistance for Frost.

The Gutta Percha Company have been favoured with the following Letters in reference to the non-conducting properties of Gutta Percha Tubing, in the resistance of Frost.

From J. ARMSTRONG, Esq., M.D., Gravesend.

"My private house, which was supplied with your Gutta Percha Tubing some five or six years ago, has never required the slightest attention; and previously, there was no winter passed that we were not deluged in consequence of the bursting of the leaden pipes."

From HENRY BROWN and SONS, Western Works, 108 Rockingham-street, Sheffield.

"We have now a positive proof of the frost-resisting properties of the Gutta Percha Piping. On our premises we have a leaden Pipe and a Gutta Percha one lying side by side. The leaden one has been completely frozen up at least ten days, and the Gutta Percha one is still unaffected.

Every Variety for Gutta Percha Articles

SUCH AS

Mill-bands,
Tubing for Watering Gardens, &c., &c.,
Soles,

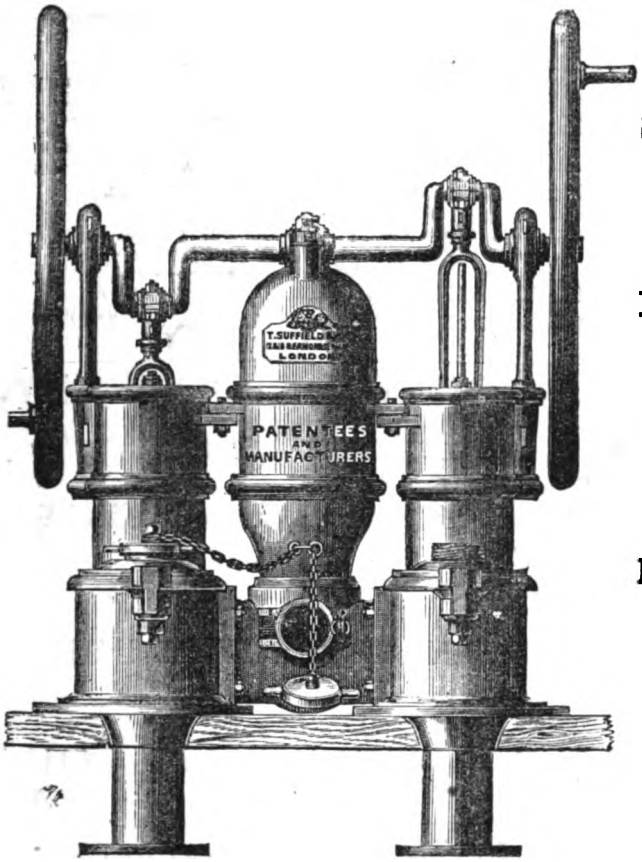
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS. SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

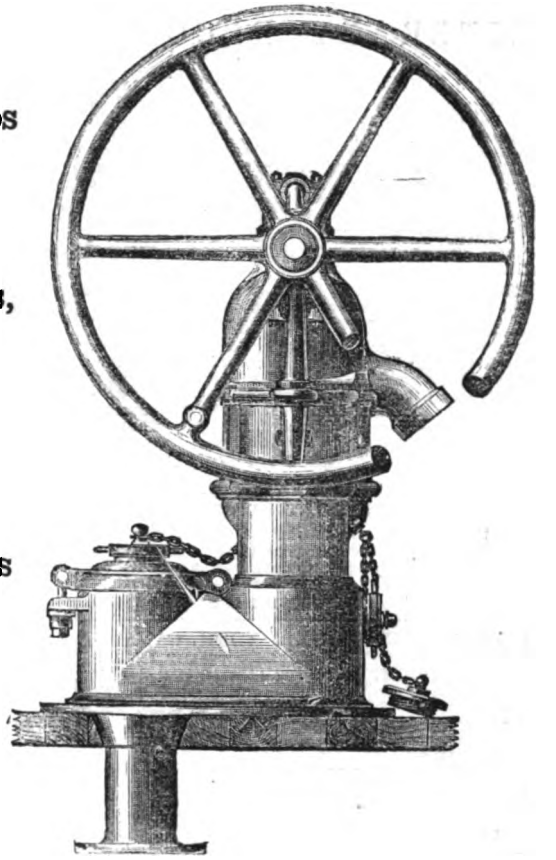
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangement either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps; the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board; the rapidity with which they can be converted into Fire Pumps, or be applied to the Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Works or Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require such Stores, together with a further saving in the cost of such Articles.

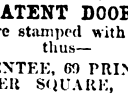
For Swing Doors, are stamped with Name and Address, thus—

SMITH, PATENTEE, 69 PRINCES STREET, LEICESTER SQUARE, LONDON,

and that Springs thus marked are warranted.

SMITH'S PATENT WEATHER-TIGHT CASEMENT FASTENING AND SILL-BARS

are admitted by all to be the most perfect invention for the purpose. Diagrams and List of Prices on application. (195)



GAS EXPLOSIONS PREVENTED.

USE THE TUBES AND FITTINGS MADE BY JOHN RUSSELL and Co. (Established at the commencement of gas-lighting), whose goods are all well tested, and warranted.

J. R. and Co. supplied Thomas Cubitt, Esq., for all his houses in Belgravia, the Queen's Palace, &c., which locality is proverbially free from gas.

J. R. and Co. are the Inventors of the Lap-Welded Tube for Steam Boilers, and have recently obtained a Patent for an improvement in them.

J. R. and Co. are the holders of the First Prize Medals for Gas-Tubes and Fittings and Boiler Tubes.

TO STEAM SHIP OWNERS, ENGINEERS, AND OTHERS.

How's Patent Steam Engine Counters, can be read at sight.

These Counters register the number of revolutions made by an engine or other mechanism. They may be used for ascertaining the duty of Pumping Engines and Water-wheels; the revolutions on board a steam-vessel; to calculate the slip of the propeller; and in a locomotive to test the slip of the wheels.

How's Patent Salinometer, for Steam Boilers using Salt Water.

By these, the density of the water in the Boiler is at all times accurately shown, and a saving of boiler and fuel is effected. They are adopted by the Admiralty, the Honorable Trinity Corporation, and others. Copies of Testimonials from Messrs. Penn, Messrs. Maudslay, and others, will be forwarded on application.

How's Engine-Room Telegraph, for communicating between Captain and Engineer. Society of Arts Prize Medal, 1855.

is a Mechanical Telegraph, and by its peculiar construction, error or misunderstanding is rendered impossible. It now extensively adopted, and gives great satisfaction.

How's Patent Fresh Water Apparatus for Ships' Use.

This apparatus is designed for the distillation of Fresh from Salt Water; and on long voyages, and where the supply of water is scanty, it will be found invaluable. Testimonials may be seen.

Patent Steam Pump and Fire-Engine for Ships' Use.

This Steam-pump occupies but a small space; works perfectly noiselessly, and throws an immense volume of water. An Illustrated Circular of Fresh Water Apparatus and Steam-pump combined, free on application.

How's Patent Machine for Cutting Bolts, Rods, Spindles, Wire, &c.

Simple in construction, inexpensive, occupies but little space, and will not easily get out of order.

A Pamphlet Illustrative of the above, sent free by post, on application to

A. P. HOW, ENGINEER,
81 MARK LANE, LONDON.

SCOTT'S
PATENT GRASS SEED SEPARATOR,
which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from
PERENNIAL AND ITALIAN RYE-GRASS, &c.,
AND
SCOTT'S PATENT CARROT SEED BEARDING
AND
CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,
which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

REMARKS.—Iron: a rather better feeling prevails in reference to this article. Scotch Pigs have advanced fully a shilling per ton. In Copper, the smelters have reduced the price ¼d. per lb. in Sheating, and £5 per ton in Cake and Tile. Lead, of soft quality, has been in good demand, and the price is 10s. per ton higher. In Spelter a considerable business has been done at advanced rates.

LAWRIE AND HAGGER, Metal Brokers.
33 Lombard-street, E.C.

IRON AND OTHER METALS.

[FROM OUR OWN CORRESPONDENT.]

The Iron Trade Generally—Glasgow Market—South Staffordshire Trade: Downward Tendency of Prices; On 'Change at Birmingham and Wolverhampton—Birmingham and Wolverhampton General Trades—Sheffield Trade; Orders Countermanded—Manufacturing Districts of Yorkshire and Lancashire—Fall in Copper—Expected Fall in Tin—Tin plates.

THE iron interests of Great Britain are not in a position this week which is an improvement of that of the weekly period preceding our last report. The tendency of prices is downward, and only few orders are coming in to supply those that are being worked out.

At Glasgow on Tuesday No. 1 was quoted at from 49s. 6d. to 49s. 9d.; Mixed Nos. warrants, 49s. 6d. to 49s. 9d.; Makers' iron, 49s. 6d. to 49s. 9d.; No. 3, 49s. 6d. to 49s. 9d. Market steady. Shipped this week, 13,132 tons; corresponding week last year, 12,159 tons.

At Birmingham on Thursday (yesterday), as at Wolverhampton on Wednesday, business was stagnant—malleable iron makers reported the receipt of no orders of note as the result of the week's correspondence from either home or foreign customers; the last American mail brought scarcely anything except information that tolerably large consignments were going out, upon sale, and that very low rates were being accepted by some houses here; these facts, with the circumstances that by this time there has crossed the Atlantic the intelligence of the effect which the Italian war has had upon the commercial classes of this country, lead to the expectation that the Americans will hold back as much as possible for some time, expecting a general fall in prices. In this view home customers are operating, so much so as in some instances to attempt to get their orders countermanded. Except, however, in cases where the war has occasioned a *bond fide* claim to such a consideration, masters refuse to cancel orders—low prices are no doubt already being taken for malleable iron.—A transaction in bars of a very fair quality was booked at Wolverhampton at £7 per ton.—Makers of first-class samples are by no means imperative in their demand of what are known as the "trade rates;" still the difference is not nearly so much as in the instance quoted, in which case the reduction upon those rates is 20s.—Pigs continue unsaleable. The few transactions of the week have been for exceedingly small quantities, and at prices which are regarded as a barometer to the necessities of the makers, which are varied.

The trade of Birmingham is gradually becoming worse. All the departments of the export trade are depressed, and orders are few for America and the East Indies. A general impression exists that the new scale of duties will militate very seriously against trade generally. Accounts are very bad with regard to commercial transactions with South America. There is the least possible doing; and the Exchange is so bad that remittances are sure to be small until an improvement takes place. The principal factors report that in Wolverhampton orders have very much fallen off during the last fortnight.

From Sheffield it is reported that the continental firms there are in receipt of numerous countermands from their correspondents abroad, and no doubt many more may be expected. In some instances the orders thus stopped have been considerable; but no one can question the propriety of these precautionary measures.

From the manufacturing districts of Yorkshire and Lancashire the reports are to the effect that much stagnation prevails, and that buyers of all descriptions of goods will operate only to statiofy immediate requirements.

Copper fell a halfpenny per lb. on Tuesday, making tough cake or ingot £107 10s., and best selected £110 10s. per ton wholesale.

Tin must follow. Tin-plates are receding.

LIST OF MISCELLANEOUS TENDERS INVITED, AND ENGAGEMENTS OPEN.

The tenders and vacancies which appear in this weekly list are not repeated in succeeding numbers.

STEAM ENGINE, *Shrewsbury.*—Forty-horse high-pressure, expansion, and condensing, with boilers, &c., complete; also, a quantity of cast-iron pipes. Particulars, Mr. T. Tisdale, Talbot-chambers, Shrewsbury. Separate tenders for engine and pipes. May 30, to the chairman.

RAILWAY WORK, *Blyth and Tyne.*—For altering and improving the levels of the line from Prospect-hill to Holywell, two miles. Plans, &c., Mr. J. F. Tone, engineer, Market-street, Newcastle-on-Tyne.

GAS PIPES, *Teignmouth.*—1780 yards of eight-inch cast-iron gas pipes, with branches, syphons, &c. Specifications, Mr. T. Braddear, surveyor, Teignmouth. May 17.

RAILWAY MACHINERY, *Victorian Railway.*—Twelve 17-ft. turn-tables; one 10-ton foundry crane; six 3-ton travelling cranes; twenty-four 3-throw switches. Specifications, 4 Abchurch-street-lane, London; and further information from I. K. Brunel, Esq., 18 Duke-street, Westminster. Tenders, May 16, to Messrs. de Pass and Sons, London.

GASHOLDER AND TANK, *Scotland.*—For the Galashiels Gas Company. The tank, 51 ft. diam. and 16 deep; also, a gasholder to work in the same, with counterpoise, 50 ft. diam. and 16 ft. deep; crown, No. 14; sides, No. 15, wire gauge, with 8-inch inlet and outlet pipes, hydraulic valves, six brackets, guide rods, guide wheels, and all necessary matters; to be fitted up by the end of Sept. this year, at the Company's Works, Galashiels. Tenders, May 19; separate tenders, to Wm. Kemp, manager.

STATION BUILDINGS, *Lancashire and Yorkshire, and East Lancashire Railways.*—On the Blackburn line at the Oaks, Bromley Cross, Chapel Town, Entwisle, and Chatburn. Plans, &c., Mr. Izat, Bolton-station. Tenders, to Mr. Mills Fenton, sec. to joint committee, Bury. May 24.

COPPER, *East India Company.*—200 tons in cakes or slabs for coinage. Conditions, at the Secretariat office, where tenders, May 17.

COPPER, *Navy.*—60 tons in ingots; 60 tons of 1¼ cwt; and 80 tons of tough cake. Conditions and form of tender, at Somerset-place, where tenders, May 17.

ROUND CANNEL, *Preston Gas Company.*—For one, three, or five years. Fresh got small cannel; Arley mine coal or Orrel coal. Tenders, May 14, at the Company's offices, Preston.

CHURCH, *Sawbridgeworth, Herts.*—Restoring, &c. Tenders, May 20, Mr. G. E. Pritchett, Bishopsgate-street-without.

SEWERS, *Hackney and Stoke Newington.*—7,260 feet of brick and pipe sewers. Plans, Mr. Lovegrove, Townhall, Hackney. Tenders there, May 18.

LIGNUM VITÆ, *Navy.*—80 tons of St. Domingo, 4½ to 18½ inches diameter, and 5 tons of white Bahama, 3½ to 4 inches diameter. Forms of tender at Somerset-place, where tenders, 2 o'clock, May 17.

SEWERAGE, *Preston.*—Time extended to May 18, tenders for the construction of 700 yards of brick sewers, 4 feet 6 inches diameter, and other works; and 225 yards of brick sewers, 4 feet 6 inches by 3 feet; also the laying and jointing of 850 yards of 18-inch pipe sewers, and other works. Local Board, Mr. Robert Ascroft, Town Clerk.

PAVING, *Nottingham.* — Paving and setting about 1,800 yards of Derbyshire stone curb for the Nottingham Benefit Building Society's estate at Radford. Specifications on May 22, with Mr. S. Collinson, sec. No date given.

CHAPEL, *East Dereham, Norfolk.*—Plans with Rev. L. Whilley, Baptist minister, East Dereham. Tenders, May 18.

RESIDENCES, *Felstead, Essex.*—For head and second master of the grammar school. Names to be sent, May 16, to Messr. Beadel and Co., Chelmsford, of whom particulars and quantities.

NEW ROOF, *Market Hall, Worcester.* — Plans, Messrs. Dean and Son, Forgate-street, Worcester. May 21.

OFFICES, *London.*—At Spring Gardens for the Metropolitan Board of Works. Drawings between twelve and one at 1 Greek-street, Soho-square. Tenders, June 2.

THE SAME, *Oakham.*— With lodge and other buildings. Plans, Mr. Thomas Barlow, Oakham; quantities, Messrs. Bellamy and Hardy, architects, Lincoln.—Tenders, five o'clock, May 23. Another contract for laying out the ground, forming the roads, &c. Plans and quantities, with tenders as with the buildings.

SURVEYOR, *Newton Heath Local Board, Manchester.*—Salary, £60. Applications, May 19, Mr. A. L. Hardman, law clerk to the borough, for the chairman.

INSPECTOR OF NUISANCES, *the same borough as preceding.*—Whole time, Salary, £52.

MINERS.—Fifteen to twenty for the Barnsley thick seam, Leading banks, 5s. 3d. to 5s. 6d. per 10 corves of 10 cwt. each, and 5s. in following-up banks. Messrs. R. Craik and Co., East Gawber Hall Colliery, Barnsley.

MANAGER, *Aberdeen Steam Navigation Company.*—Salary, £250 and house. Applications, stating experience, to Chairman, Offices, Waterloo Quay, Aberdeen, May 31.

AGENT AND MANAGER, *Sutherland Steam Packet Company.*—At the port of Littleferry. D. Gray, Esq., Golspie; or Mr. Christhall, Burghead. Date and salary not mentioned.

GASWORKS MANAGER, *Southport.*—Salary, £100, with house, coals, and gas. Application to the Chairman of Committee, Improvement Commissioners, Town Hall, Southport, May 26.

FOREMAN OF ENGINEERS AND MILLWRIGHTS.—For an establishment in Lancashire; must be capable of making working drawings. State salary and reference, "W.," 142, *Manchester Guardian* office.

ENGINEERING BUSINESS FOR SALE.

OWING to the continued ill health of the Proprietor, the first-class business of an Engineer and Crane and Block Maker is offered for sale. It has been established in the Metropolis for nearly 30 years, and has enjoyed extensive patronage amongst Brewers, Manufacturers, Warehousemen, and others, in and about London; the business done amounting to nearly £8,000 per annum. About £3,200 would be required, (part of which, however, may remain for any reasonable time on good security,) which is the bare value of the tools, patterns, and stock in trade. The premises, including good dwelling-house, very conveniently situated, and capable of accommodating from 60 to 70 hands, are held upon a long lease, at an extraordinary low rental, not exceeding £100 per annum, taxes included. Many of the tools are nearly new, and of the best construction. The present proprietor, who relinquishes the business solely on account of ill health, would give every assistance in his power to those succeeding him; and as his foreman, who has been with him for nearly ten years, is thoroughly acquainted with the practical parts of the business, any gentleman desirous of commencing as a manufacturing engineer would find the present a very favourable opportunity. As all accounts have been, for many years past, collected quarterly, a very small amount, say £800, would suffice as working capital. Full particulars may be obtained by application to E. E. ALLEN, Esq., MECHANICS' MAGAZINE Office, 166 Fleet Street, E.C. (130)

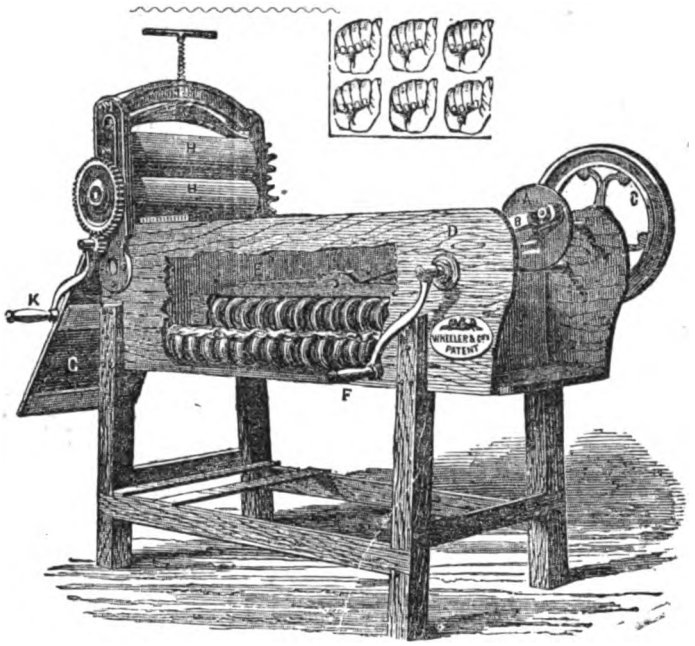
T. WHEELER AND CO.'S
"OXONIAN KNUCKLE WASHING MACHINE."



THE Improvements in these New Inventions are the non-exposure of the user's hands to the dangerous parts of the Machine, and the rapidity with which the work is done. These Machines have neither bands or wheels passing on the outside, wherein lies the liability to accident. The rubbers are the truest representation of the knuckles or hand washing yet brought out; the compensating floating rubbers work at right angles, backward and forward, in the same manner as does the hands. These Machines can be supplied with rubbers that represent a person's hand in the action of rubbing; the knuckles, finger nails, and palm of the hand being truly modelled. They are capable of Washing Clothes of every description whatsoever, the largest bedding to the most delicate piece of muslin can be washed without breaking a single thread; in fact, such is the delicacy of the action of these Machines, that the paper you are now reading can be passed between the rubbers without sustaining any injury, at the same time being thoroughly effective in cleansing. The Patentees confidently recommend these Machines to the notice of Laundresses, Heads of Families, Hotels, Emigrants, &c. So simple is the action of this Machine, that a boy or girl of 10 or 12 years of age can work it; the only skill required is to soak the clothes one hour before placing them in the Machine, placing a portion of the clothes at the handle end of the Machine; laying on the rubbers a part of them; turn the handle, and the clothes will pass through between the rubbers to the opposite end, effecting a saving of at least 50 per cent.

Prices: Washing Machines, £1 6s., £2 6s., £3 6s., £4 10s., £5 15s.; Washing, Wringing, and Mangling, £8 £10 15s., £14 14s.—Full Instructions sent with every Machine. Testimonials or References sent on application.

MANUFACTORY, ALBION WORKS PARK END STREET, OXFORD (114)

CONDY'S PATENT FLUID, or NATURAL DISINFECTANT,

Not only Deoderizes but Disinfects perfectly, and DESTROYS FOR EVER the cause of Infection.

Is not poisonous, as it may be used to purify water. Evolves no noxious or unpleasant gas. Cannot be mistaken for any other fluid, thereby preventing death and disease; and is therefore the best, safest, cheapest, and most pleasant disinfectant ever introduced.

This fluid has been examined and reported upon by the Board of Health, all the most eminent Men and Chemists of the day, in all cases in the most satisfactory manner possible.

The Public are recommended to use this Fluid, properly diluted with water, frequently and habitually in larders, sculleries, dairies, musty cakes, sick rooms, close places, &c., as it has numerous advantages, and can be used with certain immediate success and perfect safety.

Sold in Quart Bottles, 4s.; Pints, 2s.; Half-pints, 1s.; and in bulk, 10s. per Gallon.

Free to Railway on receipt of Order or Stamps. (238)

FOR SALE.

A 12-HORSE HORIZONTAL STEAM ENGINE and a 4-HORSE DIRECT ACTING STEAM ENGINE, with Fly-wheel Governors, &c., complete. Address, W. F. Plummer, 12 Albany-road, Camberwell. (188)

PATENT WEDGE and GROOVED SURFACE FRICTIONAL GEARING.—The PATENT FRICTIONAL GEARING COMPANY, Proprietors of ROBERTSON'S WEDGE SURFACE FRICTIONAL GEARING PATENTS, grant Licences to Users of Machinery, for the unlimited use of the System in their Works, on very moderate terms, enabling them to make or order from any Mechanician the Machinery they require.

The Company possess Five Patents relating to this Frictional System, including (in addition to their Bevel and Mitre Wheels) a System of Disc Clutches and Clutch Movements, Wheel Clutching, Reversing, Differential, Speed Ring, Varying Speed, and Break Movements, and of Shafting, Pillow Blocks, Shafting Hangers, &c.

Frictional Wheels thus formed are applicable to the heaviest as well as the lightest kind of work, and, in addition to their being extensively in use for ordinary gearing purposes, have been in use for a considerable time applied to Mills for Rolling Iron, the Screw-Propeller, Incline-Winding Engines, Saw Mills, Pumping Engines, Flax Scutchers, Fan Blowers, Calico-Printing Machinery, Steam Winches, Cranes, Hoists, &c.

This system gives great facilities for simplifying Machines, and for mechanical combination, and has the advantage of being noiseless and cleanly, there being no oil or grease used on the wheels. Wheel Catalogues and Circulars, giving particulars, sent free by Post; also, a list of manufacturing Agents, and information regarding those who, from locality or experience, are best able to execute orders for the description of work required.

Office, 20 Buchanan-street, Glasgow. (146)

C. F. QUINTIN'S

PATENT BREAD MACHINE.

The Journeyman Baker's and Servant's Friend. It lightens their labour and makes our daily Food clean and pure.

Highly commended at the Royal Agricultural Show, Chester, 1858, the Royal Agricultural Show, Dublin, 13th and 14th April, 1859, and the Society of Arts, Adelphi, London.

C. F. QUINTIN'S Machines are constructed in various sizes, from Half-a-Peck to Ten Bushels.

Prices from 30s. to £20.

A SACK OF FLOUR MADE INTO DOUGH IN SIX MINUTES.

Manufactory—

1 ST. JAMES'S SQUARE, CHELTENHAM.

Numerous Testimonials can be seen. (249)

WILLIAM WARNE & CO.,

Manufacturers of all descriptions of

VULCANIZED INDIA-RUBBER,

SHEETS, WASHERS,

HOSE-PIPES, TUBINGS, ETC.;

Sole Manufacturers of

WARNE'S PATENT INDIA-RUBBER TUBULAR MATS,

For Doorways, Stairs, Baths, Carriages, Ships, &c., which never clog, require no beating, and, unlike all other Mats, are readily cleansed by water. Indestructible by damp, these Mats are especially suitable for uncovered Passages, and out of door purposes. Seat Mats, Housemaids' Mats, and Brushes for wooden and stone floors.

Sole Manufacturers of

WARNE'S PATENT MINERALISED IMPROVED KAMPTULICON,

Possessing advantages over all the ordinary makes, in exceeding toughness, and flexibility, and consequent durability, while neither heat nor cold has effect upon it. Widths, 3s. 4d., 4s. 4d., 6s. 4d., and 7s. 6d. Substances, ⅛, ¼, and thicker if required. Length, 20 to 25 yards.

Patentees of the Red Mineralised India Rubber—the only Rubber not affected by Oil.

Warehouse, 9 Gresham-street West, E.C. Mills, Tottenham, N. (244)

A VALUABLE PATENT to be DISPOSED OF.—The Patentee will either dispose of the Patent or grant Licences to any party wishing to manufacture, or would join a person with capital to carry out the Patent.

TO BRASS-FOUNDERS, ENGINEERS, &c.

THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings; they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty per cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, muffles, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire-standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. (43

GLENFIELD PATENT STARCH,

USED IN THE ROYAL LAUNDRY,

AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE THE FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR

GLENFIELD PATENT STARCH,

SEE THAT YOU GET IT,

as inferior kinds are often substituted.

Sold by all Chandlers, Grocers, &c., &c. (75)

FIRE BRICKS.—THE FARNHAM INDESTRUCTIBLE SILICIOUS FIRE BRICKS have been greatly REDUCED in PRICE, and will be delivered at the Nine Elms Station, London, at 90s. per 1,000.—Address, G. H. OGSTON, J. M., Paine's Silica Works, Farnham, Surrey. (35)

WHEEL-TIRES (Noiseless).

[N.B.—A Large Stock of the above always on hand, and any modification made to order.

Please address all communications to the Manufactory,

JAMES LYNE HANCOCK, VULCANIZED INDIA-RUBBER WORKS
Goswell Road, London, E.C. (85)

STEAM CULTIVATION.

CHANDLER AND OLIVER

HAVE much pleasure in being able to state that they are now prepared to execute orders for their PATENT STEAM WINDING ENGINES AND PLOUGHS, for Cultivating Land by Steam.

The WINDING TACKLE can be fitted to Engines of any maker, and the Plough can be made to take any kind of apparatus necessary for Cultivating the Soil, such as Scarrifier Tines or Broad Shares, &c. Any Engine now used by Farmers can be fitted with the Tackle. It is light and simple, and an ordinary Farm Labourer can work it.

The Engine can be used for Thrashing without taking the Ploughing Tackle off, not requiring more than three or four horses to take it from place to place.

These Engines are very useful for Pile Driving or Drawing Ballast up inclined planes; at the same time they can be used for Pumping. Farmers will find them most useful for all purposes.

Messrs. CHANDLER and OLIVER are prepared to receive orders for separate Windlasses, which are light and simple, and generally useful.

For further Information apply to

ROBERT CHANDLER, ENGINEER, BOW, NEAR LONDON,

Or Mr. OLIVER, Farmer, Hatfield, Herts.

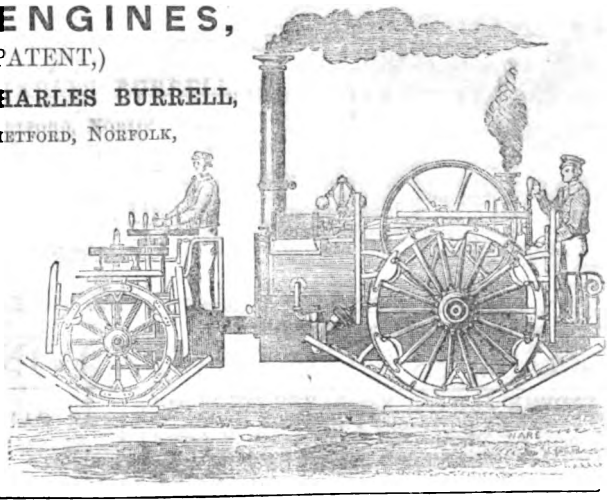
ILLUSTRATED CATALOGUES, WITH PRICES, WILL BE READY SHORTLY. (215)

TRACTION ENGINES,

(BOYDELL'S PATENT,)

MANUFACTURED BY CHARLES BURRELL,

ST. NICHOLAS WORKS, THETFORD, NORFOLK,



And ordered for India, Australia, and South America, may now be seen, complete and in course of construction at the above works. BOYDELL'S TRACTION ENGINES AND ENDLESS RAILWAY will draw heavier loads over good roads than any other traction engine, and on soft and bad roads will draw heavy loads where no other traction engine can move itself. All objection to the wear and tear of these Engines is entirely removed by the use of Charles Burrell's improved patent Wrought Iron Wheels, fitted with Rails and Tyre, as well as all the wearing parts, of Steel.

☞ *Apply also to Mr. Hemming, Mark Lane, E.C.*

PUMPING MACHINERY.

GWYNNE AND Co., Engineers, London, manufacture and supply the following Machinery, of the most approved construction and with all the latest improvements:—Portable and Fixed Steam-Engines and Boilers of every description; Waterwheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the Supply of Towns, Cities, and Districts, and for the Irrigation of Coffee, Cotton, Indigo, Sugar-cane, and Rice Estates, for pumping out Coffer-dams, Canals, Dry Docks, Reservoirs, &c. They also manufacture and supply the Pumping and other Machinery for Paper, Pulp, and Fulling Mills, Breweries, Distilleries, Tanneries, Starch Works, Bleaching, Dyeing, and Calico Printing Works, Chemical Works, Silk, Cotton, and Flax Mills, and Manufactories in general. All Letters not paid will be refused. Illustrated Price Lists forwarded on receipt of Six Postage Stamps. —GWYNNE AND Co., Hydraulic and Mechanical Engineers, Essex-wharf, Strand, London.

For Exportation.—The above can be obtained throug British Merchants, Shippers, and Colonial Agents. (24)

TO BRASS FOUNDERS.

TO BE SOLD, the Patent-right of a New and Highly-approved EQUILIBRIUM WATER COCK or VALVE, suitable for Steam Boiler Feed Pipes, or any cases where the valve is required to be opened against pressure.

Address H., MECHANICS' MAGAZINE Office, 166 Fleet-st., where a Drawing may be seen. (151)

ENGINEERS' TOOLS.

FOR SALE, a Self-acting Slide LATHE, 11-inch Centres, and Bed 12 feet long, complete; and TWO PORTABLE PUNCHING and CUTTING MACHINES, one suitable for ½-inch plates, and the other for ⅜-inch plates, both adapted for steam or hand power.

Apply to Messrs. PAGE & CAMERON, 64 Old Broad Street, E.C. (117)

ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street, Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 130 feet in length, to work by hand or Steam Power.

Hot-Water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (44)

BY ROYAL LETTERS PATENT.

CAPT. KYNASTON'S "LIFE HOOKS," by means of which boats may be disengaged with perfect safety from the usual tackles of a ship, whether she be moving rapidly ahead, going astern, or stationary. Approved and already adopted by many of the ships of the British and Dutch Navies, &c. This plan is so simple that the Hooks, with the trifling gear attached, may be applied to any boat in half an hour, or transferred from one to the other without difficulty, their use involving no addition to the ordinary fittings. Apply in London at Cunningham's "Patent Topsail" Office, 12 London-st., E.C.; or to the Patentee, through Messrs. Hallett & Co., 14 Great George-street, Westminster. (262)

MALLET'S PATENT BUCKLED PLATES.—MR. ROBERT MALLET, C.E., Inventor and Patentee of these Plates (now being laid for the Floor of the New Bridge, Westminster, and applicable to Bridge, Wharf, and Fire-proof flooring, and to a variety of other important purposes) gives notice that he has withdrawn from this date all Licences whatsoever to manufacture or vend his Patent Plates, and taken the management of the Patent exclusively into his own hands. Applications for the Plates to be made to the Patentee, who has arranged for their prompt supply, at his offices, 11 Bridge-street, Westminster, S.W., and 97 Capel-street, Dublin.
18th May, 1859. (264)

NO ADJUSTMENT REQUIRED.—You have only to place one of

LUND'S

LONDON RACK CORK SCREWS

on the neck of a bottle, and it is ready for use. Some of these Cork Screws are fitted with Patent Spring Ends to embrace the neck of the bottle, and so direct the worm through the centre of the cork.
Sold by the Patentee at 56 and 57 Cornhill, and 23 and 24 Fleet-street, London; and may be had at all Cutlers' and Ironmongers'. (251)

THORLEY'S FOOD FOR CATTLE.—Every person having an interest in domestic or farm animals should obtain a supply of this celebrated and economical food, which will prove invaluable during the approaching season. For keeping horses in good condition, it is unequalled. Pigs fatten with surprising rapidity upon it, and their flesh increases in flavour and value. Cowkeepers will find great advantage in the increased quantity and improved quality of the milk during its use. All animals are benefited by it. A pamphlet on this interesting subject, accompanied by Testimonials from the principal Nobility, Gentry, and Agriculturists, forwarded on application. In Casks containing 448 Feeds (Measures enclosed), Price 50s., carriage paid to any Railway Station in the United Kingdom. Post Office Orders payable to JOSEPH THORLEY, 77 Newgate Street, London.
N.B.—The public are cautioned against being imposed upon by worthless imitations. (132)

HART & SON, MALLEABLE IRON-FOUNDERS, 4 Vine-street, York-road, Lambeth. Orders for Malleable Iron Castings executed within a week. (77)

TO MANUFACTURERS, THE ENGINEERING, MECHANICAL, & BUILDING TRADES GENERALLY.

MESSRS. BOOTH & CO., AUCTIONEERS and BUILDERS' SALESMEN, having opened Registers for Public and Private Sales of all kinds of JOB LOTS, Surplus Stock, Stores, Tools, Implements, &c., &c., (either Old or New,) beg to call the attention of all parties to the only medium established of the kind, and to state that they are prepared to receive consignments of any weight, bulk, or value, and of any class of Goods for immediate Sale. Full particulars may be had for two stamps, at the BUILDING TRADES REGISTRY OFFICES, (established 1857,) 13 EASTCHEAP, LONDON, E.C. The Public Sales by Auction are held Weekly, on EVERY TUESDAY, at ONE O'CLOCK, and for the present at the BUILDERS' SALE GROUNDS, (established 1858,) 23 and 24 MARYLEBONE ROAD, REGENT'S PARK, W. Catalogues by Post for One Stamp. Advances on New Goods. All communications are held private and confidential. (204)

INDIA RUBBER TUBING, for Watering Gardens, Greenhouses, &c., all sizes. Also Brass Spreaders and Union Joints, for connecting the Hose to Cisterns. Illustrated price lists post free.
JAMES LYNE HANCOCK,
Vulcanised India Rubber Works, Goswell-mews, and 8 Goswell-road, London, E.C. (255)

TO ENGINEERS, CONTRACTORS, EXPORTERS, AND OTHERS.

MESSRS. PAGE AND CAMERON will Sell by Auction on the premises, No. 27 Wharf-road, City-road (immediately opposite the Gutta Percha Works), on Tuesday, June 7th, at 12 for 1 o'clock, SEVEN NEW HIGH PRESSURE HORIZONTAL STEAM ENGINES; comprising two of 10-horse power, three of 14-horse power, one of 24-horse power, and one of 30-horse power; two Portable Engines of 5-horse power each; two very superior Slide and Screw Cutting Lathes, 7 in. centres and 7 ft. and 10 ft. beds; three useful Punching and Shearing Machines, for ⅜, ½, and ¾ inch plates; a Hand or Steam power Tea Packing Machine, by BURTON and SONS, London; Iron Hurdles and Fencing; Patent Cart Arms, &c., &c.
May be viewed two days prior to the Sale, and Catalogues had on the Premises, and of Messrs. PAGE and CAMERON, Land Agents and Surveyors, 64 Old Broad-street, London and St. Albans. (259)

IMPORTANT TO COUNTRY MANUFACTURERS.

TO ENGINEERS, SHIP-BUILDERS, AND CHANDLERS, IRON FOUNDERS, TOOL MAKERS, AGRICULTURAL IMPLEMENT MAKERS, AND OTHERS.
A Practical Engineer and Member of the Institutions of Civil and Mechanical Engineers being in treaty for large and very commanding premises in Fenchurch-street (in direct line between the Docks and Mark-lane and the City), for the Exhibition and Sale of some Patented Articles of his own Invention, is desirous of undertaking the London Agency of one or two Firms of established reputation, and of whose manufactures samples, models, or drawings could be exhibited. The Advertiser having a large connection amongst Ship Owners, Engineers, and Scientific Agriculturalists, and attending the principal Agricultural Shows, possesses many facilities for forwarding the interests of those for whom he may act. To those desirous of having the use of a good London Office and of exhibiting their Manufactures in one of the best thoroughfares in Town; and, moreover, of being represented by a thoroughly practical Mechanic, the present is a very favourable opportunity. The terms proposed are a Commission on all business done in addition to a moderate rental, in proportion to the space occupied by the articles exhibited. Address, with full particulars, to C. M. E., 1 Parkside, Knightsbridge. (263)

TO STEAM SHIP BUILDERS, ENGINEERS, TOOL MAKERS, IRON MASTERS, AND OTHERS.

THE ADVERTISER, who has had considerable experience in Marine Engineering and Iron Shipbuilding, and who is an expert Draughtsman, is desirous of meeting with a permanent Engagement as London Agent, Manager of a Shipbuilding Yard, or to act in any capacity in which ample knowledge of Mechanical Details and a large connexion among Engineers, Ship Owners, and others, might be rendered available. The Advertiser having also been much engaged in working out some important patented inventions, would undertake to further the objects of those having property of this kind, either to dispose of or to bring into operation. Apply by letter, to M. E., MECHANICS' MAGAZINE Office, 166 Fleet-street. (250)

WANTED, in a large Engineering and Shipbuilding Establishment, an Assistant Draughtsman. All applications must state Salary expected, and be accompanied by a Drawing of a Pair of Marine Engines, and a practical Rigging Draught. Address, L. M. N., Belfast Post Office. (253)

PATENT HEAT DIFFUSERS.

BY the USE of DUNCAN, GWYNNE, and C. WYE WILLIAMS' PATENT HEAT DIFFUSERS, the maximum of STEAM POWER is realised from the fuel used in Steam Boilers. They are exceedingly simple, can be applied in a few hours, and do not require any alteration in the existing arrangements of Boilers in use.
The Patentees are prepared to accept for Royalty a part of the value of the Fuel saved by the use of their Apparatus.
Every information may be had on application to the Manufacturers, GWYNNE and CO., Engineers, Essex-street Wharves, Strand, London. (251)

THE USE of a CORNISH HIGH-PRESSURE BOILER is required for a few weeks after usual working hours, to complete some experiments on the evaporation of water under varying pressures. Parties willing to treat are requested to address, stating full particulars and terms, to X. Y. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street, E.C. (248)

ENGINEERS' TOOLS FOR SALE, viz.: PLANING, SHAPING, BORING, AND DRILLING, BOLT AND NUT SCREWING AND NUT SHAPING MACHINES. Inspection invited. Prices and other particulars furnished on application to
J. TODD & Co., Kent Iron Works, Bridge-street, Greenwich, S.E. (232)

FUEL AND STEAM ECONOMY.—Apply to Mr. LEE STEVENS, C.E., 1 Fish-street-hill, E.C. (243)

NORTON'S GOSSAMER CARTRIDGES, FOR MILITARY FIRE-ARMS.
These Cartridges are Manufactured by Mr. JAMES LEETCH, Gunmaker, 68 Margaret-street, Regent-street. Capt. N. has lately made an improvement in them, by pasting the thin tissue over the junction of the cartridge with the base of the shot. (237)

THE NATIONAL FLAX COMPANY, LIMITED.
Capital, £200,000, in Shares of £1 each.
5s. to be paid on Application; 5s. within Three Months from Allotment; and the remainder, as required, in two Payments of 5s. each.

GENERAL MANAGER.
Mr. G. A. CATOR.

OFFICES.
193 Gresham House, Old Broad-street, London, E.C.

THE imports of Foreign Flax Fibre having declined to a most serious extent, the Cultivation of the Plant decreased at home, and war, which threatens to become general in Europe, having commenced, a great necessity has arisen for laying the foundation of a system whereby a sufficient *Home* supply of Raw Material may be secured to meet the requirements of a great staple industry of the country—known as the Flax and Linen Trade.
It has, therefore, been determined to form "THE NATIONAL FLAX COMPANY, LIMITED," whereby such a system may be initiated.
This will be effected in Establishments to be called "Rettories," and to be erected in suitable localities throughout the United Kingdom, where the Flax Crop will be purchased from the Grower, and the Fibre prepared therefrom.
Large Dividends may be calculated on with perfect safety, as will be seen by reference to the Prospectuses and explanatory Pamphlets, which, together with Forms of Applications for Shares, and all other information, may be obtained *free* at the Offices of the Company. (245)

AGRICULTURAL AND GENERAL ENGINEERS,

And Manufacturers of Portable and Fixed Steam Engines.

Combined Threshing Machines, which dress the corn ready for market at one operation. Grinding Mills, Saw Benches, Pumps for Irrigation and Mining purposes, with all necessary gearing for being driven by steam power. Full particulars and estimates given on application to the above address.

C. S. and Co.'s PORTABLE STEAM ENGINES are adapted for every purpose to which steam-power can be applied. When intended for winding, they are fitted with reversible link motion and winding gear. They are easy of removal, as may be seen by the engraving, and can be set to work immediately on arrival.

C. S. and Co. are now doing an extensive foreign and colonial business, and are prepared to send off engines and machinery of the before-mentioned kinds in a few days from the date of order. They would also call attention to the important *reduction in prices* made for the new year.

For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (23)

CAUTION.

TO ARCHITECTS AND BUILDERS.—In consequence of numerous complaints, the Patentee begs to inform the above, that all genuine SMITH'S PATENT DOOR SPRINGS, for Swing Doors, are stamped with Name and Address, thus—SMITH, Patentee, 69 Princes-street, Leicester-square, London; and that Springs thus marked are warranted. SMITH'S PATENT WEATHER-TIGHT CASEMENT FASTENING AND SILL-BARS are admitted by all to be the most perfect invention for the purpose. Diagrams and List of Prices on application. (143)

WATER GAUGES—WATER GAUGES.—Sir,—We find your German Gauge Tube superior to any other, and strongly recommend it. We were compelled to abandon the use of our water gauge until applying your glass tube.

WILCOX and Co., Millwall Pottery Company.

These Tubes are superior to all others; being a clear white, no mistake can arise in working. Guaranteed to stand a pressure of 500 lb.

Extensively used on all the principal lines.

To be had only of E. MOORE, 55 Upper Marylebone-street, W.; and 72 Great Titchfield-street, W.

*** Price List of Gauge Fittings, &c., on application. (98)

MR. WALTER HALL is prepared to Grant Licences, or to Dispose of his Patent for working Railway Breaks. Particulars to be had of MR. HALL, who may be addressed by letter to the care of the MECHANICS' MAGAZINE, 166 Fleet-street, E.C. (217)

STEAM ENGINES.

FOR SALE, a superior HIGH PRESSURE HORIZONTAL STEAM ENGINE of 6-horse power, 8-inch cylinder, and 1-foot 6-inch stroke. One of 8-horse power, 10-inch cylinder, and 1-foot 6-inch stroke. One of 10-horse power, 12-inch cylinder, and 2-feet stroke. Two of 14-horse power, 14-inch cylinders, and 2-feet stroke; and one of 30-horse power, 20-in. cylinder, and 3-ft. stroke.

Apply to Messrs. PAGE and CAMERON, 64 Old Broad Street, E. C., London. (124)

CONDY'S PATENT FLUID, or NATURAL DISINFECTANT,

Not only Deoderizes but Disinfects perfectly, and DESTROYS FOR EVER the cause of infection.

Is not poisonous, as it may be used to purify water. Evolves no noxious or unpleasant gas. Cannot be mistaken for any other fluid, thereby preventing death and disease; and is therefore the best, safest, cheapest, and most pleasant disinfectant ever introduced.

This fluid has been examined and reported upon by the Board of Health, all the most eminent Men and Chemists of the day, in all cases in the most satisfactory manner possible.

The Public are recommended to use this Fluid, properly diluted with water, frequently and habitually in larders, sculleries, dairies, musty cakes, sick rooms, close places, &c., as it has numerous advantages, and can be used with certain immediate success and perfect safety.

Sold in Quart Bottles, 4s.; Pints, 2s.; Half-pints, 1s.; and in bulk; 10s. per Gallon.

Free to Railway on receipt of Order or Stamps. (238)

BRASS ENGINE and BOILER FITTINGS.—

Water-Gauges for Glasses, ½ ¾ 1 inch diam.
26/, 30/, 35/ each.
With Guards, 32/, 37/6 „

Gauge and Pet-Cocks, from 3/6 each.

Whistles, with 1½ 2 2½ 3 4 inch bell.
12/6, 18/6, 26/, 45/, 50/ each,

Blow-off Cock for Portable Engines, 12/6 each.

Oil Cups, of all kinds, from 18/ per dozen.

Ball Clacks, Balls, Cages, and sets complete.

Forsyth's Safety Boiler Plugs, 12/6 and 18/ each.

WILLIAM WALLER, Uddingston, by Glasgow. (214)

TO SHIPBUILDERS, SHIPOWNERS, CAPTAINS, &c.

THE ANCHOR COMMITTEE AFFIRM "TROTMAN'S PATENT ANCHOR" to be superior to all others, possessing Thirty-Five Per Cent. more Holding Power than either Porter's or Roger's, and equivalent in all respects to ordinary Anchors of 28 per cent. greater weight.

"This appeared to the Committee of vast importance to the Shipping Interests, &c."

(Vide their Official Report, 1853, "On the relative merits of different descriptions of Anchors," sanctioned and approved by the Admiralty.)

THE ANCHOR COMMITTEE

Nominated by the Lords Commissioners of the Admiralty "to investigate and determine the relative merits of Anchors," in compliance with a requisition from the principal Shipowners, Underwriters, &c., of the United Kingdom.

Rear-Admiral the Hon. Sir M. Stopford, K.C.B., Chairman.

Capt. Superintendent Charles Hope, R.N., Her Majesty's Dockyard, Sheerness.

Captain George Rodney Munday, R.N., Her Majesty's Ship "Nile."

Jonathan Aylen, Esq., R.N., Master Attendant, Her Majesty's Dockyard, Sheerness.

James Tonkin, Esq., Master, R.N., Her Majesty's Ship "Waterloo," 120 guns.

William Schaw Lindsay, Esq., M.P., &c., &c.

Duncan Dunbar, Esq., Chairman of General Shipowners' Society; Do. Mercantile Marine Board, London. Member of the Committee of "Lloyd's Register" of Shipping, &c.

Anthony Ridley, Esq., Vice-Chairman of Mercantile Marine Board; Member of the Committee of "Lloyd's Register" of Shipping, &c.

RANSOME'S PATENT STONE FILTERS—of every description for Domestic purposes, for Manufactories, Public Companies, Shipping, &c.

For Particulars, Specimens, Illustrations, and Agencies, apply to Mr. Frederick Ransome, Whitehall Wharf, Cannon-row, Westminster; or Patent Stone Works, Ipswich. A Liberal Discount allowed to the Trade or to Shippers. (174)

IMPORTANT TO MANUFACTURERS, MILL OWNERS, &c.

GUTTA PERCHA MILL BANDS.

THE GUTTA PERCHA COMPANY beg to state that the increasing demand for the Gutta Percha Strapping for Driving-bands, Lathe-straps, &c., fully justifies the strong recommendations they have everywhere received.

Their durability and strength—permanent contractability and uniformity of substance—their non-susceptibility of injury from contact with oils, grease, acids, alkalies, or water—and the facility with which the only joint required can be made in bands of from 200 to 300 feet long—render them superior to leather for almost all working purposes, and decidedly more economical.

TESTIMONIALS.

IMPORTANT ANNUAL SAVING.

From TRUMAN, HANBURY, BUXTON, & Co., Brewery, London.

"In reply to your inquiry, we have much pleasure in bearing our testimony to the advantages, both as regards economy and saving of time, effected by the use of your Patent Gutta Percha Bands in lieu of Leather Straps. The stoppage of one portion of our works through the failing of the leather strap used to be of daily occurrence—but with this annoyance we are now never troubled. We have had these straps in operation for nearly three years, and are assured by our Engineer that *they effect a saving to us of at least* THIRTY POUNDS *a year*."

From JAMES ABERNETHY & Co., Fury Hill Foundry Aberdeen.

"We have now had Gutta Percha Bands working here *for three years*. One of them has been driving the fan blast for our smith's shop for all that time, and for anything we see, may drive it as long again. The speed of the fan is but 1,200 per minute. We have used them with complete satisfaction, driving circular saws, and in some cases where leather bands would have been quite inapplicable from damp. We have uniformly endeavoured to have the drums and pulleys so proportioned to the strain, as that there is no chance of the band slipping; and with this precaution, and taking care in using *cross bands that they do not rub*, we are quite satisfied that they are superior in every respect to leather—stronger at the same weight, and keeping quite straight in working—requiring no lacings, and very seldom any repairs."

WATER POISONED BY LEADEN PIPES.

The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dick, of Bonchurch, Isle of Wight.

POISONED WATER PREVENTABLE

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha Tubing. Nothing can be better. I have also recommended it to others, who have adopted the expedient."

A variety of Gutta Percha Articles, such as Mill Bands, Tubing, Sheet, Soles, Pump Buckets, Bosses, Union Joints, Bottles, Bowls, Flasks, Curtain and Cornice Rings, Solid Frames, Galvanic Batteries, &c., &c.

THE LONDON

WARMING AND VENTILATING COMPANY,

(LIMITED,)

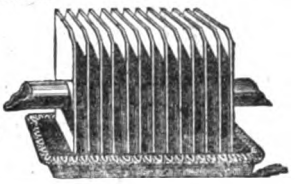
26 GREAT GEORGE STREET, Westminster, S.W.

(MANAGER—Mr. WOODCOCK.)

Churches, Greenhouses, Offices, and Buildings of every description warmed by means of a modification of the plan successfully used during the last five years by Mr. Goldsworthy Gurney in both Houses of Parliament.

Steam, Hot-water, Gas, and in open or enclosed fireplaces, Coal and Coke are equally available for the process.

The cost is less and the effect greater than that of any other known means.



The Horticulturist will find herein an instrument of new and important powers.

The apparatus may be seen in ST. PAUL'S CATHEDRAL, the various offices of the "Department of Science and Art," and in many churches and other buildings.

Particulars and Testimonials forwarded on application.

(12)

VENTILATION WITHOUT FLUES.

KUKLA'S PATENT STOVES,

At 18s., 25s., and 50s.

KUKLA'S newly-invented Deflagrator—the first and only perfect GAS STOVE. Guaranteed to burn without flue—without dust, smell, or smoke, producing a great and pure heat with the least expenditure of Gas.—*Vide Society of Arts' Journal.*

Patronised by the English and French Government.

Scientific in Principle,
Simple in Construction,
Healthy and efficient in use.

The Deflagrator Stove is cheap, portable, and suited for every situation; and from the principle on which it is constructed (viz., expanding to a sixfold volume the gas used) is capable of warming any given space more quickly and more thoroughly than any other means: while its addition forms a sure remedy for any ill-warmed or ill-ventilated apartments.

The 25s. Deflagrator warms a room of 2,000 cubic feet at a cost of 3d. per day.

The 50s. Deflagrator warms 5 to 6,000 cubic feet at a cost of 6d. per day (twelve hours).

Also, the Greenhouse Stove at 18s.

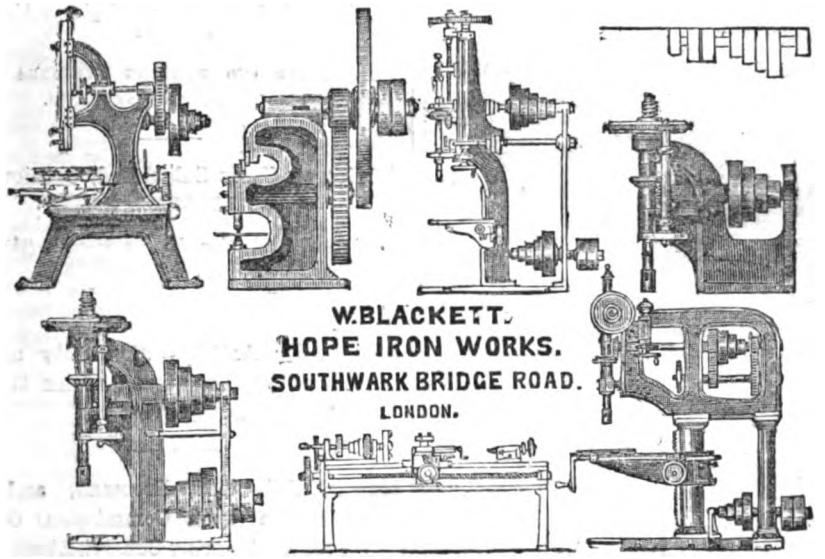
Patentee and sole Manufacturer, F. X. KUKLA, 194 Pentonville-road, London.

Country orders promptly attended to. Carriage free to any Railway in London.

Post-office Orders should be made payable to FRANCIS XAVIER KUKLA, General Office.

N.B.—Every Stove separately tested before sent out.

The NEW GAS COOKING STOVE for 10 persons, price £3. (103



W. BLACKETT has in Stock a variety of Vertical and Horizontal Steam Engines, Boilers, and Engineers' Tools, ready for delivery on the shortest notice. Apply as above. (70)

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.

Families, by using this delicious VINEGAR, insure purity and effect a saving of 50 per cent. See "Report of Dr. Letheby, City Officer of Health, Dr. Hassall, of the 'Lancet' Commission, and others." Sold by the Trade, in Bottles, labelled and capsuled. Wholesale—63 King William-street, London-bridge, E.C. Six Quart Samples sent free to any Railway for 3s. 6d. (216)

A NEW DISCOVERY IN WASHING HOUSEHOLD LINEN.

NO FAMILY SHOULD BE WITHOUT HANCOCK'S UNIVERSAL WASHING MACHINE. It effectually cleanses the Crevices of Baby-linen, Collars, Wristbands, &c., without the possibility of injuring the Linen or Collars. Received 500 Testimonials.

PRICES.

No. 2 Washes 9 Shirts in from 3 to 10 minutes; or 4 Sheets in 5 minutes	£5 5 0
No. 3 Washes 12 Shirts in from 3 to 10 minutes; or 6 Sheets in 5 minutes	7 11 0
No. 4 Washes 18 Shirts in from 3 to 10 minutes; or 12 Sheets in 5 minutes	12 12 0

And all other Articles in proportion.

J. L. HANCOCK, Sole Manufacturer and Patentee, 62 Pentonville-road, London. (37)

A VALUABLE PATENT to be DISPOSED OF.—The Patentee will either dispose of the Patent or grant Licences to any party wishing to manufacture, or would join a person with capital to carry out the Patent.

Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (163)

TO BRASS-FOUNDERS, ENGINEERS, &c.

THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings; they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty per cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, muffles, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire-standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. (43

ENGINEERS' TOOLS.

FOR SALE, a Self-acting Slide LATHE, 11-inch Centres, and Bed 12 feet long, complete; and TWO PORTABLE PUNCHING and CUTTING MACHINES, one suitable for ½-inch plates, and the other for ⅝-inch plates, both adapted for steam or hand power.

Apply to Messrs. PAGE & CAMERON, 64 Old Broad Street, E.C. (117)

ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street, Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 130 feet in length, to work by hand or Steam Power.

Hot-Water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (44)

EDWIN JEWITT, ENGRAVER ON WOOD AND DRAFTSMAN, 1 Pickett-place, Strand, near Temple-bar. Engineering, Scientific, and Mechanical Designs accurately engraved. Manufacturers and Tradesmen's Catalogues Illustrated. W.C. (84)

PUMPING MACHINERY.

GWYNNE AND Co., Engineers, London, manufacture and supply the following Machinery, of the most approved construction and with all the latest improvements:—Portable and Fixed Steam-Engines and Boilers of every description; Waterwheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the Supply of Towns, Cities, and Districts, and for the Irrigation of Coffee, Cotton, Indigo, Sugar-cane, and Rice Estates, for pumping out Coffer-dams, Canals, Dry Docks, Reservoirs, &c. They also manufacture and supply the Pumping and other Machinery for Paper, Pulp, and Fulling Mills, Breweries, Distilleries, Tanneries, Starch Works, Bleaching, Dyeing, and Calico Printing Works, Chemical Works, Silk, Cotton, and Flax Mills, and Manufactories in general. All Letters not paid will be refused. Illustrated Price Lists forwarded on receipt of Six Postage Stamps.—GWYNNE AND Co., Hydraulic and Mechanical Engineers, Essex-wharf, Strand, London.

For Exportation.—The above can be obtained throug British Merchants, Shippers, and Colonial Agents. (24)

TO BRASS FOUNDERS.

TO BE SOLD, the Patent-right of a New and Highly-approved EQUILIBRIUM WATER COCK or VALVE, suitable for Steam Boiler Feed Pipes, or any cases where the valve is required to be opened against pressure.

Address H., MECHANICS' MAGAZINE Office, 166 Fleet-st., where a Drawing may be seen. (151)

BY HER MAJESTY'S ROYAL LETTERS PATENT.

PATENT SPHERICAL SELF-ADJUSTING BEARINGS, which do not heat in work. The advantages possessed by these Bearings are:—

1st. They are Self-adjusting; and, consequently, can be put down by the most ordinary Mechanic.
2nd. They are not liable to heat, even at high speeds.
3rd. They remain constantly parellel to the Spindle; and, therefore, wear equally all across the Bearing.
4th. They require only a very small quantity of oil.

Engravings and Prices forwarded on application to the Patentees.

WALLIS & HASLAM,
Engineers and Iron Founders, North Hants Iron Works, Basingstoke. (121)

IRON AND OTHER METALS.

[FROM OUR OWN CORRESPONDENT.]

The Iron Trade—In South Staffordshire—In Lancashire—South Wales—At Glasgow—Receding Prices—Movement for Advance of Wages—South Staffordshire Trade—Suspension of Messrs. Cresswell and Sons: Meeting of Creditors—The Birmingham Trades—Sheffield Trade.

The iron trade of the country is not in a worse condition this week than it was last. South Staffordshire is no worse. In Lancashire there is a pretty good enquiry for really good iron, the prices of which do not give way. Pig iron in that district is also lower. In some portions of the South Wales there is a tolerable amount of animation. At Glasgow on Monday No. 1 went at from 48s. 6d. to 48s. 9d.; Mixed Nos. warrants, 48s. 3d. to 48s. 6d.; Makers' iron, 48s. 6d.; No. 3, 48s. 6d. Market flat. Shipped this week, 3,043 tons; last week, 8,244; total, 11,217; corresponding week last year, 11,535 tons.

In most directions prices are really downwards, for both malleable and pig iron.

A new movement has taken place in the labour market. On Wednesday a notice was posted at the several South Staffordshire iron works, demanding in the name of the puddlers of that district an advance of 1s. per ton after a certain date. It proceeds, however, from only a section of the men, and is ridiculous, because there is no probability of the advance being given.

The suspension of Messrs. Cresswell and Sons, iron-masters, Tipton, South Staffordshire, has tended to still further depress the iron trade of that district. At Birmingham on Thursday, as at Wolverhampton on Wednesday, it was evident that there was increased caution, with not a few gloomy forebodings as to this failure standing in the position of the first of others to follow. Scarcely anything has therefore been done. At the same time the malleable iron works of repute continue tolerably well employed. The smaller works also keep on, but only by accepting very low rates.—Pig iron continues almost unsaleable, except at prices so greatly in favour of buyers, that not to purchase would be extremely impolitic. Moneyed firms are deriving considerable advantage from the extremities of some of the producers of pigs. Some small quantities changed hands to-day and yesterday at £3 12s. 6d. for No. 1 best melting, and the same for a good quality of pig for malleable iron.

A meeting of the creditors of Messrs. Cresswell was held at the Queen's Hotel, Birmingham, on Wednesday, when the liabilities were shown to be about £130,000.—The Dudley and West Bromwich bank have £50,000 and £11,000 unsecured. The general creditors accepted an offer of 5s. in the pound—to be paid half in twelve months, and the other half in two years; the principal partner was present, and considerable sympathy was expressed with him by the mass of the creditors.

As in the case of the South Staffordshire iron trade, Birmingham has been otherwise than cheered by a suspension in that town since our last. On Monday the suspension of payment by Messrs. Charles Vilatti and Co.—a firm doing business with South America—was announced. The firm has been brought to a stand by the suspension of Alfred Willers and Co., of Hamburg. A meeting of creditors was to have been held yesterday (Thursday). With this exception matters are looking scarcely so bad this week as last. The shopkeepers report that their returns have very materially fallen off during the last month. The disposition among manufacturers not to make for stock will react upon the labour market until matters become more settled. The orders from Scotland and from Yorkshire and Lancashire, are few. In the foreign trade there is no improvement whatever to report. The disposition to observe the utmost caution in all the movements of trade is spreading, rather than otherwise.

As regards the trade of Sheffield, nothing whatever of importance has come under our notice during the past week, which would indicate any alteration in the state of trade since our last report. Things are still very flat in most of the staple branches.

LIST OF MISCELLANEOUS TENDERS INVITED, AND ENGAGEMENTS OPEN.

The tenders and vacancies which appear in this weekly list are not repeated in succeeding numbers.

RAILWAY, *Stockport, Disley, and Whaley Bridge Railway.*—For the construction of the railway from Whaley Bridge to Buxton, 8¼ miles. Plans, specifications, and forms, Messrs. Locke and Errington, Engineers, 13 Duke-street, Westminster, on and after Monday next. Tenders, June 8, to the secretary, 2 Leadenhall-street, London.

GASWORKS, *Salford.*—For the apparatus, iron roofs, and other castings, for the completion of new gasworks, Regents-road, Salford. Particulars H. Brothers, Engineer; tenders, the chairman of the Gas Committee, May 31.

For the brick and stone-work in the same buildings. Tenders, May 24.

TWO AMMONIA WASHERS, *Stockport.*—With 10 feet diam., with 16 inch pipes, and valves required to connect the same, to be erected at Eaton Norris Works of the borough of Stockport. Tenders, May 25, at the gas offices, Millgate, Stockport, where plans, &c.

SCAVENGERING, *Rochdale.*—Sweeping, cleansing, and water the streets, removal of tenement rubbish, &c. (two contracts.) Particulars, the Inspectors of Nuisances. Tenders, noon, May 28, to the Town Clerk.

CHURCH, *Sturminster Marshall, Dorsetshire.*—Enlarging, repairing, and restoring. Plans, &c., Mr. J. C. Chislett, Wimborne, Dorsetshire. Tenders, Rev. W. Heathcott, Sturminster Marshall, May 24.

OLD RAILS FOR SALE.—The Vale of Neath want offers for 104 tons of Barlow's patent, and 40 tons of the bridge pattern, now lying at the Neath station. John Lovain, secretary, Neath.

GAS LAMP PILLARS AND LAMPS, *Wallasey Local Board of Health.*—One hundred pillars and lamps. Drawings, &c., the offices of the Board, 1 Church-street, Egremont, near Birkenhead. Tenders there before four, May 27.

PIPELAYING, *Merthyr Tydfil.*—For the laying down of fifty miles of cast iron socket pipes and other castings. Printed specifications and forms (a guinea each) of Mr. J. W. Russell, Clerk to the Local Board; or of Mr. Hawksley, 30 Great George-street, Westminster. Tenders to the first-named, June 1.

RESERVOIR, *Halifax.*—Water-works Committee of the Corporation. Drawings, &c., Mr. G. W. Stevenson, borough engineer. Tenders, Town Clerk, May 30.

CHURCH, *Lumley.*—Plans, &c., Mr. M. Thompson, architect, 5 Eldon-square, Newcastle-on-Tyne. Tenders, Rev. John Dodd, Chester-le-street, June 1.

CHURCH, PRESBYTERY, AND SCHOOL, *Liverpool.*—At Much Woolton. Plans, &c., the Priory, Much Woolton, or at the office of Mr. R. W. Hughes, 6 Winckley-street, Preston, from May 23. No date given.

CATHOLIC CHURCH AND PRESBYTERY, *Ripon.*—Plans, &c., Messrs. J. A. Hansom and Son, architects, Devonshire Villa, Clifton, Bristol, who also will say where the plans may be seen at Ripon. No date given.

CHURCH, *Lawbridgeworth, Herts.*—Plans until the 20th inst., at Mr. G. E. Pritchard, 12 Bishopsgate-street Without, and Bishop Stortford, Herts. No date given.

CHAPEL, *Whitley, near Knottingley.*—Chapel of Ease. Plans, Miss Broadhead, Christian Knowledge Society's Depository, Pontefract. Tenders, May 28.

CHAPEL, *New Basford.*—Enlargement of Baptist Chapel, and construction of new School Rooms. Particulars, Mr. John S. Norris, architect, Market-street, Nottingham. No date given.

CHAPEL, *Pullheli.*—Baptist. Whole works, or any separate portion. Drawings till May 21, with Mr. G. Jones, Bryhyfyd, Pullheli, Merchant. Tenders May 28.

SCHOOL, *Haslington, near Crewe, Cheshire.*—New Schools and Master's Residence. Drawings in the Vestry Room of the Church, and further information, Mr. James R. Colling, 6 Ridgemont-place, Hampstead. Tenders, May 25.

SCHOOL-ROOM AND MISTRESSES' HOUSE, *Leer Green, near Beaconfield.*—Specifications at the Parsonage there, and at 102 Guildford-street, Russell-square. Tenders to Rev. Henry Herbert, Leer Green, May 28.

SCHOOLS, *Burlescombe, Devon.*—National School. Plans, the Vicarage, and Mr. John Back's, Welland. Tenders, May 23.

SCHOOLS, *Fraserburgh, Scotland.*—Masons', carpenters', plumbers', plasterers', and slaters' work of schools and teachers' dwelling-houses. One contract, if desired. Plans, Messrs. A. and W. Reid and Mackenzie, architects, 29 Union-street, Aberdeen; or with Mr. Farquhar Smith, Fraserburgh. Tenders, May 23.

TOBACCO PIPE FACTORY, *London.*—In Wharf-road, City-road Basin, for J. M. Morrice, Esq. Plans, &c., Mr. A. B. Frend, 44 Bedford Row.

HOUSES, *Wandsworth Common.*—Finishing five small houses. Drawings, &c., with Mr. W. P. Padmore, 16 Great Marlborough-street, where tenders before noon, May 25.

HOUSE, *Aldmeldrum, Scotland.*—For the masons', carpenters', slaters', and plasterers' works of a dwelling-house to be erected on a fen adjoining Glen Garioch Distillery, Aldmeldrum. Plans, &c., at the Distillery. Tenders, May 28.

HOUSE, *Weston Point, near Runcorn.*—New house for the Harbour Master. Plans, Mr. E. L. Williams, jun., engineer's office, Northwich. Tenders, June 1.

ROAD MATERIAL AND GENERAL SCAVENGERING, *St. Giles's District.*—Particulars, 199 Holborn. Tenders, 10 p.m., May 24.

DUSTING AND SCAVENGERING, *St. Saviour's District.*—For three years. Particulars and form, Board Room, Emerson-street, Bankside, Southwark. Tenders, 5·30 p.m., May 25.

PLANS WANTED.—For School premises at Taunton. Cost not to exceed £4,000. First premium £75, or five per cent; second, £25. Conditions, &c., Rev. G. S. Underwood, Secretary to Independent College, Taunton, Somerset. Plans, June 20.——New Banking House, Swansea. £25 for the approved design. Particulars, the Manager of the Glamorganshire Banking House, Swansea, June 15.——Chapel of Ease, Whipton, near Exeter; to accommodate 200; and to have nave, chancel, and hill turret. Estimates not to exceed £900, with internal fittings. Mr. Rew, Whipton Barton, will show the ground. Plans, &c., to the Vicar of Havitree, May 31.——Police Station, Cardiff. Particulars, Town Clerk. Designs, May 28.——For a Baptist Chapel, Stoke's Croft, Bristol. Instructions, Rev. E. Probort, 4 Clevedon-terrace, Kingsdown. Designs to Messrs. Ashmead and Son, 19 Small-street, Bristol, June 30.

OLD RAILS FOR SALE, *London, Brighton, and South Coast Railway.*—2,000 tons. Forms of tender, Mr. W. Walker, store keeper, Brighton terminus. Tenders to the Secretary, May 26.

GAS WORKS MANAGER.—Quantity of gas, twelve millions per annum. Salary, £100, with house, coals, and gas. Applications to the chairman of the Gas Committee of the Improvement Commissioners, Town Hall, Southport, May 26.

ENGINEERS' FOREMAN.—For a London shop. S. Scadding's Library, Belgrave-road, Pimlico, S.W.

MARINE ENGINE DRAUGHTSMAN.—G. B. R., 6 Holland street, Blackfriars Road, S.

ENGINEER'S MANAGING CLERK.—Z., care of Mr. G. Buchanan, 8 Adam-street, Adelphi.

A STOKER.—To attend on a circular saw. Counting-house, 8a Worship-street, Finsbury

DRAUGHTSMAN.—Accustomed to Gothic work. A permanency. London, M. C., Mr. Scripps's newspaper and advertising office, South Molton-street, W.

FOREMAN OF GAS-FITTERS AND FOREMAN OF SMITHS.—Mr. Ellson, Messrs. Hart and Sons, 56 Wynch-street, Strand.

FOREMAN OF ANGLE-IRON SMITHS.—J. P., 163 Strand, W.C.

ENGINEERING BUSINESS FOR SALE.

OWING to the continued ill health of the Proprietor, the first-class business of an Engineer and Crane and Block Maker is offered for sale. It has been established in the Metropolis for nearly 30 years, and has enjoyed extensive patronage amongst Brewers, Manufacturers, Warehousemen, and others, in and about London; the business done amounting to nearly £8,000 per annum. About £3,200 would be required, (part of which, however, may remain for any reasonable time on good security,) which is the bare value of the tools, patterns, and stock in trade. The premises, including good dwelling-house, very conveniently situated, and capable of accommodating from 60 to 70 hands, are held upon a long lease, at an extraordinary low rental, not exceeding £100 per annum, taxes included. Many of the tools are nearly new, and of the best construction. The present proprietor, who relinquishes the business solely on account of ill health, would give every assistance in his power to those succeeding him; and as his foreman, who has been with him for nearly ten years, is thoroughly acquainted with the practical parts of the business, any gentleman desirous of commencing as a manufacturing engineer would find the present a very favourable opportunity. As all accounts have been, for many years past, collected quarterly, a very small amount, say £800, would suffice as working capital. Full particulars may be obtained by application to E. E. ALLEN, Esq., MECHANICS' MAGAZINE Office, 166 Fleet Street, E.C. (130)

INDIA-RUBBER VALVES FOR STEAM ENGINES, PUMP PACKING, &c.—Explanatory Drawings and Information as to the best modes of fitting and arranging the above, and all other Mechanical Applications of VULCANISED INDIA-RUBBER, are furnished post-free by

CHARLES MACINTOSH & Co., Patentees,
Cambridge-st., Manchester, and 3 Cannon-st. West, London.
MANUFACTORY and DEPÔT, Cambridge-st., Manchester.
GENERAL WAREHOUSE, 3 Cannon-street West, London, E.C.—C. M. and Co.'s only Establishments. (139)

MATHEMATICAL DRAWING INSTRUMENTS, RULES, TAPES, CHAINS, LEVELS, THEODOLITES, BOX SEXTANTS, PRISMATIC and POCKET COMPASSES. Price Lists of the above articles sent post free, by JOHN ARCHBUTT, 20 Westminster Bridge Road, Lambeth, near Astley's Theatre. Every article warranted, and the prices will be found considerably lower than ever before charged for articles of similar quality. Routledge's Engineers' Slide Rules, 4s. 6d. each; Hawthorn's ditto, 5s. 6d.; Carpenters' Rules from 1s. (148)

VULCANISED INDIA-RUBBER MACHINE BANDING is NOT AFFECTED BY WET, HEAT, OR COLD; does not stretch nor slip on the pulleys. HOSES for BREWERIES, &c., will NOT impart TASTE, SMELL, or COLOUR: also for conducting, or steam purposes. Washers, Valves, Sheets, Printing Blankets, &c., in Stock. Other Articles made to order. All Goods warranted to stand 300° Fahrenheit.

N.B.—Sole Contractors to the Lords Commissioners of the Admiralty.

DODGE and GIANDONATI (late DODGE, BACON, and Co), 44 St. Paul's Churchyard, London, E.C.

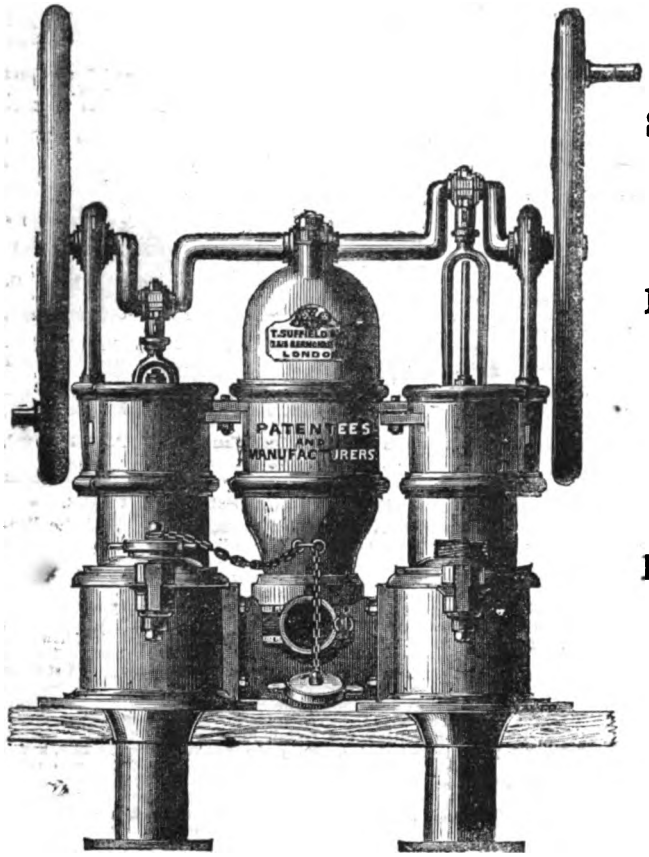
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS, SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

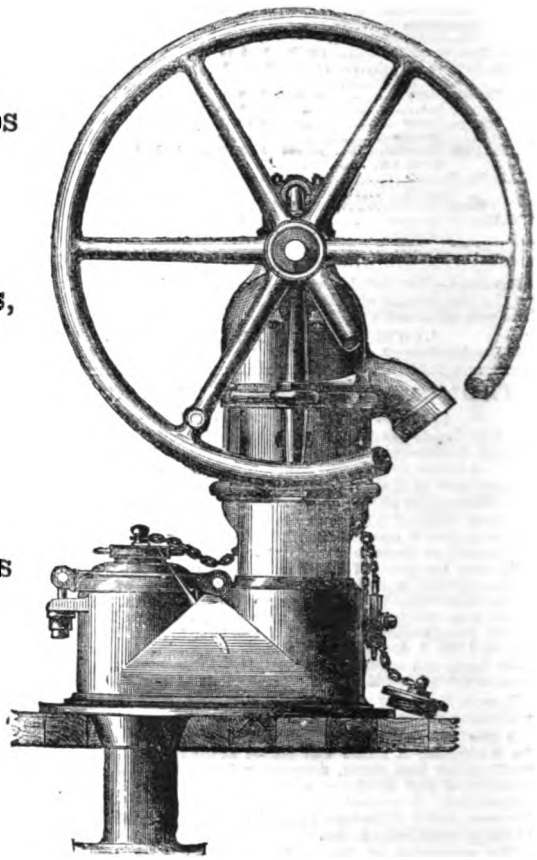
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangement either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps; the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board; the rapidity with which they can be converted into Fire Pumps, or be applied to th Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Works or Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require such Stores, together with a further saving in the cost of such Articles.

DEPOT, 116 FENCHURCH STREET, E.C.,

(OPPOSITE MARK LANE.)

MANUFACTORY, 12 & 13 BERMONDSEY WALL, S.E.

LONDON. (15)

TO STEAM SHIP OWNERS, ENGINEERS, AND OTHERS.

How's Patent Steam Engine Counters, can be read at sight.

These Counters register the number of revolutions made by an engine or other mechanism. They may be used for ascertaining the duty of Pumping Engines and Water-wheels; the revolutions on board a steam-vessel; to calculate the slip of the propeller; and in a locomotive to test the slip of the wheels.

How's Patent Salinometer, for Steam Boilers using Salt Water.

By these, the density of the water in the Boiler is at all times accurately shown, and a saving of boiler and fuel is effected. They are adopted by the Admiralty, the Honorable Trinity Corporation, and others. Copies of Testimonials from Messrs. Penn, Messrs. Maudslay, and others, will be forwarded on application.

How's Engine-Room Telegraph, for communicating between Captain and Engineer.

Society of Arts Prize Medal, 1855.

is a Mechanical Telegraph, and by its peculiar construction, error or misunderstanding is rendered impossible. It now extensively adopted, and gives great satisfaction.

How's Patent Fresh Water Apparatus for Ships' Use.

This apparatus is designed for the distillation of Fresh from Salt Water; and on long voyages, and where the supply of water is scanty, it will be found invaluable. Testimonials may be seen.

Patent Steam Pump and Fire-Engine for Ships' Use.

This Steam-pump occupies but a small space; works perfectly noiselessly, and throws an immense volume of water. An Illustrated Circular of Fresh Water Apparatus and Steam-pump combined, free on application.

How's Patent Machine for Cutting Bolts, Rods, Spindles, Wire, &c.

Simple in construction, inexpensive, occupies but little space, and will not easily get out of order.

A Pamphlet Illustrative of the above, sent free by post, on application to

A. P. HOW, ENGINEER,

81 MARK LANE, LONDON.

EVERY DESCRIPTION OF ENGINEERS' TOOLS, ENGINE ROOM STORES, &c., &c., SUPPLIED. (89)

THE IMPERIAL IRON TUBE COMPANY,

(SUCCESSORS TO GEORGE B. LLOYD & CO.)

GAS STREET AND BERKLEY STREET,

BIRMINGHAM,

Manufacturers of Wrought Iron Tubes & Fittings,

FOR GAS, STEAM, AND WATER.

PATENT GLASS ENAMELLED AND GALVANIZED TUBES,

AND

LAP-WELDED IRON BOILER TUBES. (193)

SCOTT'S

PATENT GRASS SEED SEPARATOR,

which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from

PERENNIAL AND ITALIAN RYE-GRASS, &c.,

AND

SCOTT'S PATENT CARROT SEED BEARDING

AND

CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,

which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

Communications to be sent to the Patentee, J. SCOTT, 111 Drummond Street, Euston Square, London, N.W. (48)

STEAM CULTIVATION.

CHANDLER AND OLIVER

HAVE much pleasure in being able to state that they are now prepared to execute orders for their PATENT STEAM WINDING ENGINES AND PLOUGHS, for Cultivating Land by Steam.

The WINDING TACKLE can be fitted to Engines of any maker, and the Plough can be made to take any kind of apparatus necessary for Cultivating the Soil, such as Scarrifier Tines or Broad Shares, &c. Any Engine now used by Farmers can be fitted with the Tackle. It is light and simple, and an ordinary Farm Labourer can work it.

The Engine can be used for Thrashing without taking the Ploughing Tackle off, not requiring more than three or four horses to take it from place to place.

These Engines are very useful for Pile Driving or Drawing Ballast up inclined planes; at the same time they can be used for Pumping. Farmers will find them most useful for all purposes.

Messrs. CHANDLER and OLIVER are prepared to receive orders for separate Windlasses, which are light and simple, and generally useful.

For further Information apply to

ROBERT CHANDLER, ENGINEER, BOW, NEAR LONDON,

Or Mr. OLIVER, Farmer, Hatfield, Herts.

ILLUSTRATED CATALOGUES, WITH PRICES, WILL BE READY SHORTLY. (215)

GAS EXPLOSIONS PREVENTED.

USE THE TUBES AND FITTINGS MADE BY JOHN RUSSELL and Co. (Established at the commencement of gas-lighting), whose goods are all well tested, and warranted.

J. R. and Co. supplied Thomas Cubitt, Esq., for all his houses in Belgravia, the Queen's Palace, &c., which locality is proverbially free from gas.

J. R. and Co. are the Inventors of the Lap-Welded Tube for Steam Boilers, and have recently obtained a Patent for an improvement in them.

J. R. and Co. are the holders of the First Prize Medals for Gas-Tubes and Fittings and Boiler Tubes.

PHOTOGRAPHS OF THE HIGHEST CLASS and of any size, taken and reproduced at a most moderate rate of charge. Reproductions of faultless accuracy, of Machinery, Models, Drawings, &c. Orders attended to in town and country. Estimates forwarded.

SPENCER, READ, & Co., 4 Agar-street, Strand, W.C. (90)

TO MARINE ENGINEERS, OR SHIP-BUILDERS.

THE PROPRIETOR of a VALUABLE PATENT for Double-expansive Marine Engines (by which great economy of space and fuel is obtained) is desirous of entering into arrangements with a respectable firm for the construction of the same. An adequate portion of the patent-right would be assigned by the advertiser to any firm taking the matter up; and he would render all assistance in his power, either in London or elsewhere, amongst ship-owners (to many of whom he is well known), in obtaining contracts, &c. Unexceptionable references given. Address C. E., MECHANICS' MAGAZINE Office, 166, Fleet-street. (76

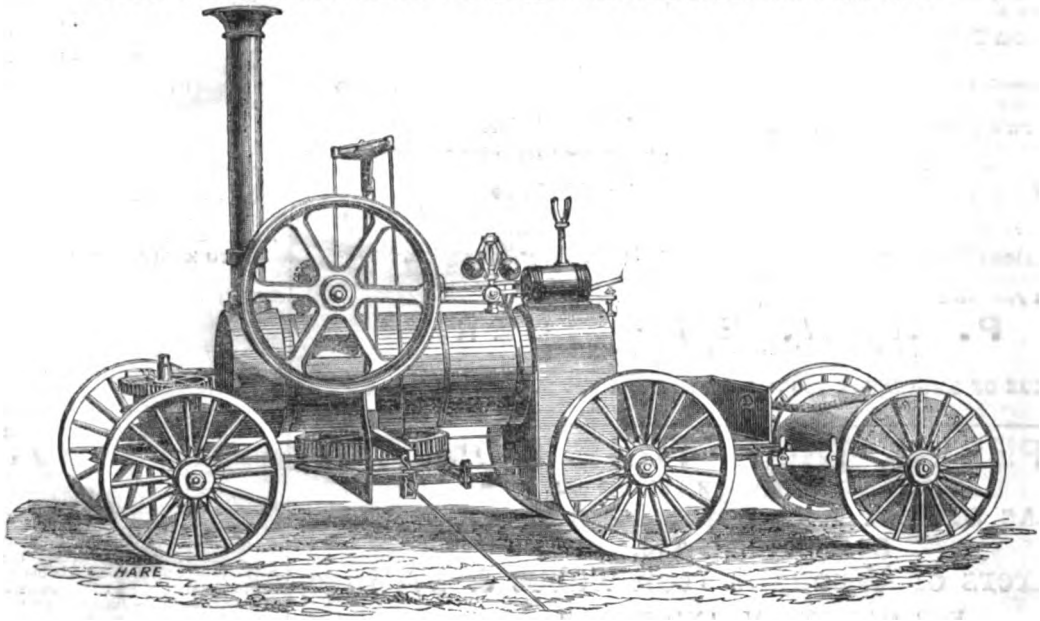
FOWLER'S PATENT STEAM PLOUGH.

A Standard Set of FOWLER'S STEAM PLOUGHING TACKLE, upon the most approved principle, can be seen in operation on the 27th, 28th, and 30th inst., on the estate of M. T. Bass, Esq., M.P., Napsbury, near St. Alban's, Herts.

THIS IMPLEMENT HAS GAINED THE FOLLOWING PRIZES:—

At STIRLING, 1857 - - - - - £200
At CHESTER, 1858 - - - - - £500
At NORTHALLERTON, 1858 - - - £50



At NORTHALLERTON (Lord Bolton's Prize), 1858 £25
At LONDONDERRY, 1858 - - - - £50
At STIRLING, 1858 - - - - - £30

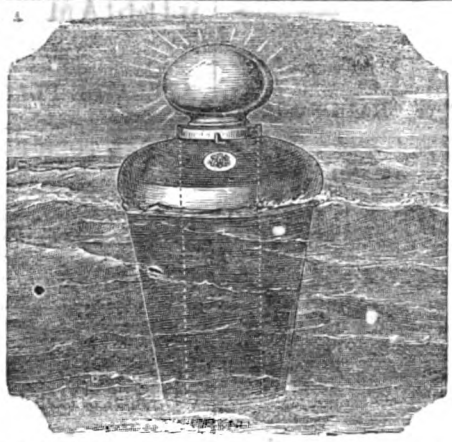
A CUT OF FOWLER'S STANDARD ENGINE, WINDLASS, AND WATER-CART.

ILLUSTRATED CATALOGUES, WITH REDUCED PRICES OF PLOUGHS, WILL BE READY SHORTLY.

FOR FURTHER PARTICULARS APPLY TO

JOHN FOWLER, JUN., 28 CORNHILL, LONDON, E.C. (206)

GRESHAM'S RECORD PATENT BUOY.



The RECORD BUOY is intended to be kept in some place available for instant use, and to be thrown overboard from a sinking ship, or a Vessel on Fire, so as to intimate disaster, having a paper inserted therein, already filled up with the Ship's Name, Port of Registry, Official Number, &c., and a few last words hastily written, intimating the nature of the calamity, with any further information that can be given at such a time. It has capacity and buoyancy to contain besides these, the Log Book, and several pounds' weight of Papers or Valuables. It is lined with Cork between the Cylinder and outside case, so that, although waterlogged, it will not sink, but keep afloat for a long time, probably for years.

In order to DISTINGUISH IT FROM ANY OTHER FLOATING SUBSTANCE, so that the Captain of a passing Ship may recognize it as an intimation of disaster, and consider it a sacred and imperative duty to pick it up and convey the information it contains according to the directions found within, it HAS RAISED CONSPICUOUSLY UPON ITS SURFACE A SILVERED GLOBE, which, owing to the reflection of the light, will make it visible at a great distance, and when dancing on the wave it shines, in fact, like a star in the firmament, and being distinguishable from anything else, its character cannot be mistaken.

It is furnished with ample directions to the finder how to act, and has Envelopes already directed to the proper authorities, who, on receipt thereof (and they should be transmitted by the first available means), will, after verifying them to prevent imposition, immediately convey the information to the owners of the lost Ship, to Lloyd's, and all parties concerned; and if a foreign ship, to the consul of the nation to which she belongs.

In order to establish uniformity, and to prevent the uncertainty and confusion which a multiplicity of Buoys of various forms might occasion, when their utility becomes apparent, and to make ESPECIAL RECOGNITION OF THESE UNDOUBTED, MR. JOHN GRESHAM, J.P. and Alderman of Hull, has Patented his Invention, and has arranged with the old-established Firm of

GEORGE & JOSEPH OLIVER,

JAMES LYNE HANCOCK,
Vulcanised India-Rubber Works, Goswell-mews and 8 Goswell-road, London, E.C. (256)

BY ROYAL LETTERS PATENT.

CAPT. KYNASTON'S "LIFE HOOKS," by means of which boats may be disengaged with perfect safety from the usual tackles of a ship, whether she be moving rapidly ahead, going astern, or stationary. Approved and already adopted by many of the ships of the British and Dutch Navies, &c. This plan is so simple that the Hooks, with the trifling gear attached, may be applied to any boat in half an hour, or transferred from one to the other without difficulty, their use involving no addition to the ordinary fittings. Apply in London at Cunningham's "Patent Topsail" Office, 12 London-st., E.C.; or to the Patentee, through Messrs. Hallett & Co., 14 Great George-street, Westminster. (262)

MALLET'S PATENT BUCKLED PLATES.—MR. ROBERT MALLET, C.E., Inventor and Patentee of these Plates (now being laid for the Floor of the New Bridge, Westminster, and applicable to Bridge, Wharf, and Fire-proof flooring, and to a variety of other important purposes) gives notice that he has withdrawn from this date all Licences whatsoever to manufacture or vend his Patent Plates, and taken the management of the Patent exclusively into his own hands. Applications for the Plates to be made to the Patentee, who has arranged for their prompt supply, at his offices, 11 Bridge-street, Westminster, S.W., and 97 Capel-street, Dublin.
18th May, 1859. (264)

INDIA-RUBBER VALVES FOR STEAM ENGINES, PUMP PACKING, &c. — Explanatory Drawings and Information as to the best modes of fitting and arranging the above, and all other Mechanical Applications of VULCANISED INDIA-RUBBER, are furnished post-free by

CHARLES MACINTOSH & Co., Patentees,
Cambridge-st., Manchester, and 3 Cannon-st. West, London.
MANUFACTORY and DEPÔT, Cambridge-st., Manchester.

Price Lists of the above articles sent post free, by JOHN ARCHBUTT, 20 Westminster Bridge Road, Lambeth, near Astley's Theatre. Every article warranted, and the prices will be found considerably lower than ever before charged for articles of similar quality. Routledge's Engineers' Slide Rules, 4s. 6d. each; Hawthorn's ditto, 5s. 6d.; Carpenters' Rules from 1s. (148)

HART & SON, MALLEABLE IRON-FOUNDERS, 4 Vine-street, York-road, Lambeth. Orders for Malleable Iron Castings executed within a week. (77)

TO ENGINEERS AND PATTERN MAKERS.

THE Parents of a Healthy Strong LAD (now fifteen years of age) are desirous of placing him as an In-door Apprentice to a first-rate Pattern Maker's, where he would be well treated and have every facility for learning the trade. He can already use the tools. A Premium would be given. Address J. S., 36 Lancaster-street, Birmingham. (267)

TO MANUFACTURERS, THE ENGINEERING, MECHANICAL, & BUILDING TRADES GENERALLY.

MESSRS. BOOTH & CO., AUCTIONEERS and BUILDERS' SALESMEN, having opened Registers for Public and Private Sales of all kinds of JOB LOTS, Surplus Stock, Stores, Tools, Implements, &c., &c., (either Old or New,) beg to call the attention of all parties to the only medium established of the kind, and to state that they are prepared to receive consignments of any weight, bulk, or value, and of any class of Goods for immediate Sale. Full particulars may be had for two stamps, at the BUILDING TRADES REGISTRY OFFICES, (established 1857,) 13 EASTCHEAP, LONDON, E.C. The Public Sales by Auction are held Weekly, on EVERY TUESDAY, at ONE O'CLOCK, and for the present at the BUILDERS' SALE GROUNDS, (established 1858,) 23 and 24 MARYLEBONE ROAD, REGENT'S PARK, W. Catalogues by Post for One Stamp. Advances on New Goods. All communications are held private and confidential. (204)

TO ENGINEERS, CONTRACTORS, EXPORTERS, AND OTHERS.

MESSRS. PAGE AND CAMERON will Sell by Auction on the premises, No. 27 Wharf-road, City-road (immediately opposite the Gutta Percha Works), on Tuesday, June 7th, at 12 for 1 o'clock, SEVEN NEW HIGH PRESSURE HORIZONTAL STEAM ENGINES; comprising two of 10-horse power, three of 14-horse power, one of 24-horse power, and one of 30-horse power; two Portable Engines of 5-horse power each; two very superior Slide and Screw Cutting Lathes, 7 in. centres and 7 ft. and 10 ft. beds; three useful Punching and Shearing Machines, for ⅜, ½, and ¾ inch plates; a Hand or Steam power Tea Packing Machine, by BURTON and SONS, London; Iron Hurdles and Fencing; Patent Cart Arms, &c., &c.

May be viewed two days prior to the Sale, and Catalogues had on the Premises, and of Messrs. PAGE and CAMERON, Land Agents and Surveyors, 64 Old Broad-street, London and St. Albans. (259)

IMPORTANT TO COUNTRY MANUFACTURERS.

TO ENGINEERS, SHIP-BUILDERS, AND CHANDLERS, IRON FOUNDERS, TOOL MAKERS, AGRICULTURAL IMPLEMENT MAKERS, AND OTHERS.

A Practical Engineer and Member of the Institutions of Civil and Mechanical Engineers being in treaty for large and very commanding premises in Fenchurch-street (in direct line between the Docks and Mark-lane and the City), for the Exhibition and Sale of some Patented Articles of his own Invention, is desirous of undertaking the London Agency of one or two Firms of established reputation, and of whose manufactures samples, models, or drawings could be exhibited. The Advertiser having a large connection amongst Ship Owners, Engineers, and Scientific Agriculturalists, and attending the principal Agricultural Shows, possesses many facilities for forwarding the interests of those for whom he may act. To those desirous of having the use of a good London Office and of exhibiting their Manufactures in one of the best thoroughfares in Town; and, moreover, of being represented by a thoroughly practical Mechanic, the present is a very favourable opportunity. The terms proposed are a Commission on all business done in addition to a moderate rental, in proportion to the space occupied by the articles exhibited. Address, with full particulars, to C. M. E., 1 Parkside, Knightsbridge. (263)

TO STEAM SHIP BUILDERS, ENGINEERS, TOOL MAKERS, IRON MASTERS, AND OTHERS.

THE ADVERTISER, who has had considerable experience in Marine Engineering and Iron Shipbuilding, and who is an expert Draughtsman, is desirous of meeting with a permanent Engagement as London Agent, Manager of a Shipbuilding Yard, or to act in any capacity in which ample knowledge of Mechanical Details and a large connexion among Engineers, Ship Owners, and others, might be rendered available. The Advertiser having also been much engaged in working out some important patented inventions, would undertake to further the objects of those having property of this kind, either to dispose of or to bring into operation. Apply by letter, to M. E., MECHANICS' MAGAZINE Office, 166 Fleet-street. (250)

ENGINEERS' TOOLS FOR SALE.

A SINGLE-GEARED DRILLING MACHINE.
A DOUBLE-GEARED SELF-ACTING DRILLING MACHINE.
A SELF-ACTING PLANING MACHINE, 6 ft. 6 × 30 × 30.
A BOLT AND NUT-SCREWING MACHINE, ¼ to 1½ inch.
A SELF-ACTING NUT-SHAPING MACHINE.
A PORTABLE PUNCHING AND SHEARING MACHINE.
A POWERFUL DOUBLE-ENDED PUNCHING AND SHEARING MACHINE.
A SET OF PLATE-BENDING ROLLERS, &c., &c.

To be seen at KENT IRON WORKS,
Bridge-street, Greenwich. (268)

PATENT HEAT DIFFUSERS.

BY the USE of DUNCAN, GWYNNE, and C. WYE WILLIAMS' PATENT HEAT DIFFUSERS, the maximum of STEAM POWER is realised from the fuel used in Steam Boilers. They are exceedingly simple, can be applied in a few hours, and do not require any alteration in the existing arrangements of Boilers in use.

The Patentees are prepared to accept for Royalty a part of the value of the Fuel saved by the use of their Apparatus.

Every information may be had on application to the Manufacturers, GWYNNE and CO., Engineers, Essex-street Wharves, Strand, London. (251)

THE USE of a CORNISH HIGH-PRESSURE BOILER is required for a few weeks after usual working hours, to complete some experiments on the evaporation of water under varying pressures. Parties willing to treat are requested to address, stating full particulars and terms, to X. Y. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street, E.C. (248)

FUEL AND STEAM ECONOMY.—Apply to Mr. LEE STEVENS, C.E., 1 Fish-street-hill, E.C. (243)

NORTON'S GOSSAMER CARTRIDGES, FOR MILITARY FIRE-ARMS.

These Cartridges are Manufactured by Mr. JAMES LEETCH, Gunmaker, 68 Margaret-street, Regent-street, Capt. N. has lately made an improvement in them, by pasting the thin tissue over the junction of the cartridge with the base of the shot. (237)

THE NATIONAL FLAX COMPANY, LIMITED.

Capital, £200,000, in Shares of £1 each.

5s. to be paid on Application; 5s. within Three Months from Allotment; and the remainder, as required, in two Payments of 5s. each.

TRUSTEE.

HENRY FENTON JADIS, Esq., Comptroller of Corn Returns Board of Trade.

PRESIDENT OF THE BOARD OF DIRECTORS.

Sir JOHN DORAT, Vice-Pres. R.S.L.

Messrs. HEYWOOD, KENNARDS, & Co., 4 Lombard-st., E.C.

SECRETARY.

Mr. JOHN H. POWELL.

GENERAL MANAGER.

Mr. G. A. CATOR.

OFFICES.

193 Gresham House, Old Broad-street, London, E.C.

THE imports of Foreign Flax Fibre having declined to a most serious extent, the Cultivation of the Plant decreased at home, and war, which threatens to become general in Europe, having commenced, a great necessity has arisen for laying the foundation of a system whereby a sufficient *Home* supply of Raw Material may be secured to meet the requirements of a great staple industry of the country—known as the Flax and Linen Trade.

It has, therefore, been determined to form "THE NATIONAL FLAX COMPANY, LIMITED," whereby such a system may be initiated.

This will be effected in Establishments to be called "Rettories," and to be erected in suitable localities throughout the United Kingdom, where the Flax Crop will be purchased from the Grower, and the Fibre prepared therefrom.

Large Dividends may be calculated on with perfect safety, as will be seen by reference to the Prospectuses and explanatory Pamphlets, which, together with Forms of Applications for Shares, and all other information, may be obtained *free* at the Offices of the Company. (245

TO STEAM SHIP OWNERS, ENGINEERS, AND OTHERS.

How's Patent Steam Engine Counters, can be read at sight.

These Counters register the number of revolutions made by an engine or other mechanism. They may be used for ascertaining the duty of Pumping Engines and Water-wheels; the revolutions on board a steam-vessel; to calculate the slip of the propeller; and in a locomotive to test the slip of the wheels.

How's Patent Salinometer, for Steam Boilers using Salt Water.

By these, the density of the water in the Boiler is at all times accurately shown, and a saving of boiler and fuel is effected. They are adopted by the Admiralty, the Honorable Trinity Corporation, and others. Copies of Testimonials from Messrs. Penn, Messrs. Maudslay, and others, will be forwarded on application.

How's Engine-Room Telegraph, for communicating between Captain and Engineer. Society of Arts Prize Medal, 1855.

is a Mechanical Telegraph, and by its peculiar construction, error or misunderstanding is rendered impossible. It now extensively adopted, and gives great satisfaction.

How's Patent Fresh Water Apparatus for Ships' Use.

This apparatus is designed for the distillation of Fresh from Salt Water; and on long voyages, and where the supply of water is scanty, it will be found invaluable. Testimonials may be seen.

Patent Steam Pump and Fire-Engine for Ships' Use.

This Steam-pump occupies but a small space; works perfectly noiselessly, and throws an immense volume of water. An Illustrated Circular of Fresh Water Apparatus and Steam-pump combined, free on application.

How's Patent Machine for Cutting Bolts, Rods, Spindles, Wire, &c.

Simple in construction, inexpensive, occupies but little space, and will not easily get out of order.

A Pamphlet Illustrative of the above, sent free by post, on application to

A. P. HOW, ENGINEER,
81 MARK LANE, LONDON.

EVERY DESCRIPTION OF ENGINEERS' TOOLS, ENGINE ROOM STORES, &c., &c., SUPPLIED. (89)

THE IMPERIAL IRON TUBE COMPANY,

(SUCCESSORS TO GEORGE B. LLOYD & CO.)

GAS STREET AND BERKLEY STREET, BIRMINGHAM,

PATENT GLASS ENAMELLED AND GALVANIZED TUBES,

AND

LAP-WELDED IRON BOILER TUBES.

(193)

SCOTT'S
PATENT GRASS SEED SEPARATOR,

which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from

PERENNIAL AND ITALIAN RYE-GRASS, &c.,

AND

SCOTT'S PATENT CARROT SEED BEARDING

AND

CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,

which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

Communications to be sent to the Patentee, J. SCOTT, 111 Drummond Street, Euston Square, London, N.W. (48)

STEAM CULTIVATION.

CHANDLER AND OLIVER

HAVE much pleasure in being able to state that they are now prepared to execute orders for their PATENT STEAM WINDING ENGINES AND PLOUGHS, for Cultivating Land by Steam.

The WINDING TACKLE can be fitted to Engines of any maker, and the Plough can be made to take any kind of apparatus necessary for Cultivating the Soil, such as Scarrifier Tines or Broad Shares, &c. Any Engine now used by Farmers can be fitted with the Tackle. It is light and simple, and an ordinary Farm Labourer can work it.

The Engine can be used for Thrashing without taking the Ploughing Tackle off, not requiring more than three or four horses to take it from place to place.

These Engines are very useful for Pile Driving or Drawing Ballast up inclined planes; at the same time they can be used for Pumping. Farmers will find them most useful for all purposes.

Messrs. CHANDLER and OLIVER are prepared to receive orders for separate Windlasses, which are light and simple, and generally useful.

For further Information apply to

ROBERT CHANDLER, ENGINEER, BOW, NEAR LONDON,

Or Mr. OLIVER, Farmer, Hatfield, Herts.

ILLUSTRATED CATALOGUES, WITH PRICES, WILL BE READY SHORTLY. (215)

GAS EXPLOSIONS PREVENTED.

USE THE TUBES AND FITTINGS MADE BY JOHN RUSSELL and Co. (Established at the commencement of gas-lighting), whose goods are all well tested, and warranted.

J. R. and Co. supplied Thomas Cubitt, Esq., for all hi houses in Belgravia, the Queen's Palace, &c., which locality is proverbially free from gas.

J. R. and Co. are the Inventors of the Lap-Welded Tube for Steam Boilers, and have recently obtained a Patent for an improvement in them.

J. R. and Co. are the holders of the First Prize Medals for Gas-Tubes and Fittings and Boiler Tubes.

TO ENGINEERS, ARCHITECTS, PATENT AGENTS, &c.

PHOTOGRAPHS OF THE HIGHEST CLASS and of any size, taken and reproduced at a most moderate rate of charge. Reproductions of faultless accuracy, of Machinery, Models, Drawings, &c. Orders attended to in town and country. Estimates forwarded.

SPENCER, READ, & Co., 4 Agar-street, Strand. W.C. (90)

TO MARINE ENGINEERS, OR SHIP-BUILDERS.

THE PROPRIETOR of a VALUABLE PATENT for Double-expansive Marine Engines (by which great economy of space and fuel is obtained) is desirous of entering into arrangements with a respectable firm for the construction of the same. An adequate portion of the patent-right would be assigned by the advertiser to any firm taking the matter up; and he would render all assistance in his power, either in London or elsewhere, amongst ship-owners (to many of whom he is well known), in obtaining contracts, &c. Unexceptionable references given. Address C. E., MECHANICS' MAGAZINE Office, 166, Fleet-street. (76

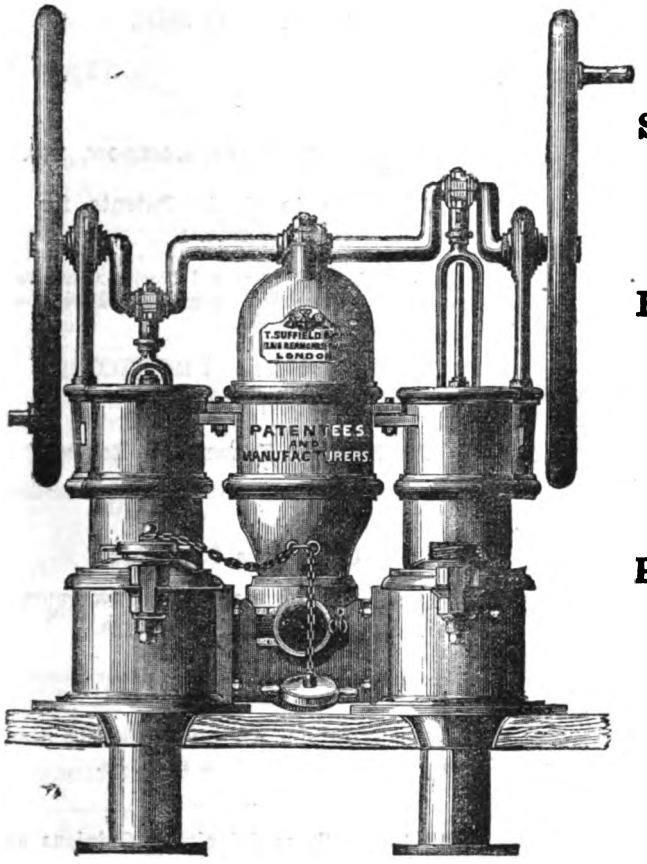
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS. SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

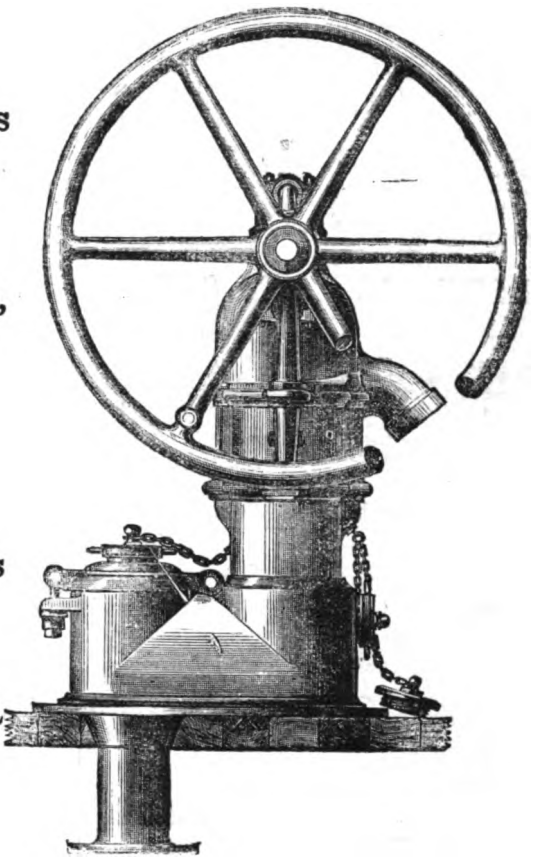
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangement either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps; the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board; the rapidity with which they can be converted into Fire Pumps, or be applied to th Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Works or Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require such Stores, together with a further saving n the cost of such Articles.

The Company has been formed for the purpose of assisting Inventors, and its contemplated operations comprise—

The taking out of Patents and Registrations for Inventors, and when required, advancing the money for this purpose.

The advancing sums of Money on approved security to Inventors and Patentees, for the purpose of enabling them to develope and complete their Patents and Inventions.

The Purchase and Sale of Inventions and Patents.

The Selling of Patents and Inventions on Commission.

The investigation of the value and merits of Inventions, and the granting of Certificates thereof.

The devotion of a portion of the Company's Premises for the purpose of receiving Models and Drawings of Inventions and Patents.

The keeping a Registry of all Patents taken out by the Company, and the furnishing a Monthly List thereof to all Subscribers.

All information may be obtained at the Office, and the Deposit may be remitted to the Bankers or to the Secretary. (223)

TO SHIPBUILDERS, SHIPOWNERS, CAPTAINS, &c.

THE ANCHOR COMMITTEE AFFIRM "TROTMAN'S PATENT ANCHOR" to be superior to all others, possessing Thirty-Five Per Cent. more Holding Power than either Porter's or Roger's, and equivalent in all respects to ordinary Anchors of 28 per cent. greater weight.

"This appeared to the Committee of vast importance to the Shipping Interests, &c."

(Vide their Official Report, 1853, "On the relative merits of different descriptions of Anchors," sanctioned and approved by the Admiralty.)

THE ANCHOR COMMITTEE

Nominated by the Lords Commissioners of the Admiralty "to investigate and determine the relative merits of Anchors," in compliance with a requisition from the principal Shipowners, Underwriters, &c., of the United Kingdom.

Rear-Admiral the Hon. Sir M. Stopford, K.C.B., Chairman.

Capt. Superintendent Charles Hope, R.N., Her Majesty's Dockyard, Sheerness.

Captain George Rodney Munday, R.N., Her Majesty's Ship "Nile."

Jonathan Aylen, Esq., R.N., Master Attendant, Her Majesty's Dockyard, Sheerness.

James Tonkin, Esq., Master, R.N., Her Majesty's Ship "Waterloo," 120 guns.

William Schaw Lindsay, Esq., M.P., &c., &c.

Duncan Dunbar, Esq., Chairman of General Shipowners' Society; Do. Mercantile Marine Board, London. Member of the Committee of "Lloyd's Register" of Shipping, &c.

Anthony Ridley, Esq., Vice-Chairman of Mercantile Marine Board; Member of the Committee of "Lloyd's Register" of Shipping, &c.

William Drew, Esq., Member of the Mercantile Marine Board; Member of the Committee of "Lloyd's Register" of Shipping, &c.

William Phillips, Esq., Member of the Committee of "Lloyd's Register" of Shipping; General Shipowners' Society, &c.

George Marshall, Esq., Member of the Committee of "Lloyd's Register" of Shipping; General Shipowners' Society, &c.

THE INTERNATIONAL JURY AT PARIS

Also awarded this Invention the First Class Medal, 1855.

33 Lombard-street, E.C.

LIST OF MISCELLANEOUS TENDERS INVITED, AND ENGAGEMENTS OPEN.

The tenders and vacancies which appear in this weekly list are not repeated in succeeding numbers.

AUSTRALIAN MAIL, *Admiralty.*—For the conveyance of Her Majesty's Mails between Great Britain and Australia, *viâ* Panama. Monthly by Steam Vessel each way. Printed views to be had at the Admiralty, where tenders by half-past one on the first of July.

RAILWAY, *Caledonian.*—For the erection of that part of the Dulmarnock Branch, extending from the Clydesdale Junction Railway to the south embankment of the river Clyde. Plans and information, Mr. Geo. Graham, engineer, Buchanan-street, Glasgow, to June 7, when tenders.

RAILWAY, *Blyth and Tyne.*—Altering and improving the levels from Prospect-hill to Holywell, two miles. Plans, &c., Mr. G. F. Fore, engineer, Market-street, Newcastle-on-Tyne. No date given.

GASHOLDER, &c., *Belper.*—For the erection and construction of tank for new gasholder; new gasholder; purifier, scrubber, condensers, inlet and outlet to new gasholder, governor, and street main. Plans, &c., of Mr. T. Jamison, Field-head, Belper. Tenders to May 30.

GASHOLDER TANK, *Cardiff.*—Gas Light and Coke Company. Excavating, puddling, brick and stone work. Plans at the Company's offices, Cardiff. Tenders to 8th June.

STEAM COOKING APPARATUS, *Waterford.*—At the Workhouse, for 1,000 inmates. Tenders to Chairman of Guardians up to 11 o'clock, June 9.

CHURCH, *Caledfwlch.*—For completing a new church at Caledfwlch. Plans, &c., from Mr. David Gwillim, Parish Clerk, Llandilo Fawr. Further information from the Rev. John Griffiths, Vicar, personally or by letter. No date specified.

CHURCH, *Ile Brewers, Somerset.*—For the rebuilding of the parish church. Drawings, &c., at the vicarage house, and tenders until June 10.

CHURCH, *Herts.*—For the enlargement, &c., of the parish church at King's Langley. Plans, &c., at the National School-room, until June 1st. Tenders until June 1st. Information of Mr. D. Brandon, architect, 24 Berkeley-square, London.

VICARAGE HOUSE, OFFICES, AND STABLE BUILDINGS, *Tisbury, Wilts.*—Plans at office of Mr. James Soppitt, architect, Shaftesbury, Dorset. Tenders to same, till 1st June.

HOSPITAL, *Chesterfield.*—For the erection of a new hospital. Plans, &c., of Mr. Wallis, Market-place. Tenders to June 6.

POLICE STATION AND PETTY SESSIONS ROOM, *Honiton.*—Plans at Offices of the Clerk of the Peace, at the Castle of Exeter, and of Mr. Stamp, Clerk of the Justices, Honiton. Tenders to June 6th.

POLICE STATION, *Andover.*—For making the alterations, &c., necessary for converting the borough gaol of Andover into a county police station. Plans, &c., of the County Surveyor, St. Swithin-street, Winchester. Plans, &c., at the Police Station at Andover. Form of Tender at the Office of Clerk of the Peace, County Hall, Winchester. Tenders to June 1.

HOUSES, *Kirkstall.*—Enlarging, &c., a villa residence at Kirkstall. Plans, &c., of Mr. Thomas Shaw, architect, 2 Belgrave-square, Leeds. Tenders to June 1.

HOUSES.—Completion of four at Tulse Hill, Lower Norwood. Plans, offices of Mr. T. E. Knightley, 25 Cannon-street, City. Tenders at offices of the United Building Land and Investment Company, 29 Poultry, to June 1.

BATHS, *Manchester.*—A third establishment for the Manchester and Salford Baths and Laundries' Company. Particulars, Mr. Worthington, 54 John Dalton-street, to whom names. No date specified.

EIGHT COTTAGES, *Disley.*—Drawings, &c., Mr. E. Ollerenshaw, corn dealer, Disley. Tenders, May 31.

POOR-HOUSE, *Scotland.*—At Tullylumb. Plans, &c., Mr. A. Heighton, architect, Perth. Tenders to the Lord Provost, at the Chief Clerk's, Perth, June 20.

NEW ROAD, *Scotland.*—About three miles in length, near Crigan Ferry, Argyleshire. Plans, &c., with Mr. Hugh Mackenzie, road surveyor, Oban, with whom contracts, May 30.

ROADS, *Bilston.*—The Bilston Turnpike Trust invite tenders for team work and repairs, for one or three years, from the 30th of June next. Tenders June 6, Messrs. Willim and Hall, clerks to the trustees, Bilston.

BRICK BURNING, *Chester and Mold Railway.* — 600,000 common field bricks, to be used this summer, near Padeswood station. To be burnt in clumps. J. B. M., post-office, Hawardine, Flintshire.

STAVES AND IRON HOOPS, *Admiralty.*—For Deptford and Gosport. Separate tenders for each port. Samples at Deptford and Gosport. Conditions of the revised contracts at Gosport, Liverpool, and Bristol. Tenders, half-past one on the 2nd June.

COAL FREIGHTS.—The Directors of the London and Brighton South Coast Railway want tenders for freight of from 18,000 to 22,000 tons of coals from the River Tyne to Kingston Wharf, near Shorcham. Forms and particulars, storekeeper, Brighton terminus. Tenders, June 9.

SEWERAGE WORK, *London.*—For the general work and repairs to the sewers in the district of the vestry of St. James's. Forms, 14 Marshall-street, Golden-square; where tenders, June 15.

SUPPLIES FOR BOARD OF HEALTH, *Borough of Preston.*—For 12 months' iron work, brass, copper, tin, lead, &c., stone, earthenware, pipes, and sundries. Specifications, Offices of the Board, 16 Church-street. Tenders to the Chairman of the "Finance Committee," with the Surveyor by 1st June.

GRANITE AND FLINTS.—*Commercial-road East, London.*—Forms, 3 Crosby-square, Bishopsgate-street. Tenders, June 7.

PARTNERSHIP INTEREST WANTED.—In an engineering or iron ship-building firm, to introduce patents connected with such businesses. L. F. G., 163 Strand.

LOCOMOTIVE TANK ENGINE WANTED. — New or second-hand. Full particulars, Alpha, William Dawson and Sons, 74 Cannon-street, London, E.C.

IMPLEMENT MAKER.—A practical man to take charge of the fitting department, and to be thoroughly conversant with lawn-mowing machines. Q. Y. Z., 163 Strand, W.C.

ASSISTANT DRAUGHTSMAN.—In an engineering and ship-building establishment. Application to state salary, and to be accompanied with a drawing of a pair of marine engines and a practical rigging draught. L. M. N., Belfast Post Office.

LOCOMOTIVE DRAUGHTSMAN.—Y, 163 Strand, with terms.

AN AGENT.—On commission for the sale of a cheap patented article for marine and other steam engines. H. N., Mr. Lindley's, 19 Catherine-street, Strand.

SURVEYOR, *Hulme.*—£200 per annum. Applications to the chairman of the Hulme committee, township offices, Hulme, June 3.

FOREMAN MACHINERY.—To take charge of the work and machinery. Knowledge of shipwright's work advisable. Box 53, Post-office, Sheffield.

PRINTING MACHINE WANTED. — Second-hand, size, 48 inches by 36 inches, or 42 inches by 28 inches. James Hogan, Dudley-road, Wolverhampton.

RANSOME'S PATENT IMPERISHABLE SILICEOUS STONE. — Chimney-Pieces, Balustrades, Capitals, Trusses, Terminals, Fountains, Vases, Monuments, &c., of great beauty, at the most reasonable prices.

For Particulars, Specimens, Illustrations, and Agencies, apply to Mr. Frederick Ransome, Whitehall Wharf, Cannon-row, Westminster; or Patent Stone Works, Ipswich. A Liberal Discount allowed to the Trade or to Shippers. (147)

MR. WALTER HALL is prepared to Grant Licences, or to Dispose of his Patent for working Railway Breaks. Particulars to be had of Mr. HALL, who may be addressed by letter to the care of the MECHANICS' MAGAZINE, 166 Fleet-street, E.C. (217)

ENGINEERING BUSINESS FOR SALE.

OWING to the continued ill health of the Proprietor, the first-class business of an Engineer and Crane and Block Maker is offered for sale. It has been established in the Metropolis for nearly 30 years, and has enjoyed extensive patronage amongst Brewers, Manufacturers, Warehousemen, and others, in and about London; the business done amounting to nearly £8,000 per annum. About £3,200 would be required, (part of which, however, may remain for any reasonable time on good security,) which is the bare value of the tools, patterns, and stock in trade. The premises, including good dwelling-house, very conveniently situated, and capable of accommodating from 60 to 70 hands, are held upon a long lease, at an extraordinary low rental, not exceeding £100 per annum, taxes included. Many of the tools are nearly new, and of the best construction. The present proprietor, who relinquishes the business solely on account of ill health, would give every assistance in his power to those succeeding him; and as his foreman, who has been with him for nearly ten years, is thoroughly acquainted with the practical parts of the business, any gentleman desirous of commencing as a manufacturing engineer would find the present a very favourable opportunity. As all accounts have been, for many years past, collected quarterly, a very small amount, say £800, would suffice as working capital. Full particulars may be obtained by application to E. E. ALLEN, Esq., MECHANICS' MAGAZINE Office, 166 Fleet Street, E.C. (130)

ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street, Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 130 feet in length, to work by hand or Steam Power.

Hot-Water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (44)

TO BRASS FOUNDERS.

TO BE SOLD, the Patent-right of a New and Highly-approved EQUILIBRIUM WATER COCK or VALVE, suitable for Steam Boiler Feed Pipes, or any cases where the valve is required to be opened against pressure.

Address H., MECHANICS' MAGAZINE Office, 166 Fleet-st., where a Drawing may be seen. (151)

PUMPING MACHINERY.

GWYNNE AND Co., Engineers, London, manufacture and supply the following Machinery, of the most approved construction and with all the latest improvements:—Portable and Fixed Steam-Engines and Boilers of every description; Waterwheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the Supply of Towns, Cities, and Districts, and for the Irrigation of Coffee, Cotton, Indigo, Sugar-cane, and Rice Estates, for pumping out Coffer-dams, Canals, Dry Docks, Reservoirs, &c. They also manufacture and supply the Pumping and other Machinery for Paper, Pulp, and Filling Mills, Breweries, Distilleries, Tanneries, Starch Works, Bleaching, Dyeing, and Calico Printing Works, Chemical Works, Silk, Cotton, and Flax Mills, and Manufactories in general. All Letters not paid will be refused. Illustrated Price Lists forwarded on receipt of Six Postage Stamps. —GWYNNE AND Co., Hydraulic and Mechanical Engineers, Essex-wharf, Strand, London.

For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (24)

CONDY'S PATENT FLUID, or NATURAL DISINFECTANT,

Not only Deodorizes but Disinfects perfectly, and DESTROYS FOR EVER the cause of infection.

Is not poisonous, as it may be used to purify water. Evolves no noxious or unpleasant gas. Cannot be mistaken for any other fluid, thereby preventing death and disease; and is therefore the best, safest, cheapest, and most pleasant disinfectant ever introduced.

This fluid has been examined and reported upon by the Board of Health, all the most eminent Men and Chemists of the day, in all cases in the most satisfactory manner possible.

The Public are recommended to use this Fluid, properl diluted with water, frequently and habitually in larders, sculleries, dairies, musty cakes, sick rooms, close places, &c., as it has numerous advantages, and can be used with certain immediate success and perfect safety.

Sold in Quart Bottles, 4s.; Pints, 2s.; Half-pints, 1s.; and in bulk, 10s. per Gallon.

Free to Railway on receipt of Order or Stamps. (238)

FIRE BRICKS.—THE FARNHAM INDESTRUCTIBLE SILICIOUS FIRE BRICKS have been greatly REDUCED in PRICE, and will be delivered at the Nine Elms Station, London, at 90s. per 1,000. —Address, G. H. OGSTON, J. M., Paine's Silica Works, Farnham, Surrey. (35)

PATENT WEDGE and GROOVED SURFACE FRICTIONAL GEARING.—The PATENT FRICTIONAL GEARING COMPANY, Proprietors of ROBERTSON'S WEDGE SURFACE FRICTIONAL GEARING PATENTS, grant Licences to Users of Machinery, for the unlimited use of the System in their Works, on very moderate terms, enabling them to make or order from any Mechanician the Machinery they require.

The Company possess Five Patents relating to this Frictional System, including (in addition to their Bevel and Mitre Wheels) a System of Disc Clutches and Clutch Movements, Wheel Clutching, Reversing, Differential, Speed Ring, Varying Speed, and Break Movements, and of Shafting, Pillow Blocks, Shafting Hangers, &c.

Frictional Wheels thus formed are applicable to the heaviest as well as the lightest kind of work, and, in addition to their being extensively in use for ordinary gearing purposes, have been in use for a considerable time applied to Mills for Rolling Iron, the Screw-Propeller, Incline-Winding Engines, Saw Mills, Pumping Engines, Flax Scutchers, Fan Blowers, Calico-Printing Machinery, Steam Winches, Cranes, Hoists, &c.

This system gives great facilities for simplifying Machines, and for mechanical combination, and has the advantage of being noiseless and cleanly, there being no oil or grease used on the wheels. Wheel Catalogues and Circulars, giving particulars, sent free by Post; also, a list of manufacturing Agents, and information regarding those who, from locality or experience, are best able to execute orders for the description of work required.

Office, 20 Buchanan-street, Glasgow. (119)

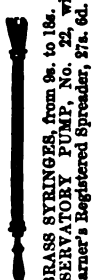
A lighter Pump of 3 inches diameter, can be supplied if required 5 15

IMPROVED LIQUID MANURE, OR GENERAL PORTABLE PUMP.

These Pumps are fitted with J. Warner and Son's Patent Bucket and Sucker, and cannot clog in action. The Barrel is of Galvanized Iron, not likely to corrode, and can be raised or lowered at pleasure. The legs will fold together, and the whole may be carried on shoulder to any pond or tank required.

4½ in. Liquid Manure Pumps, with legs, £3 3s.; 1¾ in. Gutta Percha Suction Pipe, 1s. 11d. per foot; 2 in. Flexible Rubber and Canvass Suction Pipe, on Wires, 3s. 3d. per foot. The Barrel is 27½ inches long, and the legs are 5 feet high. Larger sizes of the above if required.



BRASS SYRINGES, from 9s. to 18s.
CONSERVATORY PUMP, No. 22, with Warner's Registered Spreader, 27s. 6d.

Galvanized Iron Tub GARDEN ENGINE, with Warner's Registered Spreader, is strongly recommended for durability and low price, viz., £2 19s., to hold Ten Gallons. Larger sizes, in either wood or iron.

WARNER'S SWING WATER-BARROW.
(To hold Thirty Gallons), £3 3s.,

is intended for all large Establishments where much watering is done by the watering-pot. By its use much time and labour of the Gardener are saved, particularly where the Tank, Pond, or Pump is at a distance from the garden.

MUSICAL SHEEP BELLS, with Straps, in sets of 6, 19s.; ditto, in sets of 8, 25s.; ditto, in sets of 12, 38s.

WARNER'S CATTLE AND SHEEP BELLS, in sets of 6, with Straps, 13s. per set.

Bells for Churches, Chapels, Colleges, Schools, Turret Clocks, &c., cast for any size, note, or weight, singly or in peals. Tuned by machinery. Stocked and wheeled ready for fixing. Old Bells re-cast or taken in exchange.

The great 16-ton Bell, for the Houses of Parliament, was made by JOHN WARNER and SONS, 1856, under their Patent.

May be obtained of any Ironmonger or Plumber, in town and Country; or of the Patentees and Manufacturers, as above. (30)

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.

Families, by using this delicious VINEGAR, insure purity and effect a saving of 50 per cent. See "Report of Dr. Letheby, City Officer of Health, Dr. Hassall, of the 'Lancet' Commission, and others." Sold by the Trade, in Bottles, labelled and capsuled. Wholesale—63 King William-street, London-bridge, E.C. Six Quart Samples sent free to any Railway for 3s. 6d. (216)

A NEW DISCOVERY IN WASHING HOUSEHOLD LINEN.

NO FAMILY SHOULD BE WITHOUT HANCOCK'S UNIVERSAL WASHING MACHINE.

It effectually cleanses the Crevices of Baby-linen, Collars, Wristbands, &c., without the possibility of injuring the Linen or Collars. Received 500 Testimonials.

PRICES.

No. 2 Washes 9 Shirts in from 3 to 10 minutes; or 4 Sheets in 5 minutes	£5 5 0
No. 3 Washes 12 Shirts in from 3 to 10 minutes; or 6 Sheets in 5 minutes	7 11 0
No. 4 Washes 18 Shirts in from 3 to 10 minutes; or 12 Sheets in 5 minutes	12 12 0

And all other Articles in proportion.

J. L. HANCOCK, Sole Manufacturer and Patentee, 62 Pentonville-road, London. (37)

A VALUABLE PATENT to be DISPOSED OF.—The Patentee will either dispose of the Patent or grant Licences to any party wishing to manufacture, or would join a person with capital to carry out the Patent.

Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (163)

TO BRASS-FOUNDERS, ENGINEERS, &c.

THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings; they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty ber cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, muffles, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire- standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. (43)

GLENFIELD PATENT STARCH,

USED IN THE ROYAL LAUNDRY,

AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE THE FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR

GLENFIELD PATENT STARCH,

SEE THAT YOU GET IT,

as inferior kinds are often substituted.

Sold by all Chandlers, Grocers, &c., &c. (75)

C. F. QUINTIN'S

PATENT BREAD MACHINE.

The Journeyman Baker's and Servant's Friend. It lightens their labour and makes our daily Food clean and pure.

Highly commended at the Royal Agricultural Show, Chester, 1858, the Royal Agricultural Show, Dublin, 13th and 14th April, 1859, and the Society of Arts, Adelphi, London.

C. F. QUINTIN'S Machines are constructed in various sizes, from Half-a-Peck to Ten Bushels.

Prices from 30s. to £20.

A SACK OF FLOUR MADE INTO DOUGH IN SIX MINUTES.

Manufactory—

1 ST. JAMES'S SQUARE, CHELTENHAM.

Numerous Testimonials can be seen. (249)

IMPROVED MACHINERY FOR AGRICULTURISTS.

RICHARD GARRETT & SONS,

LEISTON WORKS, SAXMUNDHAM, SUFFOLK,

(ESTABLISHED A.D. 1778),

EARNESTLY solicit the continued support of their numerous Friends, Agriculturists, Shippers, and others; the additions made to their Works during the present year, in the erection of new sets of Workshops, fitted with the best mechanical appliances for producing Machinery of the most improved construction, expeditiously and economically, justifies their soliciting increased support, while their leading reputation as Inventors and Manufacturers of FIRST CLASS Agricultural Machinery, is a sufficient guarantee that every Machine supplied from Leiston Works will prove to the entire satisfaction of the purchaser.

R. G. & S. are now manufacturing the following Machines and Implements, which they guarantee to be thoroughly efficient in every respect:—

PORTABLE AND FIXED STEAM ENGINES. } From 4 to 40 Horse Power, suited for every kind of work
SELF-PROPELLING AND TRACTION ENGINES. } to which Steam Power is applied.
STONE GRINDING MILLS.
MORTAR AND PUG MILLS.
MILLWRIGHTS' WORK of all kinds.
SAWING MACHINERY, from 4 to 20 Horse Power.
BRICK AND TILE MACHINES.

IMPROVED SETS OF FARM MACHINERY, for Large Occupations.
PORTABLE AND FIXED MACHINERY, for Thrashing and Dressing Corn.
THE PRIZE BOLTING AND OPEN-DRUM HORSE-POWER THRASHING MACHINES.
CORN DRESSING MACHINES, for Hand, Horse, Water, and Steam Power.
BARLEY AVELLING MACHINES.
CHAFF CUTTERS, for Hand, Horse, Water, and Steam Power.
PATENT TURNIP CUTTING AND PULPING MACHINES.

THE PRIZE CORN AND SEED DRILLS.
PRIZE CORN AND SEED DRILLS WITH MANURE APPARATUS.
PRIZE SEED AND MANURE DRILLS.
LIQUID, SEED, AND MANURE DROP DRILLS.
CHAMBER'S PATENT BROADCAST MANURE DISTRIBUTOR.
GARRETT'S PATENT HORSE HOE for all Crops.
PATENT REVOLVING HOES for Root Crops.
IMPROVED PLOUGHS AND REAPING MACHINES.
&c. &c. &c.

Of which full detailed particulars will be found in R. G. & SONS' ILLUSTRATED CATALOGUE, sent postage free to any address, in English, French, or German; and any of the above Machines will be shown in operation at R. G. & Sons' Farm, near the Works, on their receiving a few days' notice.

A Copy of R. G. & SONS' new COLONIAL LIST will be forwarded free to any of the Colonies, and Shippers will be supplied with these lists, with their names and addresses printed on, free of charge, by making application for the same.

ADDRESS—R. GARRETT & SONS, LEISTON WORKS, SAXMUNDHAM, SUFFOLK. (161)

CLAYTON, SHUTTLEWORTH, AND CO.,

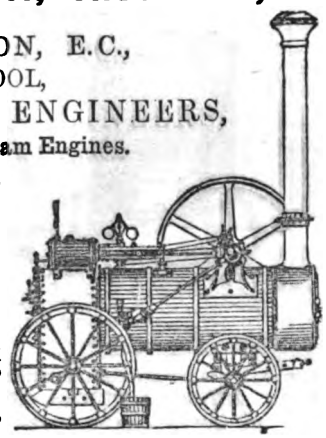
OF LINCOLN,

78 LOMBARD STREET, LONDON, E.C.,

AND 36 DALE STREET, LIVERPOOL,

AGRICULTURAL AND GENERAL ENGINEERS,

And Manufacturers of Portable and Fixed Steam Engines.



Combined Threshing Machines, which dress the corn ready for market at one operation. Grinding Mills, Saw Benches, Pumps for Irrigation and Mining purposes, with all necessary gearing for being driven by steam power. Full particulars and estimates given on application to the above address.

C. S. and Co.'s PORTABLE STEAM ENGINES are adapted for every purpose to which steam-power can be applied. When intended for winding, they are fitted with reversible link motion and winding gear. They are easy of removal, as may be seen by the engraving, and can be set to work immediately on arrival.

C. S. and Co. are now doing an extensive foreign and colonial business, and are prepared to send off engines and machinery of the before-mentioned kinds in a few days from the date of order. They would also call attention to the important *reduction in prices* made for the new year.

For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (23)

Important to every man who keeps

NO ADJUSTMENT REQUIRED.—You have only to place one of

LUND'S

LONDON RACK CORK SCREWS

on the neck of a bottle, and it is ready for use. Some of these Cork Screws are fitted with Patent Spring Ends to embrace the neck of the bottle, and so direct the worm through the centre of the cork.

Sold by the Patentee at 56 and 57 Cornhill, and 23 and 24 Fleet-street, London; and may be had at all Cutlers' and Ironmongers'. (254)

ENGINEERS' TOOLS.

FOR SALE, a Self-acting Slide LATHE, 11-inch Centres, and Bed 12 feet long, complete; and TWO PORTABLE PUNCHING and CUTTING MACHINES, one suitable for ½-inch plates, and the other for ⅜-inch plates, both adapted for steam or hand power.

Apply to Messrs. PAGE & CAMERON, 64 Old Broad Street, E.C. (117)

WATER POISONED BY LEADEN PIPES.

"The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dick, of Bonchurch, Isle of Wight. The water has cut these deep pits almost through the pipe, and not only upon the portion which we have illustrated, but has formed similar chasms throughout the entire length."—*Expositor*.

Poisoned Water Preventable.

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious, or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha. Nothing can be better. I have also recommended it to others, who have adopted the expedient.

Resistance for Frost.

The Gutta Percha Company have been favoured with the following Letters in reference to the non-conducting properties of Gutta Percha Tubing, in the resistance of Frost.

From J. ARMSTRONG, Esq., M.D., Gravesend.

"My private house, which was supplied with your Gutta Percha Tubing some five or six years ago, has never required the slightest attention; and previously, there was no winter passed that we were not deluged in consequence of the bursting of the leaden pipes."

From HENRY BROWN and SONS, Western Works, 108 Rockingham-street, Sheffield.

"We have now a positive proof of the frost-resisting properties of the Gutta Percha Piping. On our premises we have a leaden Pipe and a Gutta Percha one lying side by side. The leaden one has been completely frozen up at least ten days, and the Gutta Percha one is still unaffected.

ROYAL POLYTECHNIC INSTITUTION. Patron, H.R.H. the PRINCE CONSORT.—Open daily from Twelve to Five; Evenings, Seven to Ten.

New Lecture by Mr. E. V. GARDNER, on CHEMISTRY, as applied to DOMESTIC PURPOSES.

Lecture by Mr. KING, on Price's PATENT ELECTRO-MAGNETIC TELEGRAPH APPARATUS for Signalling between GUARDS and ENGINE DRIVERS, and on Price's FIRE and BURGLARY DETECTOR.

Splendid Series of DISSOLVING VIEWS.—Lecture on MUSIC, by Mr. LENNOX HORNE.—Exhibition of the OXY-HYDROGEN MICROSCOPE.—The ST. GEORGE'S CHOIR every Wednesday Evening, at Eight.—Mr. Twining's MUSEUM of DOMESTIC ECONOMY, &c. (271)

RAILWAY SLEEPERS, &c.

WE are prepared to sell, by Private Contract, about 100,000 Scotch Fir Sleepers, of the various dimensions in use.

Also, any quantity of Larch, and Scoth Fir Poles, Planks, Deals, Staves, and Pitwood.

Early applications will meet the best attention of

REID and FORBES.
45 High-street, Inverness, N.B. (282)

PATENT LEVER BREAKS for RAILWAY WAGGONS, doing away with the objectionable Break Rack. Can be applied to existing stock at a trifling expense. Royalty moderate.

Models can be seen at 34 Great George-street, Westminster, and the Breaks in action at the Works of the Railway Carriage Company at the Peterborough Station, on the Eastern Counties Railway; the Rugby Station, London and North-Western Railway; the Cardiff Docks Station, Taff Vale Railway; and at the Works, Oldbury, near Birmingham, where all communications are requested to be sent. (275)

RAILWAY AXLE-BOX COMPANY continue to grant Licenses to manufacture and use AXLE-BOXES under their PATENTS, which include those of Messrs. ADAMS and RICHARDSON, WRIGHTON, NORMANVILLE, VIGURS, and others.

These are the only AXLE-BOXES that effectually EXCLUDE DUST, and prevent the escape of grease, by which an important saving is effected in the wear and tear of the JOURNALS and BEARINGS and the CONSUMPTION of GREASE.

Further particulars and Licenses may be obtained of
P. M. PARSONS, Manager.
9 Arthur-street West, London-bridge, E.C. (283)

FOR INVALIDS.—INDIA-RUBBER WATER BEDS, PILLOWS, and CUSHIONS. Also Inflating Bed-chairs, Air Beds, Pillows, Bolsters, and Air Cushions made any size or design. Price Lists post free on application.—JAMES LYNE HANCOCK, Vulcanized India-Rubber Works, Goswell-mews, and 8 Goswell-road, London, E.C. (257)

HART & SON, MALLEABLE IRON FOUNDERS, 4 Vine-street, York-road, Lambeth. Orders for Malleable Iron Castings executed within a week. (77)

BIRMINGHAM WAGGON COMPANY (LIMITED) has RAILWAY WAGGONS for HIRE. Apply to the Secretary, 3 Newhall-street, Birmingham. (276)

ISCA FOUNDRY COMPANY, OLD BARRACKS, NEWPORT, MON. ENGINEERS, AND RAILWAY WAGGON BUILDERS.

Manufacturers of Switches, Points, and Crossings, Chairs, Spikes, Bolts, and General Railway Fittings. (279)

YORKSHIRE TYRE & AXLE WORKS, ROTHERHAM.

LOCOMOTIVE TYRE-BARS of every description for Engines, Carriages, and Railway Waggon Wheels.

STEEL-IRON for Springs. MERCHANT and other Irons manufactured. WM. P. HOYLE, Proprietor. (278)

RICHARD BAIRD, GENERAL COMMISSION AGENT, and CONTRACTOR for all descriptions of RAILWAY PLANT and STORES.

13 DOCK-STREET, DUNDEE. (280)

TO MANUFACTURERS, THE ENGINEERING, MECHANICAL, & BUILDING TRADES GENERALLY.

MESSRS. BOOTH & CO., AUCTIONEERS and BUILDERS' SALESMEN, having opened Registers for Public and Private Sales of all kinds of JOB LOTS, Surplus Stock, Stores, Tools, Implements, &c., &c., (either Old or New,) beg to call the attention of all parties to the only medium established of the kind, and to state that they are prepared to receive consignments of any weight, bulk, or value, and of any class of Goods for immediate Sale. Full particulars may be had for two stamps, at the BUILDING TRADES REGISTRY OFFICES, (established 1857,) 13 EASTCHEAP, LONDON, E.C. The Public Sales by Auction are held Weekly, on EVERY TUESDAY, at ONE O'CLOCK, and for the present at the BUILDERS' SALE GROUNDS, (established 1858,) 23 and 24 MARYLEBONE ROAD, REGENT'S PARK, W. Catalogues by Post for One Stamp. Advances on New Goods. All communications are held private and confidential. (204)

MATHEMATICAL DRAWING INSTRUMENTS, RULES, TAPES, CHAINS, LEVELS, THEODOLITES, BOX SEXTANTS, PRISMATIC and POCKET COMPASSES. Price Lists of the above articles sent post free, by JOHN ARCHBUTT, 20 Westminster Bridge Road, Lambeth, near Astley's Theatre. Every article warranted, and the prices will be found considerably lower than ever before charged for articles of similar quality. Routledge's Engineers' Slide Rules, 4s. 6d. each; Hawthorn's ditto, 5s. 6d.; Carpenters' Rules from 1s. (148)

NORTON'S GOSSAMER CARTRIDGES, FOR MILITARY FIRE-ARMS.

These Cartridges are Manufactured by Mr. JAMES LEETCH, Gunmaker, 68 Margaret-street, Regent-street. Capt. N. has lately made an improvement in them, by pasting the thin tissue over the junction of the cartridge with the base of the shot. (237)

MALLET'S PATENT BUCKLED PLATES.—MR. ROBERT MALLET, C.E., Inventor and Patentee of these Plates (now being laid for the Floor of the New Bridge, Westminster, and applicable to Bridge, Wharf, and Fire-proof flooring, and to a variety of other important purposes) gives notice that he has withdrawn from this date all Licences whatsoever to manufacture or vend his Patent Plates, and taken the management of the Patent exclusively into his own hands. Applications for the Plates to be made to the Patentee, who has arranged for their prompt supply, at his offices, 11 Bridge-street, Westminster, S.W., and 97 Capel-street, Dublin.
18th May, 1859. (264)

INDIA-RUBBER VALVES FOR STEAM ENGINES, PUMP PACKING, &c.—Explanatory Drawings and Information as to the best modes of fitting and arranging the above, and all other Mechanical Applications of VULCANISED INDIA-RUBBER, are furnished post-free by

CHARLES MACINTOSH & Co., Patentees,
Cambridge-st., Manchester, and 3 Cannon-st. West, London.
MANUFACTORY and DEPÔT, Cambridge-st., Manchester.
GENERAL WAREHOUSE, 3 Cannon-street West, London, E.C.—C. M. and Co.'s only Establishments. (139)

IN the matter of Letters Patent granted to EDMUND ALFRED PONTIFEX, of the Firm of PONTIFEX and WOOD, of Shoe-lane, in the City of London, Chemical Manufacturers, for "Improvements in the manufacture of Tartaric and Citric Acids, and Tartrate of Potash and Soda." Dated 12th March, 1856. No. 598.

NOTICE is hereby given that the said EDMUND ALFRED PONTIFEX has applied by Petition to the Commissioners of Patents according to the Statute in that case made and provided, for leave to enter a Disclaimer of certain parts of the Specification of the said Letters Patent.

R. A. BROOMAN,
166 Fleet-street, London, Agent for the Patentee. (269)

TO MECHANICAL DRAUGHTSMEN.

WANTED, by the Proprietors of a large Engineering Establishment, a FIRST-RATE HAND. One who is used to Rolling and Fixed Railway Plant, and can take out quantities will be preferred.—Address, stating salary expected and where last employed, to P. C., 186 Strand, London, W.C. (274)

TO SHIPBUILDERS.

IRON SHIPS may be rendered FIRE-PROOF if internally fitted with Fibrous Slab in lieu of Deal.

Extract from a letter of the Captain of the Royal Bride Steamer, trading between Bristol and Melbourne:—"25th May, 1859.—From my experience of the last nine months in all climates, I have no hesitation in saying there is no kind of lining I know of equal to your Fibrous Slab for Iron Ships.—Yours, &c. (Signed), ALEX. NEWLAND."

PATENT WOOD OR FIBROUS SLAB COMPANY, (Limited)
15 Wellington-street North, Strand, London, W.C. (270)

TO RAILWAY COMPANIES, CONTRACTORS, AND OTHERS.

GEORGE NEIGHBOUR and SONS, OIL MERCHANTS,

Particularly invite attention to their PATENT ARGAND LAMP OIL, for Railway Roof and Signal Lamps; also to their EXTRA-REFINED ENGINE OIL, for Locomotive and Machine purposes. Prices forwarded on application.

127 HIGH HOLBORN, LONDON, W.C.
Agent at MANCHESTER—E. S. ROGERS, 33 Cannon Street. (281)

BRASS AND COPPER TUBES.

MUNTZ'S PATENT SOLID ROLLED BRASS AND COPPER TUBES, now extensively used on the principal Home and Foreign Railways, and for Marine Boilers by the Government and leading Steam-Packet Companies, are cheaper and more durable than the ordinary tubes.

Address, GEORGE RICHARDSON and CO.,
1 New Broad-street, E.C. (277)

FUEL AND STEAM ECONOMY.—Apply to Mr. LEE STEVENS, C.E., 1 Fish-street-hill, E.C. (243)

IMPORTANT TO COUNTRY MANUFACTURERS.

TO ENGINEERS, SHIP-BUILDERS, AND CHANDLERS, IRON FOUNDERS, TOOL MAKERS, AGRICULTURAL IMPLEMENT MAKERS, AND OTHERS.

A Practical Engineer and Member of the Institutions of Civil and Mechanical Engineers being in treaty for large and very commanding premises in Fenchurch-street (in direct line between the Docks and Mark-lane and the City), for the Exhibition and Sale of some Patented Articles of his own Invention, is desirous of undertaking the London Agency of one or two Firms of established reputation, and of whose manufactures samples, models, or drawings could be exhibited. The Advertiser having a large connection amongst Ship Owners, Engineers, and Scientific Agriculturalists, and attending the principal Agricultural Shows, possesses many facilities for forwarding the interests of those for whom he may act. To those desirous of having the use of a good London Office and of exhibiting their Manufactures in one of the best thoroughfares in Town; and, moreover, of being represented by a thoroughly practical Mechanic, the present is a very favourable opportunity. The terms proposed are a Commission on all business done in addition to a moderate rental, in proportion to the space occupied by the articles exhibited. Address, with full particulars, to C. M. E., 1 Parkside, Knightsbridge. (263)

THE IMPERIAL IRON TUBE COMPANY,

(SUCCESSORS TO GEORGE B. LLOYD & CO.)

GAS STREET AND BERKLEY STREET,

BIRMINGHAM,

Manufacturers of Wrought Iron Tubes & Fittings,

FOR GAS, STEAM, AND WATER.

PATENT GLASS ENAMELLED AND GALVANIZED TUBES,

AND

LAP-WELDED IRON BOILER TUBES.

(193)

SCOTT'S

PATENT GRASS SEED SEPARATOR,

which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from

PERENNIAL AND ITALIAN RYE-GRASS, &c.,

AND

SCOTT'S PATENT CARROT SEED BEARDING

AND

CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,

which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

Communications to be sent to the Patentee, J. SCOTT, 111 Drummond Street, Euston Square, London, N.W. (43)

STEAM CULTIVATION.

CHANDLER AND OLIVER

HAVE much pleasure in being able to state that they are now prepared to execute orders for their PATENT STEAM WINDING ENGINES AND PLOUGHS, for Cultivating Land by Steam.

The WINDING TACKLE can be fitted to Engines of any maker, and the Plough can be made to take any kind of apparatus necessary for Cultivating the Soil, such as Scarrifier Tines or Broad Shares, &c. Any Engine now used by Farmers can be fitted with the Tackle. It is light and simple, and an ordinary Farm Labourer can work it.

The Engine can be used for Thrashing without taking the Ploughing Tackle off, not requiring more than three or four horses to take it from place to place.

These Engines are very useful for Pile Driving or Drawing Ballast up inclined planes; at the same time they can be used for Pumping. Farmers will find them most useful for all purposes.

Messrs. CHANDLER and OLIVER are prepared to receive orders for separate Windlasses, which are light and simple, and generally useful.

For further Information apply to

ROBERT CHANDLER, ENGINEER, BOW, NEAR LONDON,

Or Mr. OLIVER, Farmer, Hatfield, Herts.

ILLUSTRATED CATALOGUES, WITH PRICES, WILL BE READY SHORTLY. (215)

TO STEAM SHIP BUILDERS, ENGINEERS, TOOL MAKERS, IRON MASTERS, AND OTHERS.

THE ADVERTISER, who has had considerable experience in Marine Engineering and Iron Shipbuilding, and who is an expert Draughtsman, is desirous of meeting with a permanent Engagement as London Agent, Manager of a Shipbuilding Yard, or to act in any capacity in which ample knowledge of Mechanical Details and a large connexion among Engineers, Ship Owners, and others, might be rendered available. The Advertiser having also been much engaged in working out some important patented inventions, would undertake to further the objects of those having property of this kind, either to dispose of or to bring into operation. Apply by letter, to M. E., MECHANICS' MAGAZINE Office, 166 Fleet-street. (250)

TO ENGINEERS, CONTRACTORS, EXPORTERS, AND OTHERS.

MESSRS. PAGE AND CAMERON will Sell by Auction on the premises, No. 27 Wharf-road, City-road (immediately opposite the Gutta Percha Works), on Tuesday, June 7th, at 12 for 1 o'clock, SEVEN NEW HIGH PRESSURE HORIZONTAL STEAM ENGINES; comprising two of 10-horse power, three of 14-horse power, one of 24-horse power, and one of 30-horse power; two Portable Engines of 5-horse power each; two very superior Slide and Screw Cutting Lathes, 7 in. centres and 7 ft. and 10 ft. beds; three useful Punching and Shearing Machines, for ⅜, ½, and ¾ inch plates; a Hand or Steam power Tea Packing Machine, by BURTON and SONS, London; Iron Hurdles and Fencing; Patent Cart Arms, &c., &c.

May be viewed two days prior to the Sale, and Catalogues had on the Premises, and of Messrs. PAGE and CAMERON, Land Agents and Surveyors, 64 Old Broad-street, London and St. Albans. (259)

EDWIN JEWITT, ENGRAVER ON WOOD AND DRAFTSMAN, 1 Pickett-place, Strand, near Temple-bar. Engineering, Scientific, and Mechanical Designs accurately engraved. Manufacturers and Tradesmen's Catalogues Illustrated. W.C. (84)

FOR SALE.

A 12-HORSE HORIZONTAL STEAM ENGINE and a 4-HORSE DIRECT ACTING STEAM ENGINE, with Fly-wheel Governors, &c., complete. Address, W. F. Plummer, 12 Albany-road, Camberwell. (188)

VULCANISED INDIA-RUBBER MACHINE BANDING is NOT AFFECTED BY WET, HEAT, OR COLD; does not stretch nor slip on the pulleys. HOSES for BREWERIES, &c., will NOT impart TASTE, SMELL, or COLOUR: also for conducting, or steam purposes. Washers, Valves, Sheets, Printing Blankets, &c., in Stock. Other Articles made to order. All Goods warranted to stand 300° Fahrenheit.

N.B.—Sole Contractors to the Lords Commissioners of the Admiralty.

DODGE and GIANDONATI (late DODGE, BACON, and Co), 44 St. Paul's Churchyard, London, E.C. (208)

TO ENGINEERS, INVENTORS, AND OTHERS.

A PRACTICAL ENGINEER of long standing prepares Original Drawings, Copies, and Tracings. Advice and Assistance given to Inventors in working out their Plans. Pupils taught privately. Terms moderate.

Apply to J. J., 171 Strand. (138)

THORLEY'S FOOD FOR CATTLE.—Every person having an interest in domestic or farm animals should obtain a supply of this celebrated and economical food, which will prove invaluable during the approaching season. For keeping horses in good condition, it is unequalled. Pigs fatten with surprising rapidity upon it, and their flesh increases in flavour and value. Cowkeepers will find great advantage in the increased quantity and improved quality of the milk during its use. All animals are benefited by it. A pamphlet on this interesting subject, accompanied by Testimonials from the principal Nobility, Gentry, and Agriculturists, forwarded on application. In Casks containing 448 Feeds (Measures enclosed). Price 50s., carriage paid to any Railway Station in the United Kingdom. Post Office Orders payable to JOSEPH THORLEY, 77 Newgate Street, London.

N.B.—The public are cautioned against being imposed upon by worthless imitations. (132)

BY ROYAL LETTERS PATENT.

CAPT. KYNASTON'S "LIFE HOOKS," by means of which boats may be disengaged with perfect safety from the usual tackles of a ship, whether she be moving rapidly ahead, going astern, or stationary. Approved and already adopted by many of the ships of the British and Dutch Navies, &c. This plan is so simple that the Hooks, with the trifling gear attached, may be applied to any boat in half an hour, or transferred from one to the other without difficulty, their use involving no addition to the ordinary fittings. Apply in London at Cunningham's "Patent Topsail" Office, 12 London-st., E.C.; or to the Patentee, through Messrs. Hallett & Co., 14 Great George-street, Westminster. (262)

WATER GAUGES—WATER GAUGES.—Sir,—We find your German Gauge Tube superior to any other, and strongly recommend it. We were compelled to abandon the use of our water gauge until applying your glass tube.

WILCOX and Co., Millwall Pottery Company.

These Tubes are superior to all others; being a clear white, no mistake can arise in working. Guaranteed to stand a pressure of 500 lb.

Extensively used on all the principal lines.

To be had only of E. MOORE, 55 Upper Marylebone-street, W.; and 72 Great Titchfield-street, W.

*** Price List of Gauge Fittings, &c., on application. (98)

CAUTION.

TO ARCHITECTS AND BUILDERS.—In consequence of numerous complaints, the Patentee begs to inform the above, that all genuine SMITH'S PATENT DOOR SPRINGS, for Swing Doors, are stamped with Name and Address, thus—SMITH, Patentee, 69 Princes-street, Leicester-square, London; and that Springs thus marked are warranted. SMITH'S PATENT WEATHER-TIGHT CASEMENT FASTENING AND SILL-BARS are admitted by all to be the most perfect invention for the purpose. Diagrams and List of Prices on application. (143)

RANSOME'S PATENTED PROCESS FOR PRESERVING STONE, CEMENT, STUCCO, &c.—By this process the softest and most friable Stone, Cement, or Stucco, can be rendered Impervious and Imperishable, DECAY AT ONCE ARRESTED AND PREVENTED.

For Particulars, Specimens, Illustrations, and Agencies, apply to Mr. Frederick Ransome, Whitehall Wharf, Cannon-row, Westminster; or Patent Stone Works, Ipswich. A Liberal Discount allowed to the Trade or to Shippers. (175)

EMIGRATION TO NEW YORK, CANADA, AUSTRALIA, NEW ZEALAND, EAST INDIES, CAPE OF GOOD HOPE, &c. All Classes of Passengers booked throughout in the Finest Steam and Sailing Packets. Full Particulars in our circulars for 1859, may be had gratis on application to F. S. GRAY and Co., 54 King William Street, City, and 6 Tower Hill, London; and at 35 Bath Street, Liverpool. (187)

TO BRASS FOUNDERS.

TO BE SOLD, the Patent-right of a New and Highly-approved EQUILIBRIUM WATER COCK or VALVE, suitable for Steam Boiler Feed Pipes, or any cases where the valve is required to be opened against pressure.

Address H., MECHANICS' MAGAZINE Office, 166 Fleet-st., where a Drawing may be seen. (151)

PUMPING MACHINERY.

GWYNNE AND Co., Engineers, London, manufacture and supply the following Machinery, of the most approved construction and with all the latest improvements:—Portable and Fixed Steam-Engines and Boilers of every description; Waterwheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the Supply of Towns, Cities, and Districts, and for the Irrigation of Coffee, Cotton, Indigo, Sugar-cane, and Rice Estates, for pumping out Coffer-dams, Canals, Dry Docks, Reservoirs, &c. They also manufacture and supply the Pumping and other Machinery for Paper, Pulp, and Fulling Mills, Breweries, Distilleries, Tanneries, Starch Works, Bleaching, Dyeing, and Calico Printing Works, Chemical Works, Silk, Cotton, and Flax Mills, and Manufactories in general. All Letters not paid will be refused. Illustrated Price Lists forwarded on receipt of Six Postage Stamps.—GWYNNE AND Co., Hydraulic and Mechanical Engineers, Essex-wharf, Strand, London.

For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (24)

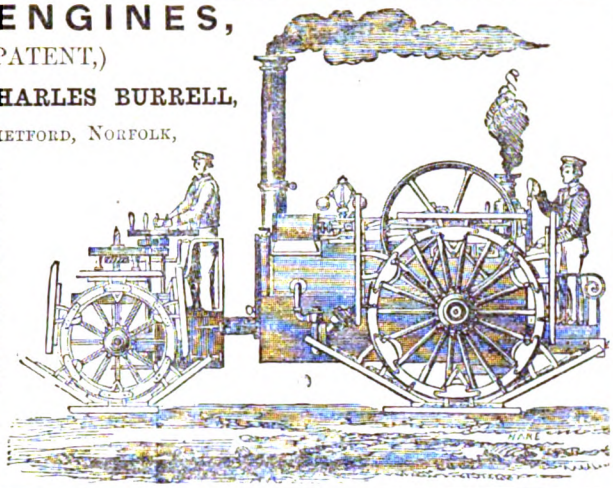
Digitized by Google

TRACTION ENGINES,

(BOYDELL'S PATENT,)

MANUFACTURED BY CHARLES BURRELL,

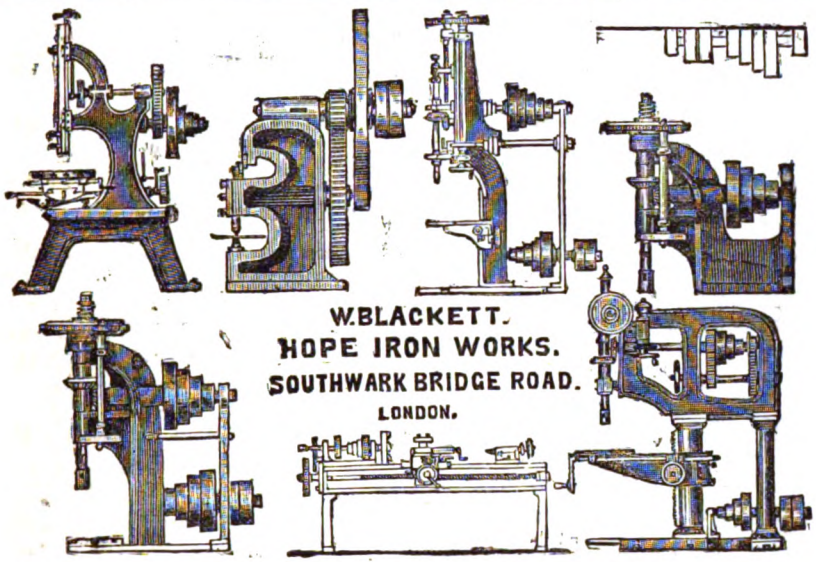
ST. NICHOLAS WORKS, THETFORD, NORFOLK,



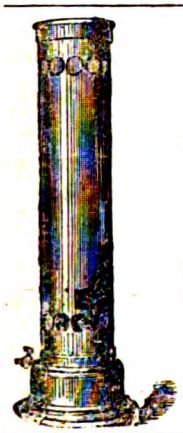
And ordered for India, Australia, and South America, may now be seen, complete and in course of construction at the above works. BOYDELL'S TRACTION ENGINES AND ENDLESS RAILWAY will draw heavier loads over good roads than any other traction engine, and on soft and bad roads will draw heavy loads where no other traction engine can move itself. All objection to the wear and tear of these Engines is entirely removed by the use of Charles Burrell's improved patent Wrought Iron Wheels, fitted with Rails and Tyre, as well as all the wearing parts, of Steel.

47 Apply also to Mr. Hemming, Mark Lane, E.C.

(40.)



W. BLACKETT has in Stock a variety of Vertical and Horizontal Steam Engines, Boilers, and Engineers' Tools, ready for delivery on the shortest notice. Apply as above. (70)



VENTILATION WITHOUT FLUES.

KUKLA'S PATENT STOVES,

At 18s., 25s., and 50s.

KUKLA'S newly-invented Deflagrator—the first and only perfect GAS STOVE. Guaranteed to burn without flue—without dust, smell, or smoke, producing a great and pure heat with the least expenditure of Gas.—*Vide Society of Arts' Journal.*

Patronised by the English and French Government.

Scientific in Principle,
Simple in Construction,
Healthy and efficient in use.

The Deflagrator Stove is cheap, portable, and suited for every situation; and from the principle on which it is constructed (viz., expanding to a sixfold volume the gas used) is capable of warming any given space more quickly and more thoroughly than any other means: while its addition forms a sure remedy for any ill-warmed or ill-ventilated apartments.

The 25s. Deflagrator warms a room of 2,000 cubic feet at a cost of 3d. per day.

The 50s. Deflagrator warms 5 to 6,000 cubic feet at a cost of 6d. per day (twelve hours).

Also, the Greenhouse Stove at 18s.

Patentee and sole Manufacturer, F. X. KUKLA, 194 Pentonville-road, London.

Country orders promptly attended to. Carriage free to any Railway in London.

Post-office Orders should be made payable to FRANCIS XAVIER KUKLA, General Office.

N.B.—Every Stove separately tested before sent out.

The New GAS COOKING STOVE for 10 persons, price £3. (103

A NEW DISCOVERY IN WASHING HOUSEHOLD LINEN.

NO FAMILY SHOULD BE WITHOUT HANCOCK'S UNIVERSAL WASHING MACHINE. It effectually cleanses the Crevices of Baby-linen, Collars, Wristbands, &c., without the possibility of injuring the Linen or Collars. Received 500 Testimonials.

PRICES.

No. 2 Washes 9 Shirts in from 3 to 10 minutes; or 4 Sheets in 5 minutes	£5 5 0
No. 3 Washes 12 Shirts in from 3 to 10 minutes; or 6 Sheets in 5 minutes	7 11 0
No. 4 Washes 18 Shirts in from 3 to 10 minutes or 12 Sheets in 5 minutes	12 12

And all other Articles in proportion.

J. L. HANCOCK, Sole Manufacturer and Patentee, 62 Pentonville-road, London. (37)

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.

Families by using this delicious VINEGAR, insure purity and effect a saving of 50 per cent. See "Report of Dr. Letheby, City Officer of Health, Dr. Hassall, of the 'Lancet' Commission, and others." Sold by the Trade, in Bottles, labelled and capsuled. Wholesale—63 King William-street, London-bridge, E.C. Six Quart Samples sent free to any Railway for 3s. 6d. (216)

GLADSTONE & Co., CONTRACTORS and ENGINEERS.

2 John-Street, Minories, London, E.C.,

Are prepared to ESTIMATE FOR and CONSTRUCT BRIDGES, PIERS, JETTIES, &c., in Iron, Wood, or Stone. Also to supply Cranes, Girders, Turntables, and Railway Work and Plant generally. (199)

A VALUABLE PATENT to be DISPOSED OF.—The Patentee will either dispose of the Patent or grant Licences to any party wishing to manufacture, or would join a person with capital to carry out the Patent.

Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (163)

as inferior kinds are often substituted.

Sold by all Chandlers, Grocers, &c., &c. (75)

TO BRASS-FOUNDERS, ENGINEERS, &c.

THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings; they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty per cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, muffles, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire-standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. (43

ON THE MODIFICATIONS WHICH THE SHIPS OF THE ROYAL NAVY HAVE UNDERGONE DURING THE PRESENT CENTURY, in respect to Dimensions, Form, Means of Propulsion, and Powers of Attack and Defence: together with a Letter on the Steam Navy of France. By Mr. E. J. REED, late of Her Majesty's Dockyard, Portsmouth; one of the Editors of the MECHANICS' MAGAZINE. (Republished by permission of the Council of the Society of Arts.)

ROBERTSON, BROOMAN, AND CO., MECHANICS' MAGAZINE and Patent Offices, 166 Fleet-st., London. (159)

NEW MONTHLY PERIODICAL.

On the 30th inst. was Published, Price 6d., No. 1 of

THE

LITERARY RECORD.

THE LITERARY RECORD will, in many respects, render a service hitherto unperformed by any Publication, as it will contain Articles of General Interest on Literature and Education, Analytical Notices of New Books, a complete Monthly Catalogue of New Publications, Indices of the principal Magazines and Reviews, a Classified Index of the *Times*, a Digest of the Literary, Scientific, and Educational History of the Month, and a great variety of other useful Information on Literature, Publishing, &c.

London: KENT & Co. (219)

Third Edition. Price 1s. 6d., or on Black Rollers and Varnished, 3s. 6d.

A REDUCED ORDNANCE MAP of England and Wales, and the Southern Parts of Scotland; with all the Lighthouses, Sands, and Soundings round the Coast accurately laid down, and showing all the Railway and Mail Packet communications. By J. COOPER. Also, a MAP of the BRITISH ISLES, 5 ft. 6 in. by 5 ft., mounted on Mahogany Rollers and Varnished, price 30s. The same Map, on Black Rollers and Varnished, 25s.

Published by W. EVERETT and SON, 34 Bouverie Street, City, E.C. (179)

New Publications of H. Bailliere.

ENGINEERING PRECEDENTS FOR STEAM MACHINERY; embracing the Performances of Steam Ships, Experiments with Propelling Instruments, Condensers, Boilers, accompanied by Analysis of the same; the whole being Original Matter. By B. F. ISHERWOOD, Chief Engineer of the U. S. Navy. 8vo, Plates, 6s.

MULLER'S PRINCIPLES OF PHYSICS AND METEOROLOGY; with 530 Woodcuts and Two Coloured Engravings. 8vo, 18s.

WEISBACH'S MECHANICS OF MACHINERY AND ENGINEERING. Two Vols., 8vo. with 900 Woodcuts, £1 19s.

KNAPP, RONALDS, AND RICHARDSON'S CHEMICAL TECHNOLOGY; or, Chemistry in its Applications to the Arts and Manufactures.—Fuel and its Applications. Vol. I., in 2 Parts, 8vo, most fully Illustrated with 433 Engravings and 4 Plates. £1 16s.

(This is the Second Edition of Knapp's Technology.)

Vol. II., 8vo, contains: Glass, Alum, Potteries, Cements, Gypsum, &c. With numerous Illustrations, £1 1s.

Vol. III., 8vo., contains: Food Generally, Bread, Cheese, Tea, Coffee, Tobacco, Milk, Sugar. With numerous Illustrations and Coloured Plates, £1 2s.

QUEKETT'S (JOHN) PRACTICAL TREATISE ON THE USE OF THE MICROSCOPE. Third Edition, with 11 Steel and numerous Wood Engravings. 8vo., £1 1s.

GRAHAM'S ELEMENTS of CHEMISTRY, including the Application of the Science in the Arts. Second Edition, with numerous Woodcuts. 2 vols., 8vo., £2.

NICHOL'S ARCHITECTURE OF THE HEAVENS. Ninth Edition, with 23 Steel Plates and many Woodcuts. 8vo., 16s.

MITCHELL'S (J.) MANUAL of PRACTICAL ASSAYING. For the use of Metallurgists, Captains of Mines, and Assayers in general. Second Edition, much enlarged, with Illustrations, &c., £1 1s.

QUARTERLY (THE) JOURNAL OF THE CHEMICAL SOCIETY. Vol. XI., 8vo., 1859, 13s.

H. BAILLIERE having a house in France, America, and Spain, is enabled to supply all Foreign Scientific Publications as soon as published. He also begs to call attention to his Large Stock of Scientific works, of which a Catalogue will be sent on application.

London: H. BAILLIERE, Publisher, 219 Regent-street. (136)

STEAM ENGINES.

FOR SALE, a superior HIGH PRESSURE HORIZONTAL STEAM ENGINE of 6-horse power, 8-inch cylinder, and 1-foot 6-inch stroke. One of 8-horse power, 10-inch cylinder, and 1-foot 6-inch stroke. One of 10-horse power, 12-inch cylinder, and 2-feet stroke. Two of 14-horse power, 14-inch cylinders, and 2-feet stroke; and one of 30-horse power, 20-in. cylinder, and 3-ft. stroke.

Apply to Messrs. PAGE and CAMERON, 64 Old Broad Street, E. C., London. (124)

ENGINEERS' TOOLS FOR SALE.

A SINGLE-GEARED DRILLING MACHINE.

A DOUBLE-GEARED SELF-ACTING DRILLING MACHINE.

A SELF-ACTING PLANING MACHINE, 6ft. 6×30×30.

A BOLT AND NUT-SCREWING MACHINE, ¼ to 1½ inch.

A SELF-ACTING NUT-SHAPING MACHINE.

A PORTABLE PUNCHING AND SHEARING MACHINE.

A POWERFUL DOUBLE-ENDED PUNCHING AND SHEARING MACHINE.

A SET OF PLATE-BENDING ROLLERS, &c., &c.

To be seen at KENT IRON WORKS, Bridge-street, Greenwich. (268)

PATENT HEAT DIFFUSERS.

BY the USE of DUNCAN, GWYNNE, and C. WYE WILLIAMS' PATENT HEAT DIFFUSERS, the maximum of STEAM POWER is realised from the fuel used in Steam Boilers. They are exceedingly simple, can be applied in a few hours, and do not require any alteration in the existing arrangements of Boilers in use.

The Patentees are prepared to accept for Royalty a part of the value of the Fuel saved by the use of their Apparatus.

Every information may be had on application to the Manufacturers, GWYNNE and CO., Engineers, Essex-street Wharves, Strand, London. (251)

THE USE of a CORNISH HIGH-PRESSURE BOILER is required for a few weeks after usual working hours, to complete some experiments on the evaporation of water under varying pressures. Parties willing to treat are requested to address, stating full particulars and terms, to X. Y. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street, E.C. (248)

TO SHIPBUILDERS, SHIPOWNERS, CAPTAINS, &c.

THE ANCHOR COMMITTEE AFFIRM "TROTMAN'S PATENT ANCHOR" to be superior to all others, possessing Thirty-Five Per Cent. more Holding Power than either Porter's or Roger's, and equivalent in all respects to ordinary Anchors of 28 per cent. greater weight.

"This appeared to the Committee of vast importance to the Shipping Interests, &c."

(Vide their Official Report, 1853, "On the relative merits of different descriptions of Anchors," sanctioned and approved by the Admiralty.)

THE ANCHOR COMMITTEE

Nominated by the Lords Commissioners of the Admiralty "to investigate and determine the relative merits of Anchors," in compliance with a requisition from the principal Shipowners, Underwriters, &c., of the United Kingdom.

Rear-Admiral the Hon. Sir M. Stopford, K.C.B., Chairman.

Capt. Superintendent Charles Hope, R.N., Her Majesty's Dockyard, Sheerness.

Captain George Rodney Munday, R.N., Her Majesty's Ship "Nile."

Jonathan Aylen, Esq., R.N., Master Attendant, Her Majesty's Dockyard, Sheerness.

James Tonkin, Esq., Master, R.N., Her Majesty's Ship "Waterloo," 120 guns.

William Schaw Lindsay, Esq., M.P., &c., &c.

Duncan Dunbar, Esq., Chairman of General Shipowners' Society; Do. Mercantile Marine Board, London. Member of the Committee of "Lloyd's Register" of Shipping, &c.

Anthony Ridley, Esq., Vice-Chairman of Mercantile Marine Board; Member of the Committee of "Lloyd's Register" of Shipping, &c.

William Drew, Esq., Member of the Mercantile Marine Board; Member of the Committee of "Lloyd's Register" of Shipping, &c.

William Phillips, Esq., Member of the Committee of "Lloyd's Register" of Shipping; General Shipowners' Society, &c.

George Marshall, Esq., Member of the Committee of "Lloyd's Register" of Shipping; General Shipowners' Society, &c.

THE INTERNATIONAL JURY AT PARIS

Also awarded this Invention the First Class Medal, 1855.

Licensed Makers of Trotman's Improved Anchors:—

Messrs. Hawks, Crawshay, and Sons, Newcastle-on-Tyne,
" John Abbott and Co., Park Works, Gateshead, Durham,
" J. and E. Lumsden, Strand Iron Works, Sunderland,

REMARKS. — Our Metal Market continues extremely quiet; very little business doing, and scarcely any alterations in price.

LAWRIE AND HAGGER, Metal Brokers.
33 Lombard-street, E.C.

LIST OF MISCELLANEOUS TENDERS INVITED, AND ENGAGEMENTS OPEN.

The tenders and vacancies which appear in this weekly list are not repeated in succeeding numbers.

PIER OR JETTY, *Bournemouth.*—According to plans, &c., by G. Rennie and Sons, C.E., 6 Holland-street, London, where, and at the Commissioners' offices, Bournemouth, they may be seen. Tenders to the Commissioners, June 14.

PIER, *at Fishguard.*—Plans at the office of Messrs. Goode and Owen, High-street, Haverford West, or at Mr. Wm. Vaughns, Main-street, Fishguard. Tenders to June 10.

BARRACK WORKS, *Deconport.*—1st. Two ablution rooms; 2nd. putting up ceilings, &c.; 3rd. building wall to portion of cliff; 4th. building wall; 5th. for completing railroad. Information, Royal Engineer's office, Devonport. Tenders to June 14.

LAYING DOWN PIPES, *Merthyr Tydfil.*—Specifications and forms for a guinea. Mr J. W. Russell's Clerk, to the Local Board of Health. Tenders to June 8.

SEWERS, *West Ham*, within the sub-districts of Hallsville, Caming-town, and Plaistow. Specifications, &c., office of Mr. Wm. J. Barsham, solicitor, Stratford-green, E., or at office of Mr. R. Rawlinson, 34 Parliament-street, Westminster. Tenders to June 13.

ROOFING TEN HUT-STABLES WITH ASPHALTE FELT, *Woolwich.*—Drawings, Royal Engineer Office, Mill-hill, Woolwich.

CHAPEL, *Crediton, near Exeter.*—Drawings, Mr. Wm. Braffords, Park-street, Crediton. Tenders to June 13.

SCHOOL REPAIRING, *Plumbland, Cumberland.*—Information at the School-house. Tenders to June 10.

RESIDENCES.—For second and head masters of the Felstead Grammar School. Plans, offices of Messrs. Beadle, Son, and Chancellor, Chelmsford, Essex. Tenders to June 20.

COTTAGES, *Woods and Forests.*—And the alteration of Potter's Hill Lodge, Whichwood, Oxfordshire. Plans, Churchill Arms, Ascot, Oxon. The sites, by the Clerk of the Works, on the spot. Tenders at noon, 1 Whitehall Place, June 7. Further particulars, Mr. J. Cluton, 9 Whitehall Place.

HOUSE, COTTAGE, AND TWO FARMSTEADS, *South Hyme, near the Sleaford and Boston Railway.*—Plans, Mr. Browning, architect, Stamford. Tenders to June 21st.

HOUSES AND SCHOOL-ROOMS, *Newton in Makerfield.*—Drawings at Offices of Mr. Wm. Poulson, Architect, Newton in Makerfield. Tenders to June 8th.

HOUSES AND FARMSTEAD. — Four on the Counthorpe Estate, between the Corby and Little Bytham stations, on the Great Northern Railway. Plans, &c., Mr. Edward Browning, architect, Stamford. Tenders to June 21st.

PIG LEAD, *India Board.*—Tenders before 11 o'clock, June 7.

PLANS FOR CEMETERY, CHAPELS, AND LODGE, *Oundle.*—Information from Clerk to New Burial Board, Oundle. Plans to June 18th.

BARRACKS WORKS, *Chatham.*—Solitary cells, works, and repairs. Particulars of the Surveyor, Chatham. Tenders June 13, War-office.

CHAIRS AND FASTENINGS, *Victoria Railway.*—2,000 tons of chairs, 250,000 trenails, 125,000 keys. Specifications, 4 Abchurch-lane, London. Further information, S. K. Brunel, Esq., 18 Duke-street, Westminster. Tenders, June 9, to De Pass and Sons.

PLANS AND SPECIFICATIONS FOR GAS WORKS.—Particulars of the Gas Committee, Narbeth, Pembrokeshire. £5 will be given for the plan approved.

BATTERIES, *War Office.*—Extension of the Western, including the construction, of expense, magazines, and shell recesses, at Hurst Castle, near Lymington, Hants. Plans, &c., Royal Engineer, Gosport. Tenders, War Office, June 6.

TO GASFITTERS, *Middlesex.*—Contracts for painting and keeping in repair the lanterns and fittings of the gas-lamps in parish of St. Mary, Islington. Forms of tender and particulars at the vestry offices. Tenders to June 8th.

SEWERAGE, *Middlesex.*—1,790 feet of sewer, 3 feet 9 inches high, 2 feet 6 inches wide. The form of tender and plans and specifications at the vestry offices of St. Mary, Islington (surveyor's department). Tenders to June 8th, 21 Milner-square, Islington.

NEW ROAD, &c., *Tottenham.*—Copy plan, &c., at 10s. 6d.

BRICK TANK at *Carshalton.*—Copy plan, &c., 10s. 6d., on application to Messrs. Gardner and Co., surveyors, 1 and 2 Southampton-street, Camberwell.

HOUSE, COTTAGE, AND TWO FARMSTEADS.—South Kyml, near the Sleaford and Boston Railway. Plans, Mr. E. Browning, architect, Stamford. Tenders to S. Hutchinson, Esq., Manthorpe Lodge, to June 21st.

SURVEYOR WANTED.—For the Pendleton district of the Borough of Salford. Whole time, £150 per annum. Application, Chairman, Pendleton District, Highway Committee, June 8.

CONDY'S PATENT FLUID, or NATURAL DISINFECTANT,

Not only Deoderizes but Disinfects perfectly, and DESTROYS FOR EVER the cause of infection.

Is not poisonous, as it may be used to purify water. Evolves no noxious or unpleasant gas. Cannot be mistaken for any other fluid, thereby preventing death and disease; and is therefore the best, safest, cheapest, and most pleasant disinfectant ever introduced.

This fluid has been examined and reported upon by the Board of Health, all the most eminent Men and Chemists of the day, in all cases in the most satisfactory manne possible.

The Public are recommended to use this Fluid, properl diluted with water, frequently and habitually in larders, sculleries, dairies, musty cakes, sick rooms, close places, &c., as it has numerous advantages, and can be used with certain immediate success and perfect safety.

Sold in Quart Bottles, 4s.; Pints, 2s.; Half-pints, 1s.; and in bulk, 10s. per Gallon.

Free to Railway on receipt of Order or Stamps. (238)

WILLIAM WARNE & CO.,

Manufacturers of all descriptions of

VULCANIZED INDIA-RUBBER,

SHEETS, WASHERS,

HOSE-PIPES, TUBINGS, ETC.;

Sole Manufacturers of

WARNE'S PATENT INDIA-RUBBER TUBULAR MATS,

For Doorways, Stairs, Baths, Carriages, Ships, &c., which never clog, require no beating, and, unlike all other Mats, are readily cleansed by water. Indestructible by damp, these Mats are especially suitable for uncovered Passages, and out of door purposes. Seat Mats, Housemaids' Mats, and Brushes for wooden and stone floors.

Sole Manufacturers of

WARNE'S PATENT MINERALISED IMPROVED KAMPTULICON,

Possessing advantages over all the ordinary makes, in exceeding toughness, and flexibility, and consequent durability, while neither heat nor cold has effect upon it. Widths, 3/4s., 4/4s., 6/4s., and 7/4s. Substances, ⅛, ¼, and thicker if required. Length, 20 to 25 yards.

Patentees of the Red Mineralised India Rubber—the only Rubber not affected by Oil.

Warehouse, 9 Gresham-street West, E.C. Mills, Tottenham, N. (244)

BRASS ENGINE and BOILER FITTINGS.—

Water-Gauges for Glasses, ½ ⅝ ¾ inch diam.
26/, 30/, 35/ each.
With Guards, 32/, 37/6 "
Gauge and Pet-Cocks, from 3/6 each.
Whistles, with 1½ 2 2½ 3 4 inch bell.
12/6, 18/6, 26/, 45/, 50/ each.
Blow-off Cock for Portable Engines, 12/6 each.
Oil Cups, of all kinds, from 18/ per dozen.
Ball Clacks, Balls, Cages, and sets complete.
Forsyth's Safety Boiler Plugs, 12/6 and 18/ each.

WILLIAM WALLER, Uddingston, by Glasgow. (214)

MR. WALTER HALL is prepared to Grant Licences, or to Dispose of his Patent for working Railway Breaks. Particulars to be had of Mr. HALL, who may be addressed by letter to the care of the MECHANICS' MAGAZINE, 166 Fleet-street, E.C. (217)

TO MARINE ENGINEERS, OR SHIP-BUILDERS.

THE PROPRIETOR of a VALUABLE PATENT for Double-expansive Marine Engines (by which great economy of space and fuel is obtained) is desirous of entering into arrangements with a respectable firm for the construction of the same. An adequate portion of the patent-right would be assigned by the advertiser to any firm taking the matter up; and he would render all assistance in his power, either in London or elsewhere, amongst ship-owners (to many of whom he is well known), in obtaining contracts, &c. Unexceptionable references given. Address C. E., MECHANICS' MAGAZINE Office, 166, Fleet-street. (76

GAS EXPLOSIONS PREVENTED.

USE THE TUBES AND FITTINGS MADE BY JOHN RUSSELL and Co. (Established at the commencement of gas-lighting), whose goods are all well tested, and warranted.

J. R. and Co. supplied Thomas Cubitt, Esq., for all his houses in Belgravia, the Queen's Palace, &c., which localit is proverbially free from gas.

J. R. and Co. are the Inventors of the Lap-Welded Tube for Steam Boilers, and have recently obtained a Patent fo an improvement in them.

J. R. and Co. are the holders of the First Prize Medals for Gas-Tubes and Fittings and Boiler Tubes.

TO ENGINEERS, ARCHITECTS, PATENT AGENTS, &c.

PHOTOGRAPHS OF THE HIGHEST CLASS and of any size, taken and reproduced at a most moderate rate of charge. Reproductions of faultless accuracy, of Machinery, Models, Drawings, &c. Orders attended to in town and country. Estimates forwarded.

SPENCER, READ, & Co., 4 Agar-street, Strand, W.C. (90)

NOTICE OF REMOVAL.

WILLIAM DRAY AND CO.,

FROM SWAN LANE TO

ADELAIDE PLACE, LONDON BRIDGE. (227)

SPIRAL TUBE BRUSHES made with Wire or Whalebone for Tubes of
1¼ 1½ 2 2½ 2¾ 3 3½ 4 4½ 5 ins. diam.
24/, 25/, 26/, 28/, 30/, 32/, 35/, 38/, 42/, 46/, 50/ per doz

Quantities of Two Dozen and upwards delivered in London.

WILLIAM WALLER, Uddingston, by Glasgow. (213)

ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street, Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 130 feet in length, to work by hand or Steam Power.

Hot-Water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (44)

ENGINEERS' TOOLS.

FOR SALE, a Self-acting Slide LATHE, 11-inch Centres, and Bed 12 feet long, complete; and TWO PORTABLE PUNCHING and CUTTING MACHINES, one suitable for ½-inch plates, and the other for ⅝-inch plates, both adapted for steam or hand power.

Apply to Messrs. PAGE & CAMERON, 64 Old Broad Street, E.C. (117)

ENGINEERING BUSINESS FOR SALE.

OWING to the continued ill health of the Proprietor, the first-class business of an Engineer and Crane and Block Maker is offered for sale. It has been established in the Metropolis for nearly 30 years, and has enjoyed extensive patronage amongst Brewers, Manufacturers, Warehousemen, and others, in and about London; the business done amounting to nearly £8,000 per annum. About £3,200 would be required, (part of which, however, may remain for any reasonable time on good security,) which is the bare value of the tools, patterns, and stock in trade. The premises, including good dwelling-house, very conveniently situated, and capable of accommodating from 60 to 70 hands, are held upon a long lease, at an extraordinary low rental, not exceeding £100 per annum, taxes included. Many of the tools are nearly new, and of the best construction. The present proprietor, who relinquishes the business solely on account of ill health, would give every assistance in his power to those succeeding him; and as his foreman, who has been with him for nearly ten years, is thoroughly acquainted with the practical parts of the business, any gentleman desirous of commencing as a manufacturing engineer would find the present a very favourable opportunity. As all accounts have been, for many years past, collected quarterly, a very small amount, say £800, would suffice as working capital. Full particulars may be obtained by application to E. E. ALLEN, Esq., MECHANICS' MAGAZINE Office, 166 Fleet Street, E.C. (180)

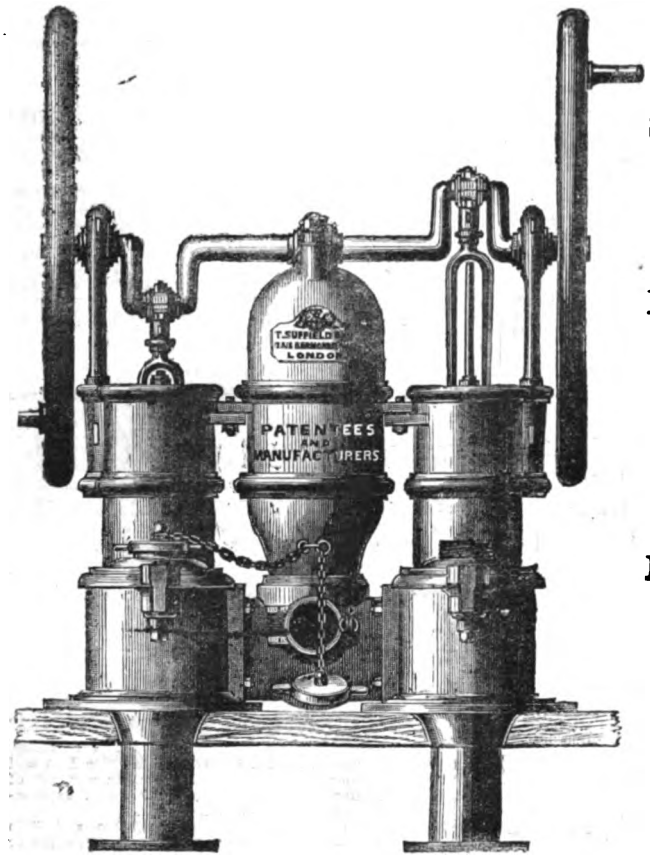
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS, SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

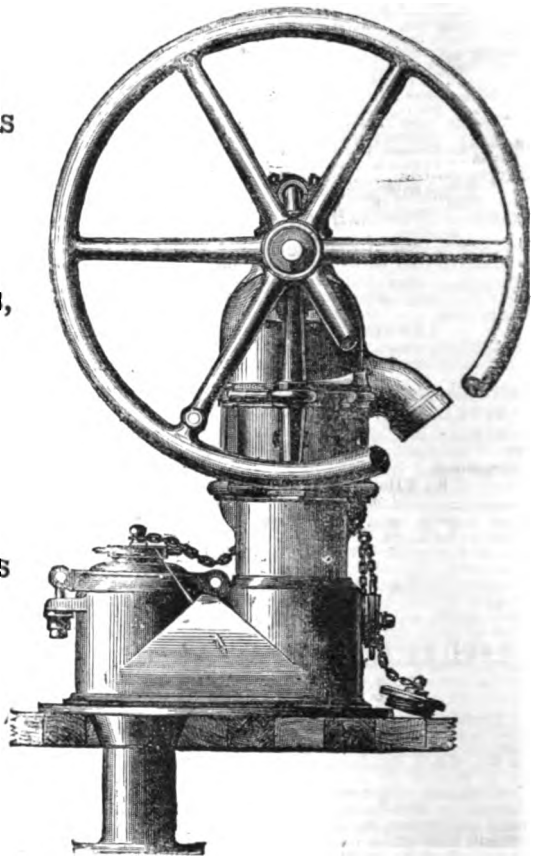
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangement either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps; the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board: the rapidity with which they can be converted into Fire Pumps, or be applied to the Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Works or Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require suc Stores, together with a further saving in the cost of such Articles.

IMPROVED MACHINERY FOR AGRICULTURISTS.

RICHARD GARRETT & SONS,

LEISTON WORKS, SAXMUNDHAM, SUFFOLK,

(ESTABLISHED A.D. 1778),

EARNESTLY solicit the continued support of their numerous Friends, Agriculturists, Shippers, and others; the additions made to their Works during the present year, in the erection of new sets of Workshops, fitted with the best mechanical appliances for producing Machinery of the most improved construction, expeditiously and economically, justifies their soliciting increased support, while their leading reputation as Inventors and Manufacturers of FIRST CLASS Agricultural Machinery, is a sufficient guarantee that every Machine supplied from Leiston Works will prove to the entire satisfaction of the purchaser.

R. G. & S. are now manufacturing the following Machines and Implements, which they guarantee to be thoroughly efficient in every respect:—

PORTABLE AND FIXED STEAM ENGINES. } From 4 to 40 Horse Power, suited for every kind of work
SELF-PROPELLING AND TRACTION ENGINES. } to which Steam Power is applied.
STONE GRINDING MILLS.
MORTAR AND PUG MILLS.
MILLWRIGHTS' WORK of all kinds.
SAWING MACHINERY, from 4 to 20 Horse Power.
BRICK AND TILE MACHINES.

IMPROVED SETS OF FARM MACHINERY, for Large Occupations.
PORTABLE AND FIXED MACHINERY, for Thrashing and Dressing Corn.
THE PRIZE BOLTING AND OPEN-DRUM HORSE-POWER THRASHING MACHINES.
CORN DRESSING MACHINES, for Hand, Horse, Water, and Steam Power.
BARLEY AVELLING MACHINES.
CHAFF CUTTERS, for Hand, Horse, Water, and Steam Power.
PATENT TURNIP CUTTING AND PULPING MACHINES.

THE PRIZE CORN AND SEED DRILLS.
PRIZE CORN AND SEED DRILLS WITH MANURE APPARATUS.
PRIZE SEED AND MANURE DRILLS.
LIQUID, SEED, AND MANURE DROP DRILLS.
CHAMBER'S PATENT BROADCAST MANURE DISTRIBUTOR.
GARRETT'S PATENT HORSE HOE for all Crops.
PATENT REVOLVING HOES for Root Crops.
IMPROVED PLOUGHS AND REAPING MACHINES.
&c. &c. &c.

Of which full detailed particulars will be found in R. G. & SONS' ILLUSTRATED CATALOGUE, sent postage free to any address, in English, French, or German; and any of the above Machines will be shown in operation at R. G. & Sons' Farm, near the Works, on their receiving a few days' notice.

A Copy of R. G. & SONS' new COLONIAL LIST will be forwarded free to any of the Colonies, and Shippers will be supplied with these lists, with their names and addresses printed on, free of charge, by making application for the same.

ADDRESS—R. GARRETT & SONS, LEISTON WORKS, SAXMUNDHAM, SUFFOLK. (161)

CLAYTON, SHUTTLEWORTH, AND CO.,

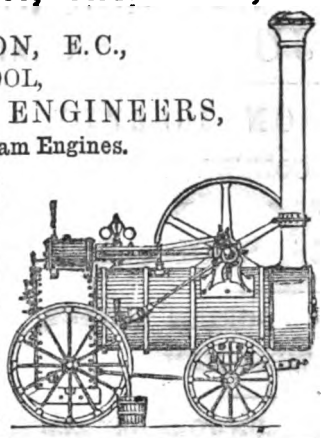
OF LINCOLN,

78 LOMBARD STREET, LONDON, E.C.,

AND 36 DALE STREET, LIVERPOOL,

AGRICULTURAL AND GENERAL ENGINEERS,

And Manufacturers of Portable and Fixed Steam Engines.



Combined Threshing Machines, which dress the corn ready for market at one operation. Grinding Mills, Saw Benches, Pumps for Irrigation and Mining purposes, with all necessary gearing for being driven by steam power. Full particulars and estimates given on application to the above address.

C. S. and Co.'s PORTABLE STEAM ENGINES are adapted for every purpose to which steam-power can be applied. When intended for winding, they are fitted with reversible link motion and winding gear. They are easy of removal, as may be seen by the engraving, and can be set to work immediately on arrival.

C. S. and Co. are now doing an extensive foreign and colonial business, and are prepared to send off engines and machinery of the before-mentioned kinds in a few days from the date of order. They would also call attention to the important *reduction in prices* made for the new year.

For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (23)

TO STEAM SHIP OWNERS, ENGINEERS, AND OTHERS.

How's Patent Steam Engine Counters, can be read at sight.

These Counters register the number of revolutions made by an engine or other mechanism. They may be used for ascertaining the duty of Pumping Engines and Water-wheels; the revolutions on board a steam-vessel; to calculate the slip of the propeller; and in a locomotive to test the slip of the wheels.

How's Patent Salinometer, for Steam Boilers using Salt Water.

By these, the density of the water in the Boiler is at all times accurately shown, and a saving of boiler and fuel is effected. They are adopted by the Admiralty, the Honorable Trinity Corporation, and others. Copies of Testimonials from Messrs. Penn, Messrs. Maudslay, and others, will be forwarded on application.

How's Engine-Room Telegraph, for communicating between Captain and Engineer. Society of Arts Prize Medal, 1855.

is a Mechanical Telegraph, and by its peculiar construction, error or misunderstanding is rendered impossible. It now extensively adopted, and gives great satisfaction.

How's Patent Fresh Water Apparatus for Ships' Use.

This apparatus is designed for the distillation of Fresh from Salt Water; and on long voyages, and where the supply of water is scanty, it will be found invaluable. Testimonials may be seen.

Patent Steam Pump and Fire-Engine for Ships' Use.

This Steam-pump occupies but a small space; works perfectly noiselessly, and throws an immense volume of water. An Illustrated Circular of Fresh Water Apparatus and Steam-pump combined, free on application.

How's Patent Machine for Cutting Bolts, Rods, Spindles, Wire, &c.

Simple in construction, inexpensive, occupies but little space, and will not easily get out of order.

A Pamphlet Illustrative of the above, sent free by post, on application to

A. P. HOW, ENGINEER,

81 MARK LANE, LONDON.

EVERY DESCRIPTION OF ENGINEERS' TOOLS, ENGINE ROOM STORES, &c., &c., SUPPLIED. (89)

IMPORTANT TO MANUFACTURERS, MILL OWNERS, &c.

GUTTA PERCHA MILL BANDS.

THE GUTTA PERCHA COMPANY beg to state that the increasing demand for the Gutta Percha Strapping for Driving-bands, Lathe-straps, &c., fully justifies the strong recommendations they have everywhere received.

Their durability and strength—permanent contractability and uniformity of substance—their non-susceptibility of injury from contact with oils, grease, acids, alkalies, or water—and the facility with which the only joint required can be made in bands of from 200 to 300 feet long—render them superior to leather for almost all working purposes, and decidedly more economical.

TESTIMONIALS.

IMPORTANT ANNUAL SAVING.

From TRUMAN, HANBURY, BUXTON, & Co., Brewery, London.

"In reply to your inquiry, we have much pleasure in bearing our testimony to the advantages, both as regards economy and saving of time, effected by the use of your Patent Gutta Percha Bands in lieu of Leather Straps. The stoppage of one portion of our works through the failing of the leather strap used to be of daily occurrence—but with this annoyance we are now never troubled. We have had these straps in operation for nearly three years, and are assured by our Engineer that *they effect a saving to us of at least* THIRTY POUNDS *a year*."

From JAMES ABERNETHY & Co., Fury Hill Foundry Aberdeen.

"We have now had Gutta Percha Bands working here *for three years*. One of them has been driving the fan blast for our smith's shop for all that time, and for anything we see, may drive it as long again. The speed of the fan is but 1,200 per minute. We have used them with complete satisfaction, driving circular saws, and in some cases where leather bands would have been quite inapplicable from damp. We have uniformly endeavoured to have the drums and pulleys so proportioned to the strain, as that there is no chance of the band slipping; and with this precaution, and taking care in using *cross bands that they do not rub*, we are quite satisfied that they are superior in every respect to leather—stronger at the same weight, and keeping quite straight in working—requiring no lacings, and very seldom any repairs."

WATER POISONED BY LEADEN PIPES.

The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dick, of Bonchurch, Isle of Wight.

POISONED WATER PREVENTABLE

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha Tubing. Nothing can be better. I have also recommended it to others, who have adopted the expedient."

A variety of Gutta Percha Articles, such as Mill Bands, Tubing, Sheet, Soles, Pump Buckets, Bosses, Union Joints, Bottles, Bowls, Flasks, Curtain and Cornice Rings, Solid Frames, Galvanic Batteries, &c., &c.

MANUFACTURED BY THE

Gutta Percha Company, Patentees,

18 WHARF ROAD, CITY ROAD, LONDON,

AND SOLD BY THEIR

WHOLESALE DEALERS IN TOWN AND COUNTRY. (29)

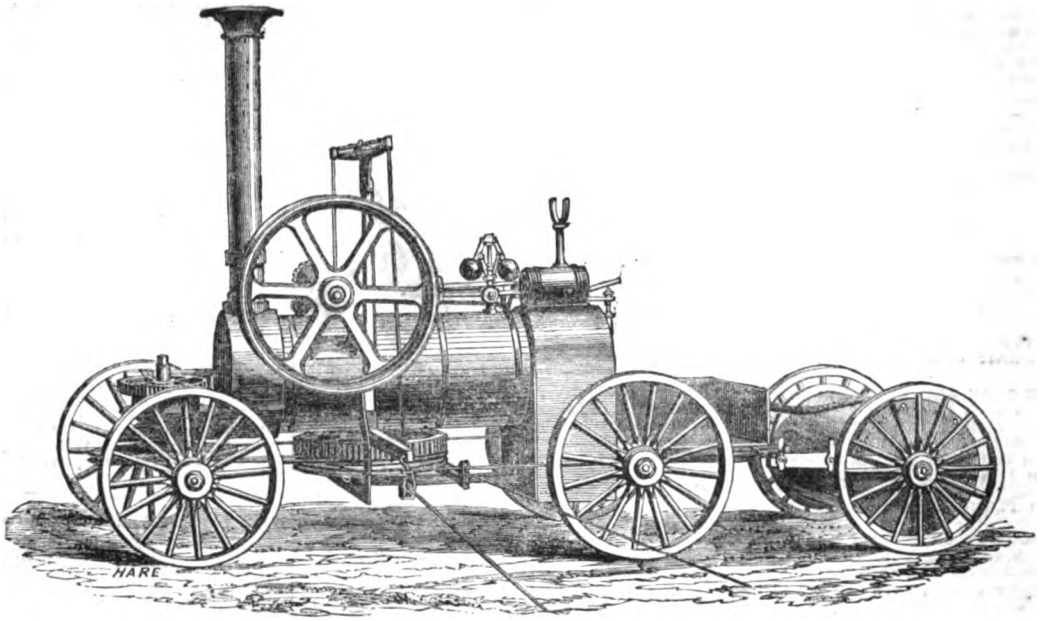
FOWLER'S PATENT STEAM PLOUGH.

THIS IMPLEMENT HAS GAINED THE FOLLOWING PRIZES:—

At STIRLING, 1857 - - - - - £260
At CHESTER, 1858 - - - - - £500
At NORTHALLERTON, 1858 - - - - £50



At NORTHALLERTON (Lord Bolton's Prize), 1858 £25
At LONDONDERRY, 1858 - - - - - £50
At STIRLING, 1858 - - - - - - £60

A CUT OF FOWLER'S STANDARD ENGINE, WINDLASS, AND WATER-CART.

ILLUSTRATED CATALOGUES, WITH REDUCED PRICES OF PLOUGHS, WILL BE READY SHORTLY.

FOR FURTHER PARTICULARS APPLY TO

JOHN FOWLER, JUN., 28 CORNHILL, LONDON, E.C. (261)

JOHN HENDERSON PORTER,

ENGINEER AND CONTRACTOR,

PATENTEE OF VARIOUS IMPROVEMENTS IN THE CONSTRUCTION OF

IRON BUILDINGS, BRIDGES, ROOFS, AND FLOORS,

IRON BUILDING AND ROOFING WORKS,

GAS STREET, BIRMINGHAM.

RAILWAY, SHIP, AND BUILDERS' IRONWORK OF ALL KINDS.

Roofs and Bodies of Luggage Vans, Trucks, and Coal Waggons.
Cast and Wrought Iron Columns, Stanchions, and Girders.
Ties, Straps, King-heads, Shoes, &c.
Iron Punts for Sugar Estates, &c., &c.
Tanks, Casks, and Barrels.
Iron Wheelbarrows, Cart Bodies, &c.
Hay Racks, Mangers, Sheep Cribs, and Cattle Troughs.
Rick Stands, and Sliding Roofs of Wrought Iron.

SUBJECTS ILLUSTRATED IN LITHOGRAPHED SKETCHES.

The application of Corrugated Iron Roofing Plates to Roofs of Timber Framing, particularly suitable for the Colonies, Railway Carriage Sheds, and Station Roofs; Iron Sheds for Sugar and Coffee Estates, for Manufactories, Weaving Sheds, &c.; Iron Roofs for Churches, Farm Buildings, Gasworks, &c.

Iron Buildings, viz.—Warehouses, Sugar Refineries, Market Houses, Railway Stations, Stores, Dwellings, &c., erected in this country, in the East and West Indies, Egypt, China, the Cape of Good Hope, South America, and Australia.

Plans and Estimates will be furnished on Application.

GREAT REDUCTION IN THE COST OF STEAM POWER.

THE temperature of the products of burnt fuel escaping into the Smoke-boxes of Locomotive and Portable Engines is upwards of 800°. DUNCAN, GWYNNE, and C. WYE WILLIAM'S PATENT HEAT DIFFUSERS, placed in the Tubes, will utilize about 400° of the heat, convert it into an equivalent of working steam, and reduce the temperature to about 350° or 400°.

The Patentees are prepared to accept for Royalty a part of the value of the fuel saved by the use of their simple appliances.

Every information may be had on application to the Manufacturers, GWYNNE & CO., Engineers, Essex-street Wharves, Strand, W.C., London.

ENGINEERS' TOOLS FOR SALE.—A Superior SELF-ACTING SLIDE and SCREW-CUTTING LATHE, 7 in. centre and 7 ft. bed. A Ditto, 7 in. centre and 9 ft. bed. A PUNCHING and SHEARING MACHINE, for ⅝ in. plates. Two Ditto for ½ in. plates, and Two Ditto for ⅜ in. plates. VERTICAL DRILLING MACHINE; PILLAR and BENCH DRILLS; HALEY'S and other LIFTING JACKS; RACHET BRACES, &c.

Apply to PAGE and CAMERON, 64 Old Broad-st., E.C., London. (285)

HORIZONTAL HIGH-PRESSURE STEAM ENGINES FOR SALE.

One of 8-horse power, 8in. cylinder, and 18in. stroke.
One of 10-horse power, 10in. cylinder, and 24in. stroke.
Two of 12-horse power, 12in. cylinder, and 24in. stroke.
One of 14-horse power, 12in. cylinder, and 36in. stroke.
Two of 14-horse power, 14in. cylinder, and 24in. stroke.
One of 16-horse power, 14in. cylinder, and 36in. stroke.
Two of 30-horse power, 20in. cylinder, and 36in. stroke.

The above Engines are quite new, of superior manufacture and finish, and are to be sold at very low prices.

Apply to PAGE and CAMERON, 64 Old Broad-street, London, E.C. (284)

PATENT LEVER BREAKS for RAILWAY WAGGONS, doing away with the objectionable Break Rack. Can be applied to existing stock at a trifling expense. Royalty moderate.

Models can be seen at 34 Great George-street, Westminster, and the Breaks in action at the Works of the Railway Carriage Company at the Peterborough Station, on the Eastern Counties Railway; the Rugby Station, London and North-Western Railway; the Cardiff Docks Station, Taff Vale Railway; and at the Works, Oldbury, near Birmingham, where all communications are requested to be sent. (275)

TO SHIPBUILDERS, SHIPOWNERS, CAPTAINS, &c.

THE ANCHOR COMMITTEE AFFIRM "TROTMAN'S PATENT ANCHOR" to be superior to all others, possessing Thirty-Five Per Cent. more Holding Power than either Porter's or Roger's, and equivalent in all respects to ordinary Anchors of 28 per cent. greater weight.

"This appeared to the Committee of vast importance to the Shipping Interests, &c."

(Vide their Official Report, 1853, "On the relative merits of different descriptions of Anchors," sanctioned and approved by the Admiralty.)

THE ANCHOR COMMITTEE

Nominated by the Lords Commissioners of the Admiralty "to investigate and determine the relative merits of Anchors," in compliance with a requisition from the principal Shipowners, Underwriters, &c., of the United Kingdom.

Rear-Admiral the Hon. Sir M. Stopford, K.C.B., Chairman.

Capt. Superintendent Charles Hope, R.N., Her Majesty's Dockyard, Sheerness.

Captain George Rodney Munday, R.N., Her Majesty's Ship "Nile."

Jonathan Aylen, Esq., R.N., Master Attendant, Her Majesty's Dockyard, Sheerness.

James Tonkin, Esq., Master, R.N., Her Majesty's Ship "Waterloo," 120 guns.

William Schaw Lindsay, Esq., M.P., &c., &c.

Duncan Dunbar, Esq., Chairman of General Shipowners' Society; Do. Mercantile Marine Board, London. Member of the Committee of "Lloyd's Register" of Shipping, &c.

Anthony Ridley, Esq., Vice-Chairman of Mercantile Marine Board; Member of the Committee of "Lloyd's Register" of Shipping, &c.

William Drew, Esq., Member of the Mercantile Marine Board; Member of the Committee of "Lloyd's Register" of Shipping, &c.

William Phillips, Esq., Member of the Committee of "Lloyd's Register" of Shipping; General Shipowners' Society, &c.

George Marshall, Esq., Member of the Committee of "Lloyd's Register" of Shipping; General Shipowners' Society, &c.

THE INTERNATIONAL JURY AT PARIS

Also awarded this Invention the First Class Medal, 1855.

Licensed Makers of Trotman's Improved Anchors:—

TEMPORARY OFFICES.

12 Pancras-lane, Cheapside, E.C., London.

The Company has been formed for the purpose of assisting Inventors, and its contemplated operations comprise—

The taking out of Patents and Registrations for Inventors, and when required, advancing the money for this purpose.

The advancing sums of Money on approved security to Inventors and Patentees, for the purpose of enabling them to develope and complete their Patents and Inventions.

The Purchase and Sale of Inventions and Patents.

The Selling of Patents and Inventions on Commission.

The investigation of the value and merits of Inventions, and the granting of Certificates thereof.

The devotion of a portion of the Company's Premises for the purpose of receiving Models and Drawings of Inventions and Patents.

The keeping a Registry of all Patents taken out by the Company, and the furnishing a Monthly List thereof to all Subscribers.

All information may be obtained at the Office, and the Deposit may be remitted to the Bankers or to the Secretary. (223)

TO MANUFACTURERS, THE ENGINEERING, MECHANICAL, & BUILDING TRADES GENERALLY.

MESSRS. BOOTH & CO., AUCTIONEERS and BUILDERS' SALESMEN, having opened Registers for Public and Private Sales of all kinds of JOB LOTS, Surplus Stock, Stores, Tools, Implements, &c., &c., (either Old or New,) beg to call the attention of all parties to the only medium established of the kind, and to state that they are prepared to receive consignments of any weight, bulk, or value, and of any class of Goods for immediate Sale. Full particulars may be had for two stamps, at the BUILDING TRADES REGISTRY OFFICES, (established 1857,) 13 EASTCHEAP, LONDON, E.C. The Public Sales by Auction are held Weekly, on EVERY TUESDAY, at ONE O'CLOCK, and for the present at the BUILDERS' SALE GROUNDS, (established 1858,) 23 and 24 MARYLEBONE ROAD, REGENT'S PARK, W. Catalogues by Post for One Stamp. Advances on New Goods. All communications are held private and confidential. (204)

TO RAILWAY COMPANIES, CONTRACTORS, AND OTHERS.

GEORGE NEIGHBOUR and SONS, OIL MERCHANTS,

Particularly invite attention to their PATENT ARGAND LAMP OIL, for Railway Roof and Signal Lamps; also to their EXTRA-REFINED ENGINE OIL, for Locomotive and Machine purposes. Prices forwarded on application.

ENGINEERS, AND RAILWAY WAGGON BUILDERS.

Manufacturers of Switches, Points, and Crossings, Chairs, Spikes, Bolts, and General Railway Fittings. (279)

YORKSHIRE TYRE & AXLE WORKS, ROTHERHAM.

LOCOMOTIVE TYRE-BARS of every description for Engines, Carriages, and Railway Waggon Wheels.

STEEL-IRON for Springs. MERCHANT and other Irons manufactured. WM. F. HOYLE, Proprietor. (278)

RICHARD BAIRD, GENERAL COMMISSION AGENT, and CONTRACTOR for all descriptions of RAILWAY PLANT and STORES.

13 DOCK-STREET, DUNDEE. (280)

FUEL AND STEAM ECONOMY.—Apply to Mr. LEE STEVENS, C.E., 1 Fish-street-hill, E.C. (243)

IMPORTANT TO COUNTRY MANUFACTURERS.

TO ENGINEERS, SHIP-BUILDERS, AND CHANDLERS, IRON FOUNDERS, TOOL MAKERS, AGRICULTURAL IMPLEMENT MAKERS, AND OTHERS.

A Practical Engineer and Member of the Institutions of Civil and Mechanical Engineers being in treaty for large and very commanding premises in Fenchurch-street (in direct line between the Docks and Mark-lane and the City), for the Exhibition and Sale of some Patented Articles of his own Invention, is desirous of undertaking the London Agency of one or two Firms of established reputation, and of whose manufactures samples, models, or drawings could be exhibited. The Advertiser having a large connection amongst Ship Owners, Engineers, and Scientific Agriculturalists, and attending the principal Agricultural Shows, possesses many facilities for forwarding the interests of those for whom he may act. To those desirous of having the use of a good London Office and of exhibiting their Manufactures in one of the best thoroughfares in Town; and, moreover, of being represented by a thoroughly practical Mechanic, the present is a very favourable opportunity. The terms proposed are a Commission on all business done in addition to a moderate rental, in proportion to the space occupied by the articles exhibited. Address, with full particulars, to C. M. E., 1 Parkside, Knightsbridge. (263)

MATHEMATICAL DRAWING INSTRUMENTS, RULES, TAPES, CHAINS, LEVELS, THEODOLITES, BOX SEXTANTS, PRISMATIC and POCKET COMPASSES. Price Lists of the above articles sent post free, by JOHN ARCHBUTT, 20 Westminster Bridge Road, Lambeth, near Astley's Theatre. Every article warranted, and the prices will be found considerably lower than ever before charged for articles of similar quality. Routledge's Engineers' Slide Rules, 4s. 6d. each; Hawthorn's ditto, 5s. 6d.; Carpenters' Rules from 1s. (148)

GAS EXPLOSIONS PREVENTED.

USE THE TUBES AND FITTINGS MADE BY JOHN RUSSELL and Co. (Established at the commencement of gas-lighting), whose goods are all well tested, and warranted.

J. R. and Co. supplied Thomas Cubitt, Esq., for all his houses in Belgravia, the Queen's Palace, &c., which localit is proverbially free from gas.

J. R. and Co. are the Inventors of the Lap-Welded Tube for Steam Boilers, and have recently obtained a Patent fc an improvement in them.

J. R. and Co. are the holders of the First Prize Medals for Gas-Tubes and Fittings and Boiler Tubes.

WORKS:
THE OLD TUBE WORKS, WEDNESBURY.
THE ALMA WORKS, WALSALL.

WAREHOUSES:
69 UPPER THAMES-STREET, LONDON.
35 GRANBY-ROW, MANCHESTER. (108)

BY ROYAL LETTERS PATENT.

CAPT. KYNASTON'S "LIFE HOOKS," by means of which boats may be disengaged with perfect safety from the usual tackles of a ship, whether she be moving rapidly ahead, going astern, or stationary. Approved and already adopted by many of the ships of the British and Dutch Navies, &c. This plan is so simple that the Hooks, with the trifling gear attached, may be applied to any boat in half an hour, or transferred from one to the other without difficulty, their use involving no addition to the ordinary fittings. Apply in London at Cunningham's "Patent Topsail" Office, 12 London-st., E.C.; or to the Patentee, through Messrs. Hallett & Co., 14 Great George-street, Westminster. (262)

MALLET'S PATENT BUCKLED PLATES.—MR. ROBERT MALLET, C.E., Inventor and Patentee of these Plates (now being laid for the Floor of the New Bridge, Westminster, and applicable to Bridge, Wharf, and Fire-proof flooring, and to a variety of other important purposes) gives notice that he has withdrawn from this date all Licences whatsoever to manufacture or vend his Patent Plates, and taken the management of the Patent exclusively into his own hands. Applications for the Plates to be made to the Patentee, who has arranged for their prompt supply, at his offices, 11 Bridge-street, Westminster, S.W., and 97 Capel-street, Dublin.

18th May, 1859. (264)

INDIA-RUBBER VALVES FOR STEAM ENGINES, PUMP PACKING, &c. — Explanatory Drawings and Information as to the best modes of fitting and arranging the above, and all other Mechanical Applications of VULCANISED INDIA-RUBBER, are furnished post-free by

CHARLES MACINTOSH & Co., Patentees,
Cambridge-st., Manchester, and 3 Cannon-st. West, London.
MANUFACTORY and DEPOT, Cambridge-st., Manchester.
GENERAL WAREHOUSE, 3 Cannon-street West, London, E.C.—C. M. and Co.'s only Establishments (139)

BRASS AND COPPER TUBES.

MUNTZ'S PATENT SOLID ROLLED BRASS AND COPPER TUBES, now extensively used on the principal Home and Foreign Railways, and for Marine Boilers by the Government and leading Steam-Packet Companies, are cheaper and more durable than the ordinary tubes.

Address, GEORGE RICHARDSON and CO.,
1 New Broad-street, E.C. (277)

TO ENGINEERS, ARCHITECTS, PATENT AGENTS, &c.

PHOTOGRAPHS OF THE HIGHEST CLASS and of any size, taken and reproduced at a most moderate rate of charge. Reproductions of faultless accuracy, of Machinery, Models, Drawings, &c. Orders attended to in town and country. Estimates forwarded.

SPENCER, READ, & Co., 4 Agar-street, Strand, W.C. (90)

RANSOME'S PATENT STONE FILTERS—of every description for Domestic purposes, for Manufactories, Public Companies, Shipping, &c.

For Particulars, Specimens, Illustrations, and Agencies, apply to Mr. Frederick Ransome, Whitehall Wharf, Cannon-row, Westminster; or Patent Stone Works, Ipswich. A Liberal Discount allowed to the Trade or to Shippers. (174)

BY HER MAJESTY'S ROYAL LETTERS PATENT.

PATENT SPHERICAL SELF-ADJUSTING BEARINGS, which do not heat in work. The advantages possessed by these Bearings are:—

1st. They are Self-adjusting; and, consequently, can be put down by the most ordinary Mechanic.
2nd. They are not liable to heat, even at high speeds.
3rd. They remain constantly parellel to the Spindle; and, therefore, wear equally all across the Bearing.
4th. They require only a very small quantity of oil.

Engravings and Prices forwarded on application to the Patentees.

WALLIS & HASLAM,
Engineers and Iron Founders, North Hants Iron Works Basingstoke. (121)

EMIGRATION TO NEW YORK, CANADA, AUSTRALIA, NEW ZEALAND, EAST INDIES, CAPE OF GOOD HOPE, &c. All Classes of Passengers booked throughout in the Finest Steam and Sailing Packets. Full Particulars in our circulars for 1859, may be had gratis on application to F. S. GRAY and Co., 54 King William Street, City, and 6 Tower Hill, London; and at 35 Bath Street, Liverpool. (187)

PUMPING MACHINERY.

GWYNNE AND Co., Engineers, London, manufacture and supply the following Machinery, of the most approved construction and with all the latest improvements:—Portable and Fixed Steam-Engines and Boilers of every description; Waterwheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the Supply of Towns, Cities, and Districts, and for the Irrigation of Coffee, Cotton, Indigo, Sugar-cane, and Rice-Estates, for pumping out Coffer-dams, Canals, Dry Docks, Reservoirs, &c. They also manufacture and supply the Pumping and other Machinery for Paper, Pulp, and Fulling Mills, Breweries, Distilleries, Tanneries, Starch Works, Bleaching, Dyeing, and Calico Printing Works, Chemical Works, Silk, Cotton, and Flax Mills, and Manufactories in general. All Letters not paid will be refused. Illustrated Price Lists forwarded on receipt of Six Postage Stamps.—GWYNNE AND Co., Hydraulic and Mechanical Engineers, Essex-wharf, Strand, London.

For Exportation.—The above can be obtained throug British Merchants, Shippers, and Colonial Agents. (24)

TO BRASS FOUNDERS.

TO BE SOLD, the Patent-right of a New and Highly-approved EQUILIBRIUM WATER COCK or VALVE, suitable for Steam Boiler Feed Pipes, or any cases where the valve is required to be opened against pressure.

Address H., MECHANICS' MAGAZINE Office, 166 Fleet-st., where a Drawing may be seen. (151)

TO BRASS-FOUNDERS, ENGINEERS, &c.

THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings, they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty per cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, muffles, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire-standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. 43

TO MARINE ENGINEERS, OR SHIP-BUILDERS.

THE PROPRIETOR of a VALUABLE PATENT for Double-expansive Marine Engines (by which great economy of space and fuel is obtained) is desirous of entering into arrangements with a respectable firm for the construction of the same. An adequate portion of the patent-right would be assigned by the advertiser to any firm taking the matter up; and he would render all assistance in his power, either in London or elsewhere, amongst ship-owners (to many of whom he is well known), in obtaining contracts, &c. Unexceptionable references given. Address C. E., MECHANICS' MAGAZINE Office, 166, Fleet-street. (76

ENGINEERING BUSINESS FOR SALE.

OWING to the continued ill health of the Proprietor, the first-class business of an Engineer and Crane and Block Maker is offered for sale. It has been established in the Metropolis for nearly 30 years, and has enjoyed extensive patronage amongst Brewers, Manufacturers, Warehousemen, and others, in and about London; the business done amounting to nearly £8,000 per annum. About £3,200 would be required, (part of which, however, may remain for any reasonable time on good security,) which is the bare value of the tools, patterns, and stock in trade. The premises, including good dwelling-house, very conveniently situated, and capable of accommodating from 60 to 70 hands, are held upon a long lease, at an extraordinary low rental, not exceeding £100 per annum, taxes included. Many of the tools are nearly new, and of the best construction. The present proprietor, who relinquishes the business solely on account of ill health, would give every assistance in his power to those succeeding him; and as his foreman, who has been with him for nearly ten years, is thoroughly acquainted with the practical parts of the business, any gentleman desirous of commencing as a manufacturing engineer would find the present a very favourable opportunity. As all accounts have been, for many years past, collected quarterly, a very small amount, say £800, would suffice as working capital. Full particulars may be obtained by application to E. E. ALLEN, Esq., MECHANICS' MAGAZINE Office, 166 Fleet Street, E.C. (130)

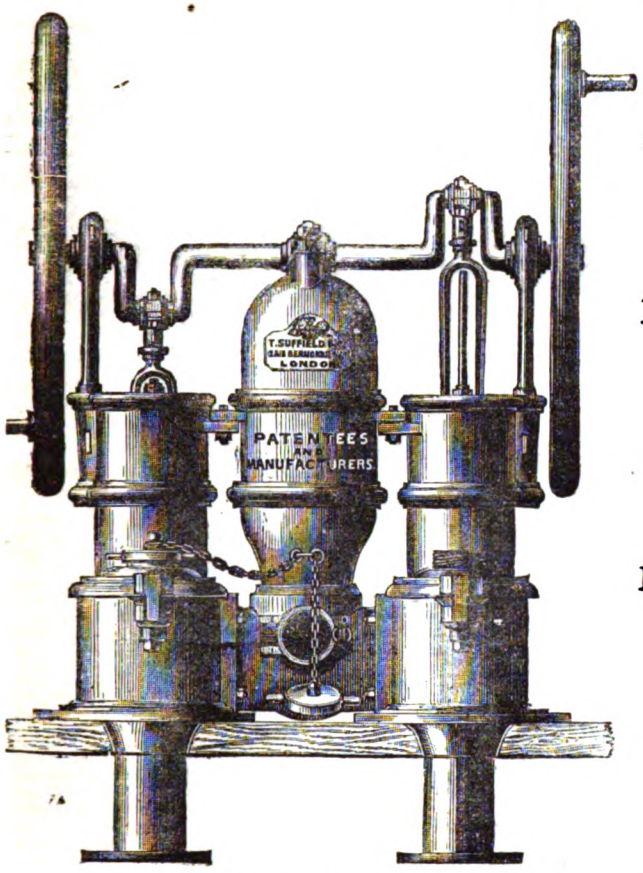
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS. SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

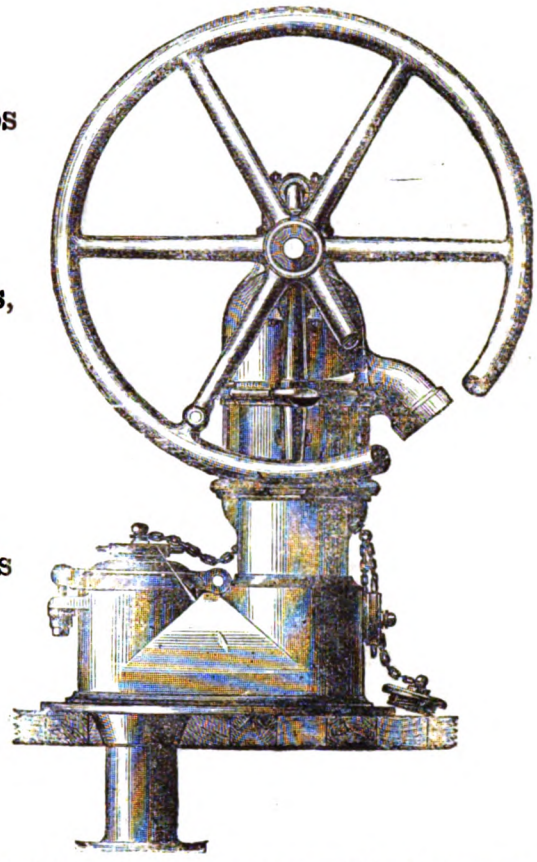
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangemen either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps, the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board: the rapidity with which they can be converted into Fire Pumps, or be applied to the Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Works or Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require such Stores, together with a further saving in the cost of such Articles.

RAILWAY AXLE-BOX COMPANY continue to grant Licenses to manufacture and use AXLE-BOXES under their PATENTS, which include those of Messrs. ADAMS and RICHARDSON, WRIGHTON, NORMANVILLE, VIGURS, and others.

These are the only AXLE-BOXES that effectually EXCLUDE DUST, and prevent the escape of grease, by which an important saving is effected in the wear and tear of the JOURNALS and BEARINGS and the CONSUMPTION of GREASE.

Further particulars and Licenses may be obtained of P. M. PARSONS, Manager,

9 Arthur-street West, London-bridge, E.C. (283)

THE USE of a CORNISH HIGH-PRESSURE BOILER is required for a few weeks after usual working hours, to complete some experiments on the evaporation of water under varying pressures. Parties willing to treat are requested to address, stating full particulars and terms, to X. Y. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street, E.C. (248)

TO STEAM SHIP BUILDERS, ENGINEERS, TOOL MAKERS, IRON MASTERS, AND OTHERS.

THE ADVERTISER, who has had considerable experience in Marine Engineering and Iron Shipbuilding, and who is an expert Draught-man, is desirous of meeting with a permanent Engagement as London Agent, Manager of a Shipbuilding Yard, or to act in any capacity in which ample knowledge of Mechanical Details and a large connexion among Engineers, Ship Owners, and others, might be rendered available. The Advertiser having also been much engaged in working out some important patented inventions, would undertake to further the objects of those having property of this kind, either to dispose of or to bring into operation. Apply by letter, to M. E., MECHANICS' MAGAZINE Office, 166 Fleet-street. (250)

A NEW DISCOVERY IN WASHING HOUSEHOLD LINEN.

LIST OF PRIZE SUBJECTS FOR SESSION 1859–60.

THE ROYAL SCOTTISH SOCIETY OF ARTS proposes to award PRIZES of different values, of THIRTY SOVEREIGNS and under, in GOLD or SILVER MEDALS, SILVER PLATE, or MONEY, for approved Communications *primarily* submitted to the Society, relative to INVENTIONS, DISCOVERIES, and IMPROVEMENTS in the *Mechanical* and *Chemical* Arts in general, and in their relation to the Fine Arts, and also to means by which the *Natural Productions* of the Country may be made more available. The Society suggests the following as a few of the many subjects that may be attended to, viz.:—

I. INVENTIONS, DISCOVERIES, or IMPROVEMENTS in the Useful Arts.

1. *Mechanical Arts.*

Inventions or Improvements in applying the Motive Power of Men and Animals,—in Wind and Water Prime Movers,—in Steam and other heat Engines and their various applications,—in Pumping, Blowing, Rolling, Sawing, Agricultural, and other Engines and Machines, —in Cotton and other Textile Manufacturing Mills,—in Shipbuilding, Wood, Iron, and Steel,—in Lighthouses,—in Marine Propellers,—in Railways, Plant, and Signals —in Electro-Magnetic Motive Power,—in Electric and other Telegraphic Apparatus, Submarine and Aerial,—in Photographic Apparatus,—in Fire-Proof Buildings,—in Water Supply,—in Paving,—Sewerage,—in Economical Appliances for increasing the Sanitary Condition of Towns,—in Smoke Consumption and Extinguishing Fires,—in Gas Works,—in Canals and Inland Navigation, —in Tools, Implements, and Apparatus for the various Trades,—in Bricks, Encaustic Tiles, Cements, and Mortars,—in Printing Machines, Cases, and Rollers,—in Stereotyping,—in Cranes,—in the Machinery for Collieries,—in preserving Timber and Metals in Marine Works,—in Optical Apparatus for Astronomy, Surveying, and Levelling,—in Manufacture of Paper, &c.

2. *Chemical Arts.*

INVENTIONS or IMPROVEMENTS in New and Useful Applications of Gutta Percha and Vulcanised India Rubber, or similar Gums,—in the Economical Extraction of Chemical Principles or Useful Substances, as Paraffine, &c., from Coal, Porcelain, Clay from Granite or Felt-par, and Metals generally from their Ores and Oxides.—in Dyes, in Paints,—in Paper,—in Glass, especially for Lenses,—in methods of rendering the Electric Light available in practice; &c.

3. *Relative to the Fine Arts.*

INVENTIONS or IMPROVEMENTS in Photographic Processes, in "Carbon" Printing, and in Methods of Printing Photographs from their Impressions on Steel or Copper Plates, or Lithographic Stones,—in Electrotype Processes,—in Die-sinking,—in Methods of Illustrating Books, to be Printed with the Letterpress,—in Paper-Hangings,—in Articles of Porcelain, Common Clay, or Metal,—in Glass-Staining, in Engraving on Stone,—in Chromo-Lithography,—in "Nature" Printing.

4. *Natural Productions.*

Discovery of Plumbago Mines,—of Slate Pencil of good quality,—Whet-stones,—of Wood suitable for Engraving.

II. EXPERIMENTS applicable to the Useful Arts.

III. COMMUNICATIONS of Processes in the Useful Arts practised in this or other Countries, but not generally known.

IV. PRACTICAL DETAILS of Public or other Undertakings of National importance, already executed, but not previously published; or valuable Suggestions for originating such undertakings.

KEITH PRIZE, value Thirty Sovereigns.

For some important "Invention, Improvement, or Discovery, in the Useful Arts, which shall be primarily submitted to the Society" during the Session.

MAKDOUGAL BRISBANE BIENNIAL PRIZE, Value £10.

"To the Authors or Inventors of Communications of Merit, which shall be approved of by the Society, or its Committee, and judged by them deserving of such distinction."

REID AND AULD PRIZES.

For the First, Second, and Third best Models of "anything new in the Art of Clock or Watch Making, by Journeymen or Master Watch and Clock Makers," if these should be considered worthy of Prizes, the year's Interest of the Reid and Auld Bequest, being about SEVEN GUINEAS, divided among them in such proportions as the Prize Committee shall fix, according to merit. To such as deserve it, the Society may add to the amount of the Prize out of its general funds.

GENERAL OBSERVATIONS.

Communications lodged *in competition for Prizes* shall not have been patented, nor previously published, nor read before any other Society, but Patented Articles may be exhibited and described. The descriptions of the various inventions, &c., must be *full* and *distinct*; and be written on *Foolscap* paper, with binding margins. The relative Drawings to be on *Imperial* Drawing-paper, and in *bold* lines, or *strongly coloured*, so as to be easily seen at about the distance of thirty feet when hung up in the Hall. The Society shall be at liberty to publish in their Transactions the papers submitted to them, or abstracts thereof. Models, &c., for which Prizes are given, to be held the property of the Society; the Value of the Models, &c., being separately allowed for.

Communications to be sent free to the SECRETARY, Chambers, 5 Hill Street, Edinburgh, on *or before 1st November*, 1859, in order to ensure their being read and reported on during the Session, the ordinary Meetings of which commence in November 1859, and end in April 1860; but *those which cannot be lodged earlier* will be received up to 1st April, 1860, although they may possibly not be read or reported on till the following Session.

By order,

JOHN BEATSON BELL, Secretary.

Edinburgh, June, 1859. (287)

LIST OF MISCELLANEOUS TENDERS INVITED, AND ENGAGEMENTS OPEN.

The tenders and vacancies which appear in this weekly list are not repeated in succeeding numbers.

NEW AISLE, *Sudbury*.—Drawings, &c., Mr. G. Scott, 20 Spring Gardens. Tenders, to the Vestry, June 18.

GAS WORKS, *Callander*.—Drawings and specifications, W. Buchanan, Callander, Scotland. Tenders, June 20.

COAST GUARD STATION, *Stonehouse, Devon*.—Drawings, the Watch Room, Stonehouse Point, or at the Admiralty Coast Guard Office, 18 Spring Gardens, London. Tenders, 20th June.

RAILWAY, *Caledonian*.—Dalmarnoch branch, extending from the Clydesdale junction to the south embankment of the river Clyde. Plans, &c., Mr. G. Graham, Buchanan-street, Glasgow. Tenders to June 7th.

SEWERS, *Dundee*.—Plans, Mr. Tawn, Surveyor. Tenders, June 27.

WORKHOUSE, *Swansea*.—Drawings, Office Mr. William Richards, Brunswick Place, Swansea. Tenders, June 30.

HOUSE, SHOP, AND WAREHOUSE, *Tamworth*.—Plans, Peel Arms, Tamworth. Tenders, Mr. B. Jennings, architect, Atherstone.

OFFICERS' MESS KITCHEN, SCULLERY, &c., *Manchester*.—Plans, Royal Engineer Office, Manchester. Tenders to June 25th.

PRISON ENTRANCE LODGE, *Maidstone*.—Plans, Offices of Messrs. Whicheord and Blandford, Architects, Maidstone. Tenders, June 23rd.

POLICE STATION, MAGISTRATES' ROOM, &c., *Great Malvern*.—Drawings, Offices of Mr. H. Rowe, County Surveyor, 17 Foregate-street, Worcester. Tenders, June 17th.

STATION HOUSE, OR LOCK-UP, *Seabrook, near Hythe, Kent*.—Plans, Office of the County Surveyor, Maidstone. Tenders, June 23rd.

VILLA RESIDENCE, *near Shrewsbury*.—Plans, Office of Messrs. Wall, solicitors, Shrewsbury. Tenders to June 15th.

RESIDENCE, *Newcastle-under-Lyme*.—Plans, Office of Mr. C. Trubshaw, architect, The Hollies, Stafford. Tenders, June 13th.

FARMHOUSE BUILDINGS AND PREMISES.—At Great Brickhill, within four miles of Bletchley station. Plans, Mr. Thos. Wood, Brickhill Manor Farm.

GASHOLDER, *Hampton Court*.—15 ft. by 20 ft. single lift, and a brick tank. Plans, Gas Works, Hampton Wick. Tenders, June 15th.

CHAPEL AND SCHOOLROOM, *Ripon*.—Plans, Rev. T. W. Ridley, Bondgate Green, Ripon. Tenders, June 15th.

BRIDGE, *Durham*.—Widening and improving Framwellgate Bridge, over the River Wear. Drawings, Mr. Howson, county architect, Durham. Tenders, June 25th.

BATHS AND LAUNDRIES, *Manchester*.—Plans, &c., Offices, Mr. Worthington, architect.

SCHOOLS, *Durham*.—For the erection of St. Margaret's. Drawings, Mr. G. Kyle, architect, 26 North Bailey, Durham. Tenders, June 13th.

ROADS, *Metropolis*.—For cleansing and stopping portions. Particulars, at the Office, 32 Whitehall-place. Tenders June 21st.

PLANS FOR DRAMATIC COLLEGE.—Gratuitous competition invited. Central Hall and ten houses. Particulars, Royal Dramatic College, 15 Bedford-street, Covent-garden, W.C. Mr. W. Cullenford, secretary.

PLANS AND SPECIFICATIONS FOR GAS WORKS.—For a small town, requiring 400 lights. Particulars, Gas Committee, Narborth, Pembroke. £5 for the plan and specifications approved.

MECHANICAL DRAUGHTSMAN.—First-rate hand; one used to Rolling and Fixing Railway Plant. B. C., 186 Strand, London, W. C.

WAREHOUSE, *Lancashire, Yorkshire, and East Lancashire Railways*.—At the Salford Goods Station. Plans, Company's Offices, Hunt's Bank, Manchester. Tenders, June 19.

POLICE STATION, *Egham*.—Plans, &c., Police Station, Chertsey. Tenders, June 24, to Clerk of Peace, Record Office, North Street, Lambeth.

SCHOOLS AND RESIDENCE, *Salop*.—At Cledbury Mortimer. Plans, &c., Riott Kemp, Free School, Cledbury. Tenders, Mr. G. E. Street, 33 Montague Place, London, June 14.

WELL SINKING, *Wallersley*.—For the supply of materials and the sinking of a pure water well, for the Board of Health, in the county of Chester. Drawings, &c., for 5s., from T. Lea, resident engineer, or at the offices of Mr. Rawlinson, 34 Parliament-street, Westminster. Tenders June 20.

SEWER WORK, *St. James's Vestry, Westminster*.—General work and repairs. Specifications and forms, 5s., 14 Marshall-street, Golden-square. Tenders June 15.

RAILWAY STORES, *Lancashire and Yorkshire*.—For the ensuing half-year. Particulars and forms, Mr. R. J. Budge, the Company's storekeeper, at the office, Miles Platting, on the 16th. Tenders, June 23.

RAILWAY STORES, *Eastern Counties*.—For a year. Forms, &c., on application in writing to Mr. J. Bullivant, storekeeper, Stratford, where patterns. Tenders, the Secretary, Bishopsgate-street, June 14.

A VALUABLE PATENT to be DISPOSED OF.—The Patentee will either dispose of the Patent or grant Licences to any party wishing to manufacture, or would join a person with capital to carry out the Patent.

Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (163)

MR. WALTER HALL is prepared to Grant Licences, or to Dispose of his Patent for working Railway Breaks. Particulars to be had of Mr. HALL, who may be addressed by letter to the care of the MECHANICS' MAGAZINE, 166 Fleet-street, E.C. (217)

EDWIN JEWITT, ENGRAVER ON WOOD AND DRAFTSMAN, 1 Pickett-place, Strand, near Temple-bar. Engineering, Scientific, and Mechanical Designs accurately engraved. Manufacturers and Tradesmen's Catalogues Illustrated. W.C. (84)

VULCANISED INDIA-RUBBER MACHINE BANDING IS NOT AFFECTED BY WET, HEAT, OR COLD; does not stretch nor slip on the pulleys. HOSES for BREWERIES, &c., will NOT impart TASTE, SMELL, or COLOUR: also for conducting, or steam purposes. Washers, Valves, Sheets, Printing Blankets, &c., in Stock. Other Articles made to order. All Goods warranted to stand 300° Fahrenheit.

N.B.—Sole Contractors to the Lords Commissioners of the Admiralty.

DODGE and GIANDONATI (late DODGE, BACON, and Co), 44 St. Paul's Churchyard, London, E.C. (208)

TO ENGINEERS, INVENTORS, AND OTHERS.

A PRACTICAL ENGINEER of long standing prepares Original Drawings, Copies, and Tracings. Advice and Assistance given to Inventors in working out their Plans. Pupils taught privately. Terms moderate.

Apply to J. J., 171 Strand. (138)

WILLIAM WARNE & CO.,

Manufacturers of all descriptions of

VULCANIZED INDIA-RUBBER,

SHEETS, WASHERS,

HOSE-PIPES, TUBINGS, ETC.;

Sole Manufacturers of

WARNE'S PATENT INDIA-RUBBER TUBULAR MATS,

For Doorways, Stairs, Baths, Carriages, Ships, &c., which never clog, require no beating, and, unlike all other Mats, are readily cleansed by water. Indestructible by damp, these Mats are especially suitable for uncovered Passages, and out of door purposes. Seat Mats, Housemaids' Mats, and Brushes for wooden and stone floors.

Sole Manufacturers of

WARNE'S PATENT MINERALISED IMPROVED KAMPTULICON,

Possessing advantages over all the ordinary makes, in exceeding toughness, and flexibility, and consequent durability, while neither heat nor cold has effect upon it. Widths, 3/4s., 4/4s., 6/4s., and 7/4s. Substances, ⅛, ¼, and thicker if required. Length, 20 to 25 yards.

Patentees of the Red Mineralised India Rubber—the only Rubber not affected by Oil.

Warehouse, 9 Gresham-street West, E.C. Mills, Tottenham, N. (244)

BRASS ENGINE and BOILER FITTINGS.—

Water-Gauges for Glasses, ½ ⅝ ¾ inch diam.
26/, 30/, 35/ each.
With Guards, 32/, 37/6 „

Gauge and Pet-Cocks, from 3/6 each.

Whistles, with 1½ 2 2½ 3 4 inch bell.
12/6, 18/6, 26/, 45/, 50/ each.

Blow-off Cock for Portable Engines, 12/6 each.

Oil Cups, of all kinds, from 18/ per dozen.

Ball Clacks, Balls, Cages, and sets complete.

Forsyth's Safety Boiler Plugs, 12/6 and 18/ each.

WILLIAM WALLER, Uddingston, by Glasgow. (214)

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.

Families, by using this delicious VINEGAR, insure purity and effect a saving of 50 per cent. See "Report of Dr. Letheby, City Officer of Health, Dr. Hassall, of the 'Lancet' Commission, and others." Sold by the Trade, in Bottles, labelled and capsuled. Wholesale—63 King William-street, London-bridge, E.C. Six Quart Samples sent free to any Railway for 3s. 6d. (216)

ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 130 feet in length, to work by hand or Steam Power.

Hot-Water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (11)

GLADSTONE & Co., CONTRACTORS and ENGINEERS.

2 John-Street, Minories, London, E.C.,

Are prepared to ESTIMATE FOR and CONSTRUCT BRIDGES, PIERS, JETTIES, &c., in Iron, Wood, or Stone. Also to supply Cranes, Girders, Turntables, and Railway Work and Plant generally. (199)

STEAM CULTIVATION.

CHANDLER AND OLIVER

HAVE much pleasure in being able to state that they are now prepared to execute orders for their PATENT STEAM WINDING ENGINES AND PLOUGHS, for Cultivating Land by Steam.

The WINDING TACKLE can be fitted to Engines of any maker, and the Plough can be made to take any kind of apparatus necessary for Cultivating the Soil, such as Scarrifier Tines or Broad Shares, &c. Any Engine now used by Farmers can be fitted with the Tackle. It is light and simple, and an ordinary Farm Labourer can work it.

The Engine can be used for Thrashing without taking the Ploughing Tackle off, not requiring more than three or four horses to take it from place to place.

These Engines are very useful for Pile Driving or Drawing Ballast up inclined planes; at the same time they can be used for Pumping. Farmers will find them most useful for all purposes.

Messrs. CHANDLER and OLIVER are prepared to receive orders for separate Windlasses, which are light and simple, and generally useful.

For further Information apply to

ROBERT CHANDLER, ENGINEER, BOW, NEAR LONDON,

Or Mr. OLIVER, Farmer, Hatfield, Herts.

ILLUSTRATED CATALOGUES WITH PRICES, WILL BE READY SHORTLY. (215)

CAUTION.

TO ARCHITECTS AND BUILDERS.—In consequence of numerous complaints, the Patentee begs to inform the above, that all genuine

SMITH'S PATENT DOOR SPRINGS.

For Swing Doors, are stamped with Name and Address, thus—

IMPROVED MACHINERY FOR AGRICULTURISTS.

RICHARD GARRETT & SONS,

LEISTON WORKS, SAXMUNDHAM, SUFFOLK,

(ESTABLISHED A.D. 1778),

EARNESTLY solicit the continued support of their numerous Friends, Agriculturists, Shippers, and others; the additions made to their Works during the present year, in the erection of new sets of Workshops, fitted with the best mechanical appliances for producing Machinery of the most improved construction, expeditiously and economically, justifies their soliciting increased support, while their leading reputation as Inventors and Manufacturers of FIRST CLASS Agricultural Machinery, is a sufficient guarantee that every Machine supplied from Leiston Works will prove to the entire satisfaction of the purchaser.

R. G. & S. are now manufacturing the following Machines and Implements, which they guarantee to be thoroughly efficient in every respect:—

PORTABLE AND FIXED STEAM ENGINES. } From 4 to 40 Horse Power, suited for every kind of work
SELF-PROPELLING AND TRACTION ENGINES. } to which Steam Power is applied.
STONE GRINDING MILLS.
MORTAR AND PUG MILLS.
MILLWRIGHTS' WORK of all kinds.
SAWING MACHINERY, from 4 to 20 Horse Power.
BRICK AND TILE MACHINES.

IMPROVED SETS OF FARM MACHINERY, for Large Occupations.
PORTABLE AND FIXED MACHINERY, for Thrashing and Dressing Corn.
THE PRIZE BOLTING AND OPEN-DRUM HORSE-POWER THRASHING MACHINES.
CORN DRESSING MACHINES, for Hand, Horse, Water, and Steam Power.
BARLEY AWELLING MACHINES.
CHAFF CUTTERS, for Hand, Horse, Water, and Steam Power.
PATENT TURNIP CUTTING AND PULPING MACHINES.

THE PRIZE CORN AND SEED DRILLS.
PRIZE CORN AND SEED DRILLS WITH MANURE APPARATUS.
PRIZE SEED AND MANURE DRILLS.
LIQUID, SEED, AND MANURE DROP DRILLS.
CHAMBER'S PATENT BROADCAST MANURE DISTRIBUTOR.
GARRETT'S PATENT HORSE HOE for all Crops.
PATENT REVOLVING HOES for Root Crops.
IMPROVED PLOUGHS AND REAPING MACHINES.
&c. &c. &c.

Of which full detailed particulars will be found in R. G. & SONS' ILLUSTRATED CATALOGUE, sent postage free to any address, in English, French, or German; and any of the above Machines will be shown in operation at R. G. & Sons' Farm, near the Works, on their receiving a few days' notice.

A Copy of R. G. & SONS' new COLONIAL LIST will be forwarded free to any of the Colonies, and Shippers will be supplied with these lists, with their names and addresses printed on, free of charge, by making application for the same.

ADDRESS—R. GARRETT & SONS, LEISTON WORKS, SAXMUNDHAM, SUFFOLK. (161)

CLAYTON, SHUTTLEWORTH, AND CO.,

OF LINCOLN,

78 LOMBARD STREET, LONDON, E.C.,

AND 36 DALE STREET, LIVERPOOL,

AGRICULTURAL AND GENERAL ENGINEERS,

And Manufacturers of Portable and Fixed Steam Engines.

Combined Threshing Machines, which dress the corn ready for market at one operation. Grinding Mills, Saw Benches, Pumps for Irrigation and Mining purposes, with all necessary gearing for being driven by steam power. Full particulars and estimates given on application to the above address.

C. S. and Co.'s PORTABLE STEAM ENGINES are adapted for every purpose to which steam-power can be applied. When intended for winding, they are fitted with reversible link motion and winding gear. They are easy of removal, as may be seen by the engraving, and can be set to work immediately on arrival.

C. S. and Co. are now doing an extensive foreign and colonial business, and are prepared to send off engines and machinery of the before-mentioned kinds in a few days from the date of order. They would also call attention to the important *reduction in prices* made for the new year.

For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (23)

TO STEAM SHIP OWNERS, ENGINEERS, AND OTHERS.

How's Patent Steam Engine Counters, can be read at sight.

These Counters register the number of revolutions made by an engine or other mechanism. They may be used for ascertaining the duty of Pumping Engines and Water-wheels; the revolutions on board a steam-vessel; to calculate the slip of the propeller; and in a locomotive to test the slip of the wheels.

How's Patent Salinometer, for Steam Boilers using Salt Water.

By these, the density of the water in the Boiler is at all times accurately shown, and a saving of boiler and fuel is effected. They are adopted by the Admiralty, the Honorable Trinity Corporation, and others. Copies of Testimonials from Messrs. Penn, Messrs. Maudslay, and others, will be forwarded on application.

How's Engine-Room Telegraph, for communicating between Captain and Engineer. Society of Arts Prize Medal, 1855.

is a Mechanical Telegraph, and by its peculiar construction, error or misunderstanding is rendered impossible. It now extensively adopted, and gives great satisfaction.

How's Patent Fresh Water Apparatus for Ships' Use.

This apparatus is designed for the distillation of Fresh from Salt Water; and on long voyages, and where the supply of water is scanty, it will be found invaluable. Testimonials may be seen.

Patent Steam Pump and Fire-Engine for Ships' Use.

This Steam-pump occupies but a small space; works perfectly noiselessly, and throws an immense volume of water. An Illustrated Circular of Fresh Water Apparatus and Steam-pump combined, free on application.

How's Patent Machine for Cutting Bolts, Rods, Spindles, Wire, &c.

Simple in construction, inexpensive, occupies but little space, and will not easily get out of order.

A Pamphlet Illustrative of the above, sent free by post, on application to

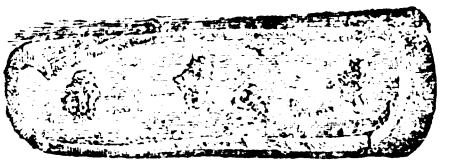
A. P. HOW, ENGINEER,

81 MARK LANE, LONDON.

EVERY DESCRIPTION OF ENGINEERS' TOOLS, ENGINE ROOM STORES, &c., &c., SUPPLIED.

(89)

WATER POISONED BY LEADEN PIPES.



"The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dick, of Bonchurch, Isle of Wight. The water has cut these deep pits almost through the pipe, and not only upon the portion which we have illustrated, but has formed similar chasms throughout the entire length."—*Expositor.*

Poisoned Water Preventable.

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious, or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha. Nothing can be better. I have also recommended it to others, who have adopted the expedient.

Resistance for Frost.

The Gutta Percha Company have been favoured with the following Letters in reference to the non-conducting properties of Gutta Percha Tubing, in the resistance of Frost.

From J. ARMSTRONG, Esq., M.D., Gravesend.

"My private house, which was supplied with your Gutta Percha Tubing some five or six years ago, has never required the slightest attention; and previously, there was no winter passed that we were not deluged in consequence of the bursting of the leaden pipes."

From HENRY BROWN and SONS, Western Works, 108 Rockingham-street, Sheffield.

"We have now a positive proof of the frost-resisting properties of the Gutta Percha Piping. On our premises we have a leaden Pipe and a Gutta Percha one lying side by side. The leaden one has been completely frozen up at least ten days, and the Gutta Percha one is still unaffected.

Every Variety for Gutta Percha Article.

SCOTT'S
PATENT GRASS SEED SEPARATOR,

which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from

PERENNIAL AND ITALIAN RYE-GRASS, &c.,

AND

SCOTT'S PATENT CARROT SEED BEARDING

AND

CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,

which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

Communications to be sent to the Patentee, J. SCOTT, 111 Drummond Street, Euston Square, London, N.W. (18)

CONDY'S PATENT FLUID, or NATURAL DISINFECTANT,

Not only Deoderizes but Disinfects perfectly, and DESTROYS FOR EVER the cause of infection.

Is not poisonous, as it may be used to purify water. Evolves no noxious or unpleasant gas. Cannot be mistaken for any other fluid, thereby preventing death and disease; and is therefore the best, safest, cheapest, and most pleasant disinfectant ever introduced.

This fluid has been examined and reported upon by the Board of Health, all the most eminent Men and Chemists of the day, in all cases in the most satisfactory manne possible.

The Public are recommended to use this Fluid, properl diluted with water, frequently and habitually in larders, sculleries, dairies, musty cakes, sick rooms, close places, &c., as it has numerous advantages, and can be used with certain immediate success and perfect safety.

Sold in Quart Bottles, 4s.; Pints, 2s.; Half-pints, 1s; and in bulk, 10s. per Gallon.

Free to Railway on receipt of Order or Stamps. (238)

GREAT REDUCTION IN THE COST OF STEAM POWER.

THE temperature of the products of burnt fuel escaping into the Smoke-boxes of Locomotive and Portable Engines is upwards of 800°. DUNCAN, GWYNNE, and C. WYE WILLIAM'S PATENT HEAT DIFFUSERS, placed in the Tubes, will utilize about 400° of the heat, convert it into an equivalent of working steam, and reduce the temperature to about 350° or 400°.

The Patentees are prepared to accept for Royalty a part of the value of the fuel saved by the use of their simple appliances.

Every information may be had on application to the Manufacturers, GWYNNE & CO., Engineers, Essex-street Wharves, Strand, W.C., London. (251)

ENGINEERS' TOOLS FOR SALE.—A Superior SELF-ACTING SLIDE and SCREW-CUTTING LATHE, 7 in. centre and 7 ft. bed. A Ditto, 7 in. centre and 9 ft. bed. A PUNCHING and SHEARING MACHINE, for ¾ in. plates. Two Ditto for ½ in. plates, and Two Ditto for ⅜ in. plates. VERTICAL DRILLING MACHINE; PILLAR and BENCH DRILLS; HALEY'S and other LIFTING JACKS; RACHET BRACES, &c.

Apply to PAGE and CAMERON, 64 Old Broad-st., E.C., London. (285)

HORIZONTAL HIGH-PRESSURE STEAM ENGINES FOR SALE.

One of 8-horse power, 8in. cylinder, and 18in. stroke.
One of 10-horse power, 10in. cylinder, and 24in. stroke.
Two of 12-horse power, 12in. cylinder, and 24in. stroke.
One of 14-horse power, 12in. cylinder, and 36in. stroke.
Two of 14-horse power, 14in. cylinder, and 24in. stroke.
One of 16-horse power, 14in. cylinder, and 36in. stroke.
Two of 30-horse power, 20in. cylinder, and 36in. stroke.

The above Engines are quite new, of superior manufacture and finish, and are to be sold at very low prices.

Apply to PAGE and CAMERON, 64 Old Broad-street, London, E.C. (284)

PATENT LEVER BREAKS for RAILWAY WAGGONS, doing away with the objectionable Break Rack. Can be applied to existing stock at a trifling expense. Royalty moderate.

Models can be seen at 34 Great George-street, Westminster, and the Breaks in action at the Works of the Railway Carriage Company at the Peterborough Station, on the Eastern Counties Railway; the Rugby Station, London and North-Western Railway; the Cardiff Docks Station, Taff Vale Railway; and at the Works, Oldbury, near Birmingham, where all communications are requested to be sent. (275)

TO SHIPBUILDERS, SHIPOWNERS, CAPTAINS, &c.

THE ANCHOR COMMITTEE AFFIRM "TROTMAN'S PATENT ANCHOR" to be superior to all others, possessing Thirty-Five Per Cent. more Holding Power than either Porter's or Roger's, and equivalent in all respects to ordinary Anchors of 28 per cent. greater weight.

"This appeared to the Committee of vast importance to the Shipping Interests, &c."

(Vide their Official Report, 1853, "On the relative merits of different descriptions of Anchors," sanctioned and approved by the Admiralty.)

THE ANCHOR COMMITTEE

Nominated by the Lords Commissioners of the Admiralty "to investigate and determine the relative merits of Anchors," in compliance with a requisition from the principal Shipowners, Underwriters, &c., of the United Kingdom.

Rear-Admiral the Hon. Sir M. Stopford, K.C.B., Chairman.

Capt. Superintendent Charles Hope, R.N., Her Majesty's Dockyard, Sheerness.

Captain George Rodney Munday, R.N., Her Majesty's Ship "Nile."

Jonathan Aylen, Esq., R.N., Master Attendant, Her Majesty's Dockyard, Sheerness.

James Tonkin, Esq., Master, R.N., Her Majesty's Ship "Waterloo," 120 guns.

William Schaw Lindsay, Esq., M.P., &c., &c.

Duncan Dunbar, Esq., Chairman of General Shipowners' Society; Do. Mercantile Marine Board, London. Member of the Committee of "Lloyd's Register" of Shipping, &c.

Anthony Ridley, Esq., Vice-Chairman of Mercantile Marine Board; Member of the Committee of "Lloyd's Register" of Shipping, &c.

William Drew, Esq., Member of the Mercantile Marine Board; Member of the Committee of "Lloyd's Register" of Shipping, &c.

William Phillips, Esq., Member of the Committee of "Lloyd's Register" of Shipping; General Shipowners' Society, &c.

George Marshall, Esq., Member of the Committee of "Lloyd's Register" of Shipping; General Shipowners' Society, &c.

PATENTEE, 42 CORNHILL, LONDON. (249)

THORLEY'S FOOD FOR CATTLE.—Every person having an interest in domestic or farm animals should obtain a supply of this celebrated and economical food, which will prove invaluable during the approaching season. For keeping horses in good condition, it is unequalled. Pigs fatten with surprising rapidity upon it, and their flesh increases in flavour and value. Cowkeepers will find great advantage in the increased quantity and improved quality of the milk during its use. All animals are benefited by it. A pamphlet on this interesting subject, accompanied by Testimonials from the principal Nobility, Gentry, and Agriculturists, forwarded on application. In Casks containing 448 Feeds (Measures enclosed). Price 50s., carriage paid to any Railway Station in the United Kingdom. Post Office Orders payable to JOSEPH THORLEY, 77 Newgate Street, London.

N.B.—The public are cautioned against being imposed upon by worthless imitations. (132)

HART & SON, MALLEABLE IRON FOUNDERS, 4 Vine-street, York-road, Lambeth. Orders for Malleable Iron Castings executed within a week. (77)

WANTED a Person thoroughly competent to take out quantities and prepare Estimates of Railway Carriages and Waggons. Applicants to state fully the nature of their experience, also where and during what periods they have been similarly engaged.

Address, enclosing references or testimonials, post-paid, to X. Z., care of Messrs. Weaklin and Flint, Stationers, 91 Farringdon-street, London, E.C. (292)

TO MANUFACTURERS, THE ENGINEERING, MECHANICAL, & BUILDING TRADES GENERALLY.

MESSRS. BOOTH & CO., AUCTIONEERS and BUILDERS' SALESMEN, having opened Registers for Public and Private Sales of all kinds of JOB LOTS, Surplus Stock, Stores, Tools, Implements, &c., &c., (either Old or New,) beg to call the attention of all parties to the only medium established of the kind, and to state that they are prepared to receive consignments of any weight, bulk, or value, and of any class of Goods for immediate Sale. Full particulars may be had for two stamps, at the BUILDING TRADES REGISTRY OFFICES, (established 1857,) 13 EASTCHEAP, LONDON, E.C. The Public Sales by Auction are held Weekly, on EVERY TUESDAY, at ONE O'CLOCK, and for the present at the BUILDERS' SALE GROUNDS, (established 1858,) 23 and 24 MARYLEBONE ROAD, REGENT'S PARK, W. Catalogues by Post for One Stamp. Advances on New Goods. All communications are held private and confidential. (204)

TO RAILWAY COMPANIES, CONTRACTORS, AND OTHERS.

GEORGE NEIGHBOUR and SONS, OIL MERCHANTS,

Particularly invite attention to their PATENT ARGAND LAMP OIL, for Railway Roof and Signal Lamps; also to their EXTRA-REFINED ENGINE OIL, for Locomotive and Machine purposes. Prices forwarded on application.

127 HIGH HOLBORN, LONDON, W.C.

Agent at MANCHESTER—E. S. ROGERS, 33 Cannon Street. (281)

INDIA RUBBER TUBING, for Watering Gardens, Greenhouses, &c., all sizes. Also Brass Spreaders and Union Joints, for connecting the Hose to Cisterns. Illustrated price lists post free.

JAMES LYNE HANCOCK,

Vulcanised India Rubber Works, Goswell-mews, and 8 Goswell-road, London, E.C. (255)

CAUTION.

TO ARCHITECTS AND BUILDERS.—In consequence of numerous complaints, the Patentee begs to inform the above, that all genuine SMITH'S PATENT DOOR SPRINGS, for Swing Doors, are stamped with Name and Address, thus—SMITH, Patentee, 69 Princes-street, Leicester-square, London; and that Springs thus marked are warranted. SMITH'S PATENT WEATHER-TIGHT CASEMENT FASTENING AND SILL-BARS are admitted by all to be the most perfect invention for the purpose. Diagrams and List of Prices on application. (143)

PATENT WEDGE and GROOVED SURFACE FRICTIONAL GEARING.—The PATENT FRICTIONAL GEARING COMPANY, Proprietors of ROBERTSON'S WEDGE SURFACE FRICTIONAL GEARING PATENTS, grant Licences to Users of Machinery, for the unlimited use of the System in their Works, on very moderate terms, enabling them to make or order from any Mechanician the Machinery they require.

The Company possess Five Patents relating to this Frictional System, including (in addition to their Bevel and Mitre Wheels) a System of Disc Clutches and Clutch Movements, Wheel Clutching, Reversing, Differential, Speed Ring, Varying Speed, and Break Movements, and of Shafting, Pillow Blocks, Shafting Hangers, &c.

Frictional Wheels thus formed are applicable to the heaviest as well as the lightest kind of work, and, in addition to their being extensively in use for ordinary gearing purposes, have been in use for a considerable time applied to Mills for Rolling Iron, the Screw-Propeller, Incline-Winding Engines, Saw Mills, Pumping Engines, Flax Scutchers, Fan Blowers, Calico-Printing Machinery, Steam Winches, Cranes, Hoists, &c.

This system gives great facilities for simplifying Machines, and for mechanical combination, and has the advantage of being noiseless and cleanly, there being no oil or grease used on the wheels. Wheel Catalogues and Circulars, giving particulars, sent free by Post; also, a list of manufacturing Agents, and information regarding those who, from locality or experience, are best able to execute orders for the description of work required.

Office, 20 Buchanan-street, Glasgow. (146)

CHADBURN BROTHERS'
PATENT METALLIC STEAM GAUGES.

THESE GAUGES have been in use more than three years, and have given general satisfaction. Those first fixed are now in as good working condition as ever. Testimonials, &c., may be seen at CHADBURN BROS.' Works, Sheffield.

The Gauges may be had of Messrs. Elliott Bros., Strand; Mr. Fenn, Newgate-street; Messrs. Dring and Fage, Tooley-street; Messrs. Nigretti and Zambra, Holborn. (286)

WOOD ENGRAVING.

TO THOSE ISSUING ILLUSTRATED CATALOGUES OR CIRCULARS.

C. STEVENS,
OF
10 GOUGH-SQUARE, FLEET-STREET,

Undertakes the preparation of Illustrated Catalogues and Circulars, for Engineers, Agricultural Implement Makers, Ironmongers, Birmingham and Sheffield Warehousemen, and others; and from considerable experience in illustrating mechanical journals, can ensure accuracy of detail both in the Drawing and Engraving. This is secured by employing professed Mechanical Draughtsmen in the preparation of the Drawings on the Wood Blocks.

ESTIMATES FURNISHED.

ADDRESS,
C. STEVENS,
DRAUGHTSMAN & ENGRAVER ON WOOD,
10 GOUGH-SQUARE, FLEET-STREET. (288)

BIRMINGHAM WAGGON COMPANY (LIMITED) has RAILWAY WAGGONS for HIRE. Apply to the Secretary, 3 Newhall-street, Birmingham. (276)

ISCA FOUNDRY COMPANY, OLD BARRACKS, NEWPORT, MON.
ENGINEERS, AND RAILWAY WAGGON BUILDERS.
Manufacturers of Switches, Points, and Crossings, Chairs, Spikes, Bolts, and General Railway Fittings. (279)

YORKSHIRE TYRE & AXLE WORKS, ROTHERHAM.
LOCOMOTIVE TYRE-BARS of every description for Engines, Carriages, and Railway Waggon Wheels.
STEEL-IRON for Springs. MERCHANT and other Irons manufactured. WM. F. HOYLE, Proprietor. (278)

RICHARD BAIRD, GENERAL COMMISSION AGENT, and CONTRACTOR for all descriptions of RAILWAY PLANT and STORES.
13 DOCK-STREET, DUNDEE. (280)

FUEL AND STEAM ECONOMY.—Apply to Mr. LEE STEVENS, C.E., 1 Fish-street-hill, E.C. (243)

IMPORTANT TO COUNTRY MANUFACTURERS.

TO ENGINEERS, SHIP-BUILDERS, AND CHANDLERS, IRON FOUNDERS, TOOL MAKERS, AGRICULTURAL IMPLEMENT MAKERS, AND OTHERS.

A Practical Engineer and Member of the Institutions of Civil and Mechanical Engineers being in treaty for large and very commanding premises in Fenchurch-street (in direct line between the Docks and Mark-lane and the City), for the Exhibition and Sale of some Patented Articles of his own Invention, is desirous of undertaking the London Agency of one or two Firms of established reputation, and of whose manufactures samples, models, or drawings could be exhibited. The Advertiser having a large connection amongst Ship Owners, Engineers, and Scientific Agriculturalists, and attending the principal Agricultural Shows, possesses many facilities for forwarding the interests of those for whom he may act. To those desirous of having the use of a good London Office and of exhibiting their Manufactures in one of the best thoroughfares in Town; and, moreover, of being represented by a thoroughly practical Mechanic, the present is a very favourable opportunity. The terms proposed are a Commission on all business done in addition to a moderate rental, in proportion to the space occupied by the articles exhibited. Address, with full particulars, to C. M. E., 1 Parkside, Knightsbridge. (263)

MATHEMATICAL DRAWING INSTRUMENTS, RULES, TAPES, CHAINS, LEVELS, THEODOLITES, BOX SEXTANTS, PRISMATIC and POCKET COMPASSES. Price Lists of the above articles sent post free, by JOHN ARCHBUTT, 20 Westminster Bridge Road, Lambeth, near Astley's Theatre. Every article warranted, and the prices will be found considerably lower than ever before charged for articles of similar quality. Routledge's Engineers' Slide Rules, 4s. 6d. each; Hawthorn's ditto, 5s. 6d.; Carpenters' Rules from 1s. (148)

GAS EXPLOSIONS PREVENTED.

USE THE TUBES AND FITTINGS MADE BY JOHN RUSSELL and Co. (Established at the commencement of gas-lighting), whose goods are all well tested, and warranted.

J. R. and Co. supplied Thomas Cubitt, Esq., for all his houses in Belgravia, the Queen's Palace, &c., which localities is proverbially free from gas.

J. R. and Co. are the Inventors of the Lap-Welded Tube for Steam Boilers, and have recently obtained a Patent for an improvement in them.

J. R. and Co. are the holders of the First Prize Medals for Gas-Tubes and Fittings and Boiler Tubes.

WORKS:
THE OLD TUBE WORKS, WEDNESBURY.
THE ALMA WORKS, WALSALL.

WAREHOUSES:
69 UPPER THAMES-STREET, LONDON.
35 GRANBY-ROW, MANCHESTER. (168)

BY ROYAL LETTERS PATENT.

CAPT. KYNASTON'S "LIFE HOOKS," by means of which boats may be disengaged with perfect safety from the usual tackles of a ship, whether she be moving rapidly ahead, going astern, or stationary. Approved and already adopted by many of the ships of the British and Dutch Navies, &c. This plan is so simple that the Hooks, with the trifling gear attached, may be applied to any boat in half an hour, or transferred from one to the other without difficulty, their use involving no addition to the ordinary fittings. Apply in London at Cunningham's "Patent Topsail" Office, 12 London-st., E.C.; or to the Patentee, through Messrs. Hallett & Co., 14 Great George-street, Westminster. (262)

TO STEAM SHIP BUILDERS, ENGINEERS, TOOL MAKERS, IRON MASTERS, AND OTHERS.

THE ADVERTISER, who has had considerable experience in Marine Engineering and Iron Shipbuilding, and who is an expert Draughtsman, is desirous of meeting with a permanent Engagement as London Agent, Manager of a Shipbuilding Yard, or to act in any capacity in which ample knowledge of Mechanical Details and a large connexion among Engineers, Ship Owners, and others, might be rendered available. The Advertiser having also been much engaged in working out some important patented inventions, would undertake to further the objects of those having property of this kind, either to dispose of or to bring into operation. Apply by letter, to M. E., MECHANICS' MAGAZINE Office, 166 Fleet-street. (250)

TO ENGINEERS, ARCHITECTS, PATENT AGENTS, &c.

PHOTOGRAPHS OF THE HIGHEST CLASS and of any size, taken and reproduced at a most moderate rate of charge. Reproductions of faultless accuracy, of Machinery, Models, Drawings, &c. Orders attended to in town and country. Estimates forwarded.

SPENCER, READ, & Co., 4 Agar-street, Strand. W.C. (90)

MALLET'S PATENT BUCKLED PLATES.—MR. ROBERT MALLET, C.E., Inventor and Patentee of these Plates (now being laid for the Floor of the New Bridge, Westminster, and applicable to Bridge, Wharf, and Fire-proof flooring, and to a variety of other important purposes) gives notice that he has withdrawn from this date all Licences whatsoever to manufacture or vend his Patent Plates, and taken the management of the Patent exclusively into his own hands. Applications for the Plates to be made to the Patentee, who has arranged for their prompt supply, at his offices, 11 Bridge-street, Westminster, S.W., and 97 Capel-street, Dublin.
18th May, 1859. (264)

INDIA-RUBBER VALVES FOR STEAM ENGINES, PUMP PACKING, &c. — Explanatory Drawings and Information as to the best modes of fitting and arranging the above, and all other Mechanical Applications of VULCANISED INDIA-RUBBER, are furnished post-free by

CHARLES MACINTOSH & Co., Patentees,
Cambridge-st., Manchester, and 3 Cannon-st. West, London.
MANUFACTORY and DEPOT, Cambridge-st., Manchester.
GENERAL WAREHOUSE, 3 Cannon-street West, London, E.C.—C. M. and Co.'s only Establishments. (139)

RAILWAY AXLE-BOX COMPANY continue to grant Licenses to manufacture and use AXLE-BOXES under their PATENTS, which include those of Messrs. ADAMS and RICHARDSON, WRIGHTON, NORMANVILLE, VIGURS, and others.

These are the only AXLE-BOXES that effectually EXCLUDE DUST, and prevent the escape of grease, by which an important saving is effected in the wear and tear of the JOURNALS and BEARINGS and the CONSUMPTION of GREASE.

Further particulars and Licenses may be obtained of
P. M. PARSONS, Manager.
9 Arthur-street West, London-bridge, E.C. (283)

THE USE of a CORNISH HIGH-PRESSURE BOILER is required for a few weeks after usual working hours, to complete some experiments on the evaporation of water under varying pressures. Parties willing to treat are requested to address, stating full particulars and terms, to X. Y. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street, E.C. (248)

PUMPING MACHINERY.

GWYNNE AND Co., Engineers, London, manufacture and supply the following Machinery, of the most approved construction and with all the latest improvements:—Portable and Fixed Steam-Engines and Boilers of every description; Waterwheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the Supply of Towns, Cities, and Districts, and for the Irrigation of Coffee, Cotton, Indigo, Sugar-cane, and Rice Estates, for pumping out Coffer-dams, Canals, Dry Docks, Reservoirs, &c. They also manufacture and supply the Pumping and other Machinery for Paper, Pulp, and Fulling Mills, Breweries, Distilleries, Tanneries, Starch Works, Bleaching, Dyeing, and Calico Printing Works, Chemical Works, Silk, Cotton, and Flax Mills, and Manufactories in general. All Letters not paid will be refused. Illustrated Price Lists forwarded on receipt of Six Postage Stamps.—GWYNNE AND Co., Hydraulic and Mechanical Engineers, Essex-wharf, Strand, London.

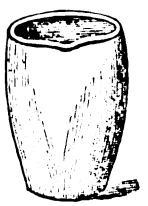
For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (24)

TO BRASS FOUNDERS.

TO BE SOLD, the Patent-right of a New and Highly-approved EQUILIBRIUM WATER COCK or VALVE, suitable for Steam Boiler Feed Pipes, or any cases where the valve is required to be opened against pressure.

Address H., MECHANICS' MAGAZINE Office, 166 Fleet-st., where a Drawing may be seen. (151)

TO BRASS-FOUNDERS, ENGINEERS, &c.



THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings, they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty per cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, muffles, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire-standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. 43

TO MARINE ENGINEERS, OR SHIP-BUILDERS.

THE PROPRIETOR of a VALUABLE PATENT for Double-expansive Marine Engines (by which great economy of space and fuel is obtained) is desirous of entering into arrangements with a respectable firm for the construction of the same. An adequate portion of the patent-right would be assigned by the advertiser to any firm taking the matter up; and he would render all assistance in his power, either in London or elsewhere, amongst ship-owners (to many of whom he is well known), in obtaining contracts, &c. Unexceptionable references given. Address C. E., MECHANICS' MAGAZINE Office, 166, Fleet-street. (76)

EMIGRATION TO NEW YORK, CANADA, AUSTRALIA, NEW ZEALAND, EAST INDIES, CAPE OF GOOD HOPE, &c. All Classes of Passengers booked throughout in the Finest Steam and Sailing Packets. Full Particulars in our circulars for 1859, may be had gratis on application to F. S. GRAY and Co., 54 King William Street, City, and 6 Tower Hill, London; and at 35 Bath Street, Liverpool. (187)

ENGINEERING BUSINESS FOR SALE.

OWING to the continued ill health of the Proprietor, the first-class business of an Engineer and Crane and Block Maker is offered for sale. It has been established in the Metropolis for nearly 30 years, and has enjoyed extensive patronage amongst Brewers, Manufacturers, Warehousemen, and others, in and about London; the business done amounting to nearly £8,000 per annum. About £3,200 would be required, (part of which, however, may remain for any reasonable time on good security,) which is the bare value of the tools, patterns, and stock in trade. The premises, including good dwelling-house, very conveniently situated, and capable of accommodating from 60 to 70 hands, are held upon a long lease, at an extraordinary low rental, not exceeding £100 per annum, taxes included. Many of the tools are nearly new, and of the best construction. The present proprietor, who relinquishes the business solely on account of ill health, would give every assistance in his power to those succeeding him; and as his foreman, who has been with him for nearly ten years, is thoroughly acquainted with the practical parts of the business, any gentleman desirous of commencing as a manufacturing engineer would find the present a very favourable opportunity. As all accounts have been, for many years past, collected quarterly, a very small amount, say £800, would suffice as working capital. Full particulars may be obtained by application to E. E. ALLEN, Esq., MECHANICS' MAGAZINE Office, 166 Fleet Street, E.C. (130)

VENTILATION WITHOUT FLUES.

KUKLA'S PATENT STOVES,

At 18s., 25s., and 50s.

KUKLA'S newly-invented Deflagrator—the first and only perfect GAS STOVE. Guaranteed to burn without flue—without dust, smell, or smoke, producing a great and pure heat with the least expenditure of Gas.—*Vide Society of Arts' Journal.*

Patronised by the English and French Government.

Scientific in Principle,
Simple in Construction,
Healthy and efficient in use.

The Deflagrator Stove is cheap, portable, and suited for every situation; and from the principle on which it is constructed (viz., expanding to a sixfold volume the gas used) is capable of warming any given space more quickly and more thoroughly than any other means: while its addition forms a sure remedy for any ill-warmed or ill-ventilated apartments.

The 25s. Deflagrator warms a room of 2,000 cubic feet at a cost of 3d. per day.

The 50s. Deflagrator warms 5 to 6,000 cubic feet at a cost of 6d. per day (twelve hours). Also, the Greenhouse Stove at 18s.

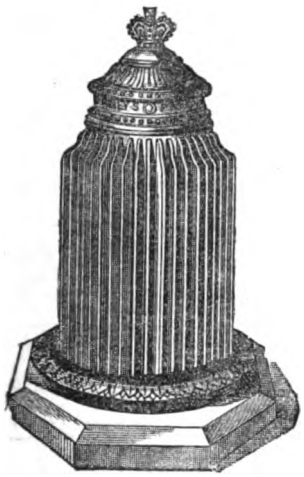
Patentee and sole Manufacturer, F. X. KUKLA, 194 Pentonville-road, London.

Country orders promptly attended to. Carriage free to any Railway in London.

Post-office Orders should be made payable to FRANCIS XAVIER KUKLA, General Office.

N.B.—Every Stove separately tested before sent out.

The New GAS COOKING STOVE for 10 persons, price £3. (103



THE LONDON

WARMING AND VENTILATING COMPANY,

(LIMITED,)

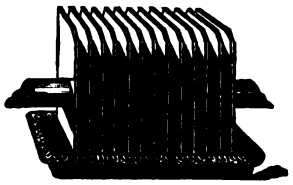
26 GREAT GEORGE STREET, Westminster, S.W.

(MANAGER—Mr. WOODCOCK.)

Churches, Greenhouses, Offices, and Buildings of every description warmed by means of a modification of the plan successfully used during the last five years by Mr. Goldsworthy Gurney in both Houses of Parliament.

Steam, Hot-water, Gas, and in open or enclosed fireplaces, Coal and Coke are equally available for the process.

The cost is less and the effect greater than that of any other known means.

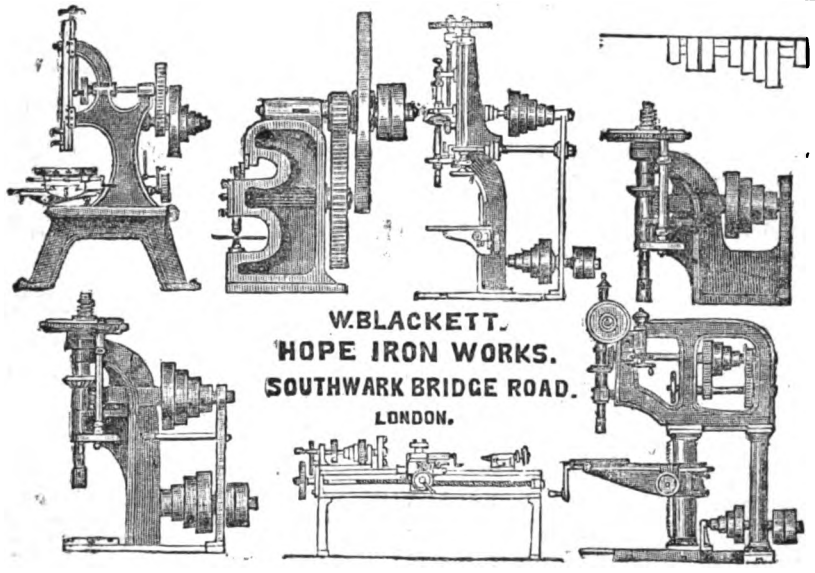


The Horticulturist will find herein an instrument of new and important powers.

The apparatus may be seen in ST. PAUL'S CATHEDRAL, the various offices of the "Department of Science and Art," and in many churches and other buildings.

Particulars and Testimonials forwarded on application.

(12)



W. BLACKETT has in Stock a variety of Vertical and Horizontal Steam Engines, Boilers, and Engineers' Tools, ready for delivery on the shortest notice. Apply as above. (70)

IMPORTANT TO MANUFACTURERS, MILL OWNERS, &c.

GUTTA PERCHA MILL BANDS.

THE GUTTA PERCHA COMPANY beg to state that the increasing demand for the Gutta Percha Strapping for Driving-bands, Lathe-straps, &c., fully justifies the strong recommendations they have everywhere received.

Their durability and strength—permanent contractability and uniformity of substance—their non-susceptibility of injury from contact with oils, grease, acids, alkalies, or water—and the facility with which the only joint required can be made in bands of from 200 to 300 feet long—render them superior to leather for almost all working purposes, and decidedly more economical.

TESTIMONIALS.

IMPORTANT ANNUAL SAVING.

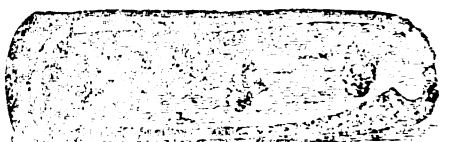
From TRUMAN, HANBURY, BUXTON, & Co., Brewery, London.

"In reply to your inquiry, we have much pleasure in bearing our testimony to the advantages, both as regards economy and saving of time, effected by the use of your Patent Gutta Percha Bands in lieu of Leather Straps. The stoppage of one portion of our works through the failing of the leather strap used to be of daily occurrence—but with this annoyance we are now never troubled. We have had these straps in operation for nearly three years, and are assured by our Engineer that *they effect a saving to us of at least* THIRTY POUNDS *a year*."

From JAMES ABERNETHY & Co., Fury Hill Foundry Aberdeen.

"We have now had Gutta Percha Bands working here *for three years*. One of them has been driving the fan blast for our smith's shop for all that time, and for anything we see, may drive it as long again. The speed of the fan is but 1,200 per minute. We have used them with complete satisfaction, driving circular saws, and in some cases where leather bands would have been quite inapplicable from damp. We have uniformly endeavoured to have the drums and pulleys so proportioned to the strain, as that there is no chance of the band slipping; and with this precaution, and taking care in using *cross bands that they do not rub*, we are quite satisfied that they are superior in every respect to leather—stronger at the same weight, and keeping quite straight in working—requiring no lacings, and very seldom any repairs."

WATER POISONED BY LEADEN PIPES.



The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dick, of Bonchurch, Isle of Wight.

POISONED WATER PREVENTABLE

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha Tubing. Nothing can be better. I have also recommended it to others, who have adopted the expedient."

A variety of Gutta Percha Articles, such as Mill Bands, Tubing, Sheet, Soles, Pump Buckets, Bosses, Union Joints, Bottles, Bowls, Flasks, Curtain and Cornice Rings, Solid Frames, Galvanic Batteries, &c., &c.

LIST OF MISCELLANEOUS TENDERS INVITED, AND ENGAGEMENTS OPEN.

The tenders and vacancies which appear in this weekly list are not repeated in succeeding numbers.

IRON WORKS, *East India Railway.*—For waggon iron, hollow spikes, and iron permanent way, viz., 81 sets of iron work for open-sided goods' waggons; 12,000 hollow wrought-iron spikes; one mile of iron permanent way, according to specifications and drawings with D. J. Noad, sec., East India Railway House, Alderman's-walk, New Broad-street, London. Tenders, June 21.

PATENT SLIP AND GRAVING DOCK, *Dundalk Harbour.*—The commissioners invite tenders for erecting a patent slip for repairing vessels of 300 tons register; also for building a graving dock, to take in vessels of 400 tons register. Further particulars, Mr. R. Needham, engineer to the commissioners. Tenders addressed to the chairman and seal to Mr. T. J. Pooler, sec. office, Quay-street, Dundalk, June 27.

RAILWAY STATION, *Wigan.*—Large passenger station for Lancashire and Yorkshire Railway Company at Wigan. Drawings, &c., at the Company's offices, Hunt's Bank, Manchester. Tenders to Mr. W. S. Lawn, sec., June 25.

GASHOLDER, *Keighley Local Board of health.*—Erection of a single-lift gasholder, 70 ft. diam. and 16 ft. deep. Plans, &c., Mr. R. Asquith, gas office, Keighley, Yorkshire. Tenders to the chairman, June 21.

LUNATIC ASYLUM, *Abergavenny.*—For a new detached wing, &c., to the Joint Counties' Lunatic Asylum. Plans and tenders at the Asylum, June 25.

CHAPEL, *Bodmin.*—Plans, &c., Messrs. Demant and Reid, 22 Courtnay-street, Plymouth, or at offices of Superintendent of Cornwall Lunatic Asylum. Tenders June 27.

CHAPEL AND SCHOOLS, *Holme.*—In Chapman-street, Boston-street, for the Wesleyan Reformers. Plans, &c., Mr. Acres, 77A Market-street. Tenders to Mr. J. T. Chadborn, Secretary, 1 Mayfield-grove, Embden-street.

NATIONAL SCHOOLS, *Scarboro'.*—Plans with the master of the boys' school, Granby-place. Tenders Mr. Christian, 10 Whitehall-place, London, June 27.

POLICE STATION, *Loughborough.*—Specifications, Magistrates' Clerks' Office, Town-hall. Bills of quantities, &c., Messrs. Bellamy and Hardy, Lincoln. Tenders, 5 P.M., June 24.

HOUSES AND FARMSTEADS.—On the Counthorpe Estate, between the Corby and Little Bytham Stations, on the Great Northern Railway. Plans, &c., Mr. E. Browning Architect, Stamford. Tenders to 6 P.M. June 21.

HOUSE, COTTAGE, AND TWO FARMSTEADS, *South Hyme.*—Near the Sleaford and Boston Railway. Plans, &c., Mr. E. Browning, Stamford. Tenders 6 P.M., June 21.

MALT HOUSE, &c., *Leeds.*—Large malt house and kiln, with engine house and chimney. Plans, &c., Messrs. J. Child and Son, architects, 23 Park-row, Leeds. Tenders, June 21.

HOUSE WORK, *Barnsbury.*—For the painters', glaziers', and plumbers' work in eight houses, Roman-road, Barnsbury. Specifications, Albert Wharf, New Wharf-road, Caledonian-road.

LODGE, *Maidstone.*—Alterations and additions, at the County Prison. Plans, &c., Messrs Whicheord and Blandford, architects, Maidstone. Tenders, June 23.

RE-BUILDING HOUSES, *Southwark.*—Taking down and rebuilding several. Plans, &c., Messrs. Waring and Blake, 42 Parliament-street, Westminster; to whom tenders, June 27. Quantities not supplied.

DRAINING, *Scotland.*—Contractor wanted to trench and drain 15 acres of natural rough pasture ground in a northern county and of easy access from Edinburgh. Apply to No. 321 *North British Advertiser* office, Edinburgh, where particulars and specifications.

MEMEL SLEEPERS, *Eastern Counties.*—100,000 rectangular, to be delivered at the Port of Lowestoft. Forms and information, the engineer, London. Tenders to the sec., June 21.

MEMEL TIMBER, *Eastern Counties Railway.*—For the supply of 1,000 loads, at the Port of Lowestoft. Forms of tender and information, the engineer, at Stratford, London. Tenders to the sec., June 21.

GRANITE, *Fulham Union.*—For supplying 800 tons of blue Guernsey granite, to be delivered at the stone yard of the Union, Fulham-fields, by 30th Sep. next. Tenders to the board-room, June 23.

LIME, *Manchester Corporation Gas Works.*—For the supply of the lime required in the next twelve months. Particulars and forms of Mr. Peacock, York-chambers, King-street.

IRON STABLE FITTINGS.—Fifty sets ramps and sills, with manger, stable guttering, &c., of strong metal. Mr. T. L. Craven, Hill Lodge, Paddington.

IRONMAKING.—A person is wanted to take care of iron manufacture at an Ironworks in the Midlands, practically acquainted with the manufacture of pig-iron, and thorough knowledge of all mechanical operations incidental thereto. Application to Bassett Smith, Esq., 3 Newhall-street, Birmingham; or Messrs. Woodhouse and Jeffcock, Civil and Mining Engineers, Midland-road, Derby.

MINING SCHOOL TEACHER, *Glasgow.*—First engagement 3 years. Salary not less than £250 per annum. Applications, Messrs. Burns and Maclean, writers, 41 West George-street, Glasgow, July 1.

TO ENGINEERS AND DRAUGHTSMEN.—A young man wanted who is accustomed to surveying, drawing and colouring plans. One conversant with the details of wrought-iron bridges and girders preferred. Address, stating experience and weekly salary required, to C. A., Messrs. Hooner and Cull, 13 Lombard-street, E.C.

ASSISTANT RAILWAY STOREKEEPER, *East India.*—For the Bombay, Baroda, and Central India Company. Applications June 23. Offices, 10 Liverpool-street, New Broad-street, London. Must produce certificates of experience in the charge of stores for the construction and working of lines. Salary £350 per annum. To proceed to India at once.

MEDALS AWARDED TO

THOMAS GLOVER'S PATENT DRY GAS-METERS.

VIZ.:

GREAT EXHIBITION, LONDON, 1851. | NEW YORK EXHIBITION, 1855.

AND PARIS UNIVERSAL EXHIBITION, 1855.

LONDON, March 25, 1859.

THOMAS GLOVER takes this opportunity of thanking Gas Companies and his other Customers for the very liberal support and patronage he has received during the past year, which has far exceeded his most sanguine anticipations, having sold a greater number of his PATENT DRY GAS-METERS since the dissolution of his partnership with Mr. Croll than he was ever previously enabled to do in any one year.

THOMAS GLOVER confines his sole attention to the business of Gas-Meter Making. The propriety of his doing so is satisfactorily proved by his success; and, without the practice of any quackery, or any attempt to delude the public by an absurd exhibition of "Old and New Valves," his Meters are in general use by the Metropolitan Gas and other Companies in this Country and abroad. For example, one Metropolitan Company have now in use above **12,500** of his Patent Dry Gas-Meters; some of these Meters have been fixed for Fourteen Years, and are still in working order, without complaint from either the Company or the Consumer.

THOMAS GLOVER thinks it necessary to put Gas Companies on their guard against parties selling Patent Dry Gas-Meters constructed in imitation of his, but unskilfully made on erroneous principles, and with improper and unsuitable materials.

THOMAS GLOVER'S Workshops are now the most extensive in this or any other country, and he is thereby enabled promptly to execute orders to any extent required. Purchasers may at any time inspect his Works and the Materials of which his Meters are constructed. He is ready to enter into Contracts with Gas Companies and others to uphold their Stock of his Meters for Twenty Years at an annual charge varying from 2½ to 5 per cent., and to leave always in the hands of Gas Companies Three Years' charge for upholding, as a guarantee for the fulfilment of the Contract.

THOMAS GLOVER,

PATENT DRY GAS-METER MANUFACTURER,

SUFFOLK STREET, CLERKENWELL GREEN, AND

ALLEN STREET, GOSWELL STREET, E.C. (293)

D. HULETT & CO.,

55 and 56 HIGH HOLBORN, LONDON,

Patentees and Manufacturers of the only good Mercurial Gas Regulator,

INVITE the attention of Gas Companies and the Trade generally to their Improved GAS-METERS, which they warrant equal to any in Quality, Workmanship, and Simplicity of Construction, and the only Meters from which Gas cannot be obtained without being duly registered.

Manufacturers of

GAS CHANDELIERS, GLASS LUSTRES, HALL LANTERNS, VESTIBULES, BRACKETS, PENDANTS;

Double Cone, Albert, Shadowless, and every description of Burner, Union Jets, Batswings, &c.;

IMPROVED FULL-WAY CARTER'S VALVES (much approved of);

GAS-STOVES, and every article connected with Gas-Apparatus.

CAST AND WROUGHT-IRON PIPE, BLACK AND GALVANISED. COPPER, TIN, BRASS, AND COMPOSITION TUBING.

D. HULETT'S IMPROVED SERVICE CLEANSER,

for clearing out Mains, Services, and Interior Fittings—60s. net.

BOYLE'S PATENT SILVERED GLASS COMBINATION REFLECTORS AND OUTSIDE LANTERNS.

Sole Manufacturers of CHURCH & MANN'S PHOTOMETER.

Large Pattern Books, with every description of Gas-Fittings, Chandeliers, &c., with complete Book of Prices, 12s. (294)

A VALUABLE PATENT to be DISPOSED OF.—The Patentee will either dispose of the Patent or grant Licences to any party wishing to manufacture, or would join a person with capital to carry out the Patent.
Address, A. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street. (163)

WILLIAM WARNE & CO.,

Manufacturers of all descriptions of

VULCANIZED INDIA-RUBBER,

SHEETS, WASHERS,

HOSE-PIPES, TUBINGS, ETC.;

Sole Manufacturers of

WARNE'S PATENT INDIA-RUBBER TUBULAR MATS,

For Doorways, Stairs, Baths, Carriages, Ships, &c., which never clog, require no beating, and, unlike all other Mats, are readily cleansed by water. Indestructible by damp, these Mats are especially suitable for uncovered Passages, and out of door purposes. Seat Mats, Housemaids' Mats, and Brushes for wooden and stone floors.

Sole Manufacturers of

WARNE'S PATENT MINERALISED IMPROVED KAMPTULICON,

Possessing advantages over all the ordinary makes, in exceeding toughness, and flexibility, and consequent durability, while neither heat nor cold has effect upon it. Widths, 3/4s., 4/4s., 6/4s., and 7/4s. Substances, ⅛, ¼, and thicker if required. Length, 20 to 25 yards.

Patentees of the Red Mineralised India Rubber—the only Rubber not affected by Oil.

Warehouse, 9 Gresham-street West, E.C. Mills, Tottenham, N. (244)

RAILWAY SLEEPERS, &c.

WE are prepared to sell, by Private Contract, about 100,000 Scotch Fir Sleepers, of the various dimensions in use.

Also, any quantity of Larch, and Scoth Fir Poles, Planks, Deals, Staves, and Pitwood.

Early applications will meet the best attention of

REID and FORBES.

45 High-street, Inverness, N.B. (282)

MR. WALTER HALL is prepared to Grant Licences, or to Dispose of his Patent for working Railway Breaks. Particulars to be had of Mr. HALL, who may be addressed by letter to the care of the MECHANICS' MAGAZINE, 166 Fleet-street, E.C. (217)

NORTON'S GOSSAMER CARTRIDGES,

FOR MILITARY FIRE-ARMS.

These Cartridges are Manufactured by Mr. JAMES LEETCH, Gunmaker, 68 Margaret-street, Regent-street, and by DAW, of Broad-street. (237)

EDWIN JEWITT, ENGRAVER ON WOOD AND DRAFTSMAN, 1 Pickett-place, Strand, near Temple-bar. Engineering, Scientific, and Mechanical Designs accurately engraved. Manufacturers and Tradesmen's Catalogues Illustrated. W.C. (84)

VULCANISED INDIA-RUBBER MACHINE BANDING is NOT AFFECTED BY WET, HEAT, OR COLD; does not stretch nor slip on the pulleys. HOSES for BREWERIES, &c., will NOT impart TASTE, SMELL, or COLOUR: also for conducting, or steam purposes. Washers, Valves, Sheets, Printing Blankets, &c., in Stock. Other Articles made to order. All Goods warranted to stand 300° Fahrenheit.

N.B.—Sole Contractors to the Lords Commissioners of the Admiralty.

DODGE and GIANDONATI (late DODGE, BACON, and Co., 44 St. Paul's Churchyard, London, E.C. (208)

BRASS ENGINE and BOILER FITTINGS.—

Water-Gauges for Glasses, ½ ¾ 1 inch diam.
26/, 30/, 35/ each.
With Guards, 32/, 37/6 „

Gauge and Pet-Cocks, from 3/6 each.

Whistles, with 1½ 2 2½ 3 4 inch bell.
12/6, 18/6, 26/, 45/, 50/ each.

Blow-off Cock for Portable Engines, 12/6 each.

Oil Cups, of all kinds, from 18/ per dozen.

Ball Clacks, Balls, Cages, and sets complete.

Forsyth's Safety Boiler Plugs, 12/6 and 18/ each.

WILLIAM WALLER, Uddingston, by Glasgow. (214)

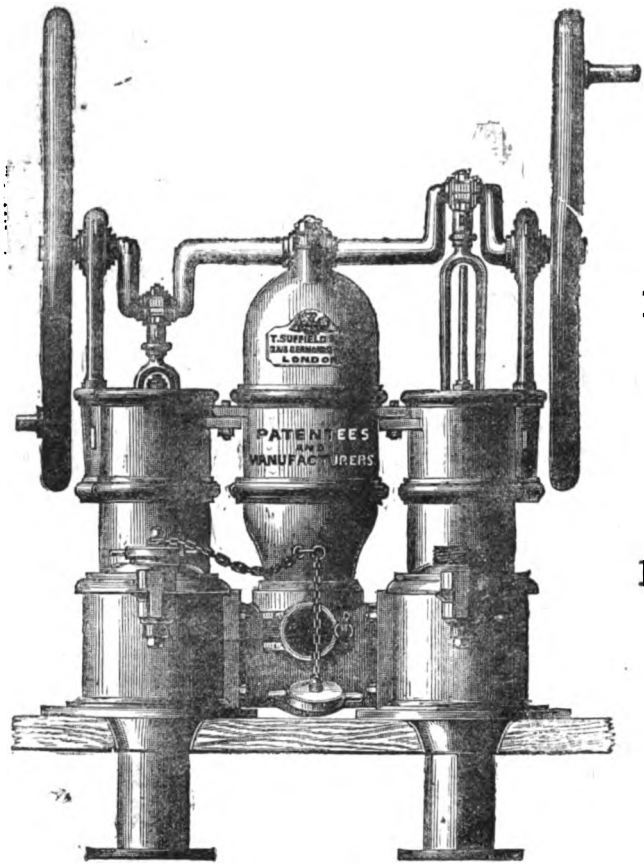
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS. SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

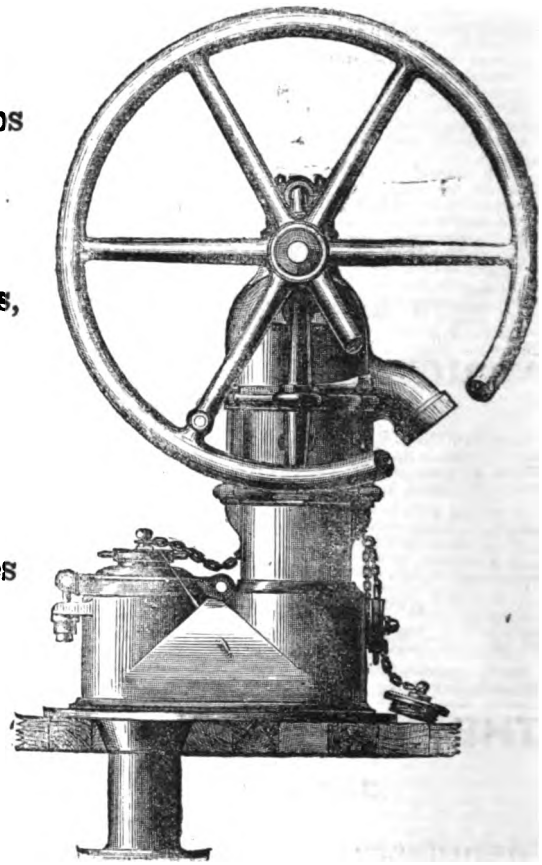
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangemen t either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps; the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board; the rapidity with which they can be converted into Fire Pumps, or be applied to the Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Works or Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require suc Stores, together with a further saving in the cost of such Articles.

JOHN HENDERSON PORTER,

ENGINEER AND CONTRACTOR,

PATENTEE OF VARIOUS IMPROVEMENTS IN THE CONSTRUCTION OF

IRON BUILDINGS, BRIDGES, ROOFS, AND FLOORS,

IRON BUILDING AND ROOFING WORKS,

GAS STREET, BIRMINGHAM.

RAILWAY, SHIP, AND BUILDERS' IRONWORK OF ALL KINDS.

Roofs and Bodies of Luggage Vans, Trucks, and Coal Waggons.
Cast and Wrought Iron Columns, Stanchions, and Girders.
Ties, Straps, King-heads, Shoes, &c.
Iron Punts for Sugar Estates, &c., &c.
Tanks, Casks, and Barrels.
Iron Wheelbarrows, Cart Bodies, &c.
Hay Racks, Mangers, Sheep Cribs, and Cattle Troughs.
Rick Stands, and Sliding Roofs of Wrought Iron.

SUBJECTS ILLUSTRATED IN LITHOGRAPHED SKETCHES.

The application of Corrugated Iron Roofing Plates to Roofs of Timber Framing, particularly suitable for the Colonies, Railway Carriage Sheds, and Station Roofs; Iron Sheds for Sugar and Coffee Estates, for Manufactories, Weaving Sheds, &c.; Iron Roofs for Churches, Farm Buildings, Gasworks, &c.

Iron Buildings, viz.—Warehouses, Sugar Refineries, Market Houses, Railway Stations, Stores, Dwellings, &c., erected in this country, in the East and West Indies, Egypt, China, the Cape of Good Hope, South America, and Australia.

Plans and Estimates will be furnished on Application

LONDON OFFICE—33 NICHOLAS LANE, CITY, E.C. (272)

CLAYTON, SHUTTLEWORTH, AND CO.,

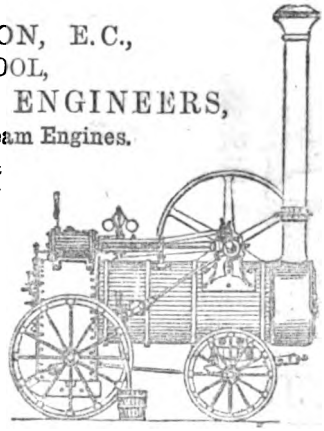
OF LINCOLN,

78 LOMBARD STREET, LONDON, E.C.,

AND 36 DALE STREET, LIVERPOOL,

AGRICULTURAL AND GENERAL ENGINEERS,

And Manufacturers of Portable and Fixed Steam Engines.



Combined Threshing Machines, which dress the corn ready for market at one operation. Grinding Mills, Saw Benches, Pumps for Irrigation and Mining purposes, with all necessary gearing for being driven by steam power. Full particulars and estimates given on application to the above address.

C. S. and Co.'s PORTABLE STEAM ENGINES are adapted for every purpose to which steam-power can be applied. When intended for winding, they are fitted with reversible link motion and winding gear. They are easy of removal, as may be seen by the engraving, and can be set to work immediately on arrival.

C. S. and Co. are now doing an extensive foreign and colonial business, and are prepared to send off engines and machinery of the before-mentioned kinds in a few days from the date of order. They would also call attention to the important *reduction in prices* made for the new year.

For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (23)

THE IMPERIAL IRON TUBE COMPANY,

(SUCCESSORS TO GEORGE B. LLOYD & CO.)

GAS STREET AND BERKLEY STREET,

Manufacturers of Wrought Iron Tubes & Fittings,

FOR GAS, STEAM, AND WATER.

PATENT GLASS ENAMELLED AND GALVANIZED TUBES,

AND

LAP-WELDED IRON BOILER TUBES.

(193)

TO STEAM SHIP OWNERS, ENGINEERS, AND OTHERS.

How's Patent Steam Engine Counters, can be read at sight.

These Counters register the number of revolutions made by an engine or other mechanism. They may be used for ascertaining the duty of Pumping Engines and Water-wheels; the revolutions on board a steam-vessel; to calculate the slip of the propeller; and in a locomotive to test the slip of the wheels.

How's Patent Salinometer, for Steam Boilers using Salt Water.

By these, the density of the water in the Boiler is at all times accurately shown, and a saving of boiler and fuel is effected. They are adopted by the Admiralty, the Honorable Trinity Corporation, and others. Copies of Testimonials from Messrs. Penn, Messrs. Maudslay, and others, will be forwarded on application.

How's Engine-Room Telegraph, for communicating between Captain and Engineer.

Society of Arts Prize Medal, 1855.

is a Mechanical Telegraph, and by its peculiar construction, error or misunderstanding is rendered impossible. It now extensively adopted, and gives great satisfaction.

How's Patent Fresh Water Apparatus for Ships' Use.

This apparatus is designed for the distillation of Fresh from Salt Water; and on long voyages, and where the supply of water is scanty, it will be found invaluable. Testimonials may be seen.

Patent Steam Pump and Fire-Engine for Ships' Use.

This Steam-pump occupies but a small space; works perfectly noiselessly, and throws an immense volume of water. An Illustrated Circular of Fresh Water Apparatus and Steam-pump combined, free on application.

How's Patent Machine for Cutting Bolts, Rods, Spindles, Wire, &c.

Simple in construction, inexpensive, occupies but little space, and will not easily get out of order.

A Pamphlet Illustrative of the above, sent free by post, on application to

A. P. HOW, ENGINEER,

81 MARK LANE, LONDON.

EVERY DESCRIPTION OF ENGINEERS' TOOLS, ENGINE ROOM STORES, &c., &c., SUPPLIED. (89)

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.

Families, by using this delicious VINEGAR, insure purity and effect a saving of 50 per cent. See "Report of Dr. Letheby, City Officer of Health, Dr. Hassall, of the 'Lancet' Commission, and others." Sold by the Trade, in Bottles, labelled and capsuled. Wholesale—63 King William-street, London-bridge, E.C. Six Quart Samples sent free to any Railway for 3s. 6d. (216)

ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 130 feet in length, to work by hand or Steam Power.

Hot-Water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (44)

GLADSTONE & Co., CONTRACTORS and ENGINEERS.
2 John-Street, Minories, London, E.C.,
Are prepared to ESTIMATE FOR and CONSTRUCT BRIDGES, PIERS, JETTIES, &c., in Iron, Wood, or Stone. Also to supply Cranes, Girders, Turntables, and Railway Work and Plant generally. (199)

SCOTT'S

PATENT GRASS SEED SEPARATOR,

which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from

PERENNIAL AND ITALIAN RYE-GRASS, &c.,

AND

SCOTT'S PATENT CARROT SEED BEARDING

AND

CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,

which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

Communications to be sent to the Patentee, J. SCOTT, 111 Drummond Street, Euston Square, London, N.W. (48)

STEAM CULTIVATION.

CHANDLER AND OLIVER

HAVE much pleasure in being able to state that they are now prepared to execute orders for their PATENT STEAM WINDING ENGINES AND PLOUGHS, for Cultivating Land by Steam.

The WINDING TACKLE can be fitted to Engines of any maker, and the Plough can be made to take any kind of apparatus necessary for Cultivating the Soil, such as Scarrifier Tines or Broad Shares, &c. Any Engine now used by Farmers can be fitted with the Tackle. It is light and simple, and an ordinary Farm Labourer can work it.

The Engine can be used for Thrashing without taking the Ploughing Tackle off, not requiring more than three or four horses to take it from place to place.

These Engines are very useful for Pile Driving or Drawing Ballast up inclined planes; at the same time they can be used for Pumping. Farmers will find them most useful for all purposes.

Messrs. CHANDLER and OLIVER are prepared to receive orders for separate Windlasses, which are light and simple, and generally useful.

For further Information apply to

ROBERT CHANDLER, ENGINEER, BOW, NEAR LONDON,

Or Mr. OLIVER, Farmer, Hatfield, Herts.

ILLUSTRATED CATALOGUES WITH PRICES, WILL BE READY SHORTLY. (215)

TO SHIPBUILDERS.

IRON SHIPS may be rendered FIRE-PROOF if internally fitted with Fibrous Slab in lieu of Deal.

Extract from a letter of the Captain of the Royal Bride Steamer, trading between Bristol and Melbourne:—"25th May, 1859.—From my experience of the last nine months in all climates, I have no hesitation in saying there is no kind of lining I know of equal to your Fibrous Slab for Iron Ships.—Yours, &c. (Signed), ALEX. NEWLAND."

PATENT WOOD OR FIBROUS SLAB COMPANY, (Limited)
15 Wellington-street North, Strand, London, W.C. (270)

TO ENGINEERS, INVENTORS, AND OTHERS:

A PRACTICAL ENGINEER of long standing prepares Original Drawings, Copies, and Tracings. Advice and Assistance given to Inventors in working out their Plans. Pupils taught privately. Terms moderate.

Apply to J. J., 171 Strand. (138)

CONDY'S PATENT FLUID, or NATURAL DISINFECTANT,

Not only Deodorizes but Disinfects perfectly, and DESTROYS FOR EVER the cause of infection.

Is not poisonous, as it may be used to purify water. Evolves no noxious or unpleasant gas. Cannot be mistaken for any other fluid, thereby preventing death and disease; and is therefore the best, safest, cheapest, and most pleasant disinfectant ever introduced.

This fluid has been examined and reported upon by the Board of Health, all the most eminent Men and Chemists of the day, in all cases in the most satisfactory manner possible.

The Public are recommended to use this Fluid, properly diluted with water, frequently and habitually in larders, scullories, dairies, musty casks, sick rooms, close places, &c., as it has numerous advantages, and can be used with certain immediate success and perfect safety.

Sold in Quart Bottles, 4s.; Pints, 2s.; Half-pints, 1s.; and in bulk, 10s. per Gallon.

Free to Railway on receipt of Order or Stamps. (233)

GREAT REDUCTION IN THE COST OF STEAM POWER.

THE temperature of the products of burnt fuel escaping into the Smoke-boxes of Locomotive and Portable Engines is upwards of 800°. DUNCAN, GWYNNE, and C. WYE WILLIAM'S PATENT HEAT DIFFUSERS, placed in the Tubes, will utilize about 400° of the heat, convert it into an equivalent of working steam, and reduce the temperature to about 350° or 400°.

The Patentees are prepared to accept for Royalty a part of the value of the fuel saved by the use of their simple appliances.

Every information may be had on application to the Manufacturers, GWYNNE & CO., Engineers, Essex-street Wharves, Straud, W.C., London. (251)

ENGINEERS' TOOLS FOR SALE.—A Superior SELF-ACTING SLIDE and SCREW-CUTTING LATHE, 7 in. centre and 7 ft. bed. A Ditto, 7 in. centre and 9 ft. bed. A PUNCHING and SHEARING MACHINE, for ¾ in. plates. Two Ditto for ½ in. plates, and Two Ditto for ⅜ in. plates. VERTICAL DRILLING MACHINE; PILLAR and BENCH DRILLS; HALEY'S and other LIFTING JACKS; RACHET BRACES, &c.

One of 16-horse power, 14in. cylinder, and 36in. stroke.
Two of 30-horse power, 20in. cylinder, and 36in. stroke.

The above Engines are quite new, of superior manufacture and finish, and are to be sold at very low prices.

Apply to PAGE and CAMERON, 64 Old Broad-street, London, E.C. (284)

PATENT LEVER BREAKS for RAILWAY WAGGONS, doing away with the objectionable Break Rack. Can be applied to existing stock at a trifling expense. Royalty moderate.

Models can be seen at 34 Great George-street, Westminster, and the Breaks in action at the Works of the Railway Carriage Company at the Peterborough Station, on the Eastern Counties Railway; the Rugby Station, London and North-Western Railway; the Cardiff Docks Station, Taff Vale Railway; and at the Works, Oldbury, near Birmingham, where all communications are requested to be sent. (275)

TO MARINE ENGINEERS, OR SHIP-BUILDERS.

THE PROPRIETOR of a VALUABLE PATENT for Double-expansive Marine Engines (by which great economy of space and fuel is obtained) is desirous of entering into arrangements with a respectable firm for the construction of the same. An adequate portion of the patent-right would be assigned by the advertiser to any firm taking the matter up; and he would render all assistance in his power, either in London or elsewhere, amongst ship-owners (to many of whom he is well known), in obtaining contracts, &c. Unexceptionable references given. Address C. E., MECHANICS' MAGAZINE Office, 166, Fleet-street. (76)

THE USE of a CORNISH HIGH-PRESSURE BOILER is required for a few weeks after usual working hours, to complete some experiments on the evaporation of water under varying pressures. Parties willing to treat are requested to address, stating full particulars and terms, to X. Y. Z., MECHANICS' MAGAZINE Office, 166 Fleet-street, E.C. (248)

TO SHIPBUILDERS, SHIPOWNERS, CAPTAINS, &c.

THE ANCHOR COMMITTEE AFFIRM "TROTMAN'S PATENT ANCHOR" to be superior to all others, possessing Thirty-Five Per Cent. more Holding Power than either Porter's or Roger's, and equivalent in all respects to ordinary Anchors of 28 per cent. greater weight.

"This appeared to the Committee of vast importance to the Shipping Interests, &c."

(Vide their Official Report, 1853, "On the relative merits of different descriptions of Anchors," sanctioned and approved by the Admiralty.)

THE ANCHOR COMMITTEE

Nominated by the Lords Commissioners of the Admiralty "to investigate and determine the relative merits of Anchors," in compliance with a requisition from the principal Shipowners, Underwriters, &c., of the United Kingdom.

Rear-Admiral the Hon. Sir M. Stopford, K.C.B., Chairman.

Capt. Superintendent Charles Hope, R.N., Her Majesty's Dockyard, Sheerness.

Captain George Rodney Munday, R.N., Her Majesty's Ship "Nile."

Jonathan Aylen, Esq., R.N., Master Attendant, Her Majesty's Dockyard, Sheerness.

James Tonkin, Esq., Master, R.N., Her Majesty's Ship "Waterloo," 120 guns.

William Schaw Lindsay, Esq., M.P., &c., &c.

Duncan Dunbar, Esq., Chairman of General Shipowners' Society; Do. Mercantile Marine Board, London. Member of the Committee of "Lloyd's Register" of Shipping, &c.

Anthony Ridley, Esq., Vice-Chairman of Mercantile Marine Board; Member of the Committee of "Lloyd's Register" of Shipping, &c.

William Drew, Esq., Member of the Mercantile Marine Board; Member of the Committee of "Lloyd's Register" of Shipping, &c.

William Phillips, Esq., Member of the Committee of "Lloyd's Register" of Shipping; General Shipowners' Society, &c.

George Marshall, Esq., Member of the Committee of "Lloyd's Register" of Shipping; General Shipowners' Society, &c.

THE INTERNATIONAL JURY AT PARIS

Also awarded this Invention the First Class Medal, 1855.

Licensed Makers of Trotman's Improved Anchors:—

Messrs. Hawks, Crawshay, and Sons, Newcastle-on-Tyne,
" John Abbott and Co., Park Works, Gateshead, Durham,
" J. and E. Lumsden, Strand Iron Works, Sunderland,
" N. Hingley and Sons, Cradley and Netherton Iron Works,
" Proctor and Taylor, Milbank Forge, Hartlepool,
" Henry Wood and Co., Goree Piazzas, Liverpool,
" Wood Brothers, Chester, Wolverhampton, and Stourbridge,
" R. Wight and Sons, Iron Works, Sunderland and Seaham,
" Pow and Fawcus, 49 Lr. Shadwell, London, and North Shields,
" John Gilbert, Cradley Heath, Staffordshire.

DEPÔTS,

GEORGE WOOD & CO., 14 Fore-st., Limehouse, London, and at 4 Goree Piazza, Liverpool.

JOHN TROTMAN, PATENTEE, 42 CORNHILL, LONDON. (249)

TO STEAM SHIP BUILDERS, ENGINEERS, TOOL MAKERS, IRON MASTERS, AND OTHERS.

THE ADVERTISER, who has had considerable experience in Marine Engineering and Iron Shipbuilding, and who is an expert Draughtsman, is desirous of meeting with a permanent Engagement as London Agent, Manager of a Shipbuilding Yard, or to act in any capacity in which ample knowledge of Mechanical Details and a large connexion among Engineers, Ship Owners, and others, might be rendered available. The Advertiser having also been much engaged in working out some important patented inventions, would undertake to further the objects of those having property of this kind, either to dispose of or to bring into operation. Apply by letter, to M. E., MECHANICS' MAGAZINE Office, 166 Fleet-street. (250)

TO ENGINEERS, ARCHITECTS, PATENT AGENTS, &c.

PHOTOGRAPHS OF THE HIGHEST CLASS and of any size, taken and reproduced at a most moderate rate of charge. Reproductions of faultless accuracy, of Machinery, Models, Drawings, &c. Orders attended to in town and country. Estimates forwarded.

SPENCER, READ, & Co., 4 Agar-street, Strand, W.C. (90)

HART & SON, MALLEABLE IRON-FOUNDERS, 4 Vine-street, York-road, Lambeth. Orders for Malleable Iron Castings executed within a week. (77)

WANTED, A PLATE-BENDING MACHINE, with Three Rollers; length about 11 to 12 feet, with standards, fly-wheel, &c., complete and ready for work.

Apply by letter to Mr. JAMES RAE, Greenwich Iron Shipbuilding Yard, Thames-street, Greenwich. (297)

TO WIRE ROPE MAKERS.—ARCHIBALD SMITH is now prepared to GRANT LICENSES for the use of his PATENT ROPE MACHINERY, guaranteed to work at six times the speed of any other, and to save upwards of fifty per cent. in the cost of making. It is used by the most eminent makers, and was also in the manufacture of the Atlantic Cable.—Apply to 69 Princes-street, Leicester-square, W. (198)

TO MANUFACTURERS, THE ENGINEERING, MECHANICAL, & BUILDING TRADES GENERALLY.

MESSRS. BOOTH & CO., AUCTIONEERS and BUILDERS' SALESMEN, having opened Registers for Public and Private Sales of all kinds of JOB LOTS, Surplus Stock, Stores, Tools, Implements, &c., &c., (either Old or New,) beg to call the attention of all parties to the only medium established of the kind, and to state that they are prepared to receive consignments of any weight, bulk, or value, and of any class of Goods for immediate Sale. Full particulars may be had for two stamps, at the BUILDING TRADES REGISTRY OFFICES, (established 1857,) 13 EASTCHEAP, LONDON, E.C. The Public Sales by Auction are held Weekly, on EVERY TUESDAY, at ONE O'CLOCK, and for the present at the BUILDERS' SALE GROUNDS, (established 1858,) 23 and 24 MARYLEBONE ROAD, REGENT'S PARK, W. Catalogues by Post for One Stamp. Advances on New Goods. All communications are held private and confidential. (204)

TO RAILWAY COMPANIES, CONTRACTORS, AND OTHERS.

GEORGE NEIGHBOUR and SONS, OIL MERCHANTS,

Particularly invite attention to their PATENT ARGAND LAMP OIL, for Railway Roof and Signal Lamps; also to their EXTRA-REFINED ENGINE OIL, for Locomotive and Machine purposes. Prices forwarded on application.

127 HIGH HOLBORN, LONDON, W.C.

Agent at MANCHESTER—E. S. ROGERS, 33 Cannon Street. (281)

FOR DRIVING MACHINERY, MILLS, &c.—INDIA-RUBBER BANDS, improved make, to resist moist and dry heat, of any length, width, and thickness Prices and instructions for use on application.

JAMES LYNE HANCOCK, Vulcanised India-Rubber Works, Goswell-mews and 8 Goswell-road, London, E.C. (256

IMPORTANT TO COUNTRY MANUFACTURERS.

TO ENGINEERS, SHIP-BUILDERS, AND CHANDLERS, IRON FOUNDERS, TOOL MAKERS, AGRICULTURAL IMPLEMENT MAKERS, AND OTHERS.

A Practical Engineer and Member of the Institutions of Civil and Mechanical Engineers being in treaty for large and very commanding premises in Fenchurch-street (in direct line between the Docks and Mark-lane and the City), for the Exhibition and Sale of some Patented Articles of his own Invention, is desirous of undertaking the London Agency of one or two Firms of established reputation, and of whose manufactures samples, models, or drawings could be exhibited. The Advertiser having a large connection amongst Ship Owners, Engineers, and Scientific Agriculturalists, and attending the principal Agricultural Shows, possesses many facilities for forwarding the interests of those for whom he may act. To those desirous of having the use of a good London Office and of exhibiting their Manufactures in one of the best thoroughfares in Town; and, moreover, of being represented by a thoroughly practical Mechanic, the present is a very favourable opportunity. The terms proposed are a Commission on all business done in addition to a moderate rental, in proportion to the space occupied by the articles exhibited. Address, with full particulars, to C. M. E., 1 Parkside, Knightsbridge. (263)

EMIGRATION TO NEW YORK, CANADA, AUSTRALIA, NEW ZEALAND, EAST INDIES, CAPE OF GOOD HOPE, &c. All Classes of Passengers booked throughout in the Finest Steam and Sailing Packets. Full Particulars in our circulars for 1859, may be had gratis on application to F. S. GRAY and Co., 54 King William Street, City, and 6 Tower Hill, London; and at 35 Bath Street, Liverpool. (187)

Digitized by Google

JOHN HENDERSON PORTER,

ENGINEER AND CONTRACTOR,

PATENTEE OF VARIOUS IMPROVEMENTS IN THE CONSTRUCTION OF

IRON BUILDINGS, BRIDGES, ROOFS, AND FLOORS,

IRON BUILDING AND ROOFING WORKS,

GAS STREET, BIRMINGHAM.

RAILWAY, SHIP, AND BUILDERS' IRONWORK OF ALL KINDS.

Roofs and Bodies of Luggage Vans, Trucks, and Coal Waggons.
Cast and Wrought Iron Columns, Stanchions, and Girders.
Ties, Straps, King-heads, Shoes, &c.
Iron Punts for Sugar Estates, &c., &c.
Tanks, Casks, and Barrels.
Iron Wheelbarrows, Cart Bodies, &c.
Hay Racks, Mangers, Sheep Cribs, and Cattle Troughs.
Rick Stands, and Sliding Roofs of Wrought Iron.

SUBJECTS ILLUSTRATED IN LITHOGRAPHED SKETCHES.

The application of Corrugated Iron Roofing Plates to Roofs of Timber Framing, particularly suitable for the Colonies, Railway Carriage Sheds, and Station Roofs; Iron Sheds for Sugar and Coffee Estates, for Manufactories, Weaving Sheds, &c.; Iron Roofs for Churches, Farm Buildings, Gasworks, &c.

Iron Buildings, viz.—Warehouses, Sugar Refineries, Market Houses, Railway Stations, Stores, Dwellings, &c., erected in this country, in the East and West Indies, Egypt, China, the Cape of Good Hope, South America, and Australia.

Plans and Estimates will be furnished on Application.

LONDON OFFICE—33 NICHOLAS LANE, CITY, E.C. (272)

CLAYTON, SHUTTLEWORTH, AND CO.,

OF LINCOLN,

79 LOMBARD STREET, LONDON, E.C.,

AND 36 DALE STREET, LIVERPOOL,

AGRICULTURAL AND GENERAL ENGINEERS,

And Manufacturers of Portable and Fixed Steam Engines.

Combined Threshing Machines, which dress the corn ready for market at one operation. Grinding Mills, Saw Benches, Pumps for Irrigation and Mining purposes, with all necessary gearing for being driven by steam power. Full particulars and estimates given on application to the above address.

C. S. and Co.'s PORTABLE STEAM ENGINES are adapted for every purpose to which steam-power can be applied. When intended for winding, they are fitted with reversible link motion and winding gear. They are easy of removal, as may be seen by the engraving, and can be set to work immediately on arrival.

C. S. and Co. are now doing an extensive foreign and colonial business, and are prepared to send off engines and machinery of the before-mentioned kinds in a few days from the date of order. They would also call attention to the important *reduction in prices* made for the new year.

For Exportation.—The above can be obtained through British Merchants, Shippers, and Colonial Agents. (23)

WILLIAM WARNE & CO.,

Manufacturers of all descriptions of

VULCANIZED INDIA-RUBBER,

SHEETS, WASHERS,

HOSE-PIPES, TUBINGS, ETC.;

Sole Manufacturers of

WARNE'S PATENT INDIA-RUBBER TUBULAR MATS,

For Doorways, Stairs, Baths, Carriages, Ships, &c., which never clog, require no beating, and, unlike all other Mats, are readily cleansed by water. Indestructible by damp, these Mats are especially suitable for uncovered Passages, and out of door purposes. Seat Mats, Housemaids' Mats, and Brushes for wooden and stone floors.

Sole Manufacturers of

WARNE'S PATENT MINERALISED IMPROVED KAMPTULICON,

Possessing advantages over all the ordinary makes, in exceeding toughness, and flexibility, and consequent durability, while neither heat nor cold has effect upon it. Widths, 3/4s., 4/4s., 6/4s., and 7/4s. Substances, ½, ¼, and thicker if required. Length, 20 to 25 yards.

Patentees of the Red Mineralised India Rubber—the only Rubber not affected by Oil.

Warehouse, 9 Gresham-street West, E.C. Mills, Tottenham, N. (244)

FUEL AND STEAM ECONOMY.—Apply to Mr. LEE STEVENS, C.E., 1 Fish-street-hill, E.C. (243)

TO ENGINEERS, INVENTORS, AND OTHERS.

A PRACTICAL ENGINEER of long standing prepares Original Drawings, Copies, and Tracings. Advice and Assistance given to Inventors in working out their Plans. Pupils taught privately. Terms moderate. Apply to J. J., 171 Strand. (138)

MR. WALTER HALL is prepared to Grant Licences, or to Dispose of his Patent for working Railway Breaks. Particulars to be had of Mr. HALL, who may be addressed by letter to the care of the MECHANICS' MAGAZINE, 166 Fleet-street, E.C. (217)

NORTON'S GOSSAMER CARTRIDGES, FOR MILITARY FIRE-ARMS.

These Cartridges are Manufactured by Mr. JAMES LEETCH, Gunmaker, 68 Margaret-street, Regent-street, and by DAW, of Broad-street. (237)

RAILWAY AXLE-BOX COMPANY continue to grant Licenses to manufacture and use AXLE-BOXES under their PATENTS, which include those of Messrs. ADAMS and RICHARDSON, WRIGHTON, NORMANVILLE, VIGURS, and others.

These are the only AXLE-BOXES that effectually EXCLUDE DUST, and prevent the escape of grease, by which an important saving is effected in the wear and tear of the JOURNALS and BEARINGS and the CONSUMPTION of GREASE.

Further particulars and Licenses may be obtained of

P. M. PARSONS, Manager.
9 Arthur-street West, London-bridge, E.C. (283)

13 Pancras-lane, Cheapside, E.C., London.

The Company has been formed for the purpose of assisting Inventors, and its contemplated operations comprise—
The taking out of Patents and Registrations for Inventors, and when required, advancing the money for this purpose.
The advancing sums of Money on approved security to Inventors and Patentees, for the purpose of enabling them to develope and complete their Patents and Inventions.
The Purchase and Sale of Inventions and Patents.
The Selling of Patents and Inventions on Commission.
The investigation of the value and merits of Inventions, and the granting of Certificates thereof.
The devotion of a portion of the Company's Premises for the purpose of receiving Models and Drawings of Inventions and Patents.
The keeping a Registry of all Patents taken out by the Company, and the furnishing a Monthly List thereof to all Subscribers.

All information may be obtained at the Office, and the Deposit may be remitted to the Bankers or to the Secretary. (226)

CAUTION.

TO ARCHITECTS AND BUILDERS.—In consequence of numerous complaints, the Patentee begs to inform the above, that all genuine

SMITH'S PATENT DOOR SPRINGS,

For Swing Doors, are stamped with Name and Address, thus—

SMITH, PATENTEE, 69 PRINCES STREET, LEICESTER SQUARE, LONDON,

and that Springs thus marked are warranted.

SMITH'S PATENT WEATHER-TIGHT CASEMENT FASTENING AND SILL-BARS

are admitted by all to be the most perfect invention for the purpose. Diagrams and List of Prices on application. (186)

RANSOME'S PATENT STONE FILTERS—of every description for Domestic purposes, for Manufactories, Public Companies, Shipping, &c.

For Particulars, Specimens, Illustrations, and Agencies, apply to Mr. Frederick Ransome, Whitehall Wharf, Cannon-row, Westminster; or Patent Stone Works, Ipswich. A Liberal Discount allowed to the Trade or to Shippers. (176)

C. F. QUINTIN'S

PATENT BREAD MACHINE.

The Journeyman Baker's and Servant's Friend. It lightens their labour and makes our daily Food clean and pure.

Highly commended at the Royal Agricultural Show, Chester, 1858, the Royal Agricultural Show, Dublin, 13th and 14th April, 1859, and the Society of Arts, Adelphi, London.

C. F. QUINTIN'S Machines are constructed in various sizes, from Half-a-Peck to Ten Bushels.

Prices from 30s. to £20.

A SACK OF FLOUR MADE INTO DOUGH IN SIX MINUTES.

Manufactory—

1 ST. JAMES'S SQUARE, CHELTENHAM.

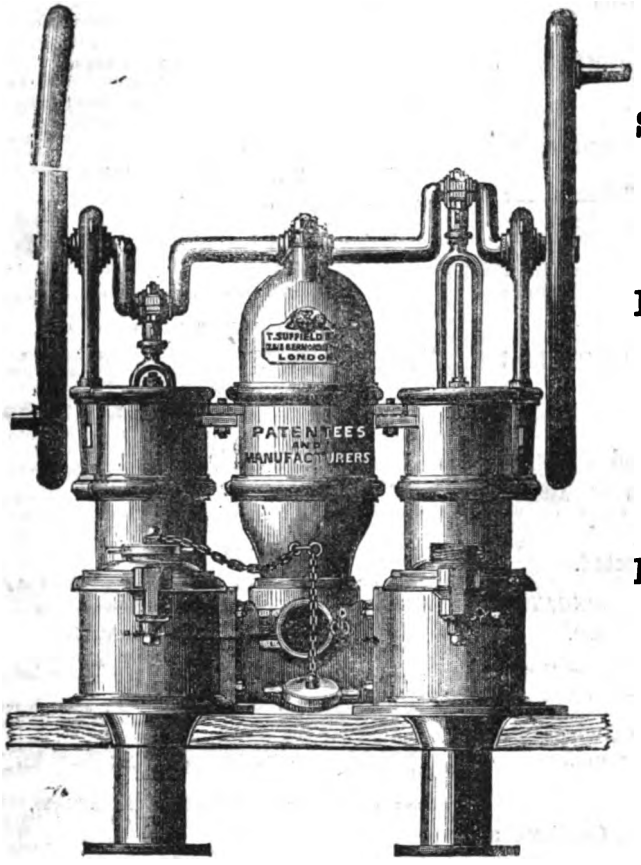
T. SUFFIELD AND CO.

Call the particular attention of

SHIP-OWNERS. SHIP-BUILDERS, AND COMMANDERS OF STEAM AND SAILING VESSELS,

to the Simple and Efficient Arrangements of their

PATENT PUMPS.



Ships' Pumps

AND

Fire Engines,

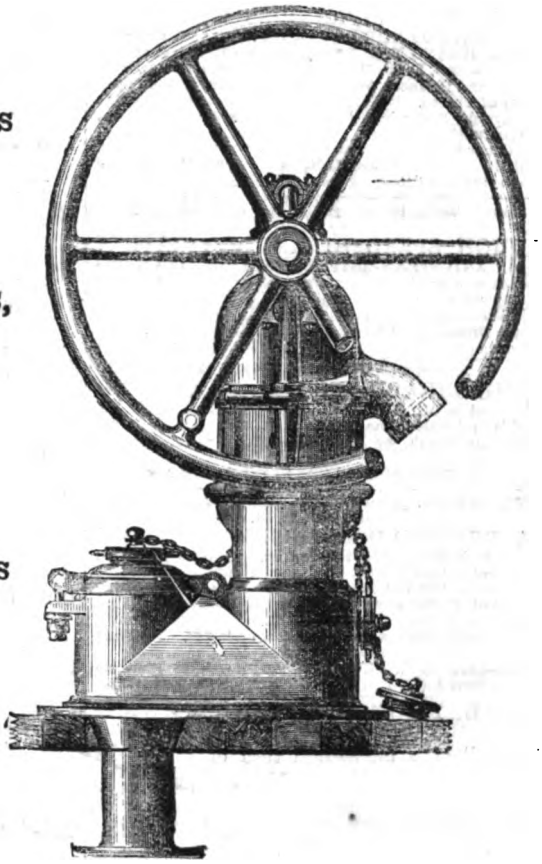
Fixed and Portable.

WITH

Patent Valves

AND OTHER

Improvements.



These Pumps are free from that liability to choke which is common to other Pumps, and their Working Parts are not susceptible of derangement either from wear or from being long out of use. They pass entirely through them, with ease, any substance that may enter the Suction Pipes. The Novelties in these Pumps are their adaptation to the varied duties of Ships' Pumps; the facilities they afford for Cleansing the Suction Pipes, and for Sounding or Examining the Valves; the readiness with which they may be used for Ventilating the Bilge, or for acting as a Syphon either for Watering the Ship, or for extinguishing Accidental Fires on board: the rapidity with which they can be converted into Fire Pumps, or be applied to the Washing of Decks; and their capability of Pumping from Several Compartments.

T. SUFFIELD AND CO.

Also respectfully solicit the attention of STEAM SHIP BUILDERS and OWNERS to their Large and Varied STOCK of

ASSORTED STORES FOR MARINE PURPOSES.

They keep a Large Stock of Goods, of their own Manufacture and from the Best Makers, constantly on view; so that by a visit to their Works or Depôt, much valuable time may be saved by Managers, Engineers, and other Gentlemen who may require suc Stores, together with a further saving in the cost of such Articles.

THE PHOTOGRAPHIC NEWS.

Weekly, 3d., by post 4d.

TO all of a mechanical turn of mind.—In No. 41, for June 17th, of the "Photographic News" was commenced, under the title of "The Amateur Mechanic," an important series of articles on constructive art. In this series, the various materials which are easily procured and most generally serviceable will be explained. Few young persons, at the present day, are without some employment for their leisure hours requiring manipulatory skill. This skill will, however, in all cases be improved by being rightly directed. There is a right and a wrong way of doing the most simple thing, and it will be the object of these articles to make plain and easy the right method. The series will be fully illustrated with engravings, and will form a complete guide to the constructive arts, alike useful to the photographic amateur and experimentalist in any of the physical sciences. A specimen number sent free by post for four stamps.

London: CASSELL, PETTER, and GALPIN, La Belle Sauvage-yard, and all newsvendors. (296)

BRASS AND COPPER TUBES.

MUNTZ'S PATENT SOLID ROLLED BRASS AND COPPER TUBES, now extensively used on the principal Home and Foreign Railways, and for Marine Boilers by the Government and leading Steam-Packet Companies, are cheaper and more durable than the ordinary tubes.

WATER POISONED BY LEADEN PIPES.

"The above engraving represents accurately a section of a leaden pipe, which was employed for a short time in conveying water from a well on the grounds of Mr. Dick, of Bonchurch, Isle of Wight. The water has cut these deep pits almost through the pipe, and not only upon the portion which we have illustrated, but has formed similar chasms throughout the entire length."—*Expositor.*

Poisoned Water Preventable.

BY THE USE OF GUTTA PERCHA TUBING.

The Gutta Percha Company have been favoured with the following letter,

From Dr. MURRAY, Hull.

"It is impossible to conceive of anything more injurious or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha. Nothing can be better. I have also recommended it to others, who have adopted the expedient.

Resistance of Frost.

The Gutta Percha Company have been favoured with the following Letters in reference to the non-conducting properties of Gutta Percha Tubing, in the resistance of Frost.

From J. ARMSTRONG, Esq., M.D., Gravesend.

"My private house, which was supplied with your Gutta Percha Tubing some five or six years ago, has never required the slightest attention; and previously, there was no winter passed that we were not deluged in consequence of the bursting of the leaden pipes."

From HENRY BROWN and SONS, Western Works, 108 Rockingham-street, Sheffield.

"We have now a positive proof of the frost-resisting properties of the Gutta Percha Piping. On our premises we have a leaden Pipe and a Gutta Percha one lying side by side. The leaden one has been completely frozen up at least ten days, and the Gutta Percha one is still unaffected.

Every Variety of Gutta Percha Article.

REMARKS.—The Metal Market continues very flat, with a limited amount of business.

LAWRIE AND HAGGER, Metal Brokers.

33 Lombard-street, E.C.

LIST OF MISCELLANEOUS TENDERS INVITED, AND ENGAGEMENTS OPEN.

The tenders and vacancies which appear in this weekly list are not repeated in succeeding numbers.

LIME AND CANNEL, *Middleton Gas Works.*—Lime for 12 months, from July 1; and from 1,000 to 1,500 tons of cannel for 12 months; also for a supply of coal for the same period. Tenders, June 30, the chairman of the company, Middleton.

RESERVOIR, &c., *Newsham.*—Particulars, Mr. J. F. Tone, 10 Market-street, Newcastle-upon-Tyne. Tenders to secretary of Blyth and Tyne Railway, Neville-hall, Newcastle-upon-Tyne.

EXCAVATIONS, *Manchester.*—In connection with the Assize Courts. Drawings, &c., Mr. A. Waterhouse, architect, Cross-street-chambers, Manchester. Tenders, June 30, to Mr. F. Hulton, clerk to the Assize Court Committee, Manchester.

PIPE-LAYING, *Dukinfield.*—Taking up and laying 3,500 yards for the Dukinfield Gas Company. Specifications, Mr. Dore, at the works. No date given.

NEW BUILDINGS, *Oldham.*—Taking down old building adjoining the town-hall and erecting a new building as an addition to the town-hall. Plans, &c., Messrs. Haley and Son, Cross-street, Manchester. Tenders, July 4, to Mr. J. Summerscales, town clerk, Manchester.

HOTEL, *Tunstall.*—Alterations and additions, Sneyd Arms Hotel. Plans, &c., Mr. R. Dain, architect, Liverpool-road, Burslem. Tenders, June 30.

WORKHOUSE, *Penistone, Yorkshire.*—New workhouse, near Sheffield. Plans, &c., Messrs. Lockwood and Mawson, architects, Post-office-buildings, Bradford. Tenders, June 28.

WORKHOUSE IMPROVEMENTS, *Wem.* — Sanitary improvements. Plans, Mr. W. Owen, clerk to the guardians, Shrubbery, Wem, June 29.

PUBLIC-HOUSE, *Northampton.* — Public-house assembly-room. Plans, &c., Mr. W. Hall, architect, St. Giles'-street, Northampton. Tenders, June 27.

BOUNDARY WALLS, &c., *Brighton.*—Boundary walls, gates, and earthwork to the Diocesan Training Schools. Drawings, &c., Mr. W. G. Habersham, 38 Bloomsbury-square. No date given.

SHEDS, PENS, &c., *Hull.*—For the show-yard of the society, on the 3rd and 4th of August next. Particulars, Mr. J. Hannan, secretary to the Yorkshire Agricultural Society, Kirk Deighton, Wetherby. Tenders, July 1.

STEAM COAL, *East India Company.*—3,000 tons for Madras. Tenders, India office, July 1.

RAILWAY, *Spain.*—For the Tudela and Bilbao Railway, comprising a distance of nearly 91 kilometers from Arrancundiaga, at 16 kilometres from Bilbao, to the right bank of the Ebro. Plans, &c., companies' offices, Calle de Bidebarrieta, No. 20 Bilbao. General information Mr. C. Vignolles, engineer-in-chief, 21 Duke-street, Westminster.

GAS WORS, *Aspatria, Cumberland.*—For the whole of the building and ironworks separately. Plans, &c., Mr. J. Bill, wine merchant, Aspatria; or Messrs. T. Richards and Son, consulting engineers, Whitehaven. Tenders, June 27.

PAVING, *Burton-upon-Trent.*—For 6,500 square yards of brick paving; 3,300 lineal yards of stone kerbing; and 350 square yards of granite paving; with other works connected. Plans, &c., the town surveyor, 26 Union-street, Burton-upon-Trent. Tenders by 4 p.m., June 30, to Mr. W. Coxon, clerk to the commissioners.

CONGREGATIONAL CHURCH AND SCHOOLS, *Derby.*—Particulars on application by letter to Messrs. Hine and Evans, architects, Nottingham.

CHURCH WORK, *Somerset.*—Repairing nave and rebuilding chancel, Parish Church, Freshford. Specification, Mr. C. E. Davis, F.S.A., 3 Westgate Buildings, Bath. Tenders, June 27.

CEMETERY, *Banbury.*—Two chapels, with sexton's lodge, for the burial-ground in the Banbury district. Drawings, &c., Mr. T. Pain, Bridge-street, Banbury; and Mr. C. H. Edwards, 4 St. James's-terrace, Camden-road, Regent's-park. Tenders, July 5.

SEWERAGE, &c., *Leamington.*—About 4,250 yards of brick sewers, the construction of works for the defication and deodorisation of the sewerage therefrom, the improvement of the river Leam, between the Adelaide-bridge at Leamington and the river Avon at Emscote, in the borough of Warwick; the construction of a weir across said river, &c. Plans, bills, &c., Mr. Anthony Morgan, surveyor to local board, Town-hall, Leamington, for 10s. Tenders, July 11. One contract.

PLANS FOR CEMETERY, *Barnsley.*—For enclosing and laying out the ground and erecting two chapels and entrance lodge, the cost for the whole not to exceed £4,000. Premium of £30 for the best and £10 for the second best designs, to Clerk of the Board, July 23.

PARROT COALS, *Greenock Gas Works.*—From 5,000 to 6,000 in monthly instalments. Tenders to state the price per ton and the quantity that can be delivered monthly, the manager of the works, July 9.

TO TAKE OUT QUANTITIES.—Also to prepare estimates of railway carriages and waggons. X. Z., care of Messrs. Weaklin and Flint, stationers, 91 Farringdon-st., E.C.

IRON MOULDER.—Foreman in a London foundry, capable of turning out 10 to 12 tons of engineering and general castings per week. F. M., 6 Melbourne-place, Old Kent-road, S.E.

DRAUGHTSMAN.—In a shipbuilding and general engineering establishment. Box 84, post-office, Belfast, with a drawing of a pair of marine engines and a practical rigging draught.

MECHANICAL DRAUGHTSMAN.—A young man, accustomed to the details of railway plant, &c. H. H., 7 Upper Kennington-Lane, Vauxhall, S.

PISTOL FILERS.—Several good hands; also several filers. Mr. Brazier and Son, Ashes, Wolverhampton.

ENGINE-FITTERS.—Several good workmen of good character. Apply Goscote Foundry, near Walsall.

GUIDE ROLLER.—To take the entire charge of a mill, turning out about 80 tons of merchant iron per week, contracting for the manufacture and management of the iron at so much per ton. Box 70, Post-office, Wolverhampton.

MILLWRIGHTS.—Three or four good workmen. Also a millstone grinder. J. D. Pickfold's, James'-st., Rugby.

FORGE AND MILL MANAGERS.—A man of energy and ability, where bars, hoops, sheets, &c., are made. Accustomed to the manufacture of iron of the best descriptions. Application by letter, H. 12, *Journal Office.*

BUILDINGS' INSPECTOR.—To take charge of the erection of an extensive building in Glasgow. To a thoroughly qualified person, a liberal remuneration. Applications, with references, No. 53, *North British Advertiser* office, Glasgow.

IRON WORKS' MANAGER.—For a bar-iron works, near Edinburgh, and qualified to conduct correspondence. Applications, to state salary, *North British Advertiser* office, Glasgow.

INFIRMARY, *Ashton-under-Lyne.* — At Chamber Hills. Plans on the 20th inst. with Mr. Lindley, Architect, Market-avenue, Ashton-under-Lyne. Tenders to Mr. H. T. Darnton, Hon. Sec., 88 Old-street, Ashton-under-Lyne, July 4.

WORKHOUSE, *Machynlleth.*—Drawings, &c., at the Board-room, Machynlleth. Bills of quantities, Mr. J. E. Oates, York. Tenders, July 6.

HOUSE, *Leicestershire.*—Taking down one and putting up another in the village of Bitteswell. Plans, &c., at the Law offices of Messrs. Woodstock and Twist, Bailey-lane, Coventry. Tenders July 17.

PUMPING MACHINERY.

GWYNNE AND Co., Engineers, London, manufacture and supply the following Machinery, of the most approved construction and with all the latest improvements:—Portable and Fixed Steam-Engines and Boilers of every description; Waterwheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the Supply of Towns, Cities, and Districts, and for the Irrigation of Coffee, Cotton, Indigo, Sugar-cane, and Rice Estates, for pumping out Coffer-dams, Canals, Dry Docks, Reservoirs, &c. They also manufacture and supply the Pumping and other Machinery for Paper, Pulp, and Fulling Mills, Breweries, Distilleries, Tanneries, Starch Works, Bleaching, Dyeing, and Calico Printing Works, Chemical Works, Silk, Cotton, and Flax Mills, and Manufactories in general. All Letters not paid will be refused. Illustrated Price Lists forwarded on receipt of Six Postage Stamps. —GWYNNE AND Co., Hydraulic and Mechanical Engineers, Essex-wharf, Strand, London.

For Exportation.—The above can be obtained throug British Merchants, Shippers, and Colonial Agents. (24)

TO BRASS-FOUNDERS, ENGINEERS, &c.

THE PATENT PLUMBAGO CRUCIBLE COMPANY having completed the enlargement of their premises, beg to call the attention of all users and shippers of Melting Pots to the great superiority of the PATENT CRUCIBLES, which have been used during the last three years by some of the largest melters in England and abroad. In addition to their capabilities of melting an average of from thirty-five to forty pourings, they are unaffected by change of temperature, never crack, but can be used till worn out, requiring only one annealing for several days' work, and become heated much more rapidly than ordinary pots, effecting thereby a saving of more than fifty per cent. in time, labour, fuel, and waste. The Patent Plumbago Crucible Company also manufacture and import clay crucibles, muffles, portable furnaces, sublimate pans and covers, glass-pots, all descriptions of fire- standing goods, and every requisite for the assayer and dentists. For Lists, Testimonials, &c., apply to Battersea Works, London, &c. 43

MALLET'S PATENT BUCKLED PLATES.—MR. ROBERT MALLET, C.E., Inventor and Patentee of these Plates (now being laid for the Floor of the New Bridge, Westminster, and applicable to Bridge, Wharf, and Fire-proof flooring, and to a variety of other important purposes) gives notice that he has withdrawn from this date all Licences whatsoever to manufacture or vend his Patent Plates, and taken the management of the Patent exclusively into his own hands. Applications for the Plates to be made to the Patentee, who has arranged for their prompt supply, at his offices, 11 Bridge-street, Westminster, S.W., and 97 Capel-street, Dublin.

18th May, 1859. (264)

RAILWAY SLEEPERS, &c.

WE are prepared to sell, by Private Contract, about 100,000 Scotch Fir Sleepers, of the various dimensions in use.

Also, any quantity of Larch, and Scoth Fir Poles, Planks, Deals, Staves, and Pitwood.

Early applications will meet the best attention of

REID and FORBES.

45 High-street, Inverness, N.B. (282)

SCOTT'S

PATENT GRASS SEED SEPARATOR,

which entirely extracts the Seeds of "COUCH," "TWITCH," "SPEAR," or "HAIR" GRASS and other impurities from

PERENNIAL AND ITALIAN RYE-GRASS, &c.,

AND

SCOTT'S PATENT CARROT SEED BEARDING

AND

CLOVER AND TREFOIL MILLING OR DRAWING MACHINE,

which effectually removes the beard from Carrot Seed, rendering it fit for sowing with facility by drill or otherwise, and by the separation of abortive or diseased grains vastly increases its vegetative per centage. By a slight modification it is applicable to the other purposes before mentioned.

These Machines were admittedly the most novel, and, at the same time, the most useful and important to the Farmer of any exhibited at the late SMITHFIELD CLUB SHOW.

They may be seen at work at the Establishment of the Manufacturer,

Mr. T. MIDDLETON, Engineer, Southwark.

Communications to be sent to the Patentee, J. SCOTT, 111 Drummond Street, Euston Square, London, N.W. (48)

THE RAILWAY CARRIAGE COMPANY,

OLDBURY, NEAR BIRMINGHAM.

LONDON OFFICE—34 GREAT GEORGE STREET, WESTMINSTER,

Manufacturers of every Description of

RAILWAY PLANT AND IRONWORK.

PATENT BRASS LIFT AND FORCE PUMP, on Plank, for House purposes, supply of Cisterns, &c.

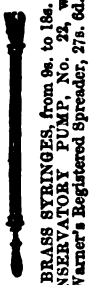
	£	s.
2½ inch	6	0
3 ,,	7	5
3½ ,,	8	0

A lighter Pump of 3 inches diameter, can be supplied if required 5 15

IMPROVED LIQUID MANURE, OR GENERAL PORTABLE PUMP.

These Pumps are fitted with J. Warner and Son's Patent Bucket and Sucker, and cannot clog in action. The Barrel is of Galvanized Iron, not likely to corrode, and can be raised or lowered at pleasure. The legs will fold together, and the whole may be carried on shoulder to any pond or tank required.

4½ in. Liquid Manure Pumps, with legs, £3 3s.; 1¼ in. Gutta Percha Suction Pipe, 1s. 11d. per foot; 2 in. Flexible Rubber and Canvass Suction Pipe, on Wires, 3s. 3d. per foot. The Barrel is 27½ inches long, and the legs are 5 feet high. Larger sizes of the above if required.



BRASS SYRINGES, from 9s. to 18s.
CONSERVATORY PUMP, No. 22, with Warner's Registered Spreader, 27s. 6d.

Galvanized Iron Tub GARDEN ENGINE, with Warner's Registered Spreader, is strongly recommended for durability and low price, viz., £2 19s., to hold Ten Gallons. Larger sizes, in either wood or iron.

WARNER'S SWING WATER-BARROW.
(To hold Thirty Gallons), £3 3s.,

is intended for all large Establishments where much watering is done by the watering-pot. By its use much time and labour of the Gardener are saved, particularly where the Tank, Pond, or Pump is at a distance from the garden.

MUSICAL SHEEP BELLS, with Straps, in sets of 6, 19s.; ditto, in sets of 8, 25s.; ditto, in sets of 12, 38s.

WARNER'S CATTLE AND SHEEP BELLS, in sets of 6, with Straps, 13s. per set.

Bells for Churches, Chapels, Colleges, Schools, Turret Clocks, &c., cast for any size, note, or weight, singly or in peals. Tuned by machinery. Stocked and wheeled ready for fixing. Old Bells re-cast or taken in exchange.

The great 16-ton Bell, for the Houses of Parliament, was made by JOHN WARNER and SONS, 1856, under their Patent.

May be obtained of any Ironmonger or Plumber, in town and Country; or of the Patentees and Manufacturers, as above. (30

STEAM CULTIVATION.

CHANDLER AND OLIVER

HAVE much pleasure in being able to state that they are now prepared to execute orders for their PATENT STEAM WINDING ENGINES AND PLOUGHS, for Cultivating Land by Steam.

The WINDING TACKLE can be fitted to Engines of any maker, and the Plough can be made to take any kind of apparatus necessary for Cultivating the Soil, such as Scarrifier Tines or Broad Shares, &c. Any Engine now used by Farmers can be fitted with the Tackle. It is light and simple, and an ordinary Farm Labourer can work it.

The Engine can be used for Thrashing without taking the Ploughing Tackle off, not requiring more than three or four horses to take it from place to place.

These Engines are very useful for Pile Driving or Drawing Ballast up inclined planes; at the same time they can be used for Pumping. Farmers will find them most useful for all purposes.

Messrs. CHANDLER and OLIVER are prepared to receive orders for separate Windlasses, which are light and simple, and generally useful.

For further Information apply to

ROBERT CHANDLER, ENGINEER, BOW, NEAR LONDON,

Or Mr. OLIVER, Farmer, Hatfield, Herts.

ILLUSTRATED CATALOGUES WITH PRICES, WILL BE READY SHORTLY. (215)

A NEW DISCOVERY IN WASHING HOUSEHOLD LINEN.

NO FAMILY SHOULD BE WITHOUT HANCOCK'S UNIVERSAL WASHING MACHINE. It effectually cleanses the Crevices of Baby-linen, Collars, Wristbands, &c., without the possibility of injuring the Linen or Collars. Received 500 Testimonials.

PRICES.

No. 2 Washes 9 Shirts in from 3 to 10 minutes; or 4 Sheets in 5 minutes	£5 5
No. 3 Washes 12 Shirts in from 3 to 10 minutes; or 6 Sheets in 5 minutes	7 11
o. 4 Washes 18 Shirts in from 3 to 10 minutes or 12 Sheets in 5 minutes	12 12

And all other Articles in proportion.

J. L. HANCOCK, Sole Manufacturer and Patentee, 62 Pentonville-road, London. (37)

CHADBURN BROTHERS' PATENT METALLIC STEAM GAUGES.

THESE GAUGES have been in use more than three years, and have given general satisfaction. Those first fixed are now in as good working condition as ever. Testimonials, &c., may be seen at CHADBURN BROS.' Works, Sheffield.

The Gauges may be had of Messrs. Elliott Bros., Strand; Mr. Fenn, Newgate-street; Messrs. Dring and Fage, Tooley-street; Messrs. Nigretti and Zambra, Holborn. (285)

Important to every man who keeps

THORLEY'S FOOD FOR CATTLE,

MEDALS AWARDED TO
THOMAS GLOVER'S PATENT DRY GAS-METERS.
VIZ.:

GREAT EXHIBITION, LONDON, 1851. | NEW YORK EXHIBITION, 1855.
AND PARIS UNIVERSAL EXHIBITION, 1855.

LONDON, March 25, 1859.

THOMAS GLOVER takes this opportunity of thanking Gas Companies and his other Customers for the very liberal support and patronage he has received during the past year, which has far exceeded his most sanguine anticipations, having sold a greater number of his PATENT DRY GAS-METERS since the dissolution of his partnership with Mr. Croll than he was ever previously enabled to do in any one year.

THOMAS GLOVER confines his sole attention to the business of Gas-Meter Making. The propriety of his doing so is satisfactorily proved by his success; and, without the practice of any quackery, or any attempt to delude the public by an absurd exhibition of "Old and New Valves," his Meters are in general use by the Metropolitan Gas and other Companies in this Country and abroad. For example, one Metropolitan Company have now in use above **12,500** of his Patent Dry Gas-Meters; some of these Meters have been fixed for Fourteen Years, and are still in working order, without complaint from either the Company or the Consumer.

THOMAS GLOVER thinks it necessary to put Gas Companies on their guard against parties selling Patent Dry Gas-Meters constructed in imitation of his, but unskilfully made on erroneous principles, and with improper and unsuitable materials.

THOMAS GLOVER'S Workshops are now the most extensive in this or any other country, and he is thereby enabled promptly to execute orders to any extent required. Purchasers may at any time inspect his Works and the Materials of which his Meters are constructed. He is ready to enter into Contracts with Gas Companies and others to uphold their Stock of his Meters for Twenty Years at an annual charge varying from 2½ to 5 per cent., and to leave always in the hands of Gas Companies Three Years' charge for upholding, as a guarantee for the fulfilment of the Contract.

THOMAS GLOVER,
PATENT DRY GAS-METER MANUFACTURER,
SUFFOLK STREET, CLERKENWELL GREEN, AND
ALLEN STREET, GOSWELL STREET, E.C. (293)

D. HULETT & CO.,
55 and 56 HIGH HOLBORN, LONDON,
Patentees and Manufacturers of the only good Mercurial Gas Regulator,
INVITE the attention of Gas Companies and the Trade generally to their Improved GAS-METERS, which they warrant equal to any in Quality, Workmanship, and Simplicity of Construction, and the only Meters from which Gas cannot be obtained without being duly registered.

Manufacturers of
GAS CHANDELIERS, GLASS LUSTRES, HALL LANTERNS, VESTIBULES, BRACKETS, PENDANTS;

IMPROVED FULL-WAY CARTER'S VALVES (much approved of);
GAS-STOVES, and every article connected with Gas-Apparatus.
CAST AND WROUGHT-IRON PIPE, BLACK AND GALVANISED. COPPER, TIN, BRASS, AND COMPOSITION TUBING.

D. HULETT'S IMPROVED SERVICE CLEANSER,
for clearing out Mains, Services, and Interior Fittings—60s. net.
BOYLE'S PATENT SILVERED GLASS COMBINATION REFLECTORS AND OUTSIDE LANTERNS.
Sole Manufacturers of CHURCH & MANN'S PHOTOMETER.
Large Pattern Books, with every description of Gas-Fittings, Chandeliers, &c., with complete Book of Prices, 12s. (294)

THE IMPERIAL IRON TUBE COMPANY,
(SUCCESSORS TO GEORGE R. LLOYD & CO.)
GAS STREET AND BERKLEY STREET,
BIRMINGHAM,
Manufacturers of Wrought Iron Tubes & Fittings,
FOR GAS, STEAM, AND WATER.
PATENT GLASS ENAMELLED AND GALVANIZED TUBES,
AND
LAP-WELDED IRON BOILER TUBES.
(193)

TO STEAM SHIP OWNERS, ENGINEERS, AND OTHERS.
How's Patent Steam Engine Counters, can be read at sight.
These Counters register the number of revolutions made by an engine or other mechanism. They may be used for ascertaining the duty of Pumping Engines and Water-wheels; the revolutions on board a steam-vessel; to calculate the slip of the propeller; and in a locomotive to test the slip of the wheels.

How's Patent Salinometer, for Steam Boilers using Salt Water.
By these, the density of the water in the Boiler is at all times accurately shown, and a saving of boiler and fuel is effected. They are adopted by the Admiralty, the Honorable Trinity Corporation, and others. Copies of Testimonials from Messrs. Penn, Maudslay, and others, will be forwarded on application.

How's Engine-Room Telegraph, for communicating between Captain and Engineer. Society of Arts Prize Medal, 1855.
is a Mechanical Telegraph, and by its peculiar construction, error or misunderstanding is rendered impossible. It now extensively adopted, and gives great satisfaction.

How's Patent Fresh Water Apparatus for Ships' Use.
This apparatus is designed for the distillation of Fresh from Salt Water; and on long voyages, and where the supply of water is scanty, it will be found invaluable. Testimonials may be seen.

Patent Steam Pump and Fire-Engine for Ships' Use.
This Steam-pump occupies but a small space; works perfectly noiselessly, and throws an immense volume of water. An Illustrated Circular of Fresh Water Apparatus and Steam-pump combined, free on application.

How's Patent Machine for Cutting Bolts, Rods, Spindles, Wire, &c.
Simple in construction, inexpensive, occupies but little space, and will not easily get out of order.

A Pamphlet Illustrative of the above, sent free by post, on application to

A. P. HOW, ENGINEER,
81 MARK LANE, LONDON.
EVERY DESCRIPTION OF ENGINEERS' TOOLS, ENGINE ROOM STORES, &c. &c., SUPPLIED. (89)

VINEGAR.—Patronised by Her Majesty's Government.
CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.
Families, by using this delicious VINEGAR, insure purity and effect a saving of 50 per cent. See "Report of Dr. Letheby, City Officer of Health, Dr. Hassall, of the 'Lancet' Commission, and others." Sold by the Trade, in Bottles, labelled and capsuled. Wholesale—63 King William-street, London-bridge, E.C. Six Quart Samples sent free to any Railway for 3s. 6d. (216)

ARTESIAN WELLS, BORING TOOLS, PUMPS, &c. Engineers, Architects, Surveyors, Builders or others requiring a good supply of Water may have any quantity procured by W. SPELLER, 14 York-street Blackfriars'-road, London, where may be had any quantity of Tools for Sinking or Boring, from 2 to 20 inches diameter, and from 100 to 2,000 feet depth; also Men and Tools to bore for Railroads, Minerals, &c., in any part of the world. Boring Tools and suitable Pipes for exportation, with full instructions for their use.

Builders, Contractors, Brickmakers, Barge and Ship Builders, and others, can be supplied with Wrought or Cast Iron Pumps, Double or Single, for excavation of Deep Wells, from 3 to 14 inches in the bore, and from 6 to 150 feet in length, to work by hand or Steam Power.

Hot-Water Apparatus for Conservatories, &c., on the most economical and improved principles.

Also Manufactory for Captain John Grant's much improved Cooking Apparatus. (44)

GLADSTONE & Co., CONTRACTORS and ENGINEERS.
2 John-Street, Minories, London, E.C.,
Are prepared to ESTIMATE FOR and CONSTRUCT BRIDGES, PIERS, JETTIES, &c., in Iron, Wood, or Stone. Also to supply Cranes, Girders, Turntables, and Railway Work and Plant generally. (199)

BIRMINGHAM WAGGON COMPANY (LIMITED) has RAILWAY WAGGONS for HIRE. Apply to the Secretary, 3 Newhall-street, Birmingham. (276)

CONDY'S PATENT FLUID, or NATURAL DISINFECTANT,

Not only Deoderizes but Disinfects perfectly, and DESTROYS FOR EVER the cause of infection.

Is not poisonous, as it may be used to purify water. Evolves no noxious or unpleasant gas. Cannot be mistaken for any other fluid, thereby preventing death and disease; and is therefore the best, safest, cheapest, and most pleasant disinfectant ever introduced.

This fluid has been examined and reported upon by the Board of Health, all the most eminent Men and Chemists of the day, in all cases in the most satisfactory manne possible.

The Public are recommended to use this Fluid, properl diluted with water, frequently and habitually in larders, sculleries, dairies, musty cakes, sick rooms, close places, &c., as it has numerous advantages, and can be used with certain immediate success and perfect safety.

Sold in Quart Bottles, 4s.; Pints, 2s.; Half-pints, 1s.; and in bulk, 10s. per Gallon.

Free to Railway on receipt of Order or Stamps. (238)

Published by RICHARD ARCHIBALD BROOMAN, at the MECHANICS' MAGAZINE Office, 166 Fleet-street, in the Parish of St. Dunstan's-in-the-West, in the County of Middlesex; and printed by JAMES JUDD, of 14 Holford-square, Pentonville, in the County of Middlesex, and HENRY ALEXANDER GLASS, at their Office, 38A New Bridge-street, in the Parish of St. Anne's Blackfriar in the City of London.—Friday, June 24 1859.
